One True Medicinal Whiskey

Beware of Imitations

While substitution is not a part of modern merchandising, it is still practiced to a greater or less degree by a few merchants who haven't the courage to compete with their fellows along legitimate, fair, lines, or who do not care for their customer's health, but their own profits only.

Substitutes Are Dangerous

And any merchant who practices substitution is unworthy of the public's confidence.

When a remedy has been before the public for more than half a century, has been prescribed and used by the best doctors and in prominent hospitals, when it has carried the blessings of health into as many thousands of homes of the sick as Duffy's Pure Malt Whiskey has, imitations are bound to arise. Be sure you get the genuine.

Duffy's Pure Malt Whiskey

Made for Medicinal Purposes Only.

It is free from injurious substances usually found in beverage whiskeys. It has given remarkable results in the prevention and relief of all throat, lung and stomach troubles and all wasting and diseased conditions for over 50 years.

INSIST ON GETTING DUFFY'S

The genuine is sold in **sealed bottles only.** The "Old Chemist's Head" is on the label and over the cork is an engraved seal. Be certain seal is unbroken. Sold by druggists, dealers and hotels, $1.25 a large bottle.

The Duffy Malt Whiskey Company, Rochester, N. Y.

Fac-simile one-third regular size.

LOCAL TREATMENT FOR WOMEN'S DISORDERS

The health we enjoy depends very largely upon how the blood circulates in our bodies; in other words, if we have perfect circulation we will have perfect health.

There is a constant wearing out of the tissues in every part of the body. The blood flowing through the veins carries off this waste or dead matter, while the blood coming from the heart through the arteries brings the fresh new living tissue, the essence of the food we have digested, to replace what has been carried off. This constant wearing out and expelling of the dead matter and the replacing of it with new matter, atom by atom, goes on day and night, until in about 7 years a complete change has been effected. Thus every man and woman has an entirely different body in every particle of it from what he or she had 7 years before.

It sometimes happens, however, from a variety of causes, that the blood becomes congested in certain portions of the body. This means that the blood vessels in these parts become weakened, and the circulation in that section of the body becomes sluggish and stagnant. The consequence is that the dead matter in that part of the body is only partially carried away, and that but little of the new, vital matter is introduced there to build up and strengthen the tissues and nerves.

This condition invariably exists in all cases of female disorders. The dead matter retained in the circulation, which should have been expelled, causes irritation and inflammation of the delicate memberane, and oppresses the nerve centres. This condition is the cause of the grievous physical and mental suffering which accompanies female troubles.

To obtain relief it is evident that the first thing to be done is to get rid of the dead matter which is being held in the circulation. If this dead matter is allowed to remain there a species of blood poisoning will result and nature will endeavor to get rid of it by forming ulcers, tumors, etc.

The above explanation will also show why **ORANGE LILY** is so successful in curing this condition. It is a local treatment, and is applied direct to the affected organs. Its curative elements are absorbed into the congested tissue, and from the very start the dead matter begins to be discharged. A feeling of immense relief, both mental and physical, accompanies it, and the improvement is constant and positive. This feature of the expelling of the dead matter is always present to a greater or less extent, and in some cases it is so marked as to be amazing. The case described in the following letter is not exceptional:

Dr. Coonley—I am thankful to Mrs. F. E. Currah, your Canadian representative, for my health restored by your wonderful remedy. I have suffered for 17 years, but not so bad until 3 years ago. Then I had a doctor, who told me I had a tumor, and could live no more than a year. If I went through an operation I would not live through it. A year later I sent for him again, and he gave me up to die. My husband then sent for another doctor, who performed an operation, and it did me much good. I doctored with him 3 or 4 months, but became so bad again that I thought I could live no longer, and I began to long to die. One day my husband came home and threw a slip of paper to me with Mrs. Currah's address and told me a lady had advised him to write to her for a treatment that would cure me. I said it was too late, that I would die anyway. I could not lift a teacup without hurting me. Then the first doctor told me I was worse than ever. However, my husband sent for **ORANGE LILY**, and the third treatment brought away one tumor. Others followed, until 7 tumors had been expelled, 3 large ones and 4 small ones. I know if it had not been for **ORANGE LILY** I would have died, for I could not live much longer. I would have thought it cheap at one hundred dollars for a month's treatment, instead of one dollar. It is worth its weight in gold.—MRS. GEO. LEWIS, Huntsville, Ont.

