

Decarbon **Steel**

Stoves AND **Ranges**

Are becoming more popular every day as the people find out their many superior points—

Handsome Finish, Good Bakers, Fuel Savers,
Do not warp or crack with the heat.
They heat faster and hold the heat longer than any other stove.

These features are only gained by making all our stoves from Decarbon Steel, the greatest stove metal known, discovered and controlled by the Doherty Manufacturing Company, makers of Decarbon Steel Stoves and Ranges.

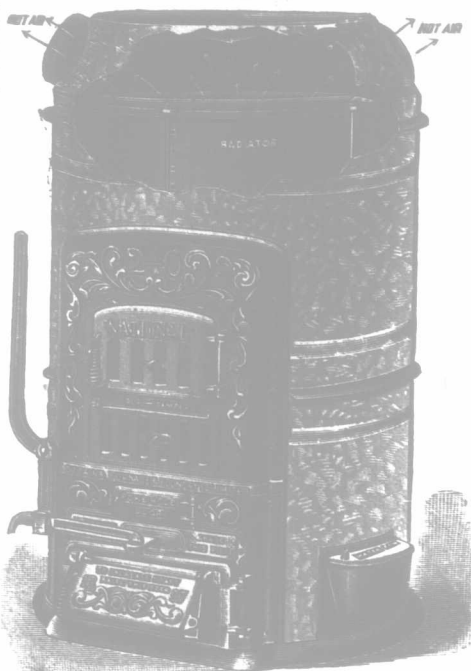

Handled by Hardware Dealers in every town.
