Miscellaneous.

—The population of Manitoba is increasing at the rate of about one thousand per week.

APPOINTMENT.—D. I. Morse, Esq., of Bear River, has lately received the appointment of Custom-house Officer for that port, official duties to commence on the first of the coming month.

—Don Augustin Edwards, a Yankee who has just died in Chili, left a fortune of $25,000,000. He had a monoply of the copper mines of the country.

—More than ten thousand men were provided with employment by the Young Men's Christian Associations in the United States during the last year.

—The mean height of an American Indian is 67.834 inches; of the American white man, 67.672; Scotch, 67.066; English, 66.575; Russian, 66.393; French, 66.277; Mexican, 66.110.

—A petrified crocodile, forty-six feet in length, has been exumed near Como Station, on the Union Pacific Railroad, and shipped to Yale College. The discoverers received two thousand dollars for their prize.

—Valuable discoveries have just been made in the Canadian portion of the Lake Superior region, tending to show that it is even richer in mineral deposits than has been supposed. The Silver Islet Company have struck "ile" in a new silver lode of remarkable richness. Copper mining is proving profitable.

—Something which is generally acknowledged to be entirely new in the experience of Baptist Ministers has befallen the Rev. James Trimble, who resided in New Brunswick until within two or years. He and his two sisters have become heirs to a large property in Ireland by the death of a relative, $450,000; the sum they are likely to obtain.—*Hx. Reporter.*

—A caravan passing through Dallas, Oregon, on its way from Portland to Palouse, attracted considerable attention the other day on account of its size, which was further increased, when it was discovered that the large body of persons comprising it were all of one family. There were the father, mother and 19 children, including six sets of twins, the oldest of the children being 21 years of age.

—A new use has been found for gun-cotton in warfare. Hereafter it is to be employed for disabling the guns of the enemy, and will take the place of the spike armorer's hammer. A slab of gun-cotton, simply laid upon the muzzle of a gun and detonated, so injures and distorts the weapon as to render it evermore useless. This method is much superior to the old one of driving a spike into the vent, as in the latter case the cannon could, in a short time, be again made ready for service.

—An interesting suit has recently been tried and decided in London. A Mr. Thistlewayte was sued by a firm of dressmakers for $5000 worth of dresses made for his wife. In the trial it came out that he allowed his wife $2500 a year for her personal expenses, on the distinct understanding that she was to contract no bills. This promise she deliberately broke and during the past eight years has run into debt to the amount of over $100,000. The Judge decided that Mr. Thistlewayte was not responsible for his wife's debts under the circumstances.

FIRE AND EXPLOSION IN HANTS COUNTY.

A house at Summerville, belonging to M. B. Grant, Esq., and occupied by Joseph Malcolm, was burned on Wednesday morning. The house caught fire from the upper chamber, and owing to the fact of there being 14 kegs of powder stowed away in the upper part of the house, it was impossible, with any degree of safety, to attempt saving anything above stairs. Twenty minutes after the place was discovered on fire the powder blew up, carrying roof and everything with it, some parts falling 100 feet off. Malcom's loss will be $200 and Mr. Grant's about $1000. No insurance. Before the fire had reached the powder room most everything moveable was removed from the rooms below.—*Windsor Mail.*

—A fact mentioned in the "Edinburgh Review" in an article headed "The Present and the Future of the East," is highly instructive as to the tolerance practised by Russia in the matters of religion. The writer remarks that no minister of another faith than that of the Orthodox Church caa even enter the Russian dominions without the express permission of the Emperor. Just before the late war the Anglican Bishop of Gibraltar wanted to proceed to Odessa to confirm the children of British subjects residing there, but the necessary *visa* of his passport was peremptorily refused, although the British Ambassador at Constantinople personally exerted himself to obtain it. General Ignatieff said he had not the power to grant the *visa* necessary to enter Russia to a foreign clergyman.

—The British Admiralty are making extensive arrangements for the purpose of opposing Russia's scheme of establishing a fleet of cruisers to prey upon British commerce. Naval centres are to be established in the Bahamas and at Newfoundland in the Atlantic and at Victoria and Fiji in the Pacific. At each of these stations the fleet will consist of three turret ships and three gunboats of the heaviest armament, two of the latter unarmored. Cruisers have been put in commission for special service. The *Boadicea*, an unarmed corvette, with a capacity of steaming fourteen knots an hour, has just been commissioned and will probably proceed to the Bahamas. The admiralty have also under consideration the adoption of a patent propellor of which marvels are related. It is claimed that this invention can, in a few hours, be applied to any steamery and by it the swiftness of the vessel will be increased one-sixth.

