Then will the Cathedral be a nucleus of grace and truth to heathen India: then will it constitute a guarantee for the naturalization of Christianity in the East: then will it help on the glorious consummation, when all nations shall remember themselves, and be turned to the glorious Saviour, the Sun of Righteousnes, and the hope of all the ends of the earth.

With dutiful regard to His Grace the President, and affectionate love to all the brethern, I am &c.

CIVIC ELECTIONS.—The scrutinies terminated at 7 o'clock last evening, after a laborious investigation on the part of the Common Council. Wm. H. Needham, Esq., is thereby returned as Alderman for King's Ward, in room of the sitting Alderman, Henry Porter, Esq.; and the present incumbent, Mr. Joseph Fairweather, is again returned as Assistant Alderman.

THE ARMY.—The troop-ship *Belleisle*, (an old 74 gun ship,) arrived at Partridge Island on Wednesday morning from the West Indies, via Halifax, with the first or "Royal" Regiment on board, to relieve the 33d in this garrison. The troops and baggage were promptly landed by the steamers *Maid of Erin* and *Conqueror*, in the course of the day; and on the following morning the 33d Regiment were conveyed on board by the same means, and the ship went to sea this morning.

At a Common Council held on Tuesday, the pilot Garretty, (owing to whose carelessness the *Queen Pomare* was stranded on the Round Reef) was deprived of his Branch—in stating his incompetency at the time of the disaster, we did so upon the authority of persons fully competent to judge; and this decision of the Council, coupled with the exposures made of his previous bad conduct go to show that we were not "*premature*" in laying the fault upon him alone.

It affords us much satisfaction to report the successful termination of the very interesting proceedings in the Sunday School House last night, when, after the passing some resolutions in favour of Church extension and the opening of the Madras, or Sunday School rooms for Public Service, until a Church with free sittings shall have been erected in Lower Cove, an Address was presented to the Rector of the Parish, signed by 270 of his Parishioners, comprising a large proportion (about 100) Pewholders.—As we publish the Address and the Reply, as well as the Resolutions we shall not at present comment upon them. After his reply to the Address, the Rector made an Address to the audience, in reference to several subjects which he wished to bring before them, and especially with regard to the causes which prevented his visiting among them more frequently;—his explanations seemed to give general satisfaction, and when he said he would endeavour to curtail other duties, that he might devote more time to a friendly intercourse with his parishioners, the pledge was received with unequivocal evidences of satisfaction and approval. The meeting was opened with a few remarks from Beverley Robinson, Esq., expressive of its motives and feelings, and the hope that unanimity would prevail; and he then called upon the Rev. Mr. Stewart to offer prayer. The proceedings of the evening were closed with a Psalm, and Prayer by the Rev Dr. W. Gray.—Upon the whole, we never saw a more attentive and respectable audience; we think there must have been upwards of 500 persons present. The Rector was eloquent and happy in his appeals and illustrations, and if we may judge from the countenances and expressions of the people at the close of the meeting, we think it will be productive of great and lasting good in the community.

To the Reverend I. W. D. GRAY, D. D., Rector of the Parish of Saint John.

REVEREND SIR—

We the subscribing Parishioners of the Parish of Saint John, beg you to accept our sincere assurances of respect and esteem for your constant, undeviating and faithful expositions of the doctrines of our holy religion in strict accordance with the Holy Scriptures, and in conformity with the established usages of our Church.

We desire to express our sentiments upon this subject, in the humble hope that this demonstration of feeling may cheer your perseverance in the onward course of duty through difficulties and opposition, which every faithful servant of his Heavenly Master must anticipate and encounter.

We acknowledge our thankfulness to the Great Disposer of events, that our Parish has thus far been preserved from those Tractarian errors and innovations, which have distracted and divided our Church in Great Britain; and that a Primate has recently been appointed in England whose elevation to the See of Canterbury, every sincere Protestant must hail as a happy and auspicious era in the history of our Church; and we notice with great pleasure and satisfaction the entire agreement of your doctrinal expositions with those which characterize the publications of this eminent servant of God.

