THE UNITED STATES

HOT OFF THE WIRES

REDS PREPARE FOR WAVE OF RIOTS LIKE RUSSIAN ORGIES, SAYS ATTORNEY GEN. NEWTON

Lusk Committee Revelations Only "Starting" to Show Work of Bolshevists, He Asserts—Mr. Untermyer Will Try to Force Rand School Hearing on Wednesday.

New York, July 30.—The Lusk committee, which is investigating seditious activities, has only pricked the surface of Bolshevism and anarchy here in its investigation so far, but is confident of running down individuals and exposing a dangerous and secret organization of Russian Soviet agents whose underground work in this country is done primarily through the radical labor group of the I. W. W., it was clearly indicated yesterday in a statement issued by Attorney General Charles D. Newton.

The evidence of Bolshevism in the I. W. W. which has been adduced so far by the committee is said to be only a forerunner of sensational disclosures to come. A thorough and far reaching inquiry into the activities of this organization and an exhaustive scrutiny of its members in this city and State probably will occupy several weeks of the committee's time upon the resumption of the hearings Wednesday.

Attorney General Newton told of some of the horrors of Bolshevik rule in Russia, as have been told privately to the committee by witnesses familiar with conditions in that country.

"This is the story of Bolshevism," said the Attorney General, "the ultimate outcome of the radical doctrines and preachings of the Reds in Russia. And this is what the I. W. W. is agitating for in America."

Akin to Ruin in Russia.

The Attorney General declared that the purpose of his statement was to indicate what Bolshevism has done in Russia and what the I. W. W. hopes to accomplish in the United States. He said that Bolshevism, which has been described as "organized anarchy," was simply the Russian counterpart of the ultimate aims of the I. W. W. in this country.

"Both doctrines call for the overturn of existing institutions for force, the murder of those who oppose these ideas and the establishment of a government of the Proletariat," said Mr. Newton. "The Proletariat these doctrine define as the propertyless class, but it includes all those who labor for fixed pay. This analogy between Russian violence and I. W. W. agitation in the United States was given the Legislative Committee to investigate Bolshevism by experts who have studied at close range the developments of the Bolshevik revolution and the attempts of the Reds in America to 'socialize' the country.

"The I. W. W. of the United States to which the advocates of anarchy have flocked in the last few years openly promotes the seizure of all industry by the workers, the destruction of government, the murder of everyone opposed to this doctrine of violence and the rule of the mob. They simply ornament the rule of the mob into proletarian government. The expressions are identical in meaning.

The evidence included in the Attorney eGneral's statement was not disclosed at public sessions of the Lusk Committee, but he declared it was given under oath, "the sworn testimony of a government official who witnessed the outrage of Russia by the Bolshevists and much of it was substantiated by photographic evidence showing the bodies of those murdered by the plundering mobs organized by Trotzky and Lenine, the Russian dictators."

Mr. Untermyer Charges Bad Faith.

While Mr. Newton was confining his attention to Bolshevism and the I. W. W. Samuel Untermyer, lawyer, who has interested himself as counsel for the Rand School of Social Science in the action begun by the Attorney General in an endeavor to revoke the charter of the school, sent a telegram to the Attorney General in which he declared he had been informed that the Attorney General intends to ask for a postponement of the trial until autumn. Mr. Untermyer charged the Attorney General with bad faith for "breach of the agreement" to bring the case to trial Wednesday, and declared it was evident the authorities had no case against the school and were unwilling to go to court.

"One might have guessed from your action in persisting in this baseless attempt to destroy the school at the time you did," said Mr. Untermyer, "and from the lawless and sensational way in which it was begun, by forcibly taking its books and papers, and from your unlawyerlike behavior through this scandaous proceeding, that when the time came for you to face the music you would, in your desperate effort to evade the trial, attempt to repudiate your solemn understanding with the court and with counsel on which they have relied.

Will Try to Force Trial.

"I assume the responsibility of hereby charging you and the committee and its counsel with prostituting your offices in the effort to destroy the good name of the school. In order that there may be no room for misunderstanding our attitude, I herewith formally advise you that every effort will be made to compel you to try this case on Wednesday next. As to your eleventh hour discovery that your complaint is built on sand, and that it must be amended, you should have thought of that before you began; before you tried to bluff the court and your adversary by accepting the challenge to go to trial immediately; before the Appellate Division, acting on your express agreement made in open court, convened an extraordinary term to try the case on Wednesday next; before the money of the tSate was spent in advertising this term, as required by law; before my client paid you a witness fee of about $30, and Senator Lusk a witness fee of about $20; before we suppoenaed Messrs. Berger, Stevenson and Converse, and before we sent a special messenger to the Adirondack Mountains to subpoena Magistrate McAdoo in order to make sure that all of you woudd be on hand on Wednesday next.

