TO YUKON FROM EDMONTON

Railway by This Route to Open Up Rich New Gold Fields

Hundreds of Miles in Extent—A Rival to the McKenzie-Mann Line From the Pacific Coast Inland—The Bulletin Thinks the Edmonton Route Would be Better Than Any Other.

Now that the Mann-McKenzie Yukon Railway deal is the topic of the day. The Edmonton Bulletin comes out with another long article advocating the construction of a railway through the Northwest Territories to the rich gold fields of the north. In speaking of this route, The Bulletin says that it would run through a channel entirely Canadian, and that the trade of the Yukon would thereby be brought more and more under Canadian control. It would give the foreign trade none of the advantages that the coast road affords, and it would put the shippers of the American ports on the Pacific out of the transportation traffic they are now enjoying. Another feature is that immigration, finding that they have to cross the continent and enter the Yukon from the Pacific, will be inclined to think New York as convenient a port as Montreal, an American transcontinental railway as direct as a Canadian, and therefore an American port on the Pacific as advantageous an outfitting point as a Canadian.

Complete the Road.

The Bulletin concludes as follows: "Beyond the great agricultural belt north of Edmonton is the Peace River, where the gold-bearing lands begin, and which Mr. Ogilvie considers are continuous throughout the intervening six hundred miles to Dawson City. There is every reason to believe that the Liard and Peace Rivers are not far behind the Klondike as gold streams. At one point on the Peace River a party of four miners are reported to be washing up $400 a day. All the rich districts east and southeast of the Klondike will be overrun by miners. The Edmonton road is built now to within a few hundred miles of the verge of this field. Let it be continued."

Good Output on the Lake of Woods.

The World met Mr. Charles H. Heys, who has been practising as an assayer at Rat Portage since January, 1897. During this time Mr. Heys has tested hundreds of samples of auriferous quartz from different parts of the Lake of the Woods district, and has had an exceptional opportunity of forming an opinion as to the value of the ore deposits. In consequence of this experience, Mr. Heys has become quite enthusiastic as to the future of the country. The rule seems to be that the ore deposits increase in width and richness with depth, Mr. Heys cited a number of instances of surface assays not exceeding a dollar or so where at a depth of 10 or 20 feet pay ore was obtained.

Shoal Lake District.

Mr. Heys has a very high opinion of the Shoal Lake (west) district, where the Mikado and other mines are situated. He produced a small bottle containing picked specimens giving gold at the rate of $120,000 per ton. This was obtained in the district mentioned.

"Of course," said Mr. Heys, "you are not to infer that specimens of this value are very plentiful, but comparing the district with other mining fields, and considering the advantages and disadvantages of each, you cannot beat our Ontario territory. The Mikado mine, for instance, is in an advanced state of development, and here the veins have been proven in width and value as they went down, and the same may be said of a number of surrounding locations."

Considering the average value of his assays for a period of six months, Mr. Heys is not surprised to find that capitalists have invested $150,000 in a mill at Keewatin for the treatment of the ores of the region tributary to this point.

BACK FROM THE KLONDIKE.

The Slocan-Cariboo Company Have Secured a Rich Klondike Claim.

Mr. R. A. Cunningham, one of the directors of the Slocan-Cariboo Company, and one of its largest stockholders, has just returned from the Klondike, where he has secured a claim for that company on one of the best creeks in the district. Mr. Cunningham, who is a practical miner of great experience, says of the claim:

"Its placer mining claim No. 38, Calder Creek, situate in the Indian River mining division of the Yukon district, about 28 miles from Dawson City, and reached by trail up Bonanza and Eldorado, thence across the divide.

"I was on this claim the latter part of November, and can say as follows: The creek is not as large, or about the same, as Eldorado. The ground fairly level, but the banks rising gradually on each side. Plenty of timber for all mining purposes on the claim. There has been considerable mining done on several creeks surrounding Calder Creek, amongst them being Wolf, Sulphur, Dominion, Quartz (a continuation of Calder), and on which prospects running from $3.50 to $7 to the pan have been taken, Ophir and the branch prospects well, and runs from 50c to $2 to the pan. On No. 40, Calder, there has been a shaft sunk, and prospects running from 50c to $1.25 have been taken from the gravel, and bed rock had not been reached when I was there, the shaft being down only 15 feet.