The public mind in our Parish has lately been engrossed with the question of Church extension, by which we presume is meant the diffusion of Gospel principles among those persons who have not access to places of Public Worship, in which they can hear them regularly expounded, we therefore hope that some improved arrangement may be adopted within our Churches, and that the Sunday and Madras School rooms may be opened for this desirable object, which we feel assured can be be accomplished by these means.

In expressing this hope, we do not however wish that the appropriation of these Buildings to Public Worship should supersede the adoption of immediate exertions to obtain funds by subscription for the erection of a Church in Lower Cove.

In concluding, we offer you our best wishes for the success of your pastoral labours, and for your spiritual and temporal welfare.

St. John, April 13, 1848.

[Reply.]

Mr. Chairman and my respected Parishioners—

I am deeply sensible of your kindness in presenting me this Address.

To receive from so large a body of my Parishioners an explicit avowal of their approval of those doctrines, which, for 22 years, I have felt it my duty to inculcate in this Parish, affords me the highest gratification.

Impressed with the firm belief that these doctrines are founded on the truth of God, in full accordance with the Formularies of our Church, and intimately connected with your own best and highest interests, I cannot but rejoice that they have met your acceptance, and assure you that the knowledge of this fact will greatly tend to cheer and animate me under any future difficulties that may attend upon the exercise of my ministry.

You express your thankfulness to the Great Disposer of events, that our Parish has thus far been preserved from those Tractarian errors and innovations, which have distracted and divided our Church in England. I share, believe me, in your feelings upon this point, and no less so in the satisfaction you express, at the elevation to the See of Canterbury, of that excellent Prelate, whose deep-seated piety and ardent zeal for the glory of Christ, most eminently qualify him for that exalted office, in those eventful and perilous times. It is I trust, an omen for good; and, as a Protestant, I hail it as an auspicious event for our Church.

You advert to the importance of diffusing Gospel principles amongst those persons in our City, who have not access, at present, to our places of public worship. It is my happiness upon this point also, most fully to accord with your sentiments. My fervent wish is to see such arrangements made, by opening our Pews to strangers and our School Houses for Divine Service, as may promote this benevolent end; and I cordially agree with you that immediate exertion should be made, to obtain funds, for the erection of a Church at Lower Cove. In regard to this latter object, especially, I am glad to have the opportunity of assuring you that I not only concur in your sentiments, but am prepared to unite with you, in the earnest endeavour, to carry this intention into effect; and, I cannot believe, that our combined efforts made in dependance upon the blessing of God, will be made in vain.

In conclusion, I have only to thank you for your kind wishes in my behalf, and to assure you of my earnest prayer, that you may long enjoy the comfort of those truths of which you have, this evening, expressed your approbation—and that your children, and your children's children, may receive and value them when you are gathered to your Fathers.

I. W. D. GRAY, D. D.,
Rector of the Parish of St. John.

St. John, April 13 1848.

