Upon the food you select for your baby depends largely your child's health and your own comfort.

Milk Granules

Is the best for the following reasons:

1. It is the perfect equivalent of Mothers' Milk.
2. A new-born infant will take it readily, digest it perfectly, and thrive upon it alone.
3. It agrees perfectly with Mothers' Milk, and thus enables a mother to partially nurse her baby while giving it Milk Granules.
4. It requires only water in its preparation.
5. Milk Granules has proved satisfactory where every other food has failed.

Milk Granules is not claimed to be suited to infants of all ages.

It is specially designed for the first few months of infancy, and as the child grows stronger it should be replaced by our second food.
