(Atlantic Notice No. 50.)

All bearings are true unless otherwise noted, are magnetic and are given from seaward; miles are nautical miles, heights are above high water, and all depths are at mean low water.

New Brunswick—(331) Northumberland Strait—Richibucto Harbor Entrance—South Beach—Amended Particulars of Range Lights.

With reference to notice to mariners No. 88 of 1901 and No. 44 (163) of 1902, the following additional information respecting the two pairs of range lights on the south beach at the entrance to Richibucto harbor is compiled from a survey made on the 8th July, 1902:

Bar Range—The bearing of the outer (Bar) range is S. 8½ deg. W. instead of S. 16½ deg. W. as formerly stated; and the front tower stands S. 52½ deg. E. 2490 feet from the front or main lighthouse of the old range, discontinued in 1901. The position of the front tower, taken from Admiralty chart No. 2199 is: Lat., N. 46 deg., 42 min. 39 sec.; lon., W. 64 deg. 45 min. 42 sec.

Channel Range—The channel range lights on the western end of the south beach are fixed white lights, shown from seventh order dioptric lanterns hoisted on white masts, having white sheds at their bases. Both lights should be visible 5 miles from all points of approach by water.

The front light mast stands beside the most westerly lobster factory stage on the north shore of the south beach, at a point distant 6260 feet N. 64½ deg. W. from the front or main lighthouse of the old range. The mast is 30 feet high, and the light is elevated 27 feet above high water mark. Lat. N. 46 deg. 42 min. 45 sec.; lon. W. 64 deg. 47 min. 46 sec.

The back light mast is located at high water mark on the north shore of the south beach, and is distant N. 73 deg. W. 466 feet from the front one. The mast is 35 feet high and the light is elevated 32 feet above high water mark.

Variation in 1902: 22 deg. 20 min. W.
