STOCK MARKET WAS HEAVY

Fear of Dearer Money Caused Recessions on Wall Street,

Net Declines Were Not Marked—Canadian Security Market Quiet and Lower in Some Issues—Money Rates and Foreign Exchange—Notes.

World Office,
Monday Evening, Oct. 8.

Canadian securities were quiet to-day, showing recessions in spots, as partial reactions from last week's big advance.

Twin City earnings for the fourth week of September increased $13,019.

On Wall Street.

Trading on the Stock Exchange to-day was marked by a revival of a considerable bear party whose activities were aggressive and persistent. Their efforts to depress prices were contested by the speculative holders of long stock, who were successful last week in lifting prices, in spite of the various unfavorable factors which developed in the situation. The conflicting forces at work were reflected in a feverish and irregular movement of prices. The marked depletion of banking reserves revealed by the Saturday bank statement had the effect of unsettling speculative opinion. The market for foreign exchange fell feverishly by successive stages almost the day, and demand sterling closed a full cent in the pound below Friday's level, which was the last day of active business in the exchange market. The small movement of gold from London to Berlin to-day was in response to the transfers of sterling from New York to Berlin, which have progressed in connection with payment of subscriptions to the German loan.

There was an appreciable narrowing of the money supply offering in New York. The prevailing rate held at 3 per cent. for call loans, and ran up to 3½ per cent. during the afternoon, but the higher rate brought out an abundant supply to fill the small remaining requirement, and the rate ran off to 2½ per cent. The interior movement of currency continued unabated, and the deposits at the sub-treasury alone to-day for transfer to the interior footed up three-quarters of a million dollars. With the exception of a period of strength in the iron and steel stocks, led by Tennessee Coal and Colorado Fuel, the sectionary tendency was predominant, and the leading stocks were off from 1 to 3 points. With the late break in call money and the fall in exchange to above the gold point, price rallied somewhat, but the market closed feverish and irregular.

J. J. Dixon has the following this evening from Ladenburg, Thalmann & Co., New York:

The stock market was mainly professional to-day and heavy in tone, tho the selling was not very determined in character until after 1 o'clock, when pressure was put upon it, and the general weakness resulted. Bear arguments were based chiefly on Saturday's bank statement, which showed reserves sufficiently low to cause apprehension of higher rates for money and a loss in specie, that aroused the suspicion that hoarding of gold had begun as a measure of precaution in case of an unfavorable result of the Presidential election. People's idea was sold because of the suits against the company in Chicago and rumors of new competition helped to weaken Sugar. Pennsylvania was conspicuously strong in the afternoon, but later yielded, with the rest of the list. Demand sterling, $4.84 to $4.84½.

Colorado Fuel & Iron net earnings for August were $235,199, as against $98,009 the corresponding month of last year.

The directors of the Carnegie Company learn that the principal railroads, at a secret meeting in New York, had decided to pay no more than $22 a ton for their rails for next year. They at once determined to maintain the $26 rate named by the rail pool at a recent New York meeting. The Carnegie directors assert that they will not sell rails for $22 a ton; that if the railroads will not pay more they will have to make them themselves.

Sub-Treasury shows banks lost since Friday $1,110,000.

Railway Items.

C.C.C. earnings for the fourth week of September increased $65,225.

Great Northern to-day declared regular quarterly dividend of 1¾ per cent. on preferred stock.

Mexican National August gross increased $70,073; net decrease, $8775.

Money Markets.

The local money market is steady. Money on call, 3 per cent.

The Bank of England discount rate is 3 per cent. Open market discount rate, 3⅝ per cent.

Money on call in New York at 2½ per cent.

A Magic Pill—Dyspepsia is a foe with which men are constantly grappling, but cannot exterminate. Subdued, and to all appearances vanquished in one, it makes its appearance in another direction. In many the digestive apparatus is as delicate as the mechanism of a watch or scientific instrument, in which even a breath of air will make a variation. With such persons disorders of the stomach ensue much suffering. To these Parmelee's Vegetable Pills are recommended as mild and sure. ed