AMERICAN SYMPATHY.

"The good wishes of the American people are heartily on the side of Russia in the impending conflict," says the New York *Herald*, with a degree of confidence quite assuring to those who really sympathize with her. But the American people is a numerous body, of which a very large part has never forgotten that England is the mother country and would turn against her with the greatest reluctance There are strong ties in a common language and literature, and inherited affections would also contribute to make it impossible in any event for the American people to throw their sympathies against her in such a war as appears to be impending.

STARVATION IN LABRADOR.

Sad accounts are received at Quebec of the sufferings of the people of Labrador. The fisheries failed them last fall, and the traders, who give them provisions in barter for their fish and oil, abandoned the territory, not caring to let the wretched people have goods on credit. Thus before winter set in the whole population was left to starve or subsist until summer on fish offal, for crops are impossible on that sterile shore. While families have lived through the winter on rotten, half-frozen carcasses of seals driven ashore by the ice floes, others have kept body and soul together by devouring the nauseous flesh of the black *loupi main*, a spieces of seal which in prosperous times would be shunned even by the dogs. Many deaths have occured from sheer starvation. Of five familes containing forty souls, in one settlement, only five survived. Scurvy is epidemic. The women haunts the shore like spectres picking up the dead seals, while the men and dogs gather sea moss or shell fish.

THE QUEEN'S BIRTHDAY IN ANNAPOLIS.

A large party of excursionists, accompanied by the city cornet band, came over from St. John by the steamer Empress. The band marched up the street and formed on the Court House square. Several fine selections of music were played to the intense delight of our citizens, especially those who are capable of appreciating harmony of a high order. Our visitors were much pleased with their stroll about town and vicinity, and all expressed themselves in terms of admiration of our scenery, as well as of the cordial manner in which they were everywhere received. At six o'clock they left for home; and Annapolis began to prepare for the evening's entertainment, to be given by our own cornet band. By eight o'clock the hall was crowded by an eager and expectant audience. It is impossible at this late hour to do full justice to the performance of the evening. The Ethiopian characters were admirably sustained by Messrs. Edwards and Roach, assisted from time to time by Messrs Cook, Fleet and Hazlewood. Very fine songs were sung by Messrs. Spence, Cook, and Hazlewood and others; while the orchestral performances were carried out by talent of the highest order. As space will not admit of our entering into details, suffice it to say that the whole concert with its incisive local hints, and side-splitting farces, was, for both fun and finance, a grand success.—*Annapolis Journal 25th inst.*

GALT (ONT.) May 22.—A lamentable accident happened on the Grand River, in this town, about 8 o'clock to-night. The small pleasure steamer Empress of India was out with a pleasure party of about 18 persons, when the steamer become unmanageable and capsized. All the passengers on board were plunged into the river below. As yet only two bodies have been recovered.

☞ The rare phenomenon of St. Elmo's fire was observed in several localities in the Harz Mountains last month. The air was so laden with electricity that canes held aloft emitted from their points light-blue flames five inches in length and three in breadth. In one place during a storm of mingled snow and rain, the ends of the branches in an entire grove were surmounted by flames of from four or five inches in length.

☞ A Beet Sugar Factory is to be started at Portland, Maine. The State has subsidized the industry. Beets which are grown there yield from 9 50 to 12.68 per cent. of sugar. It is a non-exhausting crop, and the pulp and tops are used for feeding, being a great indirect benefit to the farmer. Thirty tons to the acre are raised in France; in Maine they do not hope at first to exceed ten or fifteen tons. The beets are delivered by farmers at one of the drying kilns, 8 of which are to be established in different parts of the State.

☞ A well-to-do farmer in Ulster county, N. Y., who had heard good reports of a widow in Kingston, harnessed up his span of horses and drove to her house one day last week. There he introduced himself, and she having also heard good reports of him, welcomed him. They went out for a drive, returned to dinner, went out for another drive, and returned to supper man and wife. They had never seen or communicated with each other before that day.

☞ One of the most terrible calamities of which we ever heard is thus recorded by the *Christian Index* (Georgia):—

Last week two little children of Henry Perry, of Lumpkin County, were playing in the yard, when one of them struck the other on the head with the edge of a sharp hatchet and then ran to his mother (who, at the time was drawing a bucket of water) telling her what he had done. The mother alarmed at the news let go the handle of the windlass which struck the little child in the head killing him instantly. When she reached the other child it was dead also.

THE MYSTERIES OF THE SHAD.

