FARMING AND LIVE STOCK PAGE

FARMING BY THE MOON.

Elsewhere we copy an article on farming by the moon. That the moon's phases have great power over the growth of vegetation, has a firm hold on the convictions of many farmers in Ontario. This is more especially true of some sections of the country an dof older farmers. Only last week, a letter in a Peterboro farm publication on the planting of trees, takes pains to emphasize the importance of tree-planting in the "growth of the moon."

Other men will not sow peas, kill hogs or do any seeding but when the moon is right. They assert their knowledge with all the assurance of one who knows and they will no more think of disobeying this rule than of hauling in grain in a rain storm.

Is it that these old farmers know more about the lunar influences and the secrets of growth than our agricultural colleges and experiment stations? Do we ever see a government report dealing with experiments conducted on the various phases of the moon? Does grain sown in the waning moon equal in productiveness that sown in the growth of the moon?

It is hinted in Holy Writ that man looks to the heavens for signs and has put faith in them, but have we any scientific or religious sanction for a moon guided vegetation? Where is the origin of the belief?

THE SWINE COMMISSION.

Parliament at Ottawa has decided to send a commission to Ireland and Denmark to enquire into and report upon the methods of feeding and marketing, practised by the farmers of these two countries. For some time Canada's pork industry has been falling off and especially in Ontario, an intermittent method of raising hogs has been followed by our farmers. Many of them go heavy with hogs when the prices reach the high standard such as we enjoy to-day, and then by the time they are nicely stocked up, prices fall to what they claim is too low a level for profit.

That there is money to be made in swine raising is contended by many farmers who have been making profits at the business for years. The real problems of to-day's trouble centre around the question of feeds, and the minister has turned the discussion into a wise channel.

IT DRAWS FROM AFAR.

That World advertising in the farm pages pays, is evidenced from the sales made by some of our condensed liners used by the stock men whose letters of success have been received. One advertiser tells us that he has shipped stock to Quebec, Manitoba, New Ontario and the States to World readers. Another writes us that his poultry orders, and he advertises in The World alone, far exceed his supply. Everyone who has anything to sell or buy should put a liner in these pages and watch for results.

OBJECT OF PRUNING.

1. To modify the vigor of the plant.
2. To produce large and better fruit.
3. To keep the plants or trees within manageable shape.
4. To change trees from wood bearing to fruit bearing, and vice versa.
5. To remove superfluous or injured parts.
6. To facilitate spraying and harvesting.
7. To facilitate tillage.
8. To train the tree to some desired form.
9. To remove parts badly infested with insects and disease.

The above points will make us see the importance of pruning and pruning right; far more than we generally realize and practise.—"Southern Fruit Grower."

Bad Fire at London.

LONDON, May 28.—Fire completely gutted the upper storey of the wholesale crockery warehouse of W. J. Reid & Co., 388 Clarence-street, at an early hour this morning, causing a loss of $30,000, covered by insurance.

Was Troubled With Weak Back For Years.

Could Not Perform Household Duties. Doctors Attended Without Avail.

Mrs. Arch. Schnare, Black Point, N.B., writes: "For years I was troubled with weak back. Oftentimes I have lain in bed for days, being scarcely able to turn myself, and I have also been a great sufferer while trying to perform my household duties. I had doctors attending me without avail and tried liniments and plasters, but nothing seemed to do me any good. I was about to give up in despair when my husband induced me to try Doan's Kidney Pills, and after using two boxes I am now well and able to do my work. I am positive Doan's Kidney Pills are all that you claim for them, and I would advise all kidney sufferers to give them a fair trial."

Doan's Kidney Pills are a purely vegetable medicine, realizing quick, permanent relief, without any after ill effects. A medicine that will absolutely cure Backache and all forms of Kidney and Bladder Disease.

A medicine that strengthens the kidneys so that they are enabled to extract the poisonous uric acid from the blood and prevent the chief cause of Rheumatism.

Price 50 cents per box, or 3 for $1.25, at all dealers or The T. Milburn Co., Limited, Toronto, Ont.

In ordering specify "Doan's."

HALLMAN'S HOLSTEIN SALE BRINGS A GOOD AVERAGE

Heavy Rain Interfered With the Attendance, Yet Some Good Prices Were Realized.

BRESLAU, May 28.—A. C. Hallman's sale of Holstein cattle and Tamworth swine took place yesterday and in spite of the rain a fair crowd of eager buyers assembled. The Holsteins were a choice lot and this popular breed of dairy cattle are still in the ascendant in the Ontario farmer's estimation.