The above letter is published with Mrs. Lewis' permission. All letters received are treated as being sacredly confidential, but occasionally some patient feels so grateful for being cured that she is willing to make the matter known for the benefit and encouragement of her suffering sisters.

ORANGE LILY is a positive, scientific remedy for all disorders of the female functions. As explained above these troubles are of local origin, and require local treatment. It is just as sensible to take medicine internally for female troubles as it would be to take medicine internally for a bruise, a boil or an ulcerated tooth. In all these cases some dead matter is being retained, and the cure is effected by employing local methods for expelling the dead matter. **ORANGE LILY** has antiseptic, soothing and healing properties, and also tones up and invigorates blood vessels and nerves. I am so anxious that every suffering woman may satisfy herself, without cost to her, that **ORANGE LILY** will cure her, that I hereby make the following

FREE TRIAL OFFER

I will send, without charge, to every reader of this notice who suffers in any way from any of the troubles peculiar to women, if she will send me her address, enough of the **ORANGE LILY** treatment to last her ten days. In many cases this trial treatment is all that is necessary to effect a complete cure, and in every instance it will give very noticeable relief. If you are a sufferer, you owe it to yourself, to your family and to your friends to take advantage of this offer and get cured in the privacy of your home, without doctors' bills or expense of any kind. Address MRS. FRANCES E. CURRAH, Windsor, Ont. 7

THE PLACE OF THE PRIMARY SCHOOL IN THE PUBLIC SCHOOL COURSE

The Advertiser has arranged for a series of articles dealing with the works carried on in the public schools —from the kindergarten to the end of the public school course.

These will be from experienced teachers, members of the city public school staff.

The object is to make plain to the parents whose children attend our schools how their children are being educated, what they are taught, the materials used in their education, and how their moral, mental and physical natures are developed. It is hoped that these articles will, by establishing a better understanding of the means adopted in education, bring about a closer co-operation between parents and teachers, and, in consequence, an intelligent appreciation of the labors of the teachers. The first paper is written by Miss Howie, of Princess avenue.

During the past few years there have been many changes in the work of the primary grades, both in organization and methods of instruction.

Those in authority have recognized that this change was necessary in order to produce satisfactory results in the future education of the children.

When a child enters the public school at the age of 6 or 7 years, his interest in the world around him, and his powers of observation have been aroused by contact with his family and other associates. His habits are sufficiently developed to allow him to give some attention to formal instruction. He has heard from older people that a knowledge of reading, writing, and number, is desirable in order to acquire more knowledge of the things about him.

Primaries Were Largest.

Formerly it was thought that the inexperienced teachers might be left in charge of the beginners' classes, and, as the discipline of small children is comparatively easy, the number in the primary grade was usually almost double that of any other class in the school. The young teacher found it impossible to learn the individual needs of her pupils, and class instruction was made to depend largely on the ability of the pupils to memorize, without much comprehension of the facts presented. The results were that progress was slow, many of the pupils being left for two terms in Grade I., or advanced without due preparation. The children lost interest in their lessons, because they were unable to keep up with their class.

The primary class is now recognized as being scarcely less important than the entrance class, for it is in the first grade that the foundation of all formal instruction must be laid, and the character of the foundation must in great measure determine the nature of the child's progress in the public school course. In our normal schools much attention is given to training teachers in elementary reading and other branches of primary education, while the teachers now in charge of our primary grades are those who have shown skill in dealing with young children. The classes have been reduced in size, so as to be limited, when possible, to about 35, instead of 80 or 90 as formerly. Thus there is an opportunity for some individual instruction, which is indispensable in a primary grade.

Methods Are Changed.

The methods of instruction in the various subjects have been changed only after careful consideration of (1) the powers of the child, (2) the aim desired in teaching the subject.

