CANADA'S BILATERAL RELATIONS:

SOME KEY STATISTICS

VOLUME I

RETURN TO DEPARTMENTAL LIBRARY
RETOURNER A LA BIBLIOTHEQUE DU MINISTERE

These two volumes of statistics covering Canada's Bilateral Relations are produced from a data base maintained by the library of the Department of External Affairs, and are intended as a handy reference guide. In past years a single volume was published with the data organized in tables based on subjects. This year Tables XII and XVI have been expanded to include information on our most important imports and domestic exports with each of our trading partners. In addition, there is now a second volume where the data is organized by country. It is hoped that the two volumes will help to highlight some of Canada's quantifiable relationships with other countries. Researchers should be aware that the on-line data base is up-dated continuously as new statistics appear and that country data descriptions can be provided by the library's On-line Data Programme on request.

The country classification employed in this document is designed for purposes of geographical identification only and therefore does not reflect the view or intentions of the Government of Canada on international issues of recognition, sovereignty or jurisdiction.

Unless otherwise indicated, the Canadian import and export figures in the following tables are shown on a "customs" basis. The figures on a "customs" basis are the totals of detailed merchandise trade data tabulated from customs documents according to procedures and concepts explained in Statistics Canada's Summary of External Trade. The figures on a "balance of payments" basis reflect a number of adjustments applied to the customs totals to make them consistent with the concepts and definitions used in the system of national accounts. The adjustments include timing adjustments to exports of crude petroleum, natural gas and wheat and to receipts and payments for capital equipment; deducation of transportation charges included in the customs returns and the reduction of import values calculated for customs duty purposes to values which reflect transaction prices.

Reconciliation of United States-Canada Merchandise Trade Statistics, 1981.
After completion of the reconciliation of merchandise trade data for Canada and the United States, Canada had an estimated US$ 2.8 billion surplus in trade between the two countries in 1981, double the US$ 1.4 billion surplus posted in 1980.
Published Canadian trade statistics showed only a US$ 1.2 billion surplus, US$ 1.6 billion less than the reconciled figure, while United States statistics showed a US $6.9 billion Canadian surplus, US$ 4.1 billion higher than the reconciled number.
The largest reconciliation adjustment in 1981 was an addition of US$ 5.0 billion (12.7%) to United States exports, representing the non-receipt of export documents. The corresponding adjustment to Canadian exports was an addition of US$ 1.6 billion (3.5%), up from US$ 1.2 billion (2.8%) in 1980. Nearly 40% of Canadian non-receipts were for re-exports of goods to the United States.
Other significant adjustments included a reduction of Canadian imports by US$ 789 million for goods priced above transaction value. United States imports were reduced by US$ 867 million to remove transportation charges and increased by US$ 911 million for trade definition, most of which was for southbound electricity which the United States does not define as trade. Canadian exports were decreased by US$ 428 million for trade definition, substantially more than in the previous year

because of an increase in exports of contractors' equipment and tools which are leased. The trade definition adjustment for United States exports dropped to US$ 150 million in 1981 from US$ 459 million in 1980 because of a marked decrease of imports by Canada of offshore swapped oil (i.e. crude petroleum received directly from third countries in exchange for crude petroleum received by the United States from Canada). Data users should note that beginning in 1981, the values used in the reconciliation procedure include trade with the Virgin Islands. Puerto Rico has been included since January 1976.

From Statistics Canada Daily, Thursday, Sept. 2, 1982.

Direct investment covers investment in branches, subsidiaries and controlled companies. Direct investment is defined as long-term capital provided by or accruing to residents of the foreign country of control for use in Canada by direct investment enterprises. It covers long-term debt (bonds, debentures, loans, advances, etc.) and equity (common and preferred shares, and retained earnings).

AVANT-PROPOS

Ces statistiques en deux volumes sont recueillies depuis la banque de données que maintient la bibliothèque du Ministère des affaires extérieures; elles sont destinées à servir de guide pratique de référence. Depuis quelques années ce guide était publié en un seul volume et les tableaux étaient groupés par sujets. Cette année les tableaux XII et XVI sont plus détaillés et comprennent des renseignements sur le volume des importations et des exportations nationales avec chacun de nos partenaires commerciaux. De plus, maintenant, nous vous proposons un second volume dont le contenu est groupé par pays. Ces deux ouvrages serviront à déterminer quantitativement l'importance de quelques-unes des relations commerciales du Canada avec d'autres pays. Les chercheurs doivent se rappeler que les données informatiques sont mises à jour dès que sont publiées de nouvelles statistiques de sorte que par son Programme d'information automatisé, la bibliothèque peut, sur demande, fournir des données descriptives par pays.