After responding to the address, the Rev. Gentleman addressed the meeting at some length. He assured the meeting that in being present there on that occasion, he disclaimed everything that savoured of party feeling, or any sentiment of hostility to any person or persons, whether at the meeting or beyond its limits; that he understood the meeting to have been called for the purpose of expressing a desire to co-operate in the good work of Church-extension in the city, and of presenting to him the kind address for which he cordially thanked them. The occasion, however, was too favorable a one to be lost; he would therefore avail himself of their indulgence for a few moments to touch upon one or two points in which they were mutually interested. He was aware that a desire had been repeatedly expressed by numbers of his Parishioners to be more frequently visited by their Pastor. He did not condemn this feeling, but approved of it. It was natural; it was proper. There were more difficulties in accomplishing this object in Towns, than people in general were aware of, some of which he named to the meeting, at the same time declaring, that so fully was he persuaded of the propriety of their wishes upon this point and of the good that would result from their wishes being complied with, that as far as it was possible, by curtailing the time given to the discharge of other duties that were annexed to his office, he was determined that their wishes should be met. He then enlarged upon the subject of extending the benefits of the Gospel in the City, by opening pews to strangers, and the School-house for Divine service, expressing his belief that upon a further application being made to the proper authority, the latter object would be obtained. At the same time, he urged them to go further and build a Church at Lower Cove, and shewed by a statistical account, the number of families and individuals in the several Wards in the City, who were deprived of Church accommodation. He then referred to the observations that had been made upon the subject of Tractarianism, stated his uncompromising hostility to the errors of that system, and quoted the opinion of the present Archbishop of Canterbury upon the subject. After relating one or two anecdotes of the Archbishops, shewing his esteem for the Bible Society, and the value he set upon the intercessions of Christians in his behalf, the Rev'd Gentleman concluded his remarks by commending to the meeting the Prophet's words, "love the Truth and Peace," earnestly exhorting those who were present, to adhere to Truth at all costs, but while cleaving to it with a tenacity that nothing could sever, to endeavour, as far as principle and faithfulness would allow, to maintain the "unity of the Spirit in the bond of Peace."

The above is but a brief outline of the remarks that were made, but as far as it goes, correct.

RESOLUTIONS.

1st. That this meeting desires to extend the influence and interests of our Church, and to assist in placing the benefits of it within the reach of all who wish to partake of them.

2d. That this meeting desires the erection of a Church in the Southern section of the city, with free sittings for the further diffusion of religion.

3d. That the Rector, Wardens, and Vestry of Trinity Church be requested to apply for a license to open the Sunday or Madras School room for Divine service, until a Church can be erected.

4th. that a copy of the foregoing Resolutions be handed by the Chairman to the Rector, with a request that he will lay them before the Vestry.

DR WOMERSLEY has arrived in this City for the purpose of giving Lectures on Physiology; they will be commenced on Monday evening, and from what we have heard of the gentleman, and the recommendatory letters and notices he brings with him the lectures will no doubt prove interesting and highly instructive. We are informed that neither the lectures nor the apparatus, &c. exhibited will offend the most delicate sense of propriety.

The steamer *Maid of Erin*, belonging to Mr. Thomas Parks, has been completed in her alterations and repairs, which have very much improved her in appearance, and will add materially to her qualifications as a sea going vessel, and to the comfort and convenience of passengers travelling in her.—She is advertised to start for Portland on Tuesday next, at 9 o'clock.

CITY IMPROVEMENTS.—The large lamp and pillar at Reed's Paint, South end of Prince William street, was on Wednesday removed from its place, and a large iron column, firmly secured to a substantial granite pedestal, was raised in its stead.—The main centre column with its lamp stands 27 feet high, and from it on the East and West sides are iron branches supporting two other separate lamps—the whole making at a distance, a picturesque and imposing appearance;—the effect when lighted, is very brilliant, and besides being a guide to vessels coming up the harbor, the light can be distinguished a long distance outside Partridge Island. The lamp glasses on the side facing the harbour are stained red to distinguish them from other harbor lights.—It is certainly a credit to our city, and what is best of all, it is of domestic manufacture.

☞ A *Royal Gazette Extraordinary* of Tuesday last, contains a Proclamation by His Excellency Sir Edmund Head, announcing that his Excellency having taken the usual oaths, has assumed the Administration of the Government.

Richard Pennefather, Esq., has been appointed Private Secretary to His Excellency.

