PREPARED GUANO.

THE Subscriber is now receiving a supply for Fall Seed sowing.

TO THE LADIES.

The *Prepared Guano* is put into boxes, expressly for Gardens. Its fertility on Greenhouse Plants, and all Flowers, Vines, &c., is very great! Price 2s. 6d. per box.

This manure is so combined, that the Ammonia and other fertilizing gases are absorbed, fixed, and are given out to vegetation only as it requires them. No rot, mildew, worm, fly, nor other insects can approach it—an important consideration to farmers generally, but particularly in cotton and potato planting. It will be found admirably adapted for the growth of Cane, Cotton, and Tobacco, in the West India Islands, and renovating, restoring, and fertilizing *said lands as have been worn out and abandoned.*

DIRECTIONS:

One advantage PREPARED GUANO possesses over ordinary Manure, is, that in sowing all kinds of grain, &c., it should be used broadcast after the ground is ploughed, and then harrowed in with the seed. It may be used at any time, as a top-dressing. *One size can that manure and seed from six acres a day, which is an actual saving in labor, of the whole cost of the manure.* Grass seed intended for permanent pasture, should not be used *before the 15th or 20th of October*, which affords the farmer the advantage of pasturing his fields *two or six weeks longer* than usual. It gives him time to gather in his crops, which are often neglected for the sake of preparing the ground he intends to seed down for grass, grasses, &c., so as to get them in by the 10th of September.

It is recommended to start Corn first, and when it is up from four to six inches, the PREPARED GUANO *should be spread over the surface*, and covered by ploughing or harrowing, a large tablespoonful at could be used, mixed up with the earth, in each hill or drill.

For Greenhouse Plants, Flowers, Vines, Wall Fruit, and the like, it is only requisite to *spread* a handful or two *upon the surface round the vine or tree, and hoe it in a little.* Being a great absorber of the sun's rays, and of the fertilizing gases of the atmosphere, it will be found very beneficial to sift it over the whole of the soil, as a top-dressing in winter.

From the Democratic Advocate, Williamsburgh, L. I., May 1, 1851.

KENNEDY'S PREPARED GUANO.—This article of manure has probably been of more essential benefit to the community than any other single discovery which has been made for many years. It is prepared with reference to the principles of Agricultural Chemistry; and in its effects, shows the great advantage which a scientific knowledge must possess over his unlettered and empirical neighbors. The fertilizing qualities of this species of manure, the labor which is saved in making use of it, and its adaptation to every species of soil and vegetation, have recommended it so highly to the farming community, that it is now, to many sections of the country, the only manure in use. To our agricultural friends we recommend it as the best and cheapest manure which they can use.

LEACH FARM, JAMAICA, L. I., May 23, 1849.

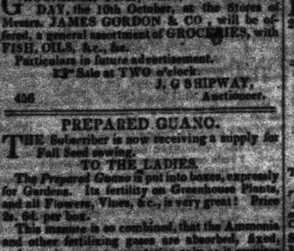
SIR,—I used your "Prepared Guano," last year, on corn, on potatoes, oats, wheat, and turnips. I have used every description of manure, as well as the imported Guano, but I give yours a preference, for its general, durability, and power. It doubled my crops. I recommend it, therefore, strongly to all farmers and gardeners.

WILLIAM MILLS, Farmer.

To Mr. C. A. Kennedy.

JOHN G. DINNING,
13, St. Sacrament Street.

Montreal, September 19, 1851. 444



DURKEE'S HIGHLY CELEBRATED BAKING POWDER.

For easily making Bread, Biscuit, Fried Cakes and Johnny Cakes, Pastry, &c., this article is better than any other Baking Powder, or than saleratus and cream of tartar, as the proportions cannot be made wrong, and it is free from the adulterations of the common article, as all ingredients will be dealt with according to the law of the land.

Agencies of same, the bottles will be accompanied by a Deed signed by R. P. Paine, the owner of the right, giving the purchaser the right to use or transfer the same. Without such a Deed, no person will be safe in purchasing or using said Baking Powder.

R. P. PAINE.

JOHN LEEMING.

Analysis of the Water of the Georgian Spring.

I have made a careful quantitative analysis of a quantity of this Water sent me by the Proprietor of the Spring, Captain Kane. It is a dilute Water, containing Chlorids with portions of Bromide and Iodide, thus resembling the Plantagenet Water, from which it differs chiefly in the presence of a portion of Sulphates, which are not often met with in Waters of this class in the Province. It has a specific gravity of 1006.78, and contains in one pound avoirdupois, the subjoined quantities of the following substances:—

	Grains.
Chloride of Sodium	1.62.20000
Chloride of Potassium	.12000
Chloride of Calcium	.31000
Chloride of Magnesium	2.40000
Bromid of Magnesium	.05016
Iodid of Magnesium	.01904
Sulphate of Lime	1.20014
Carbonate of Lime	1.40000
Carbonate of Magnesia	3.34016
Carbonate of Iron	Trace
Silica	.14000
	76.12016

T. S. HUNT,
Chemist to the Geological Commission.

Office of the Geological Survey,
Montreal, May 28, 1851.

Having compared T. S. Hunt's Analysis of the waters by him of the Plantagenet Spring Water, I can certify that the Water of the Georgian Spring with the exception that it contains a little more Sulphate of Lime, is in every respect the same Water, containing the same ingredients in the same proportions.

I have much pleasure in adding my testimony to the excellent character of this Water, which I have found very beneficial to my health, and which, I am glad to see, is now brought within reach of the Public.

Montreal, 1st July, 1851.

Analysis of the Water of the Georgian Spring, Caledonia, Canada.

Specific Gravity, 1.0067.

	Grains.
Chlorine	1.00
Iodine	Trace
Bromine	Trace
Sulphuric Acid	1.00
Lime	1.00
