St. John Chronicle

AND COLONIAL CONSERVATIVE.

Volume XVII. Saint John, New-Brunswick, Friday, September 24, 1852. Number 3.

THE SAINT JOHN CHRONICLE,

is published every Friday afternoon, by WILLIAM DURANT, at his Office in the Brick Building of L. H. Deveber & Son, west side Prince Wm. street.

☞ Visiting and Business Cards, (plain and ornamental,) Handbills, Blanks, and Printing generally, neatly executed.

TERMS OF THE CHRONICLE :—

12s. 6d. in Advance ;—$3 if not paid until the termination of the year ;

But as the Proprietor intends to discontinue, as far as practicable, the *Credit system*, and stop the practice of making *good subscribers* contribute for those who *never pay*, he offers the following

Inducements for Clubbing.

by which means parties will be able to procure a valuable Family and Business Newspaper at a CHEAPER RATE than any heretofore offered in this Province. He proposes to send

For $10 IN ADVANCE, 5 copies of the Chronicle, *to one address*, to any part of this or the Sister Provinces, for One Year ;

For $20 in advance, 11 copies for One Year ;

For $40 in advance, 24 copies for One Year ;

Mind! IN ADVANCE, and to one address.

☞ No paper discontinued until all arrearages are paid up, except at the discretion of the publisher.

All letters, orders, communications, &c., must be post paid, and addressed to

WILLIAM DURANT,

ST. JOHN, N. B.
August 29, 1851.

HAMMOND RIVER HOUSE.
THE Subscriber grateful for past patronage from the Travelling community, begs to inform his friends and the public at large, that he has lately removed his establishment to the above House, 18 miles from this City, 1 mile North of Hammond River Bridge, where he is prepared to entertain Travellers at all times and seasons.
DINNERS, &c. &c., go up at shortest notice.
Constantly on hand, a choice supply of WINES, &c, &c.
Comfortable and commodious Stabling attached to the Premises, careful hostlers always in attendance. WASHINGTON ALDEN.
February 2, 1849.

JOHN BARRY,
Silver Smith, Jeweller & Engraver
North side of King Street, St. John, N. B., a few doors below the *Waverley House.*
MANUFACTURER of all kinds Silver Plate, viz: Tea, Table, and Dessert Spoons; Forks, Ladles, Fish and Butter Knives, &c. &c.; also, Silver Cups of different patterns, which he will furnish *Cheaper* than any other House in the City. The above work is warranted to be made of Sterling Silver, and for neatness of style and superiority of finish challenges competition.
JEWELLERY made to order and repaired.
—All Kinds of ENGRAVING neatly executed.
Traders, Pedlers and others furnished with plain Gold Finger RINGS *cheaper* than can be imported. In all cases punctuality may be relied on. Cash pay the highest price given for Old Silver.
June 4.

BIBERRIAN HOTEL.—At the old Stand Again!
THE Subscriber would respectfully intimate to his friends and the public at large that he again occupies his old stand, and he is prepared to furnish them with all the Novelties of the Season, and the substantial realities of life with which they have been formerly accommodated in this Establishment.
DINNERS, SOUPS, LUNCHES, SUPPERS, &c., at the shortest notice, and on the most reasonable terms. JAMES NETHERY.
St John, N. B., May 7th, 1852.

HENRY P. SANCTON,
Soap and Candle Manufacturer,
ORANGE STREET, SAINT JOHN, N. B.,
HAS constantly on hand, SOAP and CANDLES which he can recommend to his friends and the public in general—such as cannot fail to give satisfaction to the consumer and dealer—and trusts, by attending to his business, to ensure an amount of patronage which it will be his effort to deserve and extend.
☞ Those who are in want are invited to call and see for themselves—We confidently assert that there are no better manufactured in the City.—The smallest favor thankfully received.
☞ MIND! Orange-Street—near the Centenary Chapel. July 2.—3f

WM. WISSLOCKERY,
HAS Removed his place of business to Dock street opposite the Store of Mr. B. Fanjoy, where he will be ready at all times to execute orders in his line.
☞ Journeymen and an Apprentice wanted.

National Loan Fund
LIFE ASSURANCE SOCIETY
OF LONDON.
EMPOWERED BY ACT OF PARLIAMENT.
Capital, £500,000 sterling,
Exclusive of a Reserved Fund (Surplus Premiums) of £51,000 sterling.
BOARD OF LOCAL DIRECTORS AT ST. JOHN, N. B.
(Office Nelson street.)
ROBERT F. HAZEN, *Chairman.*
Edward Allison, Esq. William Wright, Esq.
John H. Gray, Esq.
Medical Examiner.—Wm. Bayard, Esq., M. D.

Advantages offered by this Society.

PERFECT SECURITY, arising from a large Capital totally independent of the Premium Fund.

LOANS.—Two-thirds of the Annual Premiums paid, or half the Premiums for the first five years, which half may remain on interest, to be deducted rom the amount of the Policy at the death of the insured.

LOW RATES OF PREMIUM.—The rates of Premium are as low as any society of equal standing.

DIVISIONS OF PROFITS.—The Bonus' in the Society are declared annually, and each year the Assured has the option of receiving the profits in Cash in reduction of Premium, or in addition to the sum insured.—The Bonus' are permanent.

Premiums may be paid Annually, Half-Yearly, or Quarterly.

Insurance may be effected for one year, for five years, or for life, with or without participation in the profits of the society.

A liberal allowance for the surrender of policies.

Every information to the Society's Rates of Premium, mode of Insurance, and blank forms of application, may be had at the Office of the subscribers, or of the sub-Agents, who have Pamphlets for gratuitous distribution, and all documents required for effecting Insurance.

CALIFORNIA.—Parties proceeding to California can effect insurance on liberal terms.

WILLIAM J. STARR,
February, 1850. *Manager, St. John, N. B*

LIVERPOOL AND LONDON
Fire and Life Insurance Company,
[*Established in* 1836.]
Capital £2,000,000—in shares of Twenty Pounds.
THE Stockholders of this Company are responsible to the full extent of their property for the liabilities of the Company.
The undersigned hereby notifies the Public of New-Brunswick that the above-named Company have empowered him, by a full and ample Power of Attorney, to open an Office in the City of Saint John, for the Insurance of PROPERTY against loss or damage by FIRE, in any part of the Province, and to sign and issue Policies in the name of the Company; and that in virtue of the power vested in him by the said Power of Attorney, he has appointed Mr. ADAM JACK to act as Agent for the said Company, in the receiving of proposals for Insurance, and the inspection of premises proposed for Insurance, and all other the usual duties of an Agent; and to collect and receive the amount of premium on any policy issued by the undersigned in the name of the said Company, or for the renewal of the same.
The Deed of settlement, and the supplemental Deed of settlement, lies with Mr. Jack, at the Office of the *New Brunswick Marine Assurance Company*, also the pamphlets issued by the office at Liverpool, affording ample details of the mode of transacting business by the Company.
The rates of premium will be as low as any other respectable Company, and the undersigned trusts a fair portion of public patronage will be accorded to the Company.
Losses not exceeding £500 will be settled without referring to the head Office at Liverpool.
EDWARD ALLISON.
Dated at St. John, N. B., 4th August, 1851.

AUSTIN'S
LIVERY STABLE.
Charlotte Street, next the Saint John Hotel
HENRY AUSTIN gives thanks to his Friends and the Public for the very cordial support afforded him while conducting a
LIVERY STABLE
and he begs through this method to inform them, that he has recently imported several first class CARRIOLES, BUGGIES, CHAISES and CARRIAGES of the most fashionable descriptions, by which he is enabled to accommodate families or private individuals to their extreme satisfaction, and in such a style of elegance, that while he challenges competition, families will be spared the unnecessary expence of keeping up a PRIVATE ESTABLISHMENT.
Saddle Horses, Waggons and Horses, single, double, tandem or in any other style, turned out at a moment's notice, and in the best and most fashionable manner to suit customers.
The Subscribers COACH having recently undergone a thorough repair, and second to none on the Stand, attendance will be in at the different Steamboats on their arrival at the City; and will attend to all other calls he may be favoured with.
All Orders left at the St. John Hotel, or at the subscribers residence, will be punctually attended to.
May 7, 1852.

ST. JOHN LIVERY STABLES,
South-East Corner King's Square.
THE subscriber would respectfully inform the public that he has opened his new and extensive Stables at the Corner of Sydney-street, fronting on King's Square, and having purchased a number of excellent horses and superior vehicles he flatters himself that he will be enabled to furnish parties with the best and neatest turn-out which the City affords.
JAMES STOCKFORD.
St. John, July 9, 1852.

FASHIONS!—The Subscribers have made arrangements by their Senior when in Paris last season, to receive a regular supply of the New Parisian Fashionable **Hats**, as early as they appear. Our Spring Stock of these Goods, to be opened by the *Devon* upon arrival, from one of the first houses in the trade, will convince our patrons that the newest fashions, with combined elegance, durability and cheapness, are at all times offered to our customers. LOCKHART & CO.

FARM FOR SALE.
THE Subscriber offers for Sale, his Farm, situated in the Parish of Springfield, (King's County.) The said Farm contains Two Hundred Acres, Eighty of which is cleared and under good cultivation, with a comfortable Dwelling House, and good BARN: cuts Twenty Five Tons English HAY, annually. The Farm is situated near a Grist and Saw Mill, and likewise a Carding Machine, and within 4 miles of Belesle Church, and 1 1-2 of the Baptist Meeting House. It is known as the Cass Settlement, and branches off from the Finger Board to Sussex and Mill Stream, and is within thirty-three miles of the City of Saint John.
Terms of Sale will be half down, and the remaining half in yearly instalments.
For further particular apply to the Subscriber on the premises. JOHN O'NEIL.
Springfield, (K. C.) June 18, 1852.

FARM at Musquash for sale:—
A VERY valuable and well situated FARM, at Musquash in the Parish of Lancaster, 15 miles from the City of Saint John, containing 460 acres in the whole—60 acres of which are Dyked Marsh, the remaining best quality Upland, about 100 acres being cleared, and in excellent condition.—The Mail Road to St. Andrews and the United States runs through the property. It is situated in the Village of Musquash—bounded on one side by the River, and in a place well calculated both for farming purposes and a public establishment.
There is on the place, a large and convenient Dwelling House, in good repair; also, a small house, suitable for a tenant; a Blacksmith's Shop, and two large Barns capable of containing 50 tons of hay besides cattle; and plenty of good water near the house.
The Farm and Establishment will be found on examination to be well worthy the attention of any persons inclined to purchase; and the probability is that the Western Railroad Depot will be at this spot.
The terms of payment will be made easy; and further particulars may be obtained on application to DUNCAN ROBERTSON, Esquire, Barrister at Law, St. John, or to the Proprietor on the premises.
May 21, 1852. WILLIAM FOGG.

GEORGE ELATCH,
Barrister at Law.

POETRY.

THE
CAPTAIN'S SOLILOQUY.

