THREE NIGHT SCHOOLS.

Arrangements Completed for the Opening on Oct. 4—Holidays During Fair Week—Semi-Annual Entrance Examinations.

No. 1 Committee of the Board of Education took a long time to get started with their business at last evening's meeting. Messrs. Allaster (chairman), Dr. Campbell, Brady, McRobert, Inspector Carson, Principal Merchant and Secretary Abbott were present at the start, and Messrs. Stephenson and R. J. Blackwell came in later.

The passing of accounts occupied the time of the committee until 8:30, when applications from Misses L. L. Tancock, L. A. Goulding and Ada Henderson for positions on the kindergarten staff were taken up and laid over.

Miss E. A. Anderson asked for $35 a month for substituting in Miss Miller's room while the latter is at the Normal school. She will receive $1 50 a day.

Kate Brown applied for a position as substitute teacher. She is a Roman Catholic, and the committee "could not entertain her application."

J. F. Atkinson, King street, applied for the position of teacher in the night school. It was decided to have three night schools this winter. No person under 14 years of age or who is attending the public schools can attend. There will be two classes at Colborne street school and one each at King and Rectory street schools. The hours will be from 7:30 to 9:30. Messrs. Edwards, Reynolds, Baker and Atkinson will be the teachers. Messrs. Edwards and Atkinson at Colborne street, Mr. Reynolds at King street and Mr. Baker at Rectory street. Each teacher will receive $1 50 a night except Mr. Atkinson, whose salary will be $1 a night. The classes will be held on Tuesday and Friday evenings, starting on Oct. 4.

The inspector's report recommended that the committee take up the question as to whether or not pupils not possessed of all the faculties or those subject to fits should attend the city schools. Dr. Campbell unhesitatingly stated the opinion that they should not. The matter was left with the inspector with power.

Tenders will be called for a number of maps required in city schools.

No. 2 Committee will provide a room to accommodate part of Miss Lynch's class at Talbot street school, and the inspector will supply a substitute. The same will have to be done at Lorne avenue school until the new schools are ready.

Mr. Edwards, principal of St. George's school, Waterloo street north, had some difficulty in classifying the pupils there. In the lowest room there are 127 scholars and in the highest class only 30. He said that a kindergarten school was needed in that locality. He asked permission to hold a promotional examination at Christmas. This would equalize the number of pupils in the classes. His request was granted.

W. Barron was given permission to introduce a new music book into the schools.

The applications for positions as kindergarten teachers were again taken up. Miss Henderson will be placed at Hamilton road school, and Miss Tancock will be located by the inspector.

Dr. H. F. McDonald applied for the position of physician for the board. Messrs. Stephenson and McRobert moved that he be appointed. Carried.

Wednesday and Thursday of Fair week will be holidays for all the city schools. A map of the city will be procured for each school. The board will be recommended to increase Miss Crowley's salary from $275 to $325 per annum. The Galt Board of Education asked the co-operation of the board in petitioning the Education Department to have semi-annual examinations restored. The board will communicate with the Galt Board to the effect that they would be in favor of the change. Adjourned at 10:15.

The Late Bishop O'Mahony.

TORONTO, Sept. 9.—Bishop O'Mahony, who died yesterday at Toronto from the effects of dropsy, was acting priest of St. Paul's. He was born in the parish of Kilmurray, county of Cork, and would have been 67 years old next November. Possessed of talents of a high order, and being conspicuous for his energy and piety, he was selected by Pope Pius IX., after being raised to the priesthood in 1849, as the first bishop of the diocese of Armidale, Australia. There he labored with great fruit for some years, but owing to ill health had to return to Rome. Having been somewhat restored he came to Canada in 1889 at the request of the late Archbishop Lynch to co-operate in the work of the archdiocese of Toronto. On his arrival here he at once took charge of St. Paul's parish, where he had ever since remained. The result of his twelve years' pastorate is seen in the commodious schools in Queen street, in the splendid new church, in the general condition of the surroundings, and in the thorough organization and administration of the parish. The funeral takes place tomorrow.

The Chemist and the Explorer.