Bull No. 2 of the catalog was not offered for sale owing to a misfortune the day before the sale, in which the animal was injured in being taken to his stable.

Heifer calves were much in demand, and prices for these were generally well up to the hundred mark.

The highest priced cow reached the $305 figure. In all thirty-two head were disposed of for the total of $4900.

Mr. Hallman deserves commendation for allowing the sale to continue in the enforced absence of so many good buyers.

PERENNIAL SOW THISTLE

Methods of Dealing With This Persistent Pest.

At an open meeting of the Grange at the town line, Whitby recently, Mr. J. E. Howitt, botanist of the Ontario Agricultural College, outlined his method of dealing with the sow thistle, which farmers of Ontario are being menaced with just now. Wet seasons with insufficient underdrainage militate greatly in favor of this pest.

The methods Mr. Howitt recommends for eradicating the weeds are as follows: First, thoro and frequent spring cultivation; about the middle of June, manure, using about 12 loads per acre. Sow rape in ridges 26 inches apart, using one and one half pounds, Dwarf Essex variety. Get the rape in when the land is moist if possible in order to get it growing ahead of the sow thistle. Cultivate the rape thoroly, until it covers the ground. Follow the rape with a hoe crop the next year.

Second: after taking off a grain crop cultivate thoroly and sow winter rye. The following season cut the rye green or allow it to ripen and put on buckwheat or turnips.

Third: cut clover or grain in June, cultivate frequently and thoroly until fall. The following spring sow clean grain and seed down with clover, cutting the clover in June of the following season, and cultivate thoroly thruout the remainder of the season. This method seemed to meet with the most favorable reception by the audience.

Fourth: a thoro clean summer fallow.

PLANTING "IN THE MOON."

Now that planting time is around, it should be of interest to farmers, suburbanites and others who indulge in these practices to know that there is nothing in the current superstition about planting potatoes and other root crops in certain phases of the moon.

It is current opinion among many farmers that if you plant potatoes in the dark of the moon they will run to tubers, and if in the light of the moon they will run to tops. This is also said to be true of any root crop and it is planted accordingly.

There is usually a basis in fact for any superstition, and the moon superstition was so deep-rooted that a number of experts of the department of agriculture while going around the crop made it their business to study the question and see whether there might be a germ of truth, or, at least, some reason for the general belief that the moon's phases have an effect on animal and vegetable life. They have concluded after patient investigation that the moon myth is one of the comparatively few myths that date back to pure savagery and has absolutely not a scientific leg to stand on.

The field workers of the department have found that at least 75 per cent. of the farmers of the country put in their crops and do a good many other things about the farm governed absolutely by the moon's phases. The agricultural experiment stations all over the country have for years been defying the superstition and raising just as good crops, if not better, when the moon was one way as when it was the other, as farmers do when governed by the lunar light.—Live Stock World.

DISRUPTS.

PARIS, May 28.—The prestige of the general federation of labor has gone to pieces since the collapse of the general strike. M. Neil, the secretary, has resigned, and the more powerful unions have withdrawn with the intention of forming a new confederation that shall be without the revolutionary characteristics of the old one.

A Fish Story.

GALT, May 28.—(Special).—A carp weighing 10 pounds 3 ounces was caught in Grand River this afternoon by J. W. Weldon, and is the biggest fish ever taken here. It may be one of the stock placed in a pond at Doon 20 years ago.

Delegate to Conferences.

Rev. H. S. Magee, associate secretary of temperance and social reform of the Methodist Church, will represent the department at the western conferences. He will then return to Toronto and immediately proceed to Newfoundland, visiting the maritime provinces' conferences on his way back.

Rev. Dr. Chown will attend the central conferences and report on the work of the year.

Galt and Return $1.75 From Toronto.

with twenty-five cents added for admission to annual horse show. Good going via Grand Trunk Railway System June 3, 4 and 5. Return limit June 7, 1909. Secure tickets at the city office, northwest corner King and Yonge-streets. Phone M. 4209.

Toronto Ready For Season.

The steamer Toronto of the Richelieu and Ontario line will leave to-day on a trial spin, preparatory to commencing her summer schedule next Tuesday morning. Both steamers, the Toronto and Kingston, have been thoroly overhauled and cleaned and will commence the summer schedule in fine condition. The Kingston will sail from this port on Wednesday next.

The Farmstead.

It looks like a large acreage of buckwheat.

Annual Farmers' Institute meetings are being held.

