A French Suggestion to Prevent Railroad Collisions.—A Frenchman suggests a plan to prevent railroad collisions, which is said to be "simple, scientific and infallible." The agency is electricity, applicable alike to engines moving in the same as in opposite directions, charged positively and negatively, and can also be applied to a train by a watcher on the roadside directing the electricity as a signal, and and opposite force like zeiss, through the conducting power of the rail.—The inventor, with a select company of savans, while in a train, received news by this means of another coming in an opposite direction, at the approach of half a mile, by the ringing of a bell, acted upon by electricity from the other.

TO THE ELECTORS OF The Electoral Division of Tecumseth.

Gentlemen:

In compliance with the numerous invitations I have received from all parts of the District, I beg leave respectfully to offer myself as a Candidate for your suffrages, at the approaching Election of a Councillor for the Electoral Division of Tecumseth. Should I have the honor to be elected, I shall be found faithfully and fearlessly advocating those great principles which are forcing themselves at the present time, on the attention of the Canadian people.

If elected, the following measures will receive my most strenuous advocacy and support:—

Representation by Population.

No legislation in matters of Religion, and no appropriation of public monies to Sectarian uses.

No further departure from our admirable system of School Education.

Constitutional restraints on the Ministry, to stay the alarm ing increase of the Provincial debt, and to prevent the expenditure of public money, during the recess or without the direct sanction of Parliament.

Abolition of the Usury Law.

Abolition of imprisonment for debt, except in cases of fraud.

Immediate incorporation with Canadian soil of the Territory, as at present claimed by the Hudson's Bay Company. No Ministry, unwilling to advocate this measure, can count on my support, or ought to be considered in my opinion a Patriotic one.

My long residence in the District, my intimate acquaintance with the wants and wishes of the people, and also, my well-known and constant efforts to promote our public works, tending to the welfare of the District, will relieve me, I hope, from any presumption, in aspiring to so important a position, as I seek from your suffrages.

You may depend that your local affairs will at all times receive my best attention.

I have the honor to be,
Gentlemen,
Your obed't servant,
W. F. McCULLOCH.

TO THE FREE AND INDEPENDENT ELECTORS OF THE ELECTORAL DIVISION OF TECUMSETH.

Gentlemen:

I had made up my mind not to present myself as a Candidate for your suffrages so long as there remained a prospect of Mr. Dickson coming forward. But now, that he has intimated his intention to decline the invitation, I lose no time in placing myself before you as an aspirant for the high honor of representing this important Division in the Legislative Council. I trust that my intimate knowledge of the counties of Huron and Perth, and the large personal interest which I have in their prosperity will, in some measure, be taken as a substitute for actual residence among you. I may, however, assure you that the convenience of having my family educated has alone, up to this time, prevented me from being a resident of this Division which, I may say, is really my home, both as regards friends and property; and I intend, now that the completion of the railroad has all but removed the difficulty, to take up my abode permanently among you so soon as I can secure the necessary accommodation.

Of my politics you, of course, know nothing, for to be plain with you, I have never been an active politician; but like every other intelligent man having a stake or an interest in the country, I have paid some attention to the manner in which the public business is managed, and *I entirely disapprove of that management.* The financial policy in particular has my most hearty disapprobation, as its visible tendency is only to retard the progress of the country, and to embarrass the people and increase their difficulties. I shall, therefore, if honored with a seat in the Legislature, give a candid and strenuous opposition to every act of extravagant expenditure, whether in the creation of useless offices, in high salaries in superfluous grants, or in wild schemes of speculation. I have always been an economist, and should you send me to the Legislature, I will endeavor to carry out the same principles which have guided me in the management of my own affairs, and will constantly and consistently advocate that wise economy and retrenchment which would soon bring the Province to *live within her means*, as prudent, prosperous men generally do.

Having in common with most Upper Canadians, observed for the last three years, the positive evils resulting from our present system of Representation, I am convinced that the Country wisely and justly demands, that Parliamentary Representation shall be based on Population, and therefore, I am in favor of the immediate adoption of this great principle. I am a tried to Popular Education and opposed to sectarianism, and will oppose, to the best of my abilities, whether in Parliament or out, any attempt that may be made to distract or injure our Common School System, by the encroachments of sectarian creeds.

While such large tracts of land on our immediate borders are yet unsold, unsettled and unsurveyed, I would doubt the policy—especially in the present burthened condition of the Province, of embarking in extravagant schemes for the colonisation of the Hudson's Bay Territory, at the same time, as that Territory naturally and of right belongs to Canada. I am of opinion that no time should be lost in securing it for future use.

These, I believe, are what our Provincial politicians call the important questions now before the Country. But in my opinion there is another and a greater question, in which you and I and every honest tax-payer are more immediately interested. *I mean the question of a more direct, and a more real responsibility of the Administration to the Representatives of the people.*

Much of the reprehensible extravagance which has distinguished the Government of the Past three years, is attributable to the practice of allowing the Ministry to spend the public money without first having obtained the sanction of the Legislature. This dangerous practice and the facility with which bad, dishonest Ministers can raise money on the security of the Province, may produce sad waste of the public funds and lead to the most disastrous consequences. I would therefore advocate a measure positively prohibiting the Government from either spending money or raising money without first having obtained the consent of Parliament; and such a measure would not only do much to preserve the integrity and useful reputation of Ministers, but would also introduce the system of practical economy into the whole management of the public business.