When Stanley returned from his last expedition to Africa he told the world that he had found an inexhaustible supply of rubber trees in the interior of that dark continent. This at the time was intensely interesting but it has lost very much of its interest since Rigby, the chemist, has made it possible for us to have tweeds, worsteds and any of the various wool materials from which our clothing is made, rendered perfectly waterproof without changing either their appearance or the porous nature of the cloth in the slightest degree. Ladies or gentlemen may now have an outer garment made from material to their taste which will keep out the rain without their experiencing any of the discomforts produced by a rubber coat. bd&w

Writer's colic is a most dangerous disorder. It runs naturally into starvation.

When extremes meet they begin at once to argue politics.

Everything.

Mr. W. H. Holabird, General Agent, Cornado Beach Co., San Diego, Cal., U. S. A., says: "I have used St. Jacobs Oil in my family for years, as well as in my kennels and stables, and it has never failed in a single instance to do everything that could be expected of it."

Seek truth and do not forget that in order to get it you must pursue it.

A sample package of the Wonder-working K. D. C. mailed to any address. K. D. C. Company, New Glasgow, Nova Scotia.

One word of sympathy or kindness sometimes makes a friend.

Politeness that does not begin at home is almost all vanity and deceit.

No one need fear cholera or any summer complaint if they have a bottle of Dr. J. D. Kellogg's Dysentery Cordial ready for use. It corrects all looseness of the bowels promptly and causes a healthy and natural action. This is a medicine adapted for the young and old, rich and poor, and is rapidly becoming the most popular medicine for cholera, dysentery, etc., in the market.

A GLENCARRY MIRACLE.

Mr. James Sands' Wonderful Restoration to Health.

After Three Years of Paralysis, Insensibility and Uselessness, He Tells the Tale of His Recovery and Renewed Work in the World—His Story as Told a Free Press Reporter.

[Ottawa Free Press.

The town of Alexandria, some 55 miles south of the city of Ottawa, on the Canada Atlantic Railway, has been completely astonished recently at the marvelous experience of a young man, who, after having been bed-ridden for nearly twelve months and his case pronounced incurable by Montreal and Alexandria doctors, is now restored to complete health and strength.

Mr. James Sands is a young teamster, well-known and extremely popular throughout the country side, and his illness and wonderful recovery have been—indeed still are—the chief topics in the town and neighborhood. The story of his miraculous cure having reached Ottawa, a member of the Free Press staff journeyed to Alexandria and sought out Mr. Sands for the purpose of ascertaining the truth of the statements made regarding his recovery. Mr. Sands is a slimly built, but wiry-looking young man of about 32 years of age, and when met by the newspaper man the bloom of health was on his cheek and his whole frame showed signs of unimpaired vigor and vitality.

The newspaper man told Mr. Sands the object of his visit, and the latter expressed his perfect willingness to give all the facts connected with his case. "I was," said Mr. Sands, "a complete wreck, given up by the doctors, but now I am well and strong again, and gaining strength every day. I was born in Lancaster in 1860, and up to three years ago I was always healthy and strong, living in the open air and being well known throughout the whole county of Glengarry. It was in the winter of 1888-89 that I first felt signs of incipient paralysis. I was then teamster for the sash and door factory here, and had been exposed to all kinds of weather. I then experienced violent twisting cramps in my right hand. I was in Cornwall that winter when the first stroke fell, and remained there for three days before I knew anybody at all. A medical man was called in but could do nothing for me. After that I came home and appeared to get all right for a time, but after a few days the old trouble began again, my hand continuing the twitching and cramping that had preceded the stroke. Up to twelve months ago these twitching fits were the only symptoms I suffered from. Then in August, 1891, when I was in Huntingdon village I sustained a second stroke, and remained unconscious for about seven hours. A doctor attended me and I recovered sufficiently to be brought home. After my return home the paralysis steadily gained on me, and I lost the use of my right arm and leg entirely; my right eye was distorted and my tongue partially paralyzed. I was prescribed for by an Alexandria physician, whose treatment I carefully followed, but it had no effect. I still got steadily worse, and about a month before Christmas last, I went to the English hospital at Montreal. Prof. Stuart and all the doctors came around me, as mine was a curious case, and the professor treated me. All the doctors could give me no satisfaction, and did not appear to understand my case. I questioned some of them, but they told me it was a hopeless case. I remained in the hospital a month, without the least improvement, and was then brought home, and remained in my bed till May day. I had constant medical advice, but continued to grow worse and worse. My right arm withered and I grew so weak and useless that I could not turn myself in bed. Meantime I had tried all sorts of patent medicines without the least effect. In May I saw an advertisement of Dr. Williams' Pink Pills in the papers, and said I would try them as a last resort. I had heard of the wonderful cures worked by Pink Pills, and told my folks to get me some. I had not taken them long when I found myself improving, and this determined me to continue their use. My strength gradually returned, the muscles of my arm and leg became invigorated and stronger, and I was able to sit up. I still continued taking the Pills and gaining strength, until at last I was able to go about, and finally to return to my old place at the sash and door factory. I gave up the Pills for a while, but did not feel so well, so I again began their use. I now feel as well as ever, though perhaps not quite so strong as formerly. You can see my right arm, which was withered, is now all right," and Mr. Sands stretched out a muscular limb, which would have done credit to a blacksmith. In reply to the reporter Mr. Sands said he thought his trouble had been brought on by exposure to the weather. "I am completely satisfied," said he, "that it is entirely due to Dr. Williams' Pink Pills that I owe my wonderful restoration. Besides the medical treatment I had tried electricity and patent medicines, both internal and external, but without the slightest avail. After beginning Pink Pills I began to mend, and they have made a new man of me."