"From prospects taken from the surface of ground on No. 38 beside the creek, Mr. Cameron and I obtained from 25c to 40c to the pan.

"I consider that the claim is a good one, and with proper working will prove a good property."

The Slocan-Cariboo are now in treaty with a practical mining captain to work their claim, and are offering for sale some of their treasury stock to supply further funds for its development. The Slocan-Cariboo is the first of the companies with a Toronto directorate which has secured a claim in the Yukon district, and the shareholders are fortunate in securing one in such a rich tract, and of the large dimensions, five times the size of any which can now be located.

Jackfish Bay Syndicate Mining Co. Report

Another evidence of the development of the mineral resources of Ontario is to be found in the report published in another column of the Jackfish Bay Syndicate Mining Company, which more than bears out all we have claimed from time to time as to the vast mineral deposits in this province, which so far have only been scratched. This company have made no noise over their work, but suddenly burst upon the field with a statement of properties and resources thereon which seems almost startling. It is well worth reading, and the names of the directors and officers are a guarantee of careful management and future prosperity which must be gratifying to the fortunate shareholders. The following were elected directors at the annual meeting held last week: C. B. Jackes, A. Ogden, J. M. Stabler, John G. Kent, A. J. Eckardt, R. R. Carroll, D. Lackie, C. R. S. Dimnick, William McGuire, R. S. Perry, G. H. Patterson.

Wants Her Brother and Sister.

Buffalo, Feb. 11.—Mrs. Edward Sherman of London, Ont., has written a letter to Superintendent of Police Bull, asking him to find her brother and sister, whom she has not seen in forty years. Her father's name was Douglass. After his death three children were placed in an orphan asylum. Mrs. Sherman was adopted when she was three years old and was taken to Canada, where she has since lived.

S. Ackerman, commercial traveler, Belleville, writes: "Some years ago I used Dr. Thomas' Eclectric Oil for inflammatory Rheumatism, and three bottles effected a complete cure. I was the whole of one summer unable to move without crutches, and every movement caused excruciating pains. I am now out on the road and exposed to all kinds of weather, but have never been troubled with rheumatism since. I, however, keep a bottle of Dr. Thomas' Oil on hand, and I always recommend it to others as it did so much for me." ed

WEAK MEN, YOUNG or OLD,

suffering from DRAINS, LOSSES, WEAK BACK, IMPOTENCY, VARICOCELE, etc., I say to you as man to man, as physician to patient, DRUGS NEVER CURE. Why not use nature's own simple remedy,

ELECTRICITY?

With my ELECTRIC BELT and SUPPORTING SUSPENSORY I cured 5000 last year. Book, "THREE CLASSES OF MEN," explaining all, sent sealed, free upon request. Or, if you live near by, drop in and consult me free of charge.

(There is but one genuine Electric Belt and that is the Sanden. Don't be deceived by cheap, worthless imitations. I have had 30 years' experience and control patents covering every part of my belt.)

DR. C. T. SANDEN,
156 St. James-St., Montreal, Que.

SHALL CANADA HAVE A MINT

Or Shall the Country's Gold be Turned Into Bars or Ingots

And Then Stamped by the Government So That There May be Some Reliable Source of Information as to the Country's Actual Output?—Rossland vs. the Slocan.

There has been some discussion, both in this country and in England, as to whether or not Canada should have a mint of her own. In the Province of British Columbia and also in Ontario there are a great many advocates of the establishment of such an institution in the Dominion, while some of the British mining experts who have visited this country seem to think that the move would be inadvisable at present.