La bibliothèque,
Ministère des affaires extérieures.

Le système de classification des pays utilisé dans ce document n'a d'autre but que de permettre l'identification géographique. Il ne réflète en aucun cas les positions et intentions du gouvernement du Canada relatives à des questions internationales telles la reconnaissance, la souveraineté ou la jurisdiction.

A moins d'indication contraire les totaux des exportations et des importations sont présentés dans les tableux suivants sur une base «douanière». Les chiffres établis sur la base «douanière» sont les totaux des données détaillées du commerce de marchandises calculé à partir des documents douaniers, selon les méthodes et concepts exposés dans Sommaire du commerce exterieur publie par Statistique Canada. Les chiffres sur la base de la «balance des paiements» tiennent compte d'un certain nombre d'adjustements apportés aux totaux douaniers afin de les rendre compatibles avec les concepts et définitions utilisés dans les systèmes des comptes nationaux. Ces ajustements renferment des ajustements de période apportés aux exportations de pétrole brut, de gaz naturel et de blé ainsi qu'aux recettes et paiements reliés à l'equipement investi, à la déduction des frais de transport compris dans les déclarations douanières et à la réduction des valeurs des importations calculées aux fins de l'établissement des droits de douane afin d'obtenir des valuers qui rendent compte du prix des transactions.

Les statistiques sur les importations américaines sont données f.a.s. (franco long du bord) depuis 1976; avant cette date, on en donnait la valeur douanière.
Note: Les chiffres sont arrondis indépendamment.

Rapprochement Canada/Etats-Unis des statistiques du commerce des marchandises, 1981.
Le rapprochement des statistiques du commerce entre le Canada et les Etats-Unis se traduit par un excédent canadien estimatif de $2.8 milliards E.-U., soit deux fois supérieur á celui de $1.4 milliard E.-U. enregistré en 1980.
Les statistiques publiées par le Canada ne font ressortir qu'un excédent de $1.2 milliard E.-U., soit $1.6 milliard de moins que le chiffre obtenu par rapprochement, tandis que le Etats-Unis donnent un excédent de $6.9 milliards E.-U., supérieur de $4.1 milliards E.-U. au chiffre rapproché.
La correction la plus importante a été une majoration de $5.0 milliards E.-U. (12.7%) des exportations américaines attribuable à la non-réception de documents. La correction correspondante des exportations canadiennes est une majoration de $1.6 milliard E.-U. (3.5%), contre $1.2 milliard E.-U. (2.8%) en 1980. Près de 40% des cas de non-réception canadiens touchent les réexportations de biens aux Etats-Unis.
Les autres corrections appréciables comprennent une réduction de $789 millions E.-U. des importations canadiennes au titre des biens dont le prix était supérieur à la valeur de transaction.

Les importations des Etats-Unis ont été réduites de $867 millions E.-U. au titre du fret estimatif payé, et augmentées de $911 millions E.-U. au titre de la définition des échanges, dont la plus grande partie touche l'électricité exportée, que les Etats-Unis ne définissent pas comme transaction. Les exportations canadiennes ont été réduites de $428 millions E.-U. au titre de la définition des échanges, soit sensiblement plus que l'année précédente en raison de l'exportation de matériel et d'outils de crédit-bail pour entrepreneurs. La définition de la correction des échanges commerciaux pour les exportations des Etats-Unis a été réduite de $459 millions E.-U. en 1980 à $150 millions E.-U. en 1981, en raison de la diminution marquée des importations au Canada de pétrole échangé offshore, c'est-à-dire le pétrole brut reçu directement de tiers pays en échange de pétrole brut reçu par les Etats-Unis du Canada. A compter de 1981, les valeurs servant au calcul du rapprochement comprennent le commerce avec les Iles Vierges. Porto Rico est inclus depuis janvier 1976.

Les investissements directs comprennent les investissements dans les succursales, les filiales et les compagnies contrôlées. Les investissements directs sont définis comme les capitaux à long terme qui sont fournis par des résidents du pays étranger de contrôle ou qui leur sont dus, et qui sont destinés à être utilisés au Canada par les entreprises bénéficiaires des investissements directs; ils comprennent les dettes à long terme (sous forme d'obligations, de débentures, de prêts, d'avances, etc) et les capitaux propres (actions ordinaires et privilégiées et bénéfices réinvestis).
