## Com. Bullock Makes Report

### Failing to Come to Agreement With C. P. R. Re Trestle Matter Goes to Ry. Com.

Commissioner Bullock yesterday presented to the common council a report on the progress of the repairs to the trestles and sheds on the west side and the position taken by the city in respect to the trestle leading to berths 5 and 6. His proposition is that failing to come to an agreement with the C. P. R. for the upkeep of this trestle the whole matter be referred to the Board of Railway Commissioners for them to settle.

Following is the report as submitted by the commissioner.

"Your Commissioner begs to report that all necessary repairs and work to the trestles at the different City owned wharves are well in hand. There has however, never been any understanding or agreement as to who is responsible for the upkeep of the railway trestles at Nos. 5 and 6 sheds.

"Your Commissioner takes the stand that the City should not continue to pay for repairs and has opened up negotiations with the C. P. R. on the matter.

"At a recent meeting, at which both parties were represented, it was arranged that the City should at once proceed with the necessary repairs to No. 5 trestle without prejudices to their claim; that the expense of such repairs should be borne in whole or in part by the C. P. R. on the understanding that the City Engineer and the C. P. R. Engineer submit some proposition that would be mutually satisfactory, otherwise the whole question as to who should bear the expense of such repairs for the upkeep of this particular trestle should be referred to the Railway Board to arbitrate upon. The City Solicitor has written the General Superintendent along these lines and has asked him to confirm the same."

## Elevator For The City Hall

### Council Adopted Recommendation to Purchase An Otis Fensome.

The matter of an elevator for city hall was advanced a step yesterday afternoon when the city council decided thay would adopt the recommendation of the engineer to purchase an Otis Fensome elevator and its location in the building will be further considered at a special meeting of the council on Friday afternoon at 3 o'clock.

Commissioner Thornton presented the report of the city engineer who recommended that of the two bids put in for elevator with the machinery overhead, the Otis Fensome $11,202 and the Turnbull Elevator Co. $9,341, that of the Otis Fensome be accepted as in his opinion it was a more suitable machine and the ultimate cost would be very little if any more. Two bids were received for the steel stairs. John Watson and Sons, for 5 ft. 4 in stair, $3,250 and the Canada Welding Co. for 3 ft. 6 in stair, $2,215. Neither of these were just what was wanted and he recommended that both be asked to submit other figures on the stair wanted. The entire cost of installing he estimated at $16,500.

Mr. Squibb, a representative of the Otis Fensome Co. was in the room and explained that the elevator which they had bid on was a new type and he believed would give them satisfaction.

The commissioner moved the recommendation of the engineer be accepted, the location of the elevator to be left for discussion at a special meeting of the council to be held on Friday. Carried.