Laid on his couch, and as to all 'twould seem,
His vital powers all going by the beam;
His best Bow'r dropt, yet still it fails to stand,
But drags with stern resolve thro' life's quicksand.
In tranquil moments, thus his state he'd scan,
To learn the point to which his bark now ran;
"Well, 'tis lucky the my figure-head escapes!
"Although the timber of my hull now shakes;
"My 'tween decks, I must properly clear away,
"As well as 'tant the shrouds and brace each stay;
"My hull in ballast must be nicely trim'd,
"My head-rails wash'd, by cauls their beg'rm'd.
"The chain-pumps must be kept in constant go,
"The scuppers clear, then all goes well below.
"I find the waters rising in my hold,
"Yet fear will founder me, I must be bold;
"Perpetual watch and heaving of the lead,
"My Sun's still clear, no rock'ning with the dead;
"No longer on this cursed Slip I'll lie,
"They'll caulk and paint me, till I really die.
"Knock off these grapples, down hal'yards, sheets let go,
"It's all dam'd stuff, so here goes, Yo heave O!
"By Jove! my gear is now so cruelly thim'd,
"I feel myself, as if I'd haul my wind;
"'Twere well I think, for some time to delay,
"To get Sove down, and caulk'd by 'Holloway.'
"'Twas said, when Congreve made his famous rockets,
"They'd knock the shiners out of Frenchmen's pockets;
"But Holloway's small-shot, back'd by his Ointment,
"Knocks sovereigns out, by sovereign appointment.
"Most marv'lous are the cures it at'r've been told,
"And now I will the test one unkill'd;
"One of those sensive household sort of fellows
"Sat down to blow the fife, and burst the bellows!
"Dreading the Heading of his fond wife's rage,
"Thought the Professor's skill he would engage
"And straightway to the "Strand" in great alarm
"He carried the wounded bellows on his arm.
"The sage Professor first lock'd down the spout,
"Then gravely said, "I see its wind gets out."
"He gently down the nozzle thrust a Pill,
"Repeating such until it had its fill;
"Rubbing the bellows urgent o'er its sides,
"The suffering bellows, quick to soundness glides.
"Once more, with joyous sound it roars'd the fire,
"And sav'd the breathing of his spouse's ire.
"Where!" cries the Captain, "let me not be slack
"To patronize this meritorious quack!
"He said, we live, and as we live, we learn,
"I'll keep a raking fire, from stem to stern!
With anxious heart, rejoicing on his way,
He op'd a box, of dirty Pills a day!
Rubbing, as if with holly-stone each night
Till every pore seem'd previous to the light!
One morn of length, without relief of pains,
The Captain found an ebbing of his gains:
"Hulloa!" says he, "my pump will run ashore,
"With these infernal pills, I'll have no more:
"I've swallow'd now, no'er twice five thousand Pills,
"And here I lie aground, with all my ills!
"There's no place like the fam'd old English channel,
"For tons of Physic, bound in ells of flannel!"
Diseas'd in purse and person, he resolv'd,
From all, but Nature's laws, to be absolv'd;
To take long credit on Time's trusful books,
And when the debt is due,—slip off the hooks.

FAREWELL TO CALIFORNIA.

Farewell, false land of blighted hopes,
For lo! the broad Pacific opes
Its waters to my view;
And I, with fairest prospects fled,
Bright dreams, and expectations dead,
Now bid thy shores adieu!

Oft have I cursed the fatal hour,
When, with the thirst for wealth and power,
My peaceful lot I spurned;
And when to tread thy distant strand,
And wash the bright ore from thy sand,
My weyward fancy burned;

I leave thee penniless and poor,
Yes as I left my father's door,
O land of vaunted wealth!
But on thy dark and dreadful coast
My strength is gone, and I have lost
That precious jewel, health;

Do thou restore, O baleful clime!
My vigor gone, my wasted time,
Worthless is now thy gold;
Though in thy stream and rivers wide,
And down thy lofty mountains' side,
For me, in heaps, it rolled,

I've wandered in thy forests wild,
Where the sweet songster's note beguiled
My lone and weary way;
And where, amid thy towering trees,
The cool refreshing Southern breeze,
Makes wild and ceaseless play,

Beneath thy calm unclouded sky
The lizard and the scorpion lie
Thy lovely dells among;
And where thy budding flowers fair,
Perfume with sweets the desert air,
The viper rears its young.

Now San Francisco, o'er thy bay,
Again my vessel takes her way,
Through the Pacific deep;
But those who came with me, the gay,
The young, the brave, oh where are they?
In lonely graves they sleep;

For some in fierce and deadly strife,
And some beneath the assassin's knife,
Unassisted, unkept have died;
While some still madly toiling on,
Heedless of years of suffering gone,
A hapless lot abide.

Now distant grow thy less'ning hills,
More talent I hear thy babbling rills
Come murm'ring from thy shore,
Oh California, adieu,
Then swiftly fadest from my view,
I ne'er shall see thee more.

ADVERTISING is a better soldier than rashness. The vicious growing vice is the much children. Blackness.

JEALOUSY is the greatest of misfortunes, and excites the least pity.

LOVE is supreme influence by which the soul is raised to a higher life.

THE TONGUE was intended for a divine organ but the devil often plays upon it.

A SMILE, often takes away a man character as effectually as the most declamatory observation.

PROVIDENCE CHASTENS our hearts with losses, labor, and takes out our brains to make room for it.

IT IS WONDERFUL the agency of moral chlorofoms things sometimes assume when they touch their

STATISTICS OF LABOR, &c., AT MELBOURNE.

The following is from a young man who left Glasgow. The accuracy of the statement may be relied on:—

"Melbourne, March 28, 1851.

"We sailed in November last year from Greenock, and had altogether a very favorable passage. We arrived here five weeks since. The first night I had the key of the street—no getting a bed, and houses very scarce—I got into the theatre the first night I came here, at a very small salary, as there was no vacancy just then. However, I got a rise of 10s. last week. Of course you would read of this now being the land of gold country, superior to Sydney, to which place most of the ship Corbaiter's passengers were going. With this gold business everything is more than double in price. Beef 4lb. loaf, 1s. 2d., short weight included; butter, 2s. per lb., cheese, 2s. 6d. per lb.; eggs, 3s. 6d. per dozen; potatoes, 8s. per cwt.; tobacco, 4 1-2d. per ounce, and very bad, but most people smoke cigars at 2d each. Tea, common black, 1s. 6d. per lb. Good moist sugar at 4d. per lb. Prior to landing here, our third mate used to accost us with, "Come, cents, give us a pull here—hurrah for the diggings!" He not wonder dressed of such a thing as Melbourne, and his father's ship still lying in the bay for want of hands. Now for wages. A shoemaker going out at 7 in the morning till 6 in the evening, gets 5s. and her meat.—The charge of a washerwoman is 5s. a dozen for shirts; a dressmaker for making a gown, 8s.; a carpenter or joiner, per day 15s.; some £1, and some £1 10. for particular work; a tailor 10s., some 12s. 6d. per day; a sawyer, 9s. per day, and 10s.; blacksmiths, from £3 to £5 weekly; tinmen I cannot say, they seem to me as if they were making their fortunes. They are up in smoke or thunder and thrive, so much in work required for the diggings. Are all fortunate that go to the diggings? No. Many come back with empty pockets, and some with very bad eyes; others themselves, especially those subject to that complaint. The accounts in the newspaper are correct in stating the number at Mount Alexander and Ballarat—50,000. But I met a gentleman yesterday who firmly believes there are 80,000. He also stated to me that he came direct from Mount Alexander, and met between 500 and 600 on the march for it. Bread at Alexander is 3s. to 4s. the 4lb loaf.—everything in proportion.

Now, as to the size, measure, and price of ale. When I came ashore here I had neither more nor less than one solitary sixpence. I asked for a glass of ale, sixpence, and was refused for the change. The ale began to warm my old heart, so I mustered up all the courage to get my change. "You are a stranger, I suppose?" "Yes, ma' am." Now, the glass would take three to fill one imperial pint. Was I not wishing myself back again? I was next thing to teetotal all the voyage, for the cabin boys were as much as need be.—Suppose I played to them, they never said, 'Collie, will you tuse?' So I was down on them, and would no play unless I was paid, which they would not; however, The steerage passengers are co-equal with cabin now, and in most instances better, in fact. Jack is as good as his master here. I would not advise any coming here to cabin it. Only let people take necessary extras with them, according to their means. Ordinary sized chests or boxes stand a better chance of not being broken than large chests. Keep in sight all heavy clothing as well as light clothes. They are useful this side of the line, as well as with you. Crockery is very dear here, and any body bringing odds and ends, not wasted on the voyage, will find it an advantage. There is no starvation or beggery in this country, except some few indolent natives in this condition. Every one cannot make a fortune, but many will in a very short time. Merchants, speculator, &c., often make one in an incredibly short space of time and publicans can do it in three years or less. A half glass of brandy called 'a bubble,' is 6d., in some houses 4d.; a glass of rum, 4d. This is the cheapest of all the drinks. Brandy is the cheapest drink here. Wine is 6s. a bottle in or out of the public. The greatest inconvenience here is the want of houses, more especially to those who have families. Before the golden time, the town was rapidly progressing. Within a gunshot of where I live, I heard a woman asking a young man his, for a single room about the size of my kitchen. New people of all classes are off to the diggings. I sent you a paper a short time ago; and I hope you are not gone to Canada West, as I am confident this country will suit your constitution better. Regarding the moral condition of the people here, I must say that morality is lax. Drunkenness greatly prevails, and that not on the sly, but quite open. The prevailing rage is for money—money! and certainly they do send it flying round like chaff. Plenty of money and good wages have for everything."—*Ross-shire Observer.*

A HIGHLANDER'S CAREER IN AUSTRALIA.