Perhaps the most radical change of method is found in the teaching of reading. Formerly the pupil learned the names of the alphabet, associating these names with the printed forms, and generally learning the capitals first. Seat work was then provided by requiring the child to print on his slate the lesson as it appeared in the book.

The order is now reversed, the reason being that it is not the most expedient in securing results. The ability to print is not so necessary as the ability to write. We must be able to recognize the printed letters, in order to read books, but the labor of printing these letters repeatedly is not the simplest means of making them significant.

The children are now supplied with a box containing six or eight sets of the alphabet, and each card has but one letter printed on it. With these letters, words, and even sentences, can be formed, as the pupil gains the necessary knowledge.

It is a fundamental principle of education that we must proceed from the known to learn the unknown. The knowledge which a child brings to school is manifold, but it must be systematized before it is available for further progress. All our teaching, to be effective, must arouse the interest and use the self-activity of the child.

For this reason our method of teaching reading in the primary grade is a combination of (1) word, (2) sentence, (3) nursery rhyme, (4) phonic methods.

Increases Vocabulary.

The first three are variations of a system of learning by an appeal to the eye, and the phonic system allows the pupil to increase his vocabulary quickly, and to readily identify words having similar elements.

The first lessons in reading are given on the blackboard, the script form of letters being used. The first words taught in these lessons are taken from the child's own experience, being chiefly names of objects with which he is familiar or words suggesting actions performed by the pupil. Rhymes already learned at home or in kindergarten are also used. A training in oral phonics teaches the pupils to distinguish similar sounds in a series of words, and a careful comparison of the written words leads them to associate the sound with the symbol, which may be either one, or more than one letter. The printed form of the letters is then taught, and identified in the box of letters provided for that purpose, or they are located on a page of the reader or other printed page.

The school board has lately furnished the classes with a supply of supplementary readers, which in addition to the primer give suitable practice in the art of reading.

Better Facilities.

Facilities for teaching writing are better now than formerly. The blackboards in the primary rooms are placed low, so that the children can assume a natural, easy position, while they acquire the proper movement. The slate has been supplanted by sheets of paper and large lead pencils, and in some of the primary classes suitable tables and chairs have replaced the desks, which were quite impracticable for the teaching of writing.

These methods of teaching reading have resulted in the production of better readers and writers, and also incidentally in assisting materially the subject of spelling.

In teaching numbers there is as much use of the concrete at first as it is possible, so that clear conceptions of numerical facts, when once acquired, are systematically memorized in the form of tables, so that they may be used in solving simple problems and in practice of the simple rules.

The subject of hygiene in the primary grade aims at forming proper habits of health, so that pupils may be cultivated to love cleanliness and order. Physical drill and calisthenic exercises also aim directly at promoting and maintaining the physical welfare of the children.

KNIGHTS TEMPLAR HOLD BIG FIELD DAY

Richard Coeur de Lion Preceptory, No. 4, Conducts Event at New Temple.

The Knights Templar annual field day, held under the auspices of Richard Coeur de Lion Preceptory, No. 4, in the Masonic Hall on Good Friday, marked a successful event in the history of the order. About one hundred delegates from London, Stratford, Sarnia, Chatham and St. Thomas were present at the ceremonies, although many left by the early evening trains and did not partake of the banquet and dance provided by the local knights in the evening.

The preceptory opened at 10:30 o'clock in the morning, and the work of conferring degrees on 22 new members occupied the greater part of the day. R. E. Sir Knight Parsons conferred the illustrious order of the Red Cross degree. The working of this degree was under the direction of the Sarnia knights, who were present twenty strong.

The conferring of the Order of the Novice, by Sir Knight Col. A. E. Somerville, the order of installation by E. Sir Knight John R. Clunis, and the Order of Consecration by Et. Sir Knight W. A. Wilson, was successfully carried out in the afternoon session.

One of the features of the field day was the presence of Sir Knight Burley Burch, of Lambeth, who at the age of 88 is regarded as the oldest member of the order in Canada. Mr. Burch, although the oldest in years was amongst the lightest in spirit of those present. He remained all day, and was one of the last to leave the building in the evening.

The statutory banquet was celebrated in the evening, and members, their wives and lady friends, to the number of 100, enjoyed a splendid repast. The only toast was to "The Glorious Martyrs of Our Glorious Cause," and was responded to by Sir Knight Baker, city clerk.

