ST. LAWRENCE MARKET.

Receipts of farm produce were 25 loads of hay, a few dressed hogs, several loads of potatoes, and a few lots of butter, eggs and poultry.

Hay—Twenty-five loads sold at $16 to $17 per ton for new.

Dressed Hogs—Prices ranged from $9 to $9.25 per cwt.

Poultry—Prices unchanged from those given in table.

Butter—Prices unchanged.

Eggs—Prices easier.

Potatoes—Prices ranged from 75c to 95c per bushel, the bulk selling around 75c to 80c.

Seeds—Alsike clover seed prices firmer at $7.30 to $7.50 for No. 1, and $6 to $7 per bushel for No. 2.

Market Notes.

Isaac Reaman, one of the leading farmers from the northeast portion of Markham Township, reports alsike clover generally to be a good crop. Mr. Reaman stated that Geo. Judd, a Markham farmer near Mongolia P.O., had threshed seven acres of alsike clover, that yielded 50 bushels, which he sold at $7.45 per bushel to Todd & Cook of Stouffville. Mr. Reaman also informed The World that Arthur Spofford of Almira had threshed alsike clover that yielded 9 bushels per acre.

The William Rennie & Sons Seed Co. report some excellent samples of alsike clover seed being offered, and prices for such being higher: No. 1 alsike sold at $7.30 to $7.50; No. 2 alsike, $6.50 to $7.

Fine Melons.

The Dawson Commission Co. are receiving daily consignments of the finest Rockyford melons from the Erie Fruit Company of Leamington, for which they are sole agents. These melons are of fine flavor, not being surpassed on the melon market.

Chicago Gossip.

Marshall, Spader & Co. to J. G. Beaty at the close:

After heavy tone early in wheat prices were forced down ⅝c to ¾c under yesterday on pressure from local bears. Wheat has finally responded to general array of bullish news, both from abroad and here and now firm with advance of ⅞c to 1⅛c over yesterday and holding advance. Commission houses been on both sides of the market, but been good buyers on upturn. Prominent house been rather persistent buyers all day and Patten bought some in person. Exporters and foreigners, both bought some wheat here.

Ennis & Stoppani wired to J. L. Mitchell at the close:

Wheat opened fractionally higher this morning, but encountered renewed liquidation early, which resulted in sharp decline to 95c for December. The decline caught many stop orders and, judging from the subsequent action of the market cleared the speculative atmosphere and brought such factors as the strength of the foreign situation to the attention of conservative operators, who were not slow to recognize the value of the same, as was evidenced by the ready absorption of offerings on the decline and gradual upturn, which followed the market, closing 2c above the low point. Foreign news was very strong all day and 1,000,000 bushels of wheat taken for export. Advices from Canada and Northwest were bullish and we look for a higher range of prices.

Corn and Oats—Ruled strong and higher all day, with a good class of buying in evidence. News continued very bullish and the situation is unchanged.

Charles W. Gillett to Peter J. Morgan:

Wheat—Liverpool was ¼c to ½c higher this morning, after closing ¾c higher to-day and effectually checked the selling pressure in our market in the early trading. Export bids were better and numerous as our hard winter wheat had become the cheapest wheat in the world and 86 boat loads were worked for export of all grades. Foreign advices were unanimously bullish, particularly from Russia and unless cables show some uneasiness during the next few days we can scarcely look for much decline in our prices. Our market this morning was sold out and the recovery was a natural reaction. In case of a further advance to-morrow, would think wheat a sale for a turn, as we think it can be bought cheaper next week.

Corn—Market had a sinking spell early, in sympathy with wheat, but as most of the scattered long holdings had been shaken out, crop advices continue bullish, altho the weather has improved. Cash corn is 1½c higher. On any moderate recession the futures should be a purchase.

Oats—Cash market went higher with corn and, covering of shorts, and advanced prices of futures. May oats seem very likely to sell higher.

DEADLOCK IN MARKETS LOOSE STOCK IS SCARCE

Cobalt Central the Only Mining Issue Showing Any Particular Vivacity.

World Office,
Friday Evening, Aug. 30.

The dulness in the mining markets was as pronounced as ever to-day. The few transactions which transpired were the result almost entirely of room trading, the public sharing in a very small percentage. In the active issues there is practically a deadlock. The floating amount of stock is too scarce to permit of short selling with any confidence, and there is too little public interest to warrant speculative purchases among traders for an advance. The dulness shows no immediate signs of being broken, but when it is, the general feeling is that advances, and not recessions, will occur. The activity in Cobalt Central on the New York curb allows of local arbitraging, but this is the only issue at present showing any vivacity in the markets.

BULLETIN NO. 4.

Steady Progress Reported by Foster Management.

Toronto, Aug. 29, 1907.

A car containing 32 tons of No. 1 ore was shipped to Copper Cliff smelter Aug. 23.

A second car of Cobalt ore will be shipped at once to Swansea.

The resignation of Mr. Alder as manager became effective Aug. 20. The workings of the property have been under the charge of Mr. John McDonald since July 15. Seventy-men are employed, and very efficient work is being done—the development going forward rapidly and stoping continued.

The ore being taken from stopes 5 and 8 continues to carry high silver values.