The following romantic and interesting adventure is well worth perusal. The individual to whom dame Fortune was so lavish with her gifts left Inverness about 11 years ago, where he carried on the business of a buccaneer. Having made up his mind to emigrate to Australia, he prevailed upon a brother-in-law of his, with his family, to accompany him. The party sailed together from Inverness, and arrived in London all safe. The day following they strolled to view the wonders of the metropolis, and, in doing so, said as fate would have it, were not destined to sail together for Australia in the same vessel, having lost each other. The extent and intricacies of the streets of London defied our hero, Hugh Macgregor, *alias* Holstein Beag, to find his brother-in-law and wife, although he continued scrambling for them from morning till night for seven days; but all was in vain. Hugh was in a sad condition at the sudden and unaccountable disappearance of his sister and her husband. However, believing a further search for them would be useless, and besides his wages being but scanty, he was resolved, without any further delay, to sail for Australia, which he did on the evening of the seventh day. His brother-in-law and his wife also gave it up as a hopeless case to recover their relative, and, after a different search for him for two days, sailed for Australia, being thus five days a head on their voyage over Hugh Beag, or little Hugh. However, it happened that both vessels arrived at Port Phillip the same day, one in the morning and the other in the evening. Hugh being on board of the latter, on going ashore, learned that there were some Highlanders on board the former vessel, among whom he was informed there were individuals who actually corresponded with the description he had given of his relatives. However, as in London, Hugh was equally unfortunate in discovering them, although he continued for five days his search in and about the neighbourhood of Port Phillip. The reason was obvious. The brother-in-law engaged as a shepherd about an hundred miles off, and went for into the interior, and it was not until Macgregor had received a letter from his kinsfolk in Inverness, informing him of their safe arrival in Port Phillip, and subsequent engagement and prosperity there, that he was satisfied of their being in the same colony with himself. According to the last accounts they did not meet, but we have no doubt that now, there remains no doubt of a meeting. Macgregor, *alias* Holstein Beag, after having served faithfully for a few years, by which the accumulated some little money, purchased a piece of land. This land being in close proximity to the gold regions, it occurred to him to make an attempt like others, in quest of the valuable ore. His success was beyond his expectations, and it turned out that he was among the most valuable proprietors in the district. The news having spread like wildfire through the country, it may be imagined Macgregor received many offers for permission to dig, but refused all. At length a company came forward who offered him the enormous sum of £30,000, which was accepted, and Holstein Beag retired from a life of activity to enjoy the fruits of his hurriedly-acquired fortune. Such fortune, so easily acquired, but seldom falls to the lot of mortals, and the news of Hugh's success having been lately received in Inverness, and in his native district, gave such a stimulus to all those who could muster the "tin" to proceed to Australia, that last week about 120 persons left that town, many of whom were the relations and acquaintances of Hugh Macgregor, *alias* Holstein Beag.—*Ross-shire Observer.*

FIRMNESS OF EGYPTIANS ARE TO EGYPT.—One other obliration which the Egyptians owe to the Desert struck me freshly and freshly from the beginning of our voyage to the end. It plainly originated their ideas of art. Not those of the present inhabitants, which are wholly Saracenic still, but those of the primitive race, who appear to have originated art all over the world. The first thing that impressed me in the Nile scenery above Cairo was the regularity of almost all forms. The trees appeared almost the only exception. The line of the Arabian hills soon become so even as to give them the appearance being supports of a vast table land, while the sand heaped up their bases was like a row of pyramids. Elsewhere, one's idea of sand-hills is, that of all round eminences they are the roundest; but here their form is generally that of truncated pyramids. The entrances of the caverns are square. The masses of sand left by the Nile are square. The river banks are graduated by the action of the water, so that one may see a hundred natural Nilometers in as many miles. Then, again, the forms of the rocks, especially the limestone ranges, are remarkably grotesque. In a few days I saw, without looking for them, so many colossal figures of men and animals sprinkling from the natural rock, so many snakes and strange birds, that I was quite prepared for anything I afterwards met with in the temples. The higher we went up the country the more I felt the conviction that the art from the sand forms of the lower people; and in Nubia they were worthy, from their antiquity, of old Egypt. It is possible that the people of Abyssinia might, in some obscure age, have derived their ideas of art from Hindostan, and propagated them down the Nile. No one can now positively contradict it. But I did not feel on the spot that any derived art was likely to be in such perfect harmony with its surroundings as that of Egypt certainly is; a harmony so wonderful as to be perhaps the most striking circumstance of all to an European, coming from a country where all arts is derived, and its main beauty therefore lost. It is useless to speak of the beauty of Egyptian architecture and sculpture to those who, not going to Egypt, can form no conception of its main condition—its appropriateness. I need not add, that I think it worse than useless to adopt Egyptian forms and decorations in countries where there is no Nile and no Desert, and where decorations are not, as in Egypt, brought with meaning—picture language—meaning to the gazer.—*Eastern Life.*

LEARNING OF THE ENTHUSIAST.—Somebody, and we know not whom, thus rebukes an Englishman's aspiration to be independent of foreigners:—"A French cook dresses his dinner for him, and a Swiss valet dresses him for his dinner. He hands down his lady, decked with pearls that never grew in the shell of a British oyster, and her waving plume of ostrich feathers never formed the tail of a barn-door fowl. The viands of his table are from all countries of the world; his wines are from the banks of the Rhine and the Rhone.—In his conservatory, he regales his sight with the blossoms of South American flowers; in his smoking-room, he gratifies his scent with the weed of North America. His favorite horse is of Arabian blood his pet dog of the St. Bernard breed. His gallery is rich with pictures from the Flemish school and statues from Greece. For amusement, he goes to hear Italian singers warble German music, followed by a French ballet. The ermine that decorates his judges was never before on a British animal. His very mind is not English in its attainments—It is a mere picnic of foreign contribution.—His poetry and philosophy are from ancient Greece and Rome, geometry from Alexandria, his arithmetic from Arabia, and his religion from Palestine. In his cradle in his fancy, he rubbed his gums with coral from Oriental oceans; and when he dies, he is buried in a coffin made from wood that grew on a foreign soil, and his monument will be sculptured in marble from the quarries of Carrara. A pretty sort of man this to talk of being independent of foreigners!"

FRANCIS BACON'S PROPHECY.—"Bridges," says he, "unsupported by arches, can be made to span the flowing current; man shall descend to the bottom of the ocean safely breathing, and treading with a firm step on the golden sands never brightened by the light of day. Call but the secret powers of Sol and Luna into action, and behold a single steersman, sitting at the helm, guiding the vessel which divides the waves with greater rapidity than if she had been filled with a crew of mariners toiling at the oars. And the loaded chariot, no longer encumbered by the panting steed, dashes on its course with relentless force and rapidity. Let the pure and simple elements do the labour; bind the eternal elements, and yoke them to the same plough."

DO THEY TALK? Have they no leaf, language do they not at sunrise, when the winds blow, and the birds are carolling their songs, play a sweet music? Who has ever heard the soft whisper of the green leaves in the Spring time, on a Sunday morning who did not feel as if rather glean of gladness were running through his heart? And then when the peach Blossoms hang like rubies from the stem of the parent tree—when the morning dew-drop lies like the shrine of God, upon her beautiful face, and the moss-rose opens their crimson lips sparkling with the nectar that falls from heaven, who does not bless his Maker?

A NEWSPAPER IN A FAMILY.—One of the greatest advantages of a newspaper in a family of children is, the constant stimulus which the facts and statements it contains gives to the acquisition of historical, scientific and geographical knowledge. Who, then, that is a father, will be so penurious, not to say unnatural, as to refuse the slender objects of his affection and responsibility such an important aid to their advancement.

RULES FOR HEALTH.

IN A SCOTCH PAPER WRITTEN WHO HAS TRIED THEM AS:

Never drink anything but water.
Never eat anything but oatmeal.
Wear the thickest boots.
Walk fifteen miles regularly every day.

Avoid all excitement; consequently it is best to remain single, for then you will be free from all household cares and matrimonial troubles, and you will have no children to worry you.

The same rule applies to smoking, taking snuff, playing at cards, and arguing with an Irishman. They are all strong excitements which must be rigidly avoided, if you value life, the least your health.

By attending carefully to the above rules, there is every probability that you may live to a hundred years, and that you will enjoy your hundredth year fully as much as you did your twenty-first.—*Punch.*

SECRET MAN.—We learn from the Shrubrock Gazette of the 14th instant that Mr. Orris Hall, of Hadley, discovered recently, near the railroad north as Shrubrock, a rich and extensive vein of silver ore, from a specimen of which, weighing only one pound, he obtained pure silver of the value of a quarter of a dollar. "We understand," says our contemporary, "that Mr. H. has taken steps to obtain from Government the right of working the mines."—*Montreal Pilot.*

The Chronicle.

Saint John, September 24, 1852.

IMPORTANT RAILWAY MEETING.

On Saturday last, William Jackson Esquire, M. P. the distinguished Railway contractor, arrived in [illegible] gentleman conferred with the Executive Government, with the *details* of which, the public have not yet been furnished. We are informed however, that a provisional arrangement was made with Mr. Jackson by the Committee to construct our portion of the E. and N. A. railway, and that subsequently, this agreement was assented to by the railway company.

Of course, what has been already accomplished is to be subjected to the decision of the legislature; an extra meeting of which is anticipated.

We do not say like one of the morning papers of Wednesday, that we are not at liberty to state the result of the railway negotiations, and for two distinct reasons:—1st, like our contemporary, we are not in possession of the information, which, unlike him, we should most certainly publish, if in our power to do so; and 2dly, we have no desire to make the public believe, that information has been communicated to us, which up to this moment, could only be furnished at the expense *of violating a solemn pledge* to keep it sacred! We make these remarks, to show our dislike at, even a clumsy attempt at mysterious humbug. In the present case, the editor of a newspaper has no better right, or chance to be apprised of facts—not intended for publication—than has the most humble individual on the list of his subscribers.

We happen to know this however—and obtained it without resorting to the Gygean ring, or even spiritual rappings. The Province is to issue Debentures, i. e. bonds, to a limited extent, for every mile of railway to be constructed, the aggregate amount of which, is not to exceed the sum named as a Provincial contribution in the arrangement effected by the Honorable Mr. Chandler, with Mr. Jackson and his associates, as already announced. So far as the *direction* of the scheme is concerned, it will remain as formerly agreed upon, that is to say, if there be 7 or 9 directors, the people, by their government, will nominate 3 or 4, as the case may be, and thus, if a larger number is deemed expedient.

As we are not in possession of all the particulars connected with what may be fairly entitled the *stupendous* proceedings of the present week, we are therefore not in a position to pronounce an opinion in the matter *pro* or *con*. Time alone will fully develope every thing which the people are entitled to know, and they may as heretofore, place full reliance upon the independance of the *Chronicle*, in advocating what we may consider their vital interests, or in firmly denouncing any efforts which may have a tendency to impair them.

We are fully aware that there exists very generally, throughout the country, an earnest desire that British capital should be introduced into our midst, and in a Province like our own, possessing unbounded resources, without the means of developing them, this desire is a natural one; upon the other hand, even gold itself may be purchased at too dear a rate, and we should never suffer the independance of our country to be sacrificed, no matter what apparent boon is offered for it. Whenever the peoples' money is to be expended, they should control the mode of its disbursement, we therefore sincerely trust, that their representives will never consent to any arrangement whatever, without insisting upon the *sine qua non*, of a sound effective, and popular control, at the board of management. At present, the science of Railway economy is but indifferently understood in New-Brunswick, nay, its first elements have yet to be learned; our government and people therefore, it is to be hoped, will proceed with the utmost caution, before the destinies of our fine and growing country are entrusted, even to a limited extent, into the hands of strangers.

From the recent and interesting visit of Mr. Jackson, who is an influential member of the British Parliament, and a gentlemen who holds a high position in his native land, the Province is justly indebted to the Honorable Mr. Chandler. If good springs out of it—and we trust it may—the service performed by the Government—*through whose instrumentality the recent arrangement could only be effected*—will be appreciated in all time to come, and long, very long, after the slander and detraction to which they have been so spitefully subjected, even in connexion with this important matter, has been wholly dismissed from the memory of the oldest inhabitant!

Patronage which will be held by those who have the railway works in charge will be great, and for the weal or woe of the country, this patronage will be dispensed. We should be pleased to see the management so organised that if a qualified applicant for employment is rejected on political grounds, he can, and in *man fashion*, wholly repudiate the inferior tribunal of Festus, and say with confidence in its integrity,—'I appeal unto that of Cæsar.' Confer uncontrolled power on small minded men, and we shall be continually reminded of what beggars are apt to do, when enjoying equestrian exercise. However, we feel assured that the interests of the people—their imperative claims—nay, their *stern demands*, are at this important crisis, in faithful keeping.

