COCKSHUTT

DISC DRILLS

SAGGING of a seeder allows the centre drills to sow too deep, and delays crop growth and ripening. But in the Cockshutt, a strong I-beam across the entire machine prevents this. All crop grows at once, and ripens evenly.

Each disc has an oil well and dust-proof bearings. Oil once a season only. You have light draft and quick seeding.

The close-set crop sown by the "Cockshutt" prevents evaporation of moisture. You get better yield. The feed is made independent of wear and tear from jolting, and gives proper distribution. Write for full details.

THE "Cockshutt" Drill differs from others in having the discs set zig-zag, and only 6 inches apart instead of 7 inches. Experience has proven that this means 2 to 5 more bushels per acre. This means 500 extra bushels on each 160 acres of crop, if you use the Cockshutt Drill. This is pure profit, year after year. Just buying a "Cockshutt" gets it. Why not do it?

This drill does not clog with mud or trash. The boots are mud-proof. The discs have large scrapers to clean them. Besides, they "draw away" from the boot, and clinging trash falls off, instead of wedging. This feature means that you sow all your land. Also that stops are prevented. Seeding is done early. You save time and wages. Your crop gets an early start.

The "Cockshutt" is a perfect seeder, built to withstand wear for years.

Get our drill booklet.

SEND for our "Drill" information. It is free. A post card brings it. All sizes in single disc, double disc or drag shoes from 13 to 22 discs.

Eastlake Metallic Shingles

Only the best steel will stand the "EASTLAKE" embossing. Its depth and nature make it impossible for inferior steel to stand it without splitting.

This fact in itself is a guarantee of the permanent value of the "EASTLAKE" SHINGLE.

Once placed on the roof, "EASTLAKE" is there to stay, a permanent part of your barn or house—no Leaks—no danger of Fire or Lightning and best of all, no Repairs.

Useful Garden Implement

W. J. Justice, Simcoe Co., Ont.

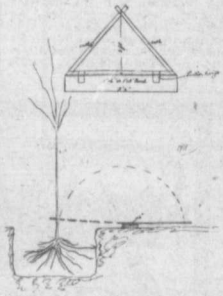
An implement that I have found very useful in my garden is the little weeder here illustrated. It was made as follows: The blade was cut with a cold chisel from a cast away hoe blade, and the cutting face filed to an edge. The stem was rivetted on by a blacksmith. It could be put on by any one having a breast drill.

This tool is exceedingly handy for close work about plants of any kind. With a little practice one could be used in each hand. It is especially good for weeding beans and Dutch set onions.

Convenient Tree Planter

W. T. Ashbridge, Kelowna, B. C.

I enclose a sketch of my tree-setter. It is simple and easy to make and just as easy to operate. As may be seen, a triangular frame is made of three laths nailed together and hinged to a 1 x 6 board by leather hinges.



A Convenient Planting Board

In using this setter, the crotch of the frame is set up against the stake marking the tree, then the frame is swung back out of the way and the hole dug for the roots. When planting the tree to see if it is where the stake was all you have to do is to swing the frame back, as shown. The 1 x 6 board pressed on the soft ground with the foot will hold it in place without any trouble.

Having to plant a thousand trees a couple of years ago, the old planting device of a board with a centre notch and two pegs, did not appeal to me, and the one here suggested was adopted. In practise I find it quite satisfactory and others near who have tried it say it is a labor saver.

Nursery Queries

Will you inform me where I can obtain apple seedling to graft this spring?. What would be the best book or paper for a young beginner in nursery work? — "Reader," Norfolk Co., Ont.

Most of the large nurseries will sell seedlings of imported stock such as they ordinarily use for propagation. Concerning nursery work, the best literature on the subject is contained in the Nursery Book, by L. H. Bailey, published by Macmillan Co., 70 Bond Street, Toronto. — Prof. J. W. Crow, O. A. C., Guelph.

Free Farrier Book Given Away

What would you give to know how to cure anyone of your horses, or cows, when it is sick without having to call in the Horse Doctor?

It would save you many dollars. It would sometime mean saving the life of one of your valuable horses or cows, which might otherwise die while you are driving for the farier.

You can learn how to treat and cure all the diseases of Horses, Cattle, Sheep, Swine and Poultry from

Gleasons' Veterinary and Horse Taming Book

It contains 520 pages, illustrated, gives all the medicines, doses and remedies—just what you want to know even if you do call in your Horse Doctor.

Paper bound edition given free for one New subscription that you will send us for Farm and Dairy, and 10 cents extra to cover cost of mailing.

Handsome cloth bound edition, on fine quality paper, 25 cents additional.

Get the New subscription and send promptly. Only a limited number of these valuable books are available.

NEW CENTURY WASHING MACHINE

The Washer of the Present and the Future

Scientists tell us that some day we shall do hard manual labor—machines will do it all! The first great step has already been accomplished, so far as household work is concerned. The New Century Washer, not only takes all the hard manual labor away from washing, but it washes clothes better than mah work has ever been done before. The wiper tub furnishes the power, the New Century does nearly all the rest.

"Fanning" machines are not now but the New Century is. The other kinds "fan" some of the work, the New Century does nearly all the work. The others give a little, the New Century gives most of the difference. It is the patented and exclusive features of the New Century. Ask your dealer about them or send to us for full information.
