QUEBEC Nov. 14.—Pelletier, pilot, arrived this morning, reports the Emerald wrecked on Cape Chat—the master, his wife and child, and two or three of the crew drowned.

The Concord, of Bristol, was spoken on the 24th Oct., 7 days from Quebec, running down for St. George's Bay, Newfoundland, waterlogged.

YARMOUTH, Nov. 25.—Schooner *Edwin*, belonging to Argyle, David Goodwin, master, with a load of wood, bound to Boston, was unfortunately wrecked on Cape Cod, on Thursday the 3d inst. in a heavy gale of wind. The Passengers (among whom were three females, and Mr. Geddes, of Barrington), with the Crew, were all saved, but the Master perished, being thrown overboard by the violence of the surf. Mr. Goodwin is much regretted as an honest, industrious man. The Passengers express their most grateful acknowledgements for the kind and humane treatement they experienced from all classes of the inhabitants of Cape Cod, who witnessed their distressing situation.

The vessel to which the following paragraph from the Portland Argus refers, is probably the same fallen in with by the brig Acadian, reported in our last:—

DREADFUL ACCIDENT.—A schr. which arrived here last evening, picked up, 70 miles from Cape Elizabeth, yesterday a schr. belonging to Bath, loaded with potatoes and wood, capsized and on her beam ends, all the crew dead except the captain, who is now in a very low state—four dead bodies were found on the wreck. The captain had a nephew on board, who was the last man who died.—*Portland Argus.*

BAHAMA LIGHTS.—His Majesty's Government, having established two new Light houses in the Bahama Islands; the following particulars of them are published for the information of Mariners.

GUN CAY REVOLVING LIGHT.

At two hundred and fifty yards from the southern extreme of Gun Cay (a narrow ridge of Coral which stands on the western edge of the great Bahama Bank,) this Light house has been erected in 25° 34 30 north latitude, and 79° 18 24 west long. Its base is 25 feet above high water, and the height of the Tower is 55 feet. The light revolves once in every minute, and may be seen in all directions, except between the bearings of S by W. 1-2 W. and S. 3-4 E. (Magnetic) where at the distance of about 8 miles, it will be intercepted by the Bemini Islands.

When within 5 miles distance, vessels should not bring the light to the southward of S. E. as the chain of Cays and Reefs, project in a curve to the westward, and as they lie within a mile of the outer edge of the Bank, there might be scarcely time to obtain sounding. The flood tide also sets strongly to the eastward through the intervals of the Cays, where it is high water at full, and change at 7h 30m. and the tide rises 3 feet.

The light being 80 feet above the level of the sea, it will be visible in clear weather at the distance of 12 miles to an eye elevated 10 feet.