It is only within the last ten days, that an opposition paper very plainly intimated, that those who had opposed the E. and N. A. railway merited no employment, now that its construction was likely to be commenced. It is to such observations that a portion of our remarks will apply. The present scheme differs *in toto* from the old one, but whether or not, those who manage railways, are mere trustees for others, and they would be traitors to that trust, if they did not employ persons to do their work, whom they thought were best fitted for it, and discarding at the same time, with deserving contempt, every effort which might be used to create a prejudice against the fair claims of their fellow subjects, who may think proper to express and act upon opinions in opposition to their own. We seek for no office in the gift of railway directors, and therfore our observations are mainly levelled against the mean endeavor of our cotemporary, which, if not crushed in the bud, might possibly operate against the fair claims of others, who are differently circumstanced, and thus, in the end—retard a public enterprise, which must be conducted for the benefit of the whole Provincial community.

ERICSONS' CALORIC ENGINE.

A New ship called the *Ericson* has recently been launched at Wilmington L. I. of the burthen of 2500 tons. This vessel is to be fitted with a recently invented engine bearing the above title, the discovery of Ericson, and American who has been long known to the Scientific world. With him originated the most popular form of propeller adopted by steam boats for some years past, although at one period strongly condemned by the Edingburgh review, and denounced by a scientific writer in that periodical as utterly unpracticable! If our memory serves us correctly, Mr. Ericson was one of the three individuals who constructed as many locomotives, which contended for a prize of £500 sterling, awarded by the directors of the Liverpool and Manchester Railway. They were tried on that time at an early period, when one of the number designed by Stevenson bore the palm.

The engine built for the ship Princeton presents [illegible] great novelty. About one quarter of the fuel ordinarily used will answer. No water and consequently no steam is required. The engine will be worked solely by the expansion of of air, suddenly heated, as it is conducted, through pipes specially designed for the purpose, to the cylinders,

We have a diagram before us, illustrating this interesting discovery, of which it would be impossible to give a more particular account, without minutely referring to its working parts. Already an engine on a small scale, after the plan of Ericson has been constructed, and in operation, it has answered the expectation of its ingenious inventor, therefore, there is small reason to doubt, that the large one which will be tested in the course of a short time, will fully realize what is desired from it.

The greatest difficulty which Steamers have to contend with in *very long voyages*, is the want of capacity to carry a sufficiency of fuel, but if Ericson's plan succeeds this difficulty no longer exists, for as one quarter of the present amount of fuel will only be required, and the huge boilers are wholly dispensed with, an Ericson propelled vessel, may achieve a voyage of almost any required length without stopping, until the terminus is arrived at.

We await with considerable anxiety to hear the practical result on a large scale of this recent and extraordinary invention. If successful, it will in the course of time, in all probability, be universally adopted, and then the name of '*steam boat*', will be numbered with the things of bye-gone days.

THE CANADA CLERGY RESERVES.

Mr. Hincks's resolutions, which go to secularize this fund, and to appropriate it to purposes very wide from the sacred object for which it was set apart from the period of the British conquest of Canada, have passed the lower house in Canada. The Quebec *Chronicle* of the 18th. thus remarks:—

"No matter, again we repeat, they signify nothing. Exciting the fears of one party and arousing the prejudices of another, they have attracted some attention, but, in truth, they are a mummery, as we have before remarked, and as Mr. Papineau also thinks. The ministery, or rather the powerful part of it have no more idea of secularizing the Clergy Reserves, or of asking England to suffer them to do so, than they have of flying. Thoroughly persuaded that England will pay no heed to them, they pass a series of meaningless resolutions. Less honest than Mr. Price, less far-seeing than Mr. Baldwin, less enthusiastic than Mr Brown, and less fanatic than Mr. Rose, Mr. Hincks pursues the even tenor of his way determined, naturally enough, to keep his place as long as he can. Mr. Morin, too, must have been let into the secret, else could he never have talked about secularization as he does, knowing full well that no sooner is the church of England deprived of her privileges than the church of Rome, to which he has the pride to belong, will also be deprived of hers."

Judging from the truly Protestant dispatch of Sir John Packington to the Earl of Elgin of the 22d. of August last, the *present ministry* of England, will never consent that the Church of England, shall be robbed by those whose duty it is to protect No, no, the acts of an accidental majority of *liberals*! will be defeated this time.

DERRYANA—OR THE SIEGE OF LONDONDERRY.

By the Rev. the Rector of Magilligan, re-published in Toronto, C. W., under the auspices of the "Loyal Orange Institution."

The Volume whose re-print lies before us created a deep impression on the public mind when it was first issued from the British Press; and no less an impression in the Upper Province in which it has recently been produced.

A vulgar and enormous prejudice prevails among some of our political writers, against the Orange Institution, and the most contemptible schemes are resorted to in order to extend it, and secure for it a general currency.

Such a prejudice like almost all others finds its origin in downright ignorance if not in base malignity. Every one in the least degree acquainted with the History of the Revolution of 1688, must know that the Orange Institution was the great bulwark of British Protestantism, and indeed, but for such an organisation, we might have been to-day under the dominion of Papal tyranny. Yet strange to say, orangeism, like many other good old servants, is not even yielded a pension for its valuable services, but kicked and badgered about with the most merciless cruelty; venerable with age however, and unimpaired by its lengthened services, like Moses the Man of God, its eyes are not dim, nor its natural strength abated!

When Britain needs its help, its loyal sons are always ready to stand by her throne, and consecrate it with their heart's warm blood.

When a Papal Bull awake the empire by its roaring, and when aroused from its Passyite lethargy, and cast into a state of nervous tremor, who took the precedence of Lord John Russell, in raising a frightful testimony against it? Was it not the very Institution at Ulster, which a heartless Melbourne Ministry had attempted to destroy?

For the volume before us, we are indebted to the politeness of the Canadian publisher, and it is not only well executed, but very cheap. We recommend it to the Loyalists of New-Brunswick, and those who wish to procure it can leave their names at our office, or at the Phoenix Book store, and we are quite assured it will amply recommend itself by its own intrinsic merits.

DISTINGUISHED ARRIVALS.

The following Gentlemen were in town on monday and Tuesday last; all of whom except those who reside in St. John, have since taken their departure. The recent railway negociations have been the means of calling them together—some of them to confabulate—others, to think hard and to ponder well on their own behalf, and that of their colleagues.

Honorables Provincial Secretary, Attorney General, Surveyor General, E. B. Chandler, George Hayward. [The Honorables Solicitor General, Robert L. Hazen and John H. Gray, who reside in St. John, were also present.]

Messrs. Jackson, of England—now in Nova Scotia, Morton and Poor of the U. S. Dickey and Archibald of Nova Scotia. Mr. Jackson was accompanied by his son, also, by Captain Rhodes and Mr. Ross, Civil Engineer.

If the above combination of talant—and energy, backed by the interminably long purse of "the great English contractor," does not start the E. and N. A. railway, it will be out of the power of man we fear to overcome its vis inertiæ.

We (Montreal Courier) have just received intimation of the recall of Lord Elgin after the Session of the Provincial Parliament. The Government has been offered to Lord Haris.

We (Quebec Chronicle) *know* that the above news is fudge.

This is true however and new, Major General Gore has received the command of the forces in Nova Scotia.

The *Courier* says that the Hon. D. Daily, (who is now in England on sick leave from his Governorship in the West Indies) gets the cross of the Bath, and the Governorship of New Zealand. The *Chronicle* says—glad to hear it.—*Quebec Chronicle, 18th.*

MINERVA LIFE ASSURANCE COMPANY.—We have the report for 1852, of this substantial Association. It manifests its sound condition in a financial point of view, and thus presents strong claims for general patronage. Messrs Ranney, Sturdee & Co. are the Agents for St. John. See advertisement.

PETERSON'S MAGAZINE.—For the October number of this interesting periodical, we are indebted to Mr. B. O'Brien. The Magazine contains an amount of reading matter, which renders it very cheap at $2 per annum.

THOMAS BARING'S MISSION TO THE UNITED STATES.—The head of the great London financial house of the Baring Brothers, has been here for some days, and still Wall street is in the dark in regard to the special objects of his visit. It was first given out, with an air of semi-official authority through the London journals, that he was empowered with the necessary discretion for the most ample and [illegible] report readily gained credence, from the fact that another of the Baring Brothers, Lord Ashburton, had been so successful in settling the Northeastern Boundary dispute; and also from a readiness to believe that the diplomatic abilities of the one brother were most likely possessed by the other. But it very soon appeared that Mr. Thomas Baring was not coming to settle the fishery question, but that but that his real mission was to look after the Nicaragua Canal Company and its stock, and the condition of Mexican bonds in Wall street, Illinois railroad bonds, other State bonds including even the repudiating State of Mississippi, with a view to very large investments in Australian gold. Since the arrival of Mr. Baring, however, it seem that the special object of his particular season of the year, is the settlement of the Peruvian guano question on a pacific basis, which will be satisfactory to Mr. Webster, Captain Jewett, the English Peruvian bond holders, Peru herself, and even the guano-making penguins and pelicans of the Lobos island. But Wall street may be mistaken even in this conjecture. Perhaps his object may be to inquire into the present peculiar condition of Cuba, or the Tehuantepec treaty, or the Presidential election, with the view of betting largely on the one-sided result. Who knows?—[*New York Herald 18th Sep.*

More recently, Mr. Baring was at the Revere House, Boston.—[*Ed. Chron.*

Four Days later from England!

The steamship *Pacific* arrived at New York on Saturday last, in ten days and four hours from Liverpool, bringing 107 passengers.

STATE OF TRADE.—In Manchester prices were steady, and in most articles there is great firmness. The iron trade at Birmingham is very active. In the French provinces trade is disturbed in consequence of a new comercial treaty with Belgium.

In the London produce markets W. I. sugar has been sold at sixpence advance per cwt—Coffee is in brisk demand. Tea quiet, prices unchanged. Breadstuffs dull. The harvest reports from the north of Europe are very favourable. Good supplies ready for shipment at the Baltic ports. The harvest operations in England and Ireland have also been most satisfactory.

The Bishops of western New York and Michigan were in Liverpool. The former at a public meeting had ridiculed the idea of a rupture on the fishery question.

Letters from Berlin state that the unsold ships of the Germain fleet have been transferred to Messrs. Rothschild for 100,000 florins.

From what has appeared in the public press both in this country and in the United States, within the last week or two, it was generally supposed that the fishery dispute with America, if not actually settled, was at least in such a train of amicable adjustment that all danger of hostile collision between the two countries was at an end. We, certainly, were amongst those who thought so; but the question appears now to have assumed a new phase, and fully confirms an opinion we have long entertained, that it is extremely dangerous, in negotiating with America, to make any concession to her which is not fully warranted by the obvious principles of justice. Whether America has any serious intention of making the fishery question a cause of war between the two countries it is impossible to say, but certainly she is doing all she can to provoke it; and, if the claims put forward by Mr. Seward in the American senate are insisted upon, hostilities can scarcely be avoided, without England submitting to a humiliation she may very soon have cause to regret. We do not think that America will provoke a war with this country, just now; she will watch for a more suitable opportunity; but that she will do so on the first favourable occasion is what we firmly believe, for her ambition is of that reckless character which seems to overlook all the mischievous consequences that must result, and to be deaf to the voice of prudence.—*London Shipping Gazette.*

A gentleman of the name of Neale, who had been living for many years in the vicinity of Ashford, in Kent, died one day last, week, at the age of upwards of 70. He was possessed of an immense fortune, which has been calculated at half a million of money at least. He was of very eccentric habits, and upon a perusal of his will, it appeared, to the great disliking and disappointment of many persons present, that he had only given two legacies of £100 each to two gentlemen whom he had appointed executors, to see to the due performance of his funeral rites, and left the whole of the remainder of his property to the Queen.