"You and the Lusk Convention are furnishing the forces of violence and revolution with the strongest argument that they have had in support of their charge that the weak and defenceless have no redress in our courts as now constituted. The time is at least at hand when the right to be publically heard, to which the school was in common decency entitled and which you have been persistently denying it whilst seeking to destroy the school before it could defend itself, is to be realized, and it does not propose to be cheated out of that opportunity."

Mr. Utermyer also sent a telegram to Justice McAvoy, of the Supreme Court, before whom the case was to have been tried, advising him that he and his clients would appear before the court on Wednesday prepared to try the case and vigorously opose every attempt to postpone trial.

Imperial Russians Murdered.

Some of the testimony referred to by the Attorney General in his statement in regard to Bolshevism in Russia, was quoted from the witness' "When the Bolshevvik hordes reached Ufa in Western Siberia practically every official associated with the former government who was unable to make his escape was taken into the public squares and shot. The charge made against them was that of counter revolution. Among the murdered were three judges of the district appellate court.

"Madame Andreyevna, who was a librarian at Buglama in Western Russia, told me that large numbers of property owners were imprisoned within three days after the Bolsheviki seized the government. When the jail was filled—dozens were herded together in cells—the Bolshevik soldiers would seize certain ones from the crowd, take them out and shoot them without trial. Then women were taken in groups each night and forced to dig graves for the prisoners who were to be shot the next day. Often it happened that members of the grave digging squad dug their own graves. They were picked for execution the next day.

LIQUOR DEBATES GIVE WAY TO OIL IN U. S. SENATE

Alarmed Lest Great Britain Secure Monopoly of the Oil Fields and Action is Demanded.

Washington, D. C., July 29.—After brief debate the Senate today without a record vote, adopted a resolution by Senator Poindexter, of Washington, authorizing the federal trade commission to investigate recent uprising in the market fuel oil in the United States, especially on the Pacific coast.

Action by the Senate was taken after Senator Phelan, Democrat, California, had charged that the British interests were attempting to acquire vast oil interests in California, and that Great Britain was endeavoring to corner the world oil industry. He declared that, unless steps were taken to encourage American operation abroad, the world's supply will be in the hands of British nationals within a few years.

ADRIATIC LOADED DOWN WITH MAIL

The First Trans-Atlantic Ship to Sail Since the Strike of Dock Workers Has Over 11,000 Sacks of Mail Matter.

New York, July 30.—According to cable advices received here today, the steamship Adriatic, of the White Star Line, left Liverpool July 28 for New York, via Halifax, with 6,853 sacks of mail, said to be a record number for one ship. The Adriatic, which is the first trans-Atlantic passenger ship to leave Liverpool since the settlement of the strike of 30,000 dock workers there, will call at Halifax and leave 4,200 sacks of mail at that port before coming to New York.

SEVENTY THOUSAND CASES OF TYPHUS EXIST IN POLAND

Paris, Sunday, July 27.—(By The Associated Press).—One hundred and seventy thousand cases of typhus exist in Poland and the Baltic Russian States, according to reports received otday by officials connected with the American Sanitary Expedition now hurrying by train and by automobile, through Germany to the afflicted districts.

The Polish department of health, facing what its officials terms a crisis have appealed to the Allied Governments for aid in checking the spread of typhus. Allied staffs will be assignel to the Polish ministry of health.

LEADING ALLIES READY TO AGREE TO RESERVATIONS

Peace Delegates Prepared to See Wilson Abandon His Uncompromising Attitude.

WANT AMERICA AT ANY PRICE

Confident United States Can Be Safely Depended Upon Whenever Occasion Arises

Paris, July 27.—No surprise would be caused in peace conference circles here if President Wilson little by little abandoned his uncompromising stand on reservations to the peace treaty.

When Mr. Wilson left Paris his attitude was that any reservations whatsoever would annul the treaty in so far as the United States was concerned. At that time the other American delegates and those of the leading Allies held the same opinion. The last few days, however, seem to have brought a change in the sentiment, which appears to be growing more definite.

