Jesus and the Gospel

Rev. Prof. Jas. Denney, D.D. \$2.00 net

Dr. Denney's new book, "Jesus and the Gospel," is the most important contribution that has been made to theology for many years. It must arrest the attention of all who seriously care for religion. Not only those who teach Christianity, but all who think about Christianity in its intellectual aspect may be referred to it as by pre-eminence the frankest, the ablest, and the most conclusive treatment of the central problem which is anywhere to be found.

—*The British Weekly.*

The Resurrection of Jesus

Rev. Prof. Jas. Orr, D.D. \$1.50

His new book is a learned, unhesitating apologetic, the only book it is of any use to write, if we are to have apologetics at all.

The Atonement

Rev. Prof. James Stalker, D.D. 75c. net.

He states in the first lecture the New Testament situation on the Atonement, in the next the Old Testament preparation, and in the third the modern justification. It is, within its limits of space and time, unanswerable.