Prepare a good corn seed bed. There is plenty of time yet.

It is well to harrow the potato land once every week at least until the plants are up two inches above the ground.

There is a great show of bloom on the fruit trees. The heavy rains this week will offset some of these promises.

Read our condensed ads for bargains and when writing mention The World.

In preparing for corn the better cultivation given now, the less hoeing that will be required later.

Tile drains certainly pay well. More should be done. Chas. Petty of Cherrywood reports a big demand last year for tile, being unable to supply the local demand.

Early varieties of watermelons are the only ones that will mature in this section. Prepare for them special hills six by eight feet apart. Incorporate with the soil four large shovelfuls of rotted manure for each hill. One ounce of seed will plant a dozen hills.

Use plenty of wood ashes on the aster beds and do not overfeed the plants. Set the plants twelve to twenty inches apart, according to the variety. Seed may be sown thrucut this month.

Bordeaux mixture is the best spray to be used in preventing the rot of cherries. The first spray should be applied when the buds begin to swell, the second when the petals of the flowers begin to fall, the third two weeks after the second and the fourth two weeks later. Paris green may be added to the Bordeaux in the last three sprayings, to fight the insect pests as well as the plant diseases at the same time.

Farmers should strive for larger yields of the crops that they raise. If the average crop just pays the cost of production—which, in fact, it seldom does—then the profit is to be found in the few bushels of corn or potatoes or the few hundred pounds of straw or hay over the average.

Mr. Robert Copland of Aberdeenshire, Scotland, is to be the next Clydesdale judge at the Canadian National Exhibition. It is likely that the big fair will have a banner display of good ones this year.

George Davidson of Cherrywood reports that he has not yet sold all the cattle and horses left on his hands by a big buyer from Hastings County at his big sale in the winter. Mr. Davidson has been put to considerable inconvenience by this action of this buyer at his sale, and it is unfortunate that there is no protection against such emergencies.

CHANGES ON THE C. P. R.

Shift in the Officials Centred at Smith's Falls.

SMITH'S FALLS, May 28.—(Special)—Some changes have taken place in the C.P.R. official staff at this division this week. W. B. Cronk, who has been superintendent of the Smith's Falls-Montreal line, has been transferred to Farnham, Que., and will live there instead of here. He will be succeeded by Mr. Gilliland, who has been made superintendent of the Montreal terminals and of the Smith's Falls division, with headquarters at Montreal. The staff of the superintendent's office here has been removed to Montreal. The despatchers for the eastern division will rmain here. It is rumored that an assistant superintendent will be appointed, who wil live at Smith's Falls, and that in a few months the line from Montreal to Toronto will be put into one division and operated from Smith's Falls.

Another well-authenticated rumor says that a number of changes will shortly take place on the C.P.R., in Eastern Ontario and that they will all tend to benefit Smith's Falls.

FARMERS SHOULD RECEIVE FAIR SHARE OF REVENUE

Farmers' Institute Annual Meeting at Lick's Farm Near Oshawa

OSHAWA, May 28.—(Special.)—Rain prevented a big attendance being recorded at the annual meetings of the South Ontario Farmers' and Women's Institutes on Thursday, at the farm of Elmer Lick. Nevertheless about seventy people gathered and were well repaid for their attendance. The women served up dainty lunches to the crowd and the big barn was used as an assembly hall for the speeches and addresses.

Mr. Caesar of the O.A.C. took up the destructive agencies of fruit trees and dealt with the insect fungus and codling moth to the benefit of all present.

P. J. Carey, Dominion Fruit Inspector, dwelt upon the packing of fruit for shipment, laying especial emphasis upon proper cooling before packing.

Mr. Rivett of the agricultural department gave his observations at the fruit show at London, England, where he has charge of the Canadian exhibit.

W. L. Smith gave a very interesting talk along the lines of agricultural co-operation among the farmers, which was received with much favor.

J. H. Hare, local representative of the department of agriculture, was present and made a short reference to the work. Mr. F. L. Fowke, M.P., in a short speech pleaded for a greater interest by the farmers themselves in their work. He contended that an active interested agricultural population intent upon making their business thoro, would meet with more recognition from the government. He claimed that instead of $500,000 being given for the farmers, the appropriations should at least be a million dollars.

Mr. Elmer Lick, at whose farm the meeting was held, reports to The World that the apple crop promises to be a good one in South Ontario. As far a he can estimate at present, the only shortage appears to be in the Baldwin bloom. The annual meeting of the Oshawa Fruit Growers will be held at an early date. The lateness of the season delays spraying operations, so that the meeting is also delayed.

