BISSELL SILOS ON THE BEST

All farmers are unanimous in testifying as to its value. The handling of the Corn Crop is all done at one time. "You must make Hay while the Sun Shines," but you can store silage with unfavorable weather.

The BISSELL SILO is built of Selected Material, treated with wood preservative oils to prevent decay. The heavy steel hoops make it strong, rigid and air tight. Sizes to suit your requirements.

POULTRY AS QUOTED BY WALLER'S

702 Spadina Ave.

Toronto

	Per lb. Alive	Per lb. Dressed
Old hens over 6 lbs. each.....	29c.	28c.
" " 5 " " ".....	27c.	28c.
" " 3 1/2 to 5 lbs. each.....	24c.	26c.
" roosters over 5 lbs. each.....	18c.	22c.
Broilers 2 to 3 lbs. each.....	27c.	32c.
Young ducks over 5 lbs. each.....	26c.	30c.

Send us all your poultry.

of little use, place them in the oven until they are heated through. You will be surprised at the amount of juice they will then give.

Washing Irish Crochet.

When washing Irish crochet you will find that if you pin it out carefully to dry, as you would a lace curtain, instead of ironing it, it will retain its new look.

Dressing Perch.

Slit perch and other such fish up the back and skin them. If the skin sticks dip them into boiling water for a minute, and it will peel off easily.

Medicine Closets.

Every house should have two medicine closets, not too close together, one for medicines that are to be taken internally, and the other for liniments, and such disinfectants as carbolic acid, etc. Poisons and medicines should never be placed in the same cupboard, as that is a prolific cause of accidents. The closets may be made of packing boxes, fitted with shelves and doors or curtains, and should be nailed high enough up so that children cannot reach them.

The Beaver Circle

[Rules.—Write on only one side of paper. Do not use pen-name. Put name, age, class and address at end of letters.]

Afternoon Tea.

(A poem for the girls.)

To make this cup refreshing,
Fill the tea-kettle with water cold,
For water that's reheated makes
The tea seem tasteless, flat and old.

Then when the water hot becomes,
Fill up the china pot,
And stand it where it will stay warm
(In some safe, cozy spot)

Until the water boils quite hard,
Then empty it quite out,
Put in a half teaspoon of tea
For every guest, about;

The bubbling water pour on it,
And send right to the tray;
In just three minutes 'twill be "drawn"
And you may pour away.

If you expect a host of guests,
You'll find it a good plan
To make the tea just after lunch
As early as you can.

Make it quite strong, and let it stand
Five minutes at the least,
Turn from the leaves, keep hot, and serve
Diluted for your feast.

Little Bits of Fun.

In the course of a lesson on the subject of domestic economy and hygiene, a school teacher got a singularly smart and apt answer from a girl.

Speaking of milk and its importance as a food, the teacher asked: "Where is the best place to keep milk perfectly nice and fresh during, say, a hot summer day?"

And the girl—evidently thinking it was an easy question—promptly answered: "Please, teacher, in the cow."—Exchange.

Mildred had just had her first dip in the ocean.

"How do you like it, dear?" asked her mother as she fastened up the little six-year-old's frock.

"I didn't like it at all, mother," she replied, coldly. "I sat on a wave, and I went through."—The "Youth's Companion."

A visitor to a certain Brooklyn household was duly amazed by the wonderful likeness between the twins.

"Why," she gasped, "I never saw two children look so much alike. How does your mother tell you apart?"

"Well," explained Tommy, "she finds out by spanking us. Clarence hollers louder than I do."—N. Y. "Times."

Weeping to Order.—Danny and Bobbie had been left in the care of their big sister while their mother went out. At bedtime they wanted to "stay up for mother," but their sister relentlessly put them to bed. Danny maintained a stolid indifference.

Sunshine Furnace Efficiency

McClary straight walled firepot—no ashes to absorb heat.

The Sunshine semi-steel firepot is built with straight walls—not sloping to form and hold a non-conducting deposit of ashes. A very important point in furnace efficiency.

The grates of the Sunshine furnace are equal in area to the firepot, so that fresh oxygen—without which proper combustion is impossible—flows to every part of the fire all the time.

All air passages are exactly proportioned so that neither too much nor too little air passes over the radiator—there can be no superheated air, nor any under heated air, sent to the rooms above.

The doors, drafts and dampers are machined to fit snugly and to exclude heat-wasting air currents from the outside.

Engineering Service Free.

McClary's own heating engineers are at your service when you buy a Sunshine Furnace, to give you free expert advice on your home-heating requirements. Write to the nearest McClary Branch and ask for particulars about this service. A booklet, "Comfort in the Home," makes clear all the things you want to know about furnaces and it is sent free on request.

Usual sloping wall firepot. Blanket of ashes absorbing heat.

NORTHERN ONTARIO

Millions of acres of virgin soil, obtainable at 50c. an acre in some districts—in others free—are calling for cultivation.

Thousands of farmers have responded to the call of this fertile country, and are being made comfortable and rich. Here, right at the door of Old Ontario, a home awaits you.

For full particulars as to terms, regulations and settlers' rates, write to:

H. A. MACDONELL, Director of Colonization, Parliament Buildings, Toronto, Ont.
G. H. FERGUSON, Minister of Lands, Forests and Mines.