Henry, Byron, parliamentary reporter of the London press, is appointed consul to Hayti.

Clearances from London for Australia are still on the increase.

Capt. Hay, of the 17th regiment, lately eloped with Lady Elizabeth Bryan, daughter of Marquis Conyngham. It is believed they came to America in a recent steamer.

The scene between Polk and Cullum in congress appears in full in the English papers, and of course elicits severe comments.

A violent thunder storm and deluge had done great damage to property and crops in Worcestershire, 2000 sheep having been drowned.

The royal family was at Balmoral, the queen and youthful members of the family engaged in drives, and Prince Albert in deer stalking.

The Board of Trade returns for the month and seven months ending the 5th August, 1852, have just been issued. The annexed summary shows the total amounts under the various heads:—

The total declared value of exports for the month last past is £6,589,168, whilst for the corresponding month of 1850 and 1851 they were respectively £6,029,568, and £5,418,203. The total importation of coffee for the last month was 7,128,923 lbs, against, 3,372,875 lbs in the corresponding month of 1850, and 4,605,976 lbs in 1851; whilst in the same period there were entered for home consumption respectively 2,558,144 lbs, and 2,706,425 lbs. —Unrefined sugar shows importation of 883,639 cwt. for the month of the present year, whilst for 1850 and 1851 the figures stood respectively 533,607 cwt. and 893,617 cwt., the quantities taken for home consumption during the same period being for 1852, 621,617 cwt.; for 1850, 921,610 cw.; and 1851, 934,526 cwt.

As regards the shipping trade, we find that in the month last past there were 3452 vessels employed in the foreign trade, with a tonnage of 710,005, entered inwards; of which 3061 were sailing vessels, with 626,873 tonnage, and 391 steam vessels, with 113,132 tonnage of 853,658. There cleared outwards during the same periods respectively 3308 ships, 655,351 tonnage, of which 2956 were sailing vessels, with 561,425 tonnage, and 352 steam vessels, with 93,926 tonnage; whilst in the corresponding month of 1851 there were 3292 ships, 632,709 tonnage.

The movement in the arrival and departure of the precious metals during the past week has been of more than ordinary interest. We have received in gold and silver, but chiefly of the latter, remittances to the extent of about £370,000, whilst there has been a drain upon our resources to the extent of £685,000, or an excess of exports over imports of £315,000.

IRELAND.—There is no variation in the tone of the last agricultural reports. The reaping of the harvest is fast drawing to a close, even in the most remote and backward districts. The yield of the cereal and green crops generally is said to be everywhere beyond an average, and there no longer seems to be any doubt that the loss by the potato blight will not exceed that of last year.

FRANCE.—In France great preparation were making to receive the president on his tour.—Petitions for the restoration of the empire continued to flow in. The Vienna Lloyds states that the marriage of Louis Napoleon and Princes Vasa had been postponed by advice of her physicians, but will certainly take place, the only difference in the programme being that the empire will be declared before, instead of after, the nuptials. The same paper says it has been resolved to convoke the French senate to obtain the decision of the people on the question of empide before the close of the year.

A telegraph despatch from Amsterdam says the French minister at Hagué has been recalled in consequence of the rejection of the literary convention. Dutch funds fell rapidly in consequence. Elihu Burritt has arrived in Paris as a peace mission.

Much activity is observable in the French ports and arsenals.

The Debate has an article expressing strong dissatisfaction with the British for seizure of French fishing vessels off Newfoundland, and considers it a clumsy attempt to show imperiallity.

ITALY.—It is reported, but not officially, that Murray, the Englishman, will be pardoned, on consideration of great money.

TURKEY.—Another misunderstanding has occurred with England. The British ship-of-war "Modesto" was fired into by the shore batteries while attempting, through stress of weather, to run through the Dardanells. A British brig had also been fired into, under similar circumstances, and considerably damaged. An explanation has been demanded. The late vizier and others have been reinstated in their various posts.

THREE DAYS LATER.

[By Telegraph to the News Room.]

The Royal Mail steamer *Africa* arrived at New York at 9 o'clock, on Tuesday evening, with 144 passengers. She brings dates from Liverpool and London to the 11th inst.

There are few items of much importance since the sailing of the Pacific.

The steam frigate Geyser is being fitted out for the North American station.

Nothing new from France.

Late dates had been received from the Cape of Good Hope. The news is by no means cheering; there was no prospect of a speedy termination of the war. The Kaffirs are now well decipined, and move with true military precisions. They have become very troublesome.

Wheat has declined 1s. per quarter, and flour 5d, per barrel, Corn quite dull. Cotton rather dull, and declined 1 8d, per pound.

The Harvest prospects still continue good, and the result will be better was expected.

The Lobos Islands question is almost exclusively engaging the attention of the English press.

SHIP NEWS.—Arrived at Liverpool, 9th, ship Kitty Cordes, from Mobile. At Deal, 4th, Charlotte of Derby; at Leith Roads, Joanna; at Liverpool, 5th, Olive, and Favorite; at Gravesend, 6th, Maria; at Grimsby, Levitzow Jelkendorf; at Hull, 8th, Charlottee of Derby, and Udra; at Liverpool, 9th, Western Star—all from St. John.

Loading at Liverpool, Commodore, Olive, and Priscilla, for St. John. At the Clyde, the Faside, for do.

THE EARL OF DUNDONALD.—*The Globe* states that Admiral the Earl of Dundonald, G. C. B., has received from the Chilians £6000, in part compensation for his services which Lord Cochrane, he having at the time fitted out and commanded their squadron.

PROFESSOR HIND'S NEW PLANET.—The Astronomer Royal having undertaken to select a name for the planet discovered on the 24th of June by Mr. Hind, proposes to call it "Melpomene." This planet is one of the nearest to us of the group between Mars and Jupiter, the period of revolution being 1269 days, which places it between Flora and Victoria.

THE FRAUDULENT AUSTRALIAN EMIGRATION COMPANY.—Montague and Tripe, the parties implicated in the extensive fraud on emigrants to Australia, have been committed by Sir W. Carden for trial at the Central Criminal Court.

THE ELECTRIC TELEGRAPH.—The Electric Telegraph is now complete from London to Plymouth. The Admiralty by this means have direct and instant communication with the great naval arsenal and all the the shipping intelligence of the port.

DEATH OF A VETERAN.—Died at Bushey, Hertfordshire, on his birthday, August 4, aged 97, John Smith, formerly a soldier in the British army, and as such present at the battle of Bunker's Hill, June 17, 1775. This action, it is well known, was one of the earliest of the provincials with the mother country.

THE SANGUINARY VERDICT OF THE SIX-MILE-BRIDGE JURY.

THE most eloquent condemnation of the sanguinary verdict given by the sympathizing jurymen, who, for all we know, were accomplices or confederates with the innocent and unoffending people who sought to take the lives of the soldiery and voters at Six-Mile-Bridge, is the simple fact that Judge CRAMPTON has admitted the eight soldiers to bail on sureties, themselves, of £20 each, and two sureties of £10 each, proof of the estimation in which that learned and constitutional judge held the opinion of the jury that pronounced them guilty of wilful murder. The sureties of Mr. DELMEGE, J. P., who holds a much higher rank in society than the humble men mentioned, were proportionally higher in amount—namely, himself for £200, two sureties of £50 each.

In the agreement on the subject before the Judge, the opinion of Mr. NAGLE, the Attorney-General was thus given—

"He had carefully and minately read over all the depositions, and was unable to discover any legal evidence to warrant the finding of a verdict of wilful murder."

The following judgment of the Hon. Justice CRAMPTON is taken from *Saunder's News Letter*:—

"I feel myself called upon, in law and in justice, to admit all the prisoners to bail. I make no observation upon the evidence given before the coroner. The case is to be tried; and I wish not in any way to prejudice the trial. No objection being made to the sufficiency of the bail tendered on the part of the prisoners, and the Crown, by Mr Hayes, who appeared for the Attorney-General, consenting thereto, my order is, that the prisoners respectively be discharged from custody, on perfecting bail, as offered by the notice of the 23rd inst. His lordship then fixed the amount of bail for Mr. Delmege, at himself in £100 and two sureties in £50 each, and for the soldiers £20 and two sureties of £10 each."

The whole thing is a powerful exemplification of Popery from begining to end, and cannot fail to be productive of much good. First it is proved that a wanton deliberate, and murderous attack is made on the Queen's troops, by a large body of Popish rioters, conspicuous amongst whom were two Maynooth priests, named BURKE and McCLENE; a sympathising Popish jury deliver a verdict not less murderous than the volleys of stones flung at the soldiers; then an application for bail for these men whose innocence was patent to the world, was resisted in the same factious and malignant spirit, and not until one of the judges of the land threw the shield of his protection over the persecuted and atrociously wronged parties, where they released from a punishment which they by no means merited.

Will not this proceeding open the eyes of our statesmen and of the people of England, to the folly of attempting to conciliate popery.—*Dublin Church Sentinel.*

[*From The Halifax Colonist.*]

Whatever be the issue of the negotiations said to be still pending on the subject of the fisheries, we fear that Great Britain has lost much of the affection which still remained to her in these Colonies. It may be that the resolutions passed on Thursday last and the address to her Majesty may arrive in England in time to stay the hand of the Ministry, and their effect may possibly be to leave us our valuable fisheries in the state in which they were before this last new phase was assumed. Unsatisfactory as this was, it is all that we expect. But so far as our feelings towards what we used sentimentally to call the Mother country are concerned, it seems to matter little whether the fisheries are yielded to the Americans or not. The Cabinet may or may not concede to the American pirates the grounds they demand. But we have before us our valuable fisheries, in the English press, the voice of the English people, spoken under the impression that the rights of the colonies have been granted away. From the highest of these organs we quote as follows, from the *Times* and [illegible] to the *News of the World* and *Punch*, we [illegible] subject treated in the same manner, each [illegible] the same dread of a collision with the United States. The same scornful contempt [illegible] rights. Our journal sets before us the [illegible] between America and [illegible]

A Full Blooded Entire Horse for SALE.

THE THOROUGH-BRED HORSE

JOHN O'GAUNT,

IMPORTED by the *Carleton County Agricultural Society* in 1847 will be exhibited at the Show and Fair of the NEW BRUNSWICK SOCIETY, in Fredericton on Wednesday the 6th of October next, and at the close thereof sold at AUCTION. This Horse combines the speediest and stoutest blood as will be seen from his Pedigree, and took the first premium (£200) award d by the Legislature of the Province in 1847.—He is 11 years old perfectly sound, stands 16 hands high, and weighs 1050 pounds. His stock, ranging in age from Colt of the present season to those rising four, are large and decidedly superior.

