Teachers of District No 10.

I wish you to notice the following proposed changes for next summer. By permission of the C. B. I intend to spend the term in meeting you at convenient centres, in Teachers Institutes, for the purpose of studying more practically the rudiments of Natural Science as laid down in the C. S. Board, and generally, best methods of teaching all subjects. The Institutes will be carried on somewhat after the model of the Summer School of Science. Where an instructor can be found, lessons will be given in the Tonic Sol Fa method. Circulars naming the different stations and giving full information will be sent to teachers about May 1st. To facilitate my plan, you will oblige me, by sending along with your winter returns, the fullest information possible as to what section you are removing, your successor's name, and names of teachers in surrounding schools. As this work will occupy the greater part of the summer, my visitation of schools will be confined to those whose teachers do not attend the Institutes.

Our appeal to the teachers of Cumberland and West Colchester, on behalf of the "Children's Relief Fund," in the March REVIEW, has met with a very generous, if not general response. Many teachers, because their schools can give only a small sum, are deterred from sending it. I trust that such a condition of things will not hinder their co-operation. The principle of the giving, in the largest and smallest sum, is the same. If each school averages but one dollar, we will have a respectable fund.

Two of these contributions were raised before this fund was proposed. With these exceptions, Acadia Mines was the first received. I have to thank the teachers in Hants who are helping us. Will not every school in my District earn the pleasure of saying that it did something for the orphan children of Springhill?

Yours, E. J. LAY.