It is well known that the shad like the salmon, spends a considerable part of his life nobody knows where. Two fish experts, who had been all their life in the shad business, testified on the subject before a committee of the Connecticut Legislature this year. One said the shad came to Connecticut from Florida by the way of Hell Gate, and the other said a Connecticut river shad never went twenty miles south of Saybrook. Neither of them knew positively anything about it. The fish appear in the spring, in swarms, fat and lively; but in the winter not a shad, dead or alive, is to be found in the rivers or in the sea. They are in their submarine feeding-ground somewhere.

Telegraphic News.

EUROPE.

PARIS, May 26.—*Journal des Debats* says that Schouvaloff's mission has led to a most satisfactory result. Russia consents to lay the treaty before Congress. All powers have adhered to the proposal, and Congress will meet in Berlin on June eleventh.

LONDON, May 26.—The *Observer* says the foregoing, to say the least, is far in advance of the present position of negotiations. The *Observer* has reason to believe that Schouvaloff is not authorized to propose forthwith any very comprehensive modification of the treaty. His proposals, however, deserve careful consideration, and may ultimately form the basis of settlement, prospects of which are still undiminished.

ST. PETERSBURG, May 26.—The Russian Government has decided to abolish jury trials in cases of attempted assessination for political motives and acts of violence against the officials.

CONSTANTINOPLE, May 26.—Mr. Layard, British ambassador, received a telegram to-day from London which he communicated to the Porte. It is said to be of a favorable character.

Mahoud Dahmoud Pasha has been appointed Minister of War.

ATHENS, May 26.—The British Consul at Canea, Crete, was recently fired at by the Turks but was not injured.

LAVALETTA, Malta, May 25.—Four more transports with Indian troops have arrived.

LONDON, May 27. — The *Standard* announces that the Cabinet will meet again to-day. The *Standard* ridicules the report in the *Journal des Debates*, finding the definate date for the assembling of Congress, although it says there is some ground for believing that the main obstacle to its meeting is in course of disappearance.

A special to the *Post* from Berlin says it is reported that Count Schouvaloff has telegraphed for fuller powers.

MADRID, May 26.—The Government has decided to authorize the return of Captain General Jovellar from Cuba, leaving General Martinez Campos in supreme military and civil command, with power to execute the proposed reforms.

LONDON, May 27. — Accounts received from every capital in Europe concure as to the main feature of the political news namely, certainty of the early meeting of Congress; but considerable anxiety is apparent about the military preparations and the siturtion before Constantsnople.

The attiude of Austria especially creates apprehension at St. Petersburg, and this will not be allayed by the occupation of Adakalos, which it Austria's first ovetr demonstration against Russia's settlement of the Eastern question. Russia having promised that island to Servia. Servia is certain not to get it unles the Congress awards it to her.

Great secrecy is still maintained at St. Petersburg about the progress of negotiations. Unofficial press, the New Times, the Globe and the Russkonia, are beginning to attack the peaceful utterances of the Agence Russe and Journal de St. Petersburg.

A despatch to the "Standard" from Copenhagen states that four Russian steamers, two of them ironclads, passed through the Sound within the week. Several others are expected to follow.

UNITED STATES.

NEW YORK, May 25.—A New York *Herald* special says peace negotiations are regarded in a fair way of satisfactory conclusion. After each council of ministers the telegraph was kept actively at work for several hours. Gen. Ignatieff says the Treaty of San Stefano is drawn up in such a manner that it will lead to all manner of concessions. He regards the meeting of Congress as certain. He probably will attend it instead of Prince Gortschakoff.

It is said that information was received at the bureau of foreign affairs that papers were discovered at Pera implicating Midhat Pasha and Minister Layard in the recent attempt to replace Murad on the throne.

NEW YORK, May 25.—Two hostlers were killed by the falling of an oat bin of the Third Avenue stables, and another had his arms broken.

PHILADELPHIA, PA., May 26.—Six accredited agents of the Russian Government reached here from New York late on last Thursday night, and are occupying the best rooms at Guy's Hotel. They are accompanied by interpreters as they do not speak English. They visited Cramp's shipyard and inspected the preparation on the State of California and Columbus. It is said they will visit Roach's shipyard at Chester to-day. They keep very quiet and refuse to talk or allow interpretors to say a word.

NEW YORK, May 25.—Nine buildings and their contents were burned at Suncook, N. H., yesterday. Loss $60,000.

The whole militia force of Pennsylvania is being placed on war footing in anticipation of strikes reported to be imminent.