JOHN O GAUNT was got by Rockingham out of Purity; Rockingham by Humphrey Clinker out of Medora by Swordsman; grand dam by Trumpeter, out of Medora by Swordsman; grand dam by Trumpeter, out of Peppermint, sister to Prunella by Highflyer; Purity by Philo de Puta, winner of the St. Ledger in 1815, out of Rachael, Ruysch, sister to Claude Lorraine by Rubens; grand dam by Cesario, Miss Holt by Buzzard.—Rockingham won the Shirts at York, the Great St. Ledger, and the Cup at Doncaster; the Goodwood Cup in 1815; the Brighton Cup three years in succession; and six King's Plates—beating all the best Horses of the day. Purity never started but twice winning both her races. JOHN O'GAUNT walked over for the Two-years-old Stakes at Lichfield, and was beat by a head by Henri Quatri, the fastest horse of his day fifteen started.

By Order,
H. E. DIBBLEE,
Secretary.

Sept. 3d, 1852. S. K. FOSTER.

Third Division of Profit

MINERVA LIFE ASSURANCE COMANY OF LONDON, ESTABLISHED, 1836.

AT the Third Quinquennial Meeting of this Company, held in London, 24th June, 1852, a Surplus of £42,400 Sterling, (being four-fifths of £53,000 Sterling) was declared distributable amongst the Policy holders entitled to participate. This sum allows of a reduction of Premium for the next five years, of £9,633 16s. 3d. Sterling, per annum, or an equivalent reversionary Bonus payable at Death, of £16,933 10s. 7d.

The reduction of Premium averages 35,22 per cent. on the Premiums payable during the next five years.

The reversionary Bonus averages 60 per cent, on the Premiums received during the last five years, or 9 per cent. on the sums Assured.

Upon the Policies which had been full five years in existence, the reversionary Bonus averages 2 1-2 per cent. Premium on the sum assured, a result which has been seldom equalled, and will bear comparison with that of any Office.

The following Table illustrates the Bonuses declared:

	Average Reduction of Premium.	Average Reversionary Bonus.
1st Division—1842	16.833 per cent.	31 per cent
2d, " 1847	31.333 "	53½ "
3d, " 1852	35.22 "	60 "

On the 31st December last, the

Existing Assurances were	£1,099,843	16	2
The Capital Funds of the Company were	230,262	15	6
The Annual Income was	47,721	2	6
The Divisible Surplus was	53,000	0	0

The Directors consider, and I trust the Policy holders will agree with them, that the position of the Company is highly satisfactory, and hope that, taking into account the continually increasing competition they have to encounter, the progress of the Company has equalled their expectations, as the benefits actually realized equal, and in most cases surpass, those afforded by the largest established Offices.

Prospectuses, Forms of Proposal, and every information may be obtained from

RANNEY, STURDEE & CO.,
July 29 *Agents for New-Brunswick.*

Spring Importations of Boots and SHOES.

DAVID PATTERSON has much pleasure in announcing to his friends and the public, that he has just received per the ship Alciope, from Liverpool, and steamer Admiral, from Boston, a large supply of Ladies, Misses, Boys, Children's, and Infants BOOTS and SHOES, in almost every style, too numerous to name in an advertisement, the greater part having been manufactured to his order.

As the purchasers of imported *Boots* and *Shoes* incur considerable expense in having the rips sewed in the above class of work, those purchasing at his establishment will find it to their advantage, as all work that he warrants not to repair without any charge.

ON HAND—A well assorted Stock of Gents' BOOTS and SHOES, various styles, of his own manufacture—which is so well known in this Province for the last twenty five years, as to require no comment at this time.

STOCK OF THE GOLDEN BOOT,
Foster's Corner, King-street.

August 6. S. L. TILLEY.

OIL OIL.—500 GALLONS OLIVE OIL,
6 Boxes Fine SALAD Oil;
ex "Cuba," from Boston. W. O. SMITH,

Here is your Remedy!

HOLLOWAY'S OINTMENT.

A MOST EXTRAORDINARY CURE OF YEARS SUFFERING.

Extract of a Letter from Mr. Wm. Galoin, of 70 St. Mary's street, Weymouth, dated May 15, 1851

To Professor HOLLOWAY.

SIR,—At the age of 18 my wife (who is now 61) caught a violent cold, which settled in her legs, and ever since that time they have been more or less sore, and greatly inflamed. Her agonies were distracting, and for months together she was deprived entirely of rest and sleep. Every remedy that medical men advised was tried, but without effect; her health suffered severely, and the state of her legs was terrible. I had often read your Advertisements, and advised her to try your Pills and Ointment; and, as a last resource, after every other remedy had proved useless, she consented to do so. She commenced six weeks ago, and, strange to relate, is now in good health. Her legs are painless, without seam or scar, and her sleep sound and undisturbed. Could you have witnessed the sufferings of my wife during the last 43 years, and contrast them with her present enjoyment of health, you would indeed feel delighted in having been the means of so greatly alleviating the sufferings of a fellow-creature.

(Signed) WILLIAM GALPIN.

A PERSON 70 YEARS OF AGE CURED OF A BAD LEG, OF THIRTY YEARS' STANDING.

Copy of a Letter from Mr. William Abbs, Builder of Gas Ovens, of Rushcliffe, near Huddersfield, dated May 31st, 1851.

To Professor HOLLOWAY,

SIR,—I suffered for a period of thirty years from a bad leg, the result of two or three different accidents at Gas Works; accompanied by scorbutic symptoms. I had recourse to a variety of medical advice, without deriving any benefit, and was even told that the leg must be amputated, yet in opposition to that opinion, your Pills and Ointment have effected a complete cure in so short a time, that few who had not witnessed it would credit the fact. (Signed) WILLIAM ABBS.

The truth of this statement can be verified by Mr. W. P. England Chemist, 13, Market Street, Huddersfield.

A DREADFUL BAD BREAST CURED IN ONE MONTH.

Extract of a Letter from Mr. Frederick Turner, of Penshurst, Kent, dated December 13th, 1850.

To Professor HOLLOWAY.

DEAR SIR,—My wife had suffered from Bad Breasts for more than six months, and during the whole period had the best medical attendance, but all to no use. Having before healed an awful wound in my own leg by your unrivalled medicine, I determined again to use your Pills and Ointment, and therefore gave them a trial in her case, and fortunate it was I did so, for in less than a month a perfect cure was effected, and the benefit that various other branches of my family have derived from their use is really astonishing. I now strongly recommend them to all my friends.

(Signed) FREDERICK TURNER.

A WONDERFUL CURE OF A DANGEROUS SWELLING OF THE KNEE.

Copy of a Letter from John Forfar, an Agriculturist, residing at Newborough, near Hexham, dated May 15th, 1850.

To Professor HOLLOWAY.

SIR,—I was afflicted with a swelling on each side of the leg, rather above the knee, for nearly two years, which increased to a great size. I had the advice of three eminent surgeons here, and was an inmate of the Newcastle Infirmary for four weeks. After various modes of treatment had been tried, I was discharged as incurable. Having heard so much of your Pills and Ointment I determined to try them, and in less than a month I was completely cured. What is more remarkable I was engaged twelve hours a day in the Hay Harvest, and although I have followed my laborious occupation throughout the winter, I have had no return whatever of my complaint. (Signed) JOHN FORFAR.

AN INFLLAMMATION IN THE SIDE PERFECTLY CURED.

Copy of a Letter M. Francis Arnot, of Brewhouse, Lothian Road, Edinbro', dated April 29th, 1851.

To Professor HOLLOWAY.

SIR,—For more than twenty years my wife has been subject, from time to time, to attacks of inflammation in the side, for which she was bled and blistered to a great extent, still the pain could not be removed. About four years ago she saw, in the papers, the wonderful cures effected by your Pills and Ointment, and thought she would give them a trial. To her great astonishment and delight she got immediate relief from their use, and after persevering for three weeks the pain in her side was completely cured, and she has enjoyed the best of health for the last four years.

(Signed) FRANCIS ARNOT.

The Pills should be used conjointly with the Ointment in most of the following cases:—

Bad Legs	Chilblains	Fistulas
Bad Breasts	Chilblains	Gout
Burns	Chapped hands	Glandular Swelling
Bunions	Corns (Soft)	Lumbago
Bite of Mosquitoes and Sand-Flies	Cancers	Piles
	Contracted and Stiff Joints	Rheumatism
		Scalds
Coco-bay	Elephantiasis	Sore Nipples
Sore-throats	Skin-diseases	Scurvy
Sore-heads	Tumours	Ulcers
		Wounds
		Yaws

EXHIBITION AT THE NORTH AMERICAN CLOTHING STORE

R. HUNTER

HAS received his Spring Importations, per ships "*Saint John*" from Glasgow, "*Alciope*" and "*Devon*" from Liverpool, "*Sir Harry Smith*" and "*Faside*" from London, and late arrivals from Boston and New York, and having leased the apartments over the Shop, which he has fitted up as Warerooms, he has therefore been enabled by his additional room to enter more extensively into the business than formerly. He would therefore respectfully solicit the attention of his numerous friends and the public and general, to his very large and varied assortment of CLOTHING, &c., which he offers by Wholesale and Retail, at unusually low prices, and which cannot be competed with by others in the trade.

R. H. not considering it necessary to state the number or quantity of each particular Garment in his Establishment, or their various prices, would merely say that he has the *largest* stock of Clothing perhaps ever offered for sale in this market, and of any quality and price that the purchaser may require.

The STOCK consists of superfine Broad Cloths, Cassimeres, Doeskins, Tweeds, Russel Cords Cassinett, Shepherd's Plaids, Sattinetts, Moleskins, Cantoons, Gambroons, &c.

VESTINGS—In black and rich fancy Satins and Velvets, white Quiltings, Barathees, &c. &c.

COATS—Superfine and blue Cloth, in dress, frock Shooting, and other fashionable styles.

VESTS—An immense stock of all qualities and materials.

PANTS—A great assortment, in all the various materials worn at present.

In the *Furnishing Department* will be found in very great variety—Gent's White Shirts; fancy Regatta ditto; white and fancy Regatta Shirt Fronts and Collars; lamb's wool, merino and cotton Shirts and Drawers; Flannel Shirts and Drawers; silk and satin neck and pocket Handkerchiefs; satin Scarfs and Stocks; Opera and Demi Ties; Folded Muslin Cravats; Braces; Umbrellas; carpet bags; Cloth, Hair, and Tooth Brushes; Shaving Boxes and Brushes; Gloves; Hosiery, &c.

Cloth and Glazed Caps; FELT HATS.

R. HUNTER.

N. B.—The Clothing having been all cut on the premises and made up by the best workmen the City can supply, cannot fail in giving general satisfaction.

Gent's who would prefer selecting the Cloth can have their garments made to order in the most fashionable style, at the shortest notice.

☞ No second price. All goods marked in plain figures. R. H. May 21, 1852.

MYERS' EXTRACT OF

ROCK ROSE.