His Excellency has been pleased to appoint Lieutenant Colonel Richard Hayne and Lieutenant Colonel Charles Drury, to be his Provincial A. D. C.—*Ib.*

ARRIVAL OF A LONG EXPECTED VESSEL.—The British brig Thalia, from Cork, Ireland, arrived at Quarantine yesterday, after a passage of 136 days. The Thalia put into Antigua in distress. She has seventy passengers, six died on the passage, and 4 are now sick. This is the vessel which was supposed to have been lost at sea, and her safe arrival will no doubt lighten the hearts of many who had friends and relations on board.—*Boston Traveller.*

A MOTHER POISONED BY HER DAUGHTER.—A woman named Mary Cain, died at her residence, corner of Carve street and Harrison Avenue, on Saturday evening. Coroner Pratt was called in and held an inquest upon the body. It appeared that the daughter of the deceased, Susannah Pinkerton, who is fourteen years of age, had had some trouble with her mother, who had scolded her for being out late in the evening. It was also proved that her daughter purchased arsenic on Thursday and Saturday, for the purpose of killing rats; and it was further stated that she admitted to having put some in her mother's food. The Jury adjourned without coming to any decision in the matter, in order to allow the Doctors to test the presence of poison in the stomach of the deceased. In the meantime the girl was arrested and committed to jail, from which she was brought before the Police Court, and held for further examination on a charge of murder. Her confession is as follows: that her mother was in the habit of cruelly beating her, and that in consequence she went on Thursday to an apothecary and bought six cents worth of arsenic, under the pretence of killing rats. This she mixed with water and gave her mother one third; afterwards she bought two cents worth more and gave her the whole. Her intention was, no doubt, to kill her mother, who it was stated, had exercised a great deal of severity towards her. It seems that the girl finding that her mother vomited up the first dose, deliberately gave her, nearly twelve hours after a second dose. After her mother's death, when the officers of the law came to lead her to prison, conscience returned with fearful violence. She threw herself upon her mother's body, and was with great difficulty taken away, after having several fits. An attempt was made early yesterday morning by some friends to remove the body from the city before the authorities were called in, but it failed.—*Ib.*

CONSUMPTION.

This terrible disease is commonly attributed to our climate. But if the the climate was to blame, the disease would have been inflicted on that, and not upon the people. We think the fault is in the people, and that if the people would keep the skins of themselves and their children properly washed, and abstain from gluttony, poison, and idleness for a generation or two, consumption would be no more known than is now, in good society, the disease for which scratching and sulphur are the principal remedies.

However, consumption prevails as matters are, and picks off the best and prettiest of us, in our prime. In this state of things we must do the best we can, piece out and patch out the web of life, with journeys, voyages, and medicines. Of all the medicines we know of, Dr. Wistar's "Balsam of Wild Cherry" is what we should first recommend. We have in our office a living proof of its efficacy, who, but for it, would have been beneath the sod long ago. The inventor of this medicine, Dr. Wistar, was a man of science and humanity, and undoubtedly prepared the remedy in its best form, and the public may rely upon Mr. Fowle for the genuine article.—*Boston Daily Chronotype, Jan. 18, 1847.*

DR. HALSEY'S GOLD AND SILVER PILLS—Are founded upon the principle that nearly all diseases arise from the same causes, or that a morbid condition of the *liver, stomach, and bowels*, predisposes the system to every class of disease. When these important function become obstructed with superabundance of bile and viscid matter, Nature ceases to fulfil her proper office. It is then that the *blood* becomes impure, because the secretive organs of the liver, whose office it is to seperate the worn-out principle of this vital fluid, are no longer fit for their office, and the wasted parts of the blood continues therefore in its circulation and become diffused throughout the whole system. Thus filled with infectious humours the body is made liable to sickness. If, by chance, it is exposed to a sudden change in the weather, a bad cold, or consumption, would be the result—if in the vicinity of contagious disorders, it would imbibe the infection.

Dr. Halsey's Gold and Silver Pills, although pleasant to take and innocent in operation, is the most excellent medicine in the world, to remove the bile and viscid matter from the system, and to restore the liver, stomach, and bowels, to the performance of their proper functions, thereby rendering the blood pure, and divesting the system from all morbid and infectious humours, which we finally remove every disease, however long standing, and endow the system with health, strength, and vigour.

A circular giving a full explanation of the two-fold action of the *Gold and Silver Pills*, can be had of the agent gratis.