In conclusion, you are aware that our present excellent system of Municipal Institutions leaves little room for the interference of Parliamentary Representatives in the local affairs of their constituents; but, at the same time, as most of my worldly interests are in the Counties of Huron and Perth, it will naturally be my study to do everything in my power to promote the prosperity of these Counties. And in particular, I will cordially encourage and support any likely scheme that may be proposed or suggested for securing the immediate actual settlement of the vacant lands of the Counties, as a full measure of an industrious population is a first important step towards successful progress.

Electors of Tecumseth, with this brief and imperfect statement of my political views and principles, I solicit your support in the coming election. I will endeavor to meet as many of you, personally, as possible, before the day of election arrives, and should you honor me as your Representative, I shall gratefully require the honor by serving you and the country to the best of my abilities, and in decided opposition to systematic corruption and prodigal expenditure. Meantime—

I am,
Gentlemen,
Your faithful servant,
DONALD M'DONALD.

UNRESERVED
IMPORTANT SALE OF
VALUABLE TOWN LOTS!
IN GODERICH.

G. M. TRUEMAN IS INSTRUCTED by Messrs. R & T. Macindoe Robertson, to offer for sale by Auction, on

Wednesday, the 28th July, 1858,

commencing at 2 o'clock, P. M., at the Goderich Auction Mart, or weather permitting, on the ground, the remaining portion of that very valuable property known as the Robertson Estate, situated on the main road leading from the

RAILROAD DEPOT

(known as the Huron Road), within 100 Rods of the Market Square.

The Auctioneer thinks it quite unnecessary to expatiate on the value of the property, as it will be seen at a glance from its close proximity to the Market Square, on the one hand, and to the Railroad Depot, on the other. In addition to its being on a leading thoroughfare, it must prove one of the best investments yet offered in Goderich.

The Auctioneer would, however, call attention to the fact of the completion of the

Buffalo and Lake Huron Railroad!!

throughout the entire length from Buffalo to Goderich thereby in addition to the various advantages rendering Goderich one of the most important shipping ports in Canada West.

Plans of the property can be seen at the Auctioneer's Sale Rooms Goderich, or can be had on application by Post or otherwise to Robert Robertson Esq., Goderich.

TERMS:

One-tenth of the purchase money Cash, or by an approved endorsed note at 2 months. The balance at the end of five years, with interest payable yearly.

To the Electors of the Tecumseth Division.

Gentlemen,

The time is now fast approaching when you will be called upon to exercise the privilege of electing your Representative for the Legislative Council of the Province, and in the fulfilment of that duty to select a man in whom you have full confidence that he will use his best exertions to promote your interests, at the same time that he also fulfils the high claims which, in his Legislative capacity, the country at large will have upon him.

Twenty-nine years experience and the best portion of my life devoted to the settlement of these counties and the promotion of their interests—added to an intimate acquaintance with every individual amongst the older settlers, whose advance in worldly prosperity from year to year I have watched with interest and laboured to promote—have, I think I may without presumption say, qualified me for that position.

These facts, with your own intimate knowledge of them, and of the measure of ability with which these important objects have been carried out, will enable you to determine how far your interests are likely to be promoted by placing me in the high position of your Representative in the Upper Chamber of the Legislature.

My politics, which have always been moderate, are equally well known to you all; and it is, therefore, hardly necessary for me to refer to them in this address, since they have undergone no other change than such as the progressive Legislation of the Country, both Imperial and Colonial, have induced, and which, I may be allowed to say, have removed forever, the grand distinctions hitherto existing between Whig and Tory.

The only questions of a political character now appearing to claim special attention, are Education, Representation by Population, and the Hudson's Bay Territory.

In reference to Education, my conviction is, that it is for your interests, and for the welfare of the United Provinces, to allow the present Common School Act to continue in full force, and untouched, for it appears to work well, and, as I believe, gives very general satisfaction; but should the question be brought up for discussion, and any amendment be proposed, in that Act, I shall then, as on every other question, be prepared to give them that consideration which the great importance of the subject entitles it to.

The principle of Representation by Population shall receive my warmest support, for it has my unqualified approval.

And in regard to the Hudson's Bay question I shall be prepared when it is brought forward to support the interests of Canada to the fullest extent.

I am now as I have hitherto been, a man of progress and I shall ever to the best of my ability advocate judicious improvements for the benefit of the Country. I shall endeavor to promote all objects in which your real Interests are involved and I shall always be found advocating a wise economy in public Expenditure.

In conclusion, my long connection with the Counties of Huron and Perth—the belief that I understand their Interests, and a determination to promote them to the best of my ability, embolden me to solicit your suffrages to place me as your Representative in the legislative Council and should I succeed in obtaining that great object of my ambition, I shall ever look upon it with pride and satisfaction as an acknowledgment on your part that my past labors have merited approbation, and as an assurance of your confidence in my continued devotion to the furtherance of your welfare and interests and which as one of yourselves are identical with my own.

A GOOD HORSE.

"THERE is much pleasure and profit in the service of a good horse, and very little of either in a bad one;" no person from choice will retain a bad horse, many, however are in possession of such who need not be. We think there are few horses so bad but the condition can be improved and rendered more valuable and useful to their owners, to effect which, there is nothing equal to "Darley's Arabian Heave Remedy and Condition Medicine," it has effected astonishing results in thousands of cases.
Remember the name, and see that the written signature of Hord & Co., is on each package.