The newspaper man then called on Messrs. Ostrom Bros. & Co., widely-known druggists, and interviewed their representative, Mr. Smith, as to his knowledge of the case. Mr. Smith was fully conversant with the facts, and vouched for the story told by Mr. Sands, and further said that his hopeless case and remarkable recovery are known throughout Glengarry county. In reply to the query if many of Dr. Williams' Pink Pills are sold, Mr. Smith replied that the sale was remarkable and that in his experience he had never handled a remedy that sold so well, or gave such general satisfaction to those using them, as everywhere glowing reports are heard of the excellent results following their use. Dr. Williams' Pink Pills are not a patent medicine in the sense that word is understood. They are the result of years of experience and careful investigation. They are not a purgative medicine, but act directly upon the blood and nerves, supplying those constituents required to enrich the former and stimulate and restore the latter.

For all diseases depending upon a vitiated condition of the blood, or shattered nerves, they are an unfailing remedy. Such diseases as these speedily yield to their treatment. Locomotor ataxia, partial paralysis, St. Vitus' dance, neuralgia, rheumatism, sciatica, nervous prostration, nervous headache, dyspepsia, chronic erysipelas, scrofula, etc. They are a specific for the troubles peculiar to females correcting irregularities, and restoring the functions, and in the case of men effect a radical cure in all cases arising from overwork, mental worry or excesses of any nature. In fact it may be said of them "They come as a boon and a blessing to men, Restoring to health, life and vigor again.

The Pills are manufactured by the Dr. Williams' Medicine Company, Brockville, Ont., and Schenectady, N. Y., and are sold in boxes (never in loose form by the dozen or hundred and the public are cautioned against numerous imitations sold in this shape) at 50 cents a box, or two boxes for $2 50, and may be had of all druggists or direct by mail from Dr. Williams' Medicine Company, from either address. The price at which these pills are sold make a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.

Not Wholly Inexperienced.

"Did you ever play football?"

"No, but I have been in a railway collision."

"German Syrup"

A Farmer at Edom, Texas, Says: "We are six in family. We live in a place where we are subject to violent Colds and Lung Troubles. I have used German Syrup for six years successfully for Sore Throat, Cough, Cold, Hoarseness, Pains in the Chest and Lungs, and spitting-up of Blood. I have tried many different kinds of cough Syrups in my time, but let me say to anyone wanting such a medicine—German Syrup is the best. That has been my experience. If you use it once, you will go back to it whenever you need it. It gives total relief and is a quick cure. My advice to everyone suffering with Lung Troubles is—Try it. You will soon be convinced. In all the families where your German Syrup is used we have no trouble with the Lungs at all. It is the medicine for this country.
