Cradled on 180 Inches of Special-Alloy Springs

NINETY inches—7½ feet—of springs on each side the Jewett Six! Spring length equal to eighty per cent of its wheelbase. See how many cars of comparable size you can find as liberally sprung as Jewett! Every spring is built to finest Paige standards of special steels.

Leaves are wide and flat, stoutly shackled, and have well-oiled bushings. They absorb the shock and jolt of roughest roads in a way that makes folks wonder at Jewett's big-car riding comfort. The rear springs are semi-elliptic—slung *under* the axle to give both car and occupants a low, easy, cradling motion. Jewett spring suspension, in a word, is what you'd expect Paige to build! And Jewett Six is a better car than you expect $1645 to buy.