A Cleveland despatch says the revenue cutter, Commodore Perry, left for a cruise along the Canadian shores. This, with the fact that the steamer Michigan received on board at Erie a Gatling gun and ammunition caused belief that both are on the lookout for Fenians.

Gold 101.

Additional intelligence about the tornado of Thursday night in Wisconsin and Illinois indicates that the loss of life was greater than reported. Between Mount Vernon and Oregon, in the farmer state the tornado was very severe, and near Paoli several houses were demolished and three or four persons killed. It has been ascertained that from twelve to eighteen lives were lost between Mount Vernon and Paoli. In the suburbs of Chicago a farm house was blown down and a mother and her two children killed, the latter being hurled through the air, falling dead twenty rods away.

Enjoy Life.

What a truly beautiful world we live in! Nature gives us grandeur of mountains, glens and oceans, and thousands of means for enjoyment. We can desire no further or better when in perfect health; but how often the majority of the people feel like giving it up disheartened, discouraged and worn out with disease, when there is no occasion for this feeling, as every sufferer can easily obtain satisfactory proof that Green's August Flower will make them as free from disease as when born. Dyspepsia and Liver Complaint is the direct cause of seventy-five per cent of such maladies as Biliousness, Indigestion, Sick Headache, Costiveness, Nervous Prostration, Dizziness of the Head, Palpitation of the Heart, and other distressing symptoms. Three doses of August Flower will prove its wonderful effect. Sample bottles, 10 cents. Try it.

BUNIONS, CORNS, unsightly bunches on either feet or hands, are removed without pain or discolorization, by GILES' LINIMENT IODIDE OF AMMONIA; it never fails.

For sale by Dr. Joseph Dennison, Bridgetown.

COMMUNISM IN THE UNITED STATES.

Within the past year we have seen an organized insurrection arresting commerce and destroying property in many States simultaneously, and have also seen a so-called Labor or National party growing with remarkable rapidity. The Communist does the scheming. The Trade Unionist and political demagogue, more or less unconsciously, do the work which the Communist plans. It is not safe to overlook the fact that the demagogue and the Unionist appeal to the popular prejudices which have gained great force within the past few years. In the mines, in the iron, cotton and woollen mills, in the shoe shops, and the tobacco factories, and on the railways, efforts have been made, with very great success, to excite and intensify antagonism between labor and capital; the misconduct of some bahks and insurance companies, and the great prosperity of others have alike been used to arouse hostility; the debt and taxes have been swelled until the bondholder seems to the unthinking a public enemy; and the legislative warfare upon transporting companies has prompted them to combinations which threaten the profits of the producer and the freedom of commerce. All these things conspire with the general prostration of business to prepare the minds of men for rash and dangerous counsels. Upon this vast body of inflammable material the Communist has worked, thus far the more successfully because there has been a general incredulity among the order-loving and property-owning classes. A telegram from Chicago states that secret labor organizations, numbering 3,000 or 4,000 men have been armed, and for some weeks have been drilling in the city. There is little attempt to disguise the purposes of these organizations in this country. Sheltered by freedom, they are here to destroy freedom. Here the branded enemies of society no longer shadowed by the police and awed by the armies of despotic governments, plot with impunity, organize freely, and drill at leisure, use the ballot to create in the chief cities such officials and such police as may suit them, employ the trades unions to sweep into their schemes many of the better sort of workmen, and thus prepare for open warfare against social order and civilized society. It is high time to give this matter serious attention. Men who love order, or have property to lose, cannot afford to treat with indifference the steady advance of Communism in this country.—*N. Y. Tribune.*

INVASION OF RUSSIA FROM INDIA.—The idea of pitting Indians against Russians did not come first from either India or England. The threat of a Russian invasion of India has been more than once uttered. India, indeed, has been counted upon as the point at which England was most likely to be found vulnerable. Why, it may be fairly asked, should Russia be allowed a monopoly in this respect. The prospect of an Indian invasion of Russia is at least as likely to be realized by the one as the other is, and it is justified in advance by language which the Russians have allowed themselves to indulge in pretty freely.—*London Times.*

Electricity.

Thomas' Excelsior Eclectric Oil.

Worth Ten Times its Weight in Gold—Pain cannot stay where it is used?