FOR all cases of Scrofulous Diseases, Dyspepsia, [illegible] Sore, Mouth, General Debility, &c. &c. No medicine has ever received such high testimonials from persons who have been afflicted with the above named diseases, as the Rock Rose. Myers' Extract is an elegant preparation, perfectly safe, and a wonderfully efficacious remedy. The extraordinary Medicinal properties of the Rock Rose Plant, have become known to some of the most eminent Medical practitioners of the country; others are fast becoming acquainted with its healing virtues, and desire to have it more extensively known and used.

The following is an extract from a note on the title page of a work published by D. A. Tyler, M. D., New Haven, Conn. on the efficacy of Rock Rose. These pages were penned without any expectation "of their ever being presented to the public—since "which time the plant (Rock Rose) under consideration has been more fully tested its virtues developed, and their character more fully established. "They are published by with the consent of several "medical friends. The object of this dissertation is "to lay before the members of the profession and "the public, the virtues of a plant too much neglected which undoubtedly (as an order member of the profession once remarked to me) possessed far more attractive hours than the popular sarsaparilla. I ask for the plant an impartial trial."

ITS MEDICAL HISTORY AND PROPERTIES

Are far the most important, since upon these depends its value to the community. Dr. Loudon says, that in 1799, it was so valuable in England, that it was cultivated from seeds. Ever since 1806.

PROF. IVES, OF YALE COLLEGE,

Has habitually used it with great success in *Scrofula*, and *Chronic Disease*, and through him its virtues were made known until, as Dr. Tyler says, "it is now in this section [New Haven] a common article in domestic practice, for the cure of *Scrofula* and cutaneous diseases." Dr. Whatlaw, a Scotch botanist of noteriety, while traveling in America, in 1814, learned its use in Canada. Returning to England, he employed it in medicating his baths, when became greatly celebrated for the cure of similar diseases.

DR. PARISH, OF PHILADELPHIA.

Remarks that it has been successfully used in bad cases of *Scrofulous Diseases*.

DR. J. H. THOMPSON, OF THE SAME PLACE,

Prescribed it in bad cases of Scrofulous patients a. Wells' Hospital. His success attracted the attention of senior physicians. He reports the following remarkable cases of White Swelling of the right hip, in February, 1844. The lad was seven years old, and had the disease for three years. The bone was dislocated upward and outward. There was a large opening on the hip leading to the bone, into which I could thrust my finger. I counted twelve ulcers. He had been under several physicians, who had given him up. I ordered a decoction of the *Rock Rose*. In two days his night sweats ceased; I then ordered a tea spoonful of the tincture of Rock Rose, three times a day. *Thirty-nine* days after he was *entirely well*.

For sale by *Druggists Generally*, where Circulars and Certificates of cases may be obtained.

GEO. F. EVERETT & CO.

Sole Wholesale agents for the Province. Manufactured by William Franklin & Co., Proprietors New Haven Conn.

THE GREAT REMEDY.

Sharp's Balsam of Hoarhound and Aniseed.

An never failing cure for Coughs, Colds, Asthma, Shortness of Breath, &c.

The extraordinary celebrity which this simple, pleasing, and effectual medicine has attained, may be seen by the following proofs, or certificates, all from persons well known:—

Mr. J. G. SHARP.—

Since you appointed me agent for the sale of your valuable Balsam of Hoarhound and Aniseed, I have been repeatedly informed by those who have used it, that it is without doubt one of the best medicines they have ever had, for the complaints in which it is recommended.

R. D. MARTHUR.

To Mr. J. G. Sharp—

Sir,—One of my children has been suffering for years under a severe Cough. The usual remedies were applied without effect. Having heard of Mr. J. G. Sharp's "*Balsam of Hoarhound and Aniseed*," I obtained some, and after the use of about 8 oz., or one vial of this extraordinary mixture, the cure was complete.

J. G. CAMPBELL,
April 28, 1852, City of Saint John.

Mr. J. G. Sharp,

Had, a few weeks ago, a very bad cold. Being recommended to try *Sharp's Balsam of Hoarhound and Aniseed*, I got a quarter dollar bottle, and found it not only a pleasant but a most useful and effective medicine. It is pleasing to take, and a first rate cure.

PATRICK TOWER,
April, 23, 1852, City of Saint John.

For the last sixteen years I have suffered from Asthma so bad that I was often obliged to sit in bed to prevent suffication. I tried every means, during that time, that the usual or ordinary medicines could produce, but without effect, until I obtained some of *Sharp's Balsam of Hoarhound and Aniseed*, (which was recommended to me,) and after using two bottles, I found the relief so long sought for.

M. SMITH,
Studholm, Kings County, March, 1852,

Sold in bottles at 1s. 6d and 2s. 6d, each, at the stores of JOHN G. SHARP, King street; R. D. MARTHUR, Medical Hall, King square, and JOHN CHALONER, King street.

HOLLOWAY'S PILLS.

CURE OF A DISORDERED LIVER AND BAD DIGESTION.

Copy of a Letter from Mr. R. W. Kirkus, Chemist,

To Professor HOLLOWAY.

SIR,—Your Pills and Ointment have stood the highest on our sale list of Proprietary Medicines for some years. A customer, to whom I can refer for any enquiries, desires me to let you know the particulars of her case. She had been troubled for years with a disordered liver and bad digestion. On the last occasion, however, the virulence of the attack was so alarming, and the inflammation set in so severely, that doubts were entertained of her not being able to bear up under it; fortunately she was induced to try your Pills, and she informs me that after the first, and each succeeding dose, she had great relief. She continued to take them, and although she used only three Boxes, she is now in the enjoyment of perfect health. I could have sent you many more cases, but the above from the *severity of the attack*, and the *speedy cure*, I think, speaks much in favour of your astonishing Pills. Signed)

R. W. KIRKUS.

AN EXTRAORDINARY CURE OF RHEUMATIC FEVER, IN VAN DIEMEN'S LAND.

Copy of a Letter inserted in the Hobart Town Courier, of the 1st March, 1851, by Major J. Welsh:

Margaret McConnigan, nineteen years of age, residing at New Town, had been suffering from a violent rheumatic fever for upwards of two months, which had entirely deprived her of the use of her limbs; during this period she was under the care of the most eminent medical men in Hobart Town, and by them her case was considered hopeless. A friend prevailed upon her to try Holloway's celebrated Pills, which she consented to do and in an incredible short space of time they effected perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND STOMACH OF A PERSON 81 YEARS OF AGE.

From Messrs. Thew & Son, Proprietors of the Lynn Advertiser, who can vouch for the following statement.—August 2nd, 1851.

To Professor HOLLOWAY.

SIR,—I desire to bear testimony to the good effects of Holloway's Pills. For some years I suffered severely from a pain and tightness in the stomach which was also accompanied by a shortness of breath, that prevented me from walking about. I am 81 years of age, and notwithstanding my advanced state of life; these Pills have so relieved me, that I am desirous that others should be made acquainted with their virtues. I am now rendered, by their means, comparatively active, and can take exercise without inconvenience or pain, which I could not do before. (Signed) HENRY COE.

North Street, Lynn, Norfolk.

AN EXTRAORDINARY CURE OF THE GRAVEL, AND A MOST DANGEROUS LIVER COMPLAINT.

Copy of a Letter addressed to J. K. Heydon, Esq., Sydney, New South Wales, dated February 25, 1851.

SIR,—A Mr. Thomas Clark, a Settler at Lake George, for a considerable time seriously afflicted with a Complaint of the Liver, together with the Gravel. His medical attendants, after trying all their professional skill, candidly told him that his case was hopeless, and any further efforts useless. In this situation, and when expecting every day would terminate his existence, a friend recommended him to try Holloway's Pills, and as a forlorn hope he did so, the first dose gave him considerable relief, he therefore persevered in taking them according to the directions, and is now restored to perfect health. He will feel great pleasure in confirming this statement, or even make an affidavit to the same effect, should it be required. (Signed) WILLIAM JONES,

Proprietor of the Goulburn Herald,
New South Wales.

WONDERFUL EFFICACY OF HOLLOWAY'S PILLS IN CASES OF DROPSY.

Persons suffering from Dropsy, either about the turn of life, or at other times, should immediately have recourse to these Pills, as hundreds of persons are annually cured, by their use, of this direful complaint in its different stages, when all other means had failed.

These celebrated Pills are wonderfully efficacious in the following complaints.

Ague	Dropsy	Inflammation
Asthma	Dysentry	Jaundice
Bilious Complaints	Erysipelas	Liver Complaints
Bloich on the Skin	Female Irregularities	Fevers of all kinds
Bowel Complaints	Piles	Constipation of the Bowels

E. Kennay can confidently recommend his Pianofortes to the Public, having been for many years engaged in one of the first establishments in London.

☞ Every description of English and American Pianofortes tuned and repaired.

May 15, 1852.

Rubbick's Patent White Lead.
ZINC PAINT.

THIS PAINT is entirely free from any injurious properties whatever; it is beautiful in manufacture—healthful to operate in—of rooms newly painted with it, it is unparalleled in Whiteness, Cleanness and Delicacy of Color, and Permanent. Two hundred weight of this PAINT with nine *gallons* of C.L. will cover as much surface as three hundred weight of white Paint made from lead and twelve *gallons of Oil*.

Further particulars will be given at another time.

A quantity of this Paint in Kegs of all sizes, is expected from London, about the end of the month.

JOHN KINNEAR.

April 3, 1852. *Prince Wm. Street*

LADIES' LOOK OUT.—Daily expected A—A supply of Exceedingly choice CONFECTIONARY, comprising nine, new sorts—viz:

Glasgow Original PINE APPLE DROPS;
JERCONELLE PEAR DROPS;
Raspberry Drops; *Honey Drops;*
Pink Varieties, and others too numerous to mention.

The Subscribers will be able to supply Country Traders with those rich productions as cheap as ordinary Confections may be had.

August 27. FELLOWS & CO.

UNION LINE,

A PROPOSES for the time of STEAMERS between St. John and Fredericton—are as follows, viz:—

A STEAMER

Will leave Indiantown, for Fredericton, and Fredericton, for Indiantown, every morning and evening (Sundays, Excepted) at 9 A. M., and 7 P. M. Excepted Monday mornings, from Fredericton, on which day the Boat will leave at 6 A. M. instead of 9 to enable passengers to take the Boston Boat, which leaves St. John every Monday at 2 o'clock, P. M.

☞ ALL FREIGHT BY THE ABOVE LINE MUST BE accompanied by a Freight Bill, and the Freight paid on delivery of the Goods, excepting Way Freight which must be paid on shipment, unless accompanied by the owner, otherwise it will be taken to Fredericton and stored at the Owners expence.

☞ CABIN FARE BY THIS LINE 5s. TO FREDERICTON.

Freight 6d per barrel only.

For further particulars see printed lists of Fare and Freight.

☞ The Subscriber having been appointed Agent for this Line of Steamers at Indian Town, will be in constant attendance to afford every facility to the forwarding of Passengers and Freight.

I. MERRITT, Agent.

N. B.—The above steamers will connect with Steamers Reindeer and Union, which will continue to leave Fredericton every morning for the Upper Country until the water falls to prevent.