An informal dance followed the banquet, and to music supplied by the Tony Vita Orchestra, the merry-making was continued until after midnight.

The committee who had charge of the arangements are as follows: Chairman, Col. A. E. Somerville; secretary, A. Carrothers. Banquet committee—John R. Clunis and J. C. Love. At home committee—Dr. Routledge, A. B. Barr. Reception—J. W. Metherall, T. Rowe, C. W. McGuire and J. Graham. Decoration—C. W. McGuire and J. W. Metherwell.

BRILLIANT SCENE AS MONARCH TAKES OATH

Great Ovation For Constantine and Queen at Grecian Capital.

Athens, Greece, March 21. — King Constantine of Greece took the constitutional oath of office in the Chamber of Deputies today in the presence of the highest officials of the state and of all the members of Parliament.

A salute of 101 guns was fired when the royal procession left the palace. Brilliant weather had brought out great crowds of people, who cheered the king on his way, while military bands stationed at intervals played the National Anthem.

The king, who was wearing a general's uniform, entered the Chamber of Deputies at 10:30. Queen Sophia, Crown Prince George and the other princes of the royal family, all dressed in deep mourning, accompanied him.

The deputies stood in their places in deep silence as his majesty entered. The Metropolitan of Athens, who was surrounded by the members of the Holy Synod, in full canonicals, offered prayer, and then read aloud the constitutional oath, which King Constantine repeated in a firm voice.

The king then signed the oath and all the cabinet ministers and the Metropolitan of Athens countersigned it, amid the hearty cheers of the deputies.

An immense crowd gathered outside the Chamber of Deputies welcomed the king and the other members of the royal family when they emerged and the cheering continued all the way to the palace.

Upon their return to the palace the new king and queen received the congratulations of the members of the cabinet and other notable persons, after which Premier Venizelos tendered the resignation of his ministry.

King Constantine, however, refused to accept it, saying he knew its tender was only a formality. He added that the Government of M. Venizelos enjoyed the full confidence of the crown.

Later King Constantine and the members of the royal household, accompanied by M. Venizelos, left for Saloniki, where they will arrive tomorrow.

The body of King George will be brought to Athens on board a Greek warship, which will be convoyed by foreign men-of-war.

Say Good-bye to Pimples

Stuart's Calcium Wafers Will Drive Them Away—Creams Will Never Do It—They Can't.

No need for anyone to have a complexion disfigured by pimples, blotches, liver spots or blackheads. Just clear the blood of impurities and they'll go away.

All My Friends Marvel at the Way Stuart's Calcium Wafers Drove Those Ugly Pimples Away.

Stuart's Calcium Wafers cleanse and clear the blood, driving out all poisons and impurities. And you'll never have a good complexion until the blood is clean.

These little wafers may be used with perfect freedom. Science knows no more powerful blood cleanser. They are entirely free from harmful drugs or opiates. Your doctor prescribes these hundreds of times a year.

Stuart's Calcium Wafers go right into your blood. Their purifying, beneficial effect upon the blood is felt throughout the body, not in a year or a month, but in a few days. You feel better all over because your blood, the life-giving fluid, is doing its work properly.

No matter how bad your complexion is, Stuart's Calcium Wafers will work wonders with it. You can get these little wonder-workers at your druggist's for 50 cents a package.

QUIET AT THE FRONT

Turks Unable to Drive Bulgarians From Lines at Tchataldja.

London, March 21.—Except for the statement that all is quiet along the Tchatalja lines, today's official reports concerning the military operations in Southeastern Europe are, as is usual, in direct contradiction of one another.

A dispatch from Sofia says the day passed quietly all along the Tchatalja front, and that the previous attempts which the Turks made there to advance were paralyzed with heavy losses. It adds that all continues quiet on the Gallipoli Peninsula and at Adrianople.

Constantinople, on the other hand, reports that the Turks at Adrianople kept up a continual artillery fire on the Bulgarians today, and that at Bulair, on the Gallipoli Peninsula, the enemy's left wing, which was throwing up fortifications on Examilo Heights, was attacked by Turkish artillery and withdrew, abandoning the entrenchments.

