Buick 24-4-35 Five Passenger Touring

A "Four" With Four Wheel Brakes.

In designing four-wheel brakes on its Buick Four models as well as on the Sixes, Buick has added greater safety to a car already recognized for its sturdiness, high grade construction, power, beauty, comfort and efficiency.

The new Buick Four is the logical car for the motorist who wants economical transportation in a car of whose appearance and performance he may be justly proud.