FREIGHT will be passed through by these Boats to Woodstock and the Tobique, without any extra charge for reshipment at Fredericton.

John Westmorland, Esq.

The Subscriber having been appointed Agent to the above Company for New-Brunswick, begs to announce that he is prepared to receive Proposal for FIRE AND LIFE ASSURANCE. The large Capital of the Company, and the number and influence of its Proprietors, enable it to rank with the most eligible Offices, either in America or Europe, with respect to the advantages offered to the Public.

FIRE BRANCH.

Persons assured by this Company are not subject to any covenants or calls to make good losses which may happen to themselves or other, nor do they depend upon an uncertain fund or contribution, the Capital Stock of this Company being an unquestionable security to the Assured in case of Loss or Damage by Fire.

LIFE BRANCH.

In addition to the more customary methods of Insurance, the Company likewise Assures Live on any of the following contingencies:—

For the term of One Year, Seven Years, or any other definite period.

For the whole continuance of Life.—The Premiums to cease, after a limited number of Annual Payments.

For Two Joint Lives.—The sum assured to be paid on the death of either.

On the longest of Two or Three Lives.—The sum assured to be payable at the death of the last survivor; or,

The Survivorships.—To secure the payment of the sum assured, if a life A die before another life B.

For a sum to be payable at age 60, or at death.

Premiums on Credit.—A portion of the Premiums may remain on Credit. Assurances may be effected in various ways, not enumerated, to meet the convenience of parties.

The important advantages afforded by the Company in the Life Branch will include the following, viz:—

The Guarantee of an ample Capital, and Exemption of the Assured from liability of Partnership.

Moderate Premiums.

Large Participation of Profits by the Assured amounting to Two-thirds of its net amount, which may be applied at the option of the party effecting the Assurance:—1st. By the immediate payment of the sum so apportioned.—2nd. By an equivalent reduction of the future Premiums.—Or, 3rd. By an equivalent increase of the sum assured.

Small Charge for Management.—The expenses of the Office being borne in due proportion by the two Branches.

Prompt Settlement of Claims.

Policies lapsed by non-payment of the Premium may be renewed within three months, by paying the Premium, with a fine of 10s. per cent., on the production of evidence to the satisfaction of the Directors of the good state of health of the life assured.

The Company will always be prepared to Purchase the Policies of this Office at their equitable value or will grant a New Policy in lieu thereof, without any further payment of Premium, for a sum to be agreed on.

Extra Premiums, suitable to special circumstances, will be accepted to enable a party possessing a Policy on the life of another to guard against the possibility of its being vitiated by the Life departing beyond limits, or by any other cause.

Thirty Days are allowed for the Payment of Premiums after the day on which they respectively

Additional Advantages offered to Lives Assured with this Company at St. John, N. B.

I.—RESIDENCE.—Persons assured for the whole term of life will have permission, without the payment of extra Premium, to reside in any part of Europe, or in any place in North America to the north of 38 degrees of North Latitude, but not to the westward of the Mississippi River.

II.—VOYAGES.—They will also, if not sea-farring by profession, be allowed, without any extra charge—

To cross and re-cross the Atlantic Ocean, in steamers or first-class sailing-vessels;

To pass from any part of Europe to any other, or from any part of North America to another, within the limits above specified; also,

To pass to and from, but not to reside in any place which shall not be further south than 35 degree of North Latitude, but not to the westward of the Mississippi River.

☞ *Office, corner of Prince William street and the Market-square in St. John.*

SHARP'S Family Medicines

NOTICE TO THE PUBLIC.
OF INTEREST TO ALL.
Sharp's Celebrated Family Medicines and Preparations.

SHARP'S COMPOUND ALKALINE INFUSION OF SARSAPARILLA.—Sarsaparilla has of late years been much used, and with great success, in cases of Chronic Rheumatism, as an alternative in Scrofulous affections, Scurvy, Obstinate, Cutaneous Eruptions, Indolent Ulcers, Diseases of the Periosteum and Bone, attended with obscure pains, wasting the flesh, tenderness of the part, tumors and nodes unconnected with Syphilis, and in that state of the habit known among medical men under the term of Cachexia, but which is not easy to define. In such cases Sarsaparilla proves a most valuable remedy, and often effects a cure when all other remedies have long been administered in vain, and when the diseased state of the system has been of many years duration.

This article, prepared by John G. Sharp, has performed numerous and most astonishing cures of persons who have for years been festered with sores from head to feet, and others who have been sent up with Mercurial Rheumatism, which they had been laid up with for 2 or 3 years. Prepared and sold by John G. Sharp, Member of the Pharmaceutical Society of Great Britain. N. B.—Dose, a Wine Glass full, three times daily.

SHARP'S BALSAM of HOARHOUND AND ANISEED, for Coughs, Colds, Shortness of Breath, Asthma, &c.

This excellent medicine has the extraordinary property of immediately relieving Coughs, Colds, Hoarseness, Difficulty of Breathing, and Huskiness of the Throat. It operates by dissolving the congealed phlegm, and causing free expectoration.

Persons who are troubled with that unpleasant tickling in the Throat which deprives them of rest night after night, by the incessant cough which it provokes, will by taking one dose find immediate relief; and one bottle in most cases will effect a cure. Sold in bottles at 1s. 6d. to 2s. 6d. each.—Prepared by John G. Sharp, member of the Pharmaceutical Society of Great Britain, Dock street, St. John, N. B.

Sharp's Tincture of Myrrh and Borax; prepared with Eau de Cologne.

This article is excellent for washing and refreshing the mouth, and alleviating Rheumatic Pains which are often mistaken for the Tooth-ache. It is composed of choice Turkey Myrrh, Camphor and Eau de Cologne. Prepared by John G. Sharpe Chemist, St. John, N. B. Sold in bottles at 2s. 6d each.

COCOA NUT OIL FOR THE HAIR.

This is one of the best articles ever offered to the public, for *cleanting, strengthening*, and *promoting* the growth of the Hair. Sold in pots at 1s, 3d, 1s 2s. 6d. each. Prepared only by J. G. SHARP, Chemist, &c., St. John, New Brunswick.

Sharp's Camphorated Tooth Powder is superior to, and more agreeable than any other Dentifrice, for beautifying the Teeth and Gums. It removes Tartar with injuring the enamel of the Teeth, giving them a beautiful Pearly appearance. Prepared by JOHN G. SHARP, at 1s 3d and 2s 6d per Box.

Sharp's Oriental Hair Wash, for restoring, beautifying, cleansing, and preserving the Hair.

This article is of unfailing efficacy for preserving Baldness, for aiding the Growth of the Hair to an extent surpassing belief. Prepared by JOHN G. SHARP, Chemist and Druggist. (Sold in bottles at 2s. 6d. each.)

Also, Sharp's Nutritive Cream, for the Hair.—This Cream possesses the properties of promoting and strengthening the growth of the Hair, giving it a glossy appearance, rendering the most indisposible Hair perfectly pliable, and keeping it in strong Curl during damp weather or violent exercise, and preventing an accumulation of Scurf upon the Head. Prepared only by JOHN G. SHARP. Sold it bottles at 1s 3d. each.

To the Ladies.

Sharp's Celebrated Kalydor, for the Complexion

By applying the KALYDOR copiously, several times a day, and by letting it remain on, it will radically cure all Eruptions, Tetters, Ring Worms, Inflamed Eyes, Burns, Scalds, &c., &c.

Ladies suckling will find it an excellent remedy for allaying inflammation—cooling and refreshing the infant's mouth. It being perfectly innocent, the most delicate lady or child may use it with safety.

GENTLEMEN after shaving by applying the Kalydor and letting it remain on the face, will find it allay the irritation and smarting pain, and render the skin soft and pleasant. Prepared and sold by JOHN G. SHAP, Chemist, Saint John, N. B.

Sold in Bottles at 2s. 6d. each.

Bug Poison.

"The Dead Shot" Bug Poison—To those who are afflicted with these crawling, biting, and bothering tormentors of our nightly rest, the subscriber would humbly recommend this article one thorough application of which will exterminate them forever from your premises. Prepared by John G. Sharp, Chemist. Sold in Bottles at 1s. 3d. to 2s. 6d. each.

Sharp's celebrated vermin and insect EXTERMINATOR! for the destruction of Rats and Mice, Cockroaches, Beetles, Crickets, Bugs, &c., &c.

The "EXTERMINATOR" is designed to supersede the use of Common Poisons, by furnishing a preparation convenient and safe to sell, at the same time attractive to the Vermin.

Directions for using the "Exterminator."—Roll it up in pieces the size of a small marble, and throw it into their holes; or spread it on fresh baked bread, with a thin piece of wood, and cut it into small pieces and distribute it about the places they frequent.

Put up and Sold by the Proprietor, in boxes at 1s. 3d. to 2 6d. each.

☞ None genuine unless signed

EXHIBITION
AT THE
NORTH AMERICAN CLOTHING STORE
SOUTH SIDE KING STREET.

HAS received his Spring importations, per ships "*Saint John*" from Glasgow, "*Alcione*" and "*Devon*" from Liverpool, "*Sir Harry Smith*" and "*Faside*" from London, and late arrivals from Boston and New York, and having leased the apartments over the Shop, which he has fitted up as Warerooms, he has therefore been enabled by his additional room to enter more extensively into the business than formerly. He would therefore respectfully solicit the attention of his numerous friends and the public and general, to his very large and varied assortment of CLOTHING, &c., which he offers by Wholesale and Retail, at unusually low prices, and which cannot be competed with by others in the trade.

R. H. not considering it necessary to state the number or quantity of each particular Garment in his Establishment, or their various prices, would merely say that he has the *largest* stock of Clothing perhaps ever offered for sale in this market, and of any quality and price that the purchaser may require.

The STOCK consists of superfine Broad Cloths, Cassimeres, Doeskins, Tweeds, Russel Cords Cassinett, Shepherd's Plaids, Sattinetts, Moleskins, Cantoons, Gambroons, &c.

VESTINGS—In black and rich fancy Satins and Velvets, white Quiltings, Barathea, &c. &c.

COATS—Superfine and blue Cloth, in dress, frock Shooting, and other fashionable styles.

VESTS—An immense stock of all qualities and materials.

PANTS—A great assortment, in all the various materials worn at present.

In the *Furnishing Department* will be found in very great variety—Gent's. White Shirts; fancy Regatta ditto; white and fancy Regatta Shirt Fronts and Collars; lamb's wool, merino and cotton Shirts and Drawers; Flannel Shirts and Drawers; silk and satin neck and pocket Handkerchiefs; satin Scarfs and Stocks; Opera and Demi Ties; Folded Muslin Cravats; Braces; Umbrellas; carpet bags; Cloth, Hair, and Tooth Brushes; Shaving Boxes and Brushes; Gloves; Hosiery, &c.

Cloth and Glazed Caps; FELT HATS.

R. HUNTER.

N. B.—The Clothing having been all cut on the premises and made up by the best workmen the City can supply, cannot fail in giving general satisfaction.

Gent's who would prefer selecting the Cloth can have their garments made to order in the most fashionable style, at the shortest notice.

☞ No second price. All goods marked in plain figures. R. H. May 21, 1852.
