Ten Cans Now Instead of Six

AN open silo is a gaping hole in the money bag of milk profits. Keep air and moisture and dust out of your silo and you will notice at once the increase in your milk and butter-fat production. Cattle crave fresh, juicy silage just as people do wholesome food. It keeps them in fine, robust tone throughout the trying winter months and induces a rich, abundant flow of milk.

PEDLAR'S "PERFECT" SHEET METAL SILO COVERS

give you definite and permanent protection from the elements that sap the goodness of your silage.

Made in sections of sheet metal easily locked together, storm-tight and lightning-proof. Cannot rust or decay. Made in hip or single pitch style. Write now for prices and Booklet L. F.
