

OLIVER PLOWS

Drawn by

INTERNATIONAL HARVESTER

**MOGUL or TITAN Oil
Tractors**

MORE than ever this year that familiar combination, **International Harvester** tractors and **Oliver** plows is busy at work turning the soil of West Canadian fields. They have grown more popular steadily—a solid popularity based on satisfaction.

Mogul and **Titan** oil tractors give users the most power and the best steady service, least trouble in the way of care and attention, least difficulty in the way of breakages—and they prove by far the most economical power in the long run. They are built to meet every farmer's needs in style, weight and size.

Oliver tractor gangs are made up in 4, 5 and 6-base sections. The sections are joined flexibly, insuring plowing to an even depth. Levers are double-latched, truck wheels are sweeled, beams have the most rigid construction known. The **Oliver** plow, no matter how large, follows the lay of the land and plows evenly on irregular or rolling surfaces.

Write to the nearest of the branch houses listed below for catalogues. It will be to your advantage at this time of year to have in your possession more information as to what you can do this season with an outfit of **Oliver** plows and an **International Harvester Mogul** or **Titan** tractor.