It is the cheapest medicine ever made. One dose cures common sore throat. One bottle has cured Bronchitis. Fifty cents' worth has cured an old standing cough. It positively cures catarrh, asthma, and croup. Fifty cents' worth has cured crick in the back, and the same quantity lame back of eight years' standing. It cures swelled neck, tumors, rhematism, neuralgia, contraction of the muscles, stiff joints, spinal complaints, and pain and soreness in any part, no matter where it may be, nor from what cause it may arise, it always does you good. Twenty-five cents' worth has cured bad cases of chronic and bloody dysentry. One tea-spoonful cures colic in fifteen minutes. It will cure any case of piles it is possible to cure. Six or eight applications is warranted to cure any case of exorcitated nipples and inflamed breast. For bruises, if applied often and bound up, there is never the slightest discoloration to the skin. It stops the pain as soon as applied. Cures frosted feet, boils, warts, corns, and wounds of every description on man or beast.

BEWARE OF IMITATIONS.—Ask for Dr. Thomas' Eclectric Oil. See that the signature of *S. N. Thomas* is on the wrapper, and the names of Northrop & Lyman are blown in the bottle, and *Take no other.* Sold by all medicine dealers. Price 25 cts. NORTHROP & LYMAN, Toronto, Ont., Proprietors for the Dominion.

Note.—*Eclectric*—Selected and Electrized.

For sale by W. W. CHESLEY, Bridgetown, N. S.

The highest market prices given.

GEORGE MURDOCH.

To the Electors of Annapolis County.

AS the time is approaching when you will be called upon to deposit your ballots for a Representative to the Local Legislature, I respectfully offer myself a candidate for your suffrages.

Party politics being at the present time a dead issue, it becomes our duty to look more especially to our local interests. I, therefore, pledge myself, if elected, to give my strict attention to the *Agricultural, Manufacturing* and *Industrial* interests of this Province and County. I further pledge myself not to be a follower of any political intriguer, and will endeavor to the best of my ability to discountenance any combination of merchants in interfering with the free expression of the farmer at the polls or otherwise.

The farmer is the provider; he furnishes the raw material which is at the basis of human progress.

Still further, the Agricultural interest pays four-fifths of the taxes of this County, and the Agricultural class, more than any other, must defend our country in case of an invasion. I ask, "why should not the farmers of this Agricultural County demand and have their just rights—in electing an Agriculturist to represent them in the Local Parliament?" I also call upon the volunteers of this County to stand by their commander.

I have the honor to be,
Gentleman,
Your obedient servant,
W. E. STARRATT.

PIANOS AND ORGANS.

THE
ROGER'S UPRIGHT PIANO.

THIS INSTRUMENTS IS CONSTRUCTED ON ENTIRELY NEW PRINCIPLES, and the most earnest and careful attention is called to the *Rifleer Patent Iron Tuning Arrangement*, consisting of a stick, *ching-pin, set-screw*, held in place by a block or lock cast on the iron frame, by which positive accuracy of pitch and reliability of tune are attained. It is not only capable of being tuned *perfectly*, more easily and readily than any other piano, but after the stretch is once out of the string there is no possible chance for the instrument to get out of tune.

Having control of the sale of these pianos in the Maritime Provinces I am able to furnish them as low as any FIRST CLASS Piano can be purchased. Illustrated Circulars furnished on application.

THE MODEL PIANO

This Piano is designed for those who have not room for a large piano or cannot afford to spend $600 or $400 in the purchase of an instrument. They are about the size of the ordinary cabinet organ. The cases are made of Walnut or Rosewood finish.

It has a compass of 5½ Octaves. Scale A to C. Full Iron Frame, strongly braced in rear, and are first-class in ever respect.

Prices from $175.00, upwards.

The W. P. Emerson
Square and Upright Pianos.

These Pianos are first-class in every respect. I can furnish a 7½ Ontave, four-round corner piano for

$800 and upwards.

The Geo. A. Prince,
The Mason & Hamlin,
and the Dominion Organ.
at lowest prices.

A GOOD DOUBLE REED ORGAN FOR $100.
A Ten Stop Organ for $125.
A Very Elegant tri-reed Organ for $150.

Diphtheria Conquered!

UNPARALLELED SUCCESS
—OF—
DR. J. D. DAVIS'
NEWLY DISCOVERED REMEDIES & ORIGINAL METHOD OF TREATMENT.

FACTS FOR PEOPLE TO CONSIDER.

5000 CASES treated during the past twenty years; not one failure when taken in its first stages. Nine-tenths cured when taken in its advanced stages.

Dr. J. D. Davis will pay one thousand dollars for every case of Diphtheria in its first stages that he cannot cure.

For the small sum of two dollars Dr. Davis will send to any address, with directions, medicines that never failed to cure Diphtheria when taken in its early stages.

N. B.—The medicine may be obtained at the office of this paper.