On No. 5 shaft sinking is being done. At a level of 120 feet, exploring work will be done on veins 5 and 1, and in the directoon of 2.

From the level there is every reason to expect that large bodies of ore will be blocked out.

An assay plant is being installed, under the direction of a competent assaye rand chemist.

John G. Kent, President.

STRIKE NOW RELEGATED TO COURTS AND LAWYERS

Mines Are Settling Down to Business and Extreme Optimism Prevails.

COBALT, Aug. 30.—(From the Man on the Spot.)—The strike question no longer appears to be the "all absorbing" question of the day. What interest does attach to it has centred on the legal phases and techicalities raised by the lawyers.

Yesterday morning before the magistrate the union leaders were charged with inciting the men of the Cobalt Lake Mining Co. to strike. The summons issued under the Trade Disputes Act of last session and Barrister Agar of the firm of Slaght, Slaght & Agar pleaded on behalf of the defendants that the charges were too indefinite and also that the prosecution should at once disclose the names of the parties who were interfered with. The court enlarged the case till Wednesday next. In the meantime the nightly meetings on the square are taking place. The authorities have not yet accepted Organizer Roadhouse's challenge to "come in and get their feet wet."

A visit to the celebrated La Rose Mine is always an object lesson of the camp's wonderful wealth.

No mine in the camp is better known and no more wonderful results have been got from any other property in the district of Coleman. Eighty-five men are at work and two shifts kept up. There is a 13-drill day shift and a 5-drill night shift at work. On the night shift ore mucking is being done. The sleeping and boarding capacity of the La Rose is now overtaxed.

Shaft Down 335 Feet.

Their shaft is down 330 or 335 feet and will be continued. At the first level (100 feet) there are to-day the even 1000 feet of drifting done and about 650 feet of cross-cutting.

At the second level 690 feet have been drifted in a straight line and 250 feet of cross-cutting.

Then at the third level 100 feet of driving and 100 feet of cross-cutting have been done to date. In addition three winzes have been sunk, each 100 feet, and another one 35 feet. One is at the first level, two at the second and one is going on the third level.

There have been many changes at this property in the past few months, but the next six months will witness many greater ones.

The north 40 acres are known as J. B. 4 and the old La Rose shaft was sunk here. It is down about 45 feet. The hillside is being cleaned up and this shaft will be sunk to a depth of several hundred feet. It is located in a straight line northeast of the present shaft 950 feet.

It will be made the main shaft. A new plant will be installed and new buildings erected, so that the entire 80 acres will be operated as a first-class mine of its magnitude should be.

The La Rose Company has the largest acreage of any mining company in Cobalt. When the strike was declared Manager Flynn closed down the work at Fisher-Epplitt, Princess and University. These properties are still closed down, also Silver Hill and two other locations that this company owns. Work will be resumed on all of these, but buildings have to be erected and plants installed. The returns for the last car shipped by the La Rose have not yet been received, but the 33 tons sent just previous showed what their rich ore is. The shipment averaged 5850 oz. of silver to the ton. Manager Flynn is a man who has devoted a lot of time to smelting in the west and is well qualified to cope with the difficulties surrounding this question.

The wonderful richness of Cobalt is generally recognized, but that the working mines really know what they have is doubted by many.

Out at the Cochrane they have been finding a large body of white calcite, streaked with quartz and with a dark colored substance thru it that looked like greasy cobalt. The "Man on the Spot" when there last week got Supt. George MacDougall to give him a sample of this as a curio.

Rare Mineral Found.

Sam Cohen has recently been appointed consulting engineer of this property and his observations of the big dump caused him to "get a hunch." The greasy cobalt that impregnated the calcite seemed to him to be "stromeyrite," which is a sulphide of silver and copper, either this or some associated mineral. Prof. Nichol of Queen's has some samples and is making some careful tests. Experts declare it to be a rare mineral and assays have now proved that this large white calcite vein contains very high silver values. Some assays run as high as 2669 ounces of silver to the ton. The chances are that the Cochrane Mine will be making immediate shipments of very high grade ore, carrying thousands of ounces of silver to the ton. The Cochrane adjoins and is directly south of the Temiscaming; then come the Duchess and Progress and the Calverley-Wettlauffer. From the Rochester Mine, where a first-class plant is now in operation and good ore is being sacked, and on down to the second concession of Coleman, some of the best looking properties in the camp are to-day being found.

The Townsite Company has picked up a rich vein near the northeast boundary. It is a narrow vein, but rich in silver. It is one inch wide and was found in the bottom of the 6 ft. trench. It is supposed to be an extension of either the City of Cobalt or a Buffalo vein.

The rich find in the 6th concession of James, already reported in The World, has been followed by a later discovery in either the 2nd or 3rd concession of the same township. A prospector hailed the passing boat at about the 2nd concession of James this week and had a bag of samples. One of these samples contained a large nugget rich in silver. The vein must have been 16 inches in width where the nugget was taken out. Great activity is looked for up the Montreal River this fall.

THREW DYNAMITE IN LAKE.

COBALT, Aug. 30.—While the fire engine was in practice a spark fell into a box containing dynamite, and set fire to some paper. Charles Carr of Milton, Carr & Son, threw the box into the lake, and as it struck the water it exploded. A boat house was wrecked and several boats damaged.