A petition has been gotten up in British Columbia, where during the last few weeks it has been widely circulated and largely signed. The petition suggests that a charter be given a private mining corporation, to prevent the exportation of gold as a raw material. The petition is addressed to Sir Wilfrid Laurier and the House of Commons, and asserts that $20,000,000 has been taken out of the Klondike district alone, and that therefore, with a view of conserving to the country some proportion of the yellow metal extracted by the miners, the Government should grant the charter asked for. The document goes on to object to the incorporation of Canadian gold into the unsettled money system of the United States and to the depreciating of the purchasing power of every dollar of Canadian gold shipped to the States.

Gold Bars or Ingots.

In a recent article in The London (Eng.) Mining Journal on the gold fields of Ontario and British Columbia, Mr. Edgar Rathbone, an eminent authority on mining matters, refers to the question of a Canadian mint. He says that in connection with the gold production of this country he would suggest that instead of a mint, which he does not consider that Canada requires, it would be a wise provision if Parliament ordained that all gold bars or ingots being officially stamped, as in this way the actual amount of gold produced in the country could always be accurately ascertained.

Refers to the Sultana.

In order to illustrate the injury which may be done to a mining community and indeed to the state at large through the non-enforcement of statistical information by the Government from mine owners, he states that at the present time the largest gold-producing mine in the Province of Ontario, being a private adventure, does not make any public returns of its gold production, nor indeed is it possible to obtain any statistical information as to what the undertaking is doing; so that what might have acted as a valuable object lesson in connection with mining in that district is entirely lost to the whole community.

The Hammond Reef.

In an interview with Mr. James Hammond, published in yesterday's World, it was inadvertently stated that practically nothing had been done towards the development of the Felger-Hammond syndicate property. The fact of the matter is that considerable work is being done on the various locations owned by this syndicate, and that operations on them have totalled in cost about $7000. As regards the Hammond Reef Gold Mining Company Mr. Hammond also wishes it to be stated that B vein sometimes assays $70, but that the ore gives only $3 per ton free milling. None of the E vein ore has been put through the company's mills as yet.

Rossland v. Slocan.

In an article entitled "Slocan v. Rossland" The Spokane Spokesman states that it is becoming the custom whenever the Rossland papers issue any statistics or figures regarding the development of the mines of that camp for the Slocan people to follow up with a statement which contends that their own silvery district is still ahead of the golden Trail district.

As the cost of development in any camp largely affects the output of said camp The World has procured from another source figures which go to put the Slocan in the light of a poor man's camp, as far as the cost of operating goes. In Rossland drifting costs $20, raising $30, and sinking $92, while in the Slocan the respective figures are $8, $10 and $14.

New York Gossip.

McIntyre & Wardwell (John J. Dixon) received the following despatch from New York to-day:

To-day's stock market was again adversely influenced by a revival of disquieting rumors from Washington over the De Lome incident and the Cuban situation. The reports telegraphed yesterday afternoon that the Spanish Government would reconsider the acceptance of De Lome's resignation and recall him, with an apology, for the reflections cast on President McKinley proved to be premature. Nothing of the kind having really occurred, and the situation being the same as yesterday morning, those who bought stocks on this report in the late trading yesterday, believing the incident to have been closed, turned sellers to-day, and the bears put out fresh lines of shorts and resumed the irregular hammering tactics. The fact that to-morrow is a legal holiday in this State and all banks and exchanges will be closed until Monday gave the bears an advantage, as the bulls were disinclined to materially increase their interests pending a definite solution of the De Lome incident. London houses were quiet but steady buyers all the morning, and the demand from this source, with fair support and commission buying, imparted a steady undertone, and later led up to fractional recovery. Wagner Palace Cars stock scored a material advance of nearly 20 points on rumors of consolidation with Pullman Co. Pending a definite solution of the De Lome incident the market is likely to continue irregular.