MAGAZINE FOR SUFFRAGETTES

It Will Be Issued Monthly in New York at Five Cents the Copy.

NEW YORK, May 28.—With the first week in June The American Suffragette, a new publication, managed by suffragettes, will be issued. The venture is in the hands of Mrs. Sofia Loebinger and Miss Helen Murphy, two of the leading American suffragettes, who by their vigorous public efforts in the past have attracted much attention to the suffrage cause. The magazine will be issued monthly and will be on sale on news stands at five cents. The subscription price is fifty cents a year.

The contents will include not only material concerning the suffrage cause, but also the affairs of women thruout the entire world.

The magazine will be progressive, and its aim will be to convert the conservative suffragists, as well as to proselytize among the "antis."

Homeseekers' Excursions to Western Canada

via Chicago June 1 and 15, via Sarnia and Northern Navigation Company, May 31 and June 15. (Steamer leaves Sarnia 3.30 p.m.) Winnipeg and return, $32.00; Edmonton and return, $42.50. Proportionate rates to other points. Secure tickets at Grand Trunk City Ticket Office, northwest corner King and Yonge-streets. Phone Main 4209.

FATALLY GORED BY BULL.

ST. THOMAS, May 28.—Wm. Boughner, a farmer, aged 56, residing three miles west of Tillsonburg, was attacked this morning by a vicious young bull in the barnyard. Mr. Boughner defended himself for a time with a pitchford, but the animal finally got him down and gored him. He will die.

CALGARY GRAIN EXCHANGE

Incorporation Has Been Granted—Shows Alberta's Development.

OTTAWA, May 28.—(Special).—The incorporation of the Calgary Grain Exchange with a capital of $100,000, with all the powers usually granted to a grain exchange, indicates the development of Southern Alberta as a wheat-growing centre. It has also a bearing on the movement to ship grain from the new provinces to Europe via Pacific ports.

GREAT PT. ARTHUR DRY DOCK

Cleveland Capitalists Are Mainly Interested in the Venture.

PORT ARTHUR, May 28.—Port Arthur is to have the biggest dry dock and ship-building plant on the Canadian side of the great lakes. The agreement was signed to-day on behalf of the city with a new company, known as the Western Dry Dock & Shipbuilding Company, Limited, composed principally of Cleveland capitalists, and including Mr. A. F. Bowman of Southampton, who is representing them in the negotiations here. A bylaw will now be submitted to the people.

LONE-HANDED QUELLS MUTINY

Captain of German Ship Reports an Exciting Experience.

VICTORIA, B.C., May 28.—Attacked by six of his crew at once, Captain Wagner of the German ship Elisa Lihn from Antofagasta for Puget Sound, succeeded in beating off his opponents with his fists and quelling a mutiny, which bid fair to develop into larger proportions, and which resulted in the death of one man.

On April 10 the crew tapped a barrel of wine aboard and rapidly becoming intoxicated attacked Wagner and the boatswain in an effort to make the former a prisoner and to throw the boatswain overboard. Wagner fought off his opponents, stretching them one after another on the deck.

The boatswain was carried as far as the rail by infuriated men, but managed to escape, and going to the assistance of Captain Wagner, helped to bring about order. One of the crew fell in the hold and was killed.

CANADIAN TROOPS AT SPOKANE

Rocky Mountain Rangers to Attend Irrigation Congress.

SPOKANE, Wash., May 28.—(Special).—More than ordinary interest attaches to the visit of the Nelson Companies, 102nd Regiment, Rocky Mountain Rangers of British Columbia, to Spokane during the 17th sessions of the National Irrigation Congress the second week in August.

The coming of the troops, wearing the British uniforms, will add greatly to the series of historic incidents to be re-enacted in connection with the parades of progress, showing the development of the Pacific Northwest since the coming of the first white man in 1804, and in the march in review of the industrial and irrigation army, with 10,000 men in line, on August 10, 11 and 12.

The visitors will be entertained by the local militia and the Canadian Club, of which J. H. Tisley is president. One of the entertainments will take the form of a mess banquet at the Spokane Interstate Fair Grounds.

Next Week at Hanlan's.