It is now believed among some of the best i ormed in Crillon circles that reservations proposed by the Senate which simply bear on the attitude of the United States and do not change the terms of the treaty will prove acceptable to the Allies. When the Allies were declaring that the treaty must not be changed, their position was based on the statements of President Wilson, who had said that the Senate was bound to ratify the document, as public opinion would force such action.

There is no evidence in the news printed here in French, English and American newspapers that the American people have risen in protest against the desire of the Senate to make certain reservations. This absence of opular disapproval, coupled with the latest news that William H. Taft, once a wholesouled advocate of the treaty, had brought out his own reservations, has set the French and Italians to thinking. The result is that they are in private conversation discounting the importance of any reservations the United States may make.

This atmosphere has reached the Crillon, where in well informed circles it was said that there will be no official objections on the part or the Allies to the Senate reservations. The cold truth is that France, Italy and Britain, especially the first two, want the United States a party to the treaty under any terms, as they are confident that America can be depended upon to do even more than she promises if the occasion arises.

A Briton high in official confidence said today:—"The league is a wobbly old thing anyway and a few United States reservations won't hurt."

To be frank, the United States is the creditor nation and is the world's storehouse. Even idealists must eat to live.

U. S. BILL TO DEPORT UNDESIRABLE ALIENS

Washington, July 30—A bill to deport undesirable aliens under which the government may send home enemy aliens now interned in this country, was passed today by the House.

German prisoners, to the number of 2,000, in the West Camp, Oswestry, have threatened to start a riot.

They had had breakfast and, seeing no dinner rations on the table sufficiently early, as they thought, they refused to parade.

Arming themselves with heavy sticks, they went in a body to the barbed-wire and threatened to beat the guards.

Reinforcements were hurriedly sent for from another camp, and 250 troops with fixed bayonets, quelled the disturbance.

Dinner rations arrived during the morning and peace reigned once more.

THIN PEOPLE SHOULD TAKE PHOSPHATE

Working Like Plain Bitro-Phosphate to Put on Firm, Healthy Flesh and to Increase Strength, Vigor and Nerve Force.

Judging from the countless preparations and treatments which are continually being advertised for the purpose of making thin people fleshy, developing arms, neck and bust, and replacing ugly hollows and angles by the soft curved lines of health and beauty, there are evidently thousands of men and women who keenly feel their excessive thinness.

Thinness and weakness are usually due to starved nerves. Our bodies need more phosphate than is contained in modern foods. Physicians claim there is nothing that will supply this deficiency so well as the organic phosphate known among druggists as bitro-phosphate, which is inexpensive and is sold by the Ross Drug Co. in St. John and most all druggists under a guarantee of satisfaction or money back. By feeding the nerves directly and by supplying the body cells with the necessary phosphoric food elements, bitro-phosphate quickly produces a welcome transformation in the appearance; the increase in weight frequently being astonishing.

This increase in weight also carries with it a general improvement in the health. Nervousness, sleeplessness and lack of energy, which nearly always accompany excessive thinness, soon disappear, dull eyes become bright, and pale cheeks glow with the bloom of perfect health.

CAUTION: — Although bitro-phosphate is unsurpassed for relieving nervousness, sleeplessness and general weakness, it should not, owing to its remarkable flesh-growing properties, be used by anyone who does not desire to put on flesh.

AUSTRIA GRANTED SEVEN MORE DAYS FOR ITS DECISION

Paris, July 29—(By The A. P.)—Austria has been granted seven additional days for consideration of the peace terms, August sixth will be the final day on which the Austrian representatives may submit enquiries. This was decided upon by the Supreme Council today.

My milk problem solved with powdered separated milk.

KLIM is a dry powder. Change it into liquid by dissolving in water.

PURE—CONVENIENT—ECONOMICAL

Klim is all of these and soives your milk problem for this summer.

PURITY: New pasteurized separated milk received in the cool of each morning is used for producing Klim. The instantaneous change by the "spray process" from liquid to snow-white Klim makes it safe. It is packed in clean tins without being touched by human hands. Government bulletins prove our separated milk powder pure and genuine.

CONVENIENCE: Have a tin of Klim in the house and you can bake or cook anything requiring milk without thinking about your milk supply. Use it regularly. Have it handy to use just as you use sugar and flour. It is a staple food for every home.

ECONOMY: There is no waste when you use Klim for baking and cooking and other purposes. No sour milk accumulates to be thrown away. No ice is needed. Klim keeps indefinitely in the original tin until all used up.

Order a one pound tin from your grocer with your next order. You will then soon be using the ten pound tin.

Plants in Ontario at Brownsville, Belmont, Burford, Glanworth and Hickson.