Henry A. King & Co.'s gossip from New York:

The stock market was irregular to-day, and alternate spots of strength and weakness succeeded each other. There was heavy buying by London long after the usual hours in which arbitrage operations are conducted. The professional trading element, however, was not disposed to carry stock over the double holiday, and many small speculative accounts were liquidated. A sensational feature of the day was the advance of 6¼ per cent. in Met. St. Ry., but half of the advance was lost. Manhattan reacted a point from yesterday but Third-avenue rose 6 per cent. Declines from the early high prices which were made on London support reached 1 per cent. Market stiffened on covering of shorts, and closed fairly steady. Government bonds were ⅛ to ¼ per cent. lower. Railroad bonds were fairly active and irregular.

London Markets Quiet But Good.

New York, Feb. 11.—The Evening Post's financial cable from London says: The stock markets here were quiet but generally good to-day, the feature being a sharp rise in consols, despite dearer money. The buying was good, and significant.

Americans were active, although the dealing was professional. The close was under the best. It is noticed that, however good New York prices are, there is a tendency to sell from there. Louisville and Nashville was bought on reports that the scheme for remodelling the bonded debt had been virtually completed. Grain and cotton have risen to 9d. Argentine and Brazil stocks were good, as also Italian and Turks, on better news in Paris. Mines were firm. There is some reason for doubting whether the Chinese loan negotiations have been finally suspended, although nothing in that line is expected at present. There is a probability of a further issue of Japanese internal bonds here soon, similar to the operation of last year.

The Grand Trunk statement, showing that the entire deficit had been wiped out and that a balance of £10,000 remained, exceeded the most sanguine expectations. The Paris bourse was buoyant and the Berlin market steady.

Cotton Futures.

New York, Feb. 11.—Cotton—Futures closed steady; sales, 240,900 bales. Feb. 6.01, March 6.04, April 6.07, May 6.11, June 6.14, July 6.17, Aug. 6.20, Sept. 6.21, Oct. 6.21, Nov. 6.22, Dec. 6.24.

East Buffalo Cattle Market.

East Buffalo, Feb. 11.—Cattle—Receipts about 5 car loads. Market ruled quiet and slow, only a few odd head being sold.

Hogs—Receipts 40 cars. Demand fair and prices ruled fairly steady. Prime selected light yorkers $4.10 to $4.15, mixed packers' grades $4.17 to $4.25, medium weights and heavy hogs $4.20 to $4.25, roughs $3.50 to $3.65, stags $2.75 to $3.15, pigs $3.25 to $3.35.

Sheep and Lambs—Receipts 32 cars; market weak for lambs, at a shade lower prices. Good handy sheep ruled with a fairly active demand and scarce and firmer. Native lambs, choice to extra, $5.65 to $5.75; fair to good, $5.35 to $5.60; culls to common, $4.75 to $5.25; yearlings, common to choice, $4.75 to $5.35. Native sheep, choice to selected wethers, $4.80 to $5; good to choice mixed sheep, $4.60 to $4.75; common to fair, $4 to $4.50; culls to common sheep, $3 to $3.90.

Only those who have had experience can tell the tortures corns cause. Pain with your boots on, pain with them off—pain night and day; but relief is sure to those who use Holloway's Corn Cure. ed

Radnor.

MINING SHARES

Some six months ago a London syndicate sent out an expert mining engineer to examine and report upon the various properties held by the Great Northern Mining E. & D. Corporation. On the strength of his reports they have arranged to take up the treasury shares at 4 shillings, which is practically par and to undertake the bringing out of subsidiary companies on the London market. The syndicate have guaranteed the necessary funds to push development in the meantime. Considering the phenomenal value of their Michipicoten and Wainapitae properties and their small capitalization, par is really a low value for their shares, particularly in view of the fact that by the bringing out of subsidiary companies in London substantial dividends would be practically secured.

Their method of operating is to secure and partly develop promising prospects, which are then formed into subsidiary companies, which put in the necessary machinery, etc. This method gives the greatest returns for the least risk.

Having purchased a large block of treasury shares on their first issue I am able to offer a few thousand shares for one week at the low price of 50 cents per $1 share, fully paid up and non-assessable.

Write for full particulars to

63 BOX 65, Berlin, Ont.

WANTED.	FOR SALE.
500 War Eagle.	100 Monte Cristo.
500 Iron Mask.	300 Tin Horn.

500 Poorman.	1000 Poorman.

Offering special snap in Northern Bell, any size lots. S. J. SHARP, 63 Yonge-street.

OVER 1 PER CENT. PER MONTH.

The suggestion we made last week has met with so much favor that we repeat it again. The price of the stocks quoted is exceedingly low and we feel very confident that a purchaser of any one of them will make big money. We particularly recommend Gilpin Four at one cent per share and Madonna at 1¾c as splendid purchases. Both companies own good properties, are working steadily and have cash and stock in the Treasury.

On an investment of $500.00 we make the following suggestion, which, at the present rate of dividends of the first three named companies, will yield interest at the rate of over 1 per cent. per month.

No. of Shares.	Stocks.	Price per Share.	Cost.	Commission.
100	ELKTON CONS.	.87	$87.00	$1.50
100	MOON ANCHOR	.97	97.00	1.50
100	GOLD COIN	.93	93.00	1.50
5000	GILPIN FOUR	.01	50.00	Net
5000	MADONNA	.01 3-4	87.50	Net
5000	GREGORY LEASING	.01 1-2	75.00	3.75
			$489.50	$8.25
			8.25	
			$497.75	

Realising the fact that many people would be more inclined to consider mining investments if there was a greater certainty of immediate return, we take the liberty of submitting the above plan, which, we think, is worthy of consideration. The first three named companies are regular monthly dividend payers. Elkton pays 2 cts. per share per month, Moon Anchor 2½ cts. per share per month, Gold Coin 1 ct. per share per month, and it is more than likely that during 1898 the Gold Coin dividend will be increased to 2 and perhaps 3 cts. per month. Also, realizing the fact that purchasers of dividend-paying stocks are not likely to make the tremendous profits that the prospective stocks, having good properties behind them and under good management, present, we have combined the two, showing that on an investment of about $500, a purchaser will be receiving interest on his money to the extent of over 1 per cent. per month and at the same time have a chance of participating in the tremendous profits that are likely to accrue from the first-class prospective stocks we have mentioned. The management of all of them we can guarantee. The total dividends from the first three named companies would amount to $5.50 per month, and the present price of those dividend payers is exceedingly low, and they will no doubt show great deal higher prices in the course of a few months. The prices quoted are the latest market prices we have, but of course it is understood they are subject to fluctuation. We can heartily recommend the three cheaper stocks mentioned as splendid chances for large profits. The above plan can be arranged to suit larger investors, and on an investment of about $1000 we can submit a plan where the immediate return would be at the rate of about 15 per cent. per annum, with the excellent chance of large profits from prospective stocks. For smaller investors, we advise the immediate purchase of Gilpin Four at ONE CENT per share, which we can get in blocks of 500 and over. Madonna is also an excellent chance at 1 3-4 cts. per share. That company owns patented property in the celebrated Cripple Creek District. Gregory Leasing is very closely held, but we think we can get a few blocks at around 1½ cts. per share. Do not delay, but write us at once.

KLONDIKE!

Start From VANCOUVER Because

1. VANCOUVER is the best outfitting point on the coast, goods being considerably cheaper than in the United States.
2. VANCOUVER is the nearest port of departure to the Yukon district.
3. VANCOUVER is the terminus of the Canadian Pacific Railway, whose steamers will start from VANCOUVER this spring.
4. All north-bound steamers call at VANCOUVER.
5. Direct steamers to Yukon ports have now commenced to run from VANCOUVER.
6. VANCOUVER is the only Canadian port where passengers transfer direct from train to steamer.
7. KLONDIKE is in CANADA. OUTFIT IN VANCOUVER AND SAVE 33 PER CENT. CUSTOMS DUTY. 462

W. GODFREY,
President Board of Trade, Vancouver, B.C.