The principal free feature at Hanlan's Point next week will be the appearance at this popular amusement park of The Nords, noted the world over as the most reckless and graceful high divers. Their performance consists of leaping from a small platform erected high in the air into a small tank of water. On their way to earth they turn somersaults and accomplish other feats equally daring and interesting. On the big open air stage there will be presented a number of circus acts every afternoon and evening, making this one of the biggest entertainments of the kind ever offered the public, without any charge whatever. All the special extra features are now running, and they are affording lots of amusement to visitors. All the ferry steamers are now in commission, and there is no delay whatever at the wharves.

To the man who wants to regain his youth, who wants to feel like he did when he was budding into manhood, I offer a book which will show him the road to happiness—a book of 80 pages, which is brimful of things he likes to read, and will give him courage and enlighten him as to the cause and cure of his troubles. It will point out the pitfalls and guide him safely to a future of strength and vitality. It is beautifully illustrated. It tells what other men have suffered and how they have cured themselves. It is free. I will send it, closely sealed, without marks, if you will mail me this coupon. If you are not the man you ought to be, SEND FOR IT TO-DAY.

Dr. McLaughlin's Electric Belt

is no longer an experiment. It is hailed by thousands with loud praise because it cured them. "It cured me. I am well and strong as ever. What more could one ask?" writes a man with a heart full of gratitude.

WILLIAM BROCK, Listowel, Ont., says: "Your Belt cured me of Neuralgia and Rheumatism after the failure of many kinds of medicine and many doctors."

WM. S. CARTER, Mapleton, Ont. writes: "My aches and pains have completely left me. I am twice as strong as before and advise all suffering people to get Dr. McLaughlin's Electric Belt."

BETTER HAY PRICES

"Well-cured, half-sold," is a true hay proverb. Sweet, clean, well-dried, even-colored hay brings a high price in every market. You can shake newly cut hay and rake it all in one operation, and save the price of a sulky-rake and a tedder—if you own a

Champion Side Delivery Rake
Used in connection with the **Champion Hay Loader**

below illustrated, you have a combination that will do your haying up "to the King's taste." We can't go into detail here about these high-grade haying machines, but we have done so in our free catalog. In it you'll find answered the questions you're most liable to ask. Capacity of Loader is easily 2 tons in ten minutes; no break-downs, either; no getting off wagon to detach loader. With the Side Delivery Rake you can shake and rake a 20-acre field easily in four hours and leave it in good shape for the loader. It works so smoothly—no threshing or hard-hitting—that it will rake clean a bean-field and not waste any. Better send for that catalog Pto and our "Farmer's Ready Reckoner." BOTH FREE. We have an agent in your vicinity who will gladly answer your questions. Call on him and ask about these two machines.

Frost & Wood Co., Ltd.
Smith's Falls, Can.

STRENGTH AND ECONOMY

You can depend absolutely on PEERLESS Fencing to hold live stock under any and all conditions. It is made of all No. 9 steel wire heavily galvanized and has lots of spring in it, making ample provision for contraction and expansion due to changes in the temperature, sudden shocks, etc.

PEERLESS
The Fence That Saves Expense

is held together by the Peerless lock which holds the wires securely and makes Peerless Fence absolutely stock proof. The lock cannot be slipped or knocked loose. Write for our new book—it will interest you. It's free.

Mr. Mann's Auto Wrecked.

D. D. Mann's big $10,000 Stevens-Duryea touring car was wrecked late Thursday evening in a collision with a street car. The chauffeur had just driven Mr. Mann to the train and afterwards gathered up a party of lady friends for a tour of the city. While going west on College the auto bumped into a street car at Shaw-street. The front of the car was demolished. Three women in the auto were pitched out headlong, and one of them, who gave the name of Miss Johnson of 342 Simcoe-street, was hurt. The chauffeur, George Sagar, has disappeared.

Band at Hanlan's.

The band of the 48th Highlanders will render concerts to-morrow (Sunday) afternoon and evening at Hanlan's Point. Mr. Slattery has prepared a special program for this occasion.

Cruiser is Speedy.

PORTSMOUTH, Eng., May 28.—The battleship cruiser Invincible has made a remarkable full speed run on her way here from Queen's Ferry. She averaged more than 28 knots an hour, and at one time attained a speed of nearly 29 knots.

West Point Bandmaster Suicides.

WEST POINT, N.Y., May 28.—Geo. Essigke, for the past fifteen years bandmaster at West Point, committed suicide to-day by inhaling illuminating gas.

Gas in Alberta.

CALGARY, Alta., May 28.—The first flow of gas of a commercial value was discovered yesterday at the well in East Calgary, where a flow of 100,000,000 cubic feet per twenty-four hours was struck.