Forty years in use, twenty years the standard, prescribed and recommended by physicians. For Woman's Ailments, Dr. Martel's Female Pills, at your druggist's. ywt

SPRING TERM FROM APRIL 1.

New classes will be formed April 1 in Bookkeeping, Shorthand, etc, at the Westervelt School, Y. M. C. A. Building, London. Send fo particulars. xtz,Mar31

LINSEED COMPOUND

Looks as Neat When Stretched on the Posts as It Does in the Picture

GetGood Fence for Your Money

FROST WOVEN FENCES are the best value because:

They are made from full-size, No. 9, heavily-galvanized wire, which has that springiness that is lacking in many makes of Woven Fence.

They are carefully woven, having laterals and stays properly placed, and fastened by a lock, absolutely secure, but which does not kink the lateral wire, and weaken it to such an extent that there is no "come back."

Laterals are waved in such a way that they have practically the same elasticity as coiled wire.

Remember that cost for posts and labor is the same, no matter what kind of a fence you buy. Why not, then, get a fence that you know is strong and durable, instead of one which has no reputation for long service?

The Frost Wire Fence Company draw and galvanize their own wire, and the material used in their Woven Fences, therefore, is absolutely the best.

Economy in buying wire fences is not getting something cheap, but, on the contrary, getting something good, because in the long-run a fence that has the service-giving qualities of the Frost Fence is worth much more to you than a fence on which you can save a few cents per rod, and which will become used up in a few years.

We are handling the complete Frost lines, which means all styles of Woven Fences and Gates as well as Lawn Fences, both in Wire and Angle Iron. These goods have behind them the best-equipped Wire Mills and Fence Factory in Canada.

FREE TO YOU—MY SISTER

FREE TO YOU AND EVERY SISTER SUFFERING FROM WOMEN'S AILMENTS.

I am a woman.
I know woman's sufferings.
I have found the cure.

I will mail, **free** of any charge, my **home treatment** with full instructions to any sufferer from women's ailments. I want to tell **all** women about this cure — **you**, my reader, for yourself, your daughter, your mother, or your sister. I want to tell you how to cure yourselves at home without the help of a doctor. Men cannot understand women's sufferings. What we women know **from experience**, we know better than any doctor. **I know** that my home treatment is a safe and sure cure for **Leucorrhœa** or **Whitish discharges, Ulceration, Displacement** or **Falling of the Womb, Profuse, Scanty** or **Painful Periods, Uterine** or **Ovarian Tumors** or **Growths**, also **pains in the head; back and bowels, bearing down feelings, nervousness, creeping feeling up the spine, melancholy, desire to cry, hot flashes, weariness, kidney and bladder troubles where caused by weaknesses peculiar** to our sex.

I want to send you a **complete 10 days' treatment entirely free** to prove to you that you can cure yourself at home, easily, quickly and surely. Remember, that **it will cost you nothing** to give the treatment a complete trial; and if you should wish to continue, **it will cost you only** about 12 cents a week, or less than two cents a day. It will not interfere with your work or occupation. **Just send me your name and address**, tell me how you suffer, if you wish, and I will send you the treatment for your case, entirely free, in plain wrapper, by return mail. **I will also send you free of cost**, my book—"WOMAN'S OWN MEDICAL ADVISER" with explanatory illustrations showing why women suffer, and how they can easily cure themselves at home. Every woman should have it, and learn to think for herself. Then when the doctor says—"You must have an operation," you can decide for yourself. Thousands of women have cured themselves with my home remedy. **It cures all, old or young.** To **Mothers of Daughters**, I will explain a simple home treatment which speedily and effectually cures Leucorrhœa, Green Sickness and Painful or Irregular Menstruation in Young Ladies. Plumpness and health always result from its use.

Wherever you live, I can refer you to ladies of your own locality who know and will gladly tell any sufferer that this **Home Treatment really cures all woman's diseases** and makes women well, strong, plump and robust. **Just send me your address**, and the free ten days' treatment is yours, also the book. Write to-day, as you may not see this offer again. Address:
