

MAY ECHO SYLVIA 22375
 (Written for The Register by J. W. McAllister, Jr. and Harold Meallister, Chino, California.)
 IN the matter of 7-day records the fact that a large butter production should be accompanied by large milk production is becoming of ever increasing importance. Breeders are beginning to be no longer satisfied with simply a large butter record in the short time tests, but demand that there shall be a normal percentage of fat as being the true indication of a cow's capacity. No cow, however, has ever been able to show the world's record milk production in the official test with such enormous butter production as the great Canadian cow, May Echo Sylvia (see illustration). She has recently finished a record which, with many respects has placed her in a class by herself, she made 35.35 lbs. butter and 87.3 lbs. milk in 7 days, 146.36 lbs. butter, and 371.2 lbs. milk for 30 days, and 285.19 lbs. butter and 7207.5 lbs. milk for 60 days; her records for both milk and butter being unequalled

by any other cow for 7, 30, or 60 days. Her milk record for 7 days is exceeded by 45 lbs. by Riverside Sadio De Kol Burke, and by 20 lbs. by Margie Newman; but on the other hand her record exceeds the butter record of Riverside Sadio De Kol Newman by 3.04 lbs., and that of Margie Newman by 3.54 lbs. In the 30-day test Riverside Sadio De Kol Burke is still ahead of May Echo Sylvia by over 150 lbs. of milk, but there is a credit of 20 lbs. butter to the advantage of the last named cow. Margie Newman falls behind May Echo Sylvia for both milk and butter for 30 days. For 60 days, May Echo Sylvia's superior persistence enabled her to surpass Riverside Sadio De Kol Burke, and to win the 60-day test. She produced approximately 80 lbs. more milk and 41 lbs. more butter than did Margie Newman. In 60-day test, her test being, however, strictly official for the full period, while part of Riverside Sadio De Kol Burke's test was unofficial. Her 60-day test also compares very favorably with that of the 40-
