YUKON

YUKON	*F. T. Congdon		Lib. 221

*Member of the last Parliament.

**North Essex and Drummond-Athabaska went Liberal at the general election in 1908 by the majorities given above. At succeeding by-elections, however, North Essex went Conservative by a majority of 84, while Drummond-Athabaska was carried by a Nationalist by 200.

***Hon. Mr. Templeman and Hon. Mr. Pugsley were both members of the last Parliament, though they did not sit for the constituencies in which they have been nominated on this occasion. Mr. Templeman sat for Comox Atlin and Mr. Pugsley for St. John City and County.

The candidates described as "Independent" in the Government column, have announced that they favor reciprocity. Those marked "Independent" in the Opposition column are opposed to reciprocity. Mr. John Herron of Macleod, though nominated by a Conservative convention, has announced that they will vote for reciprocity should the question come up in the House. Mr. W. M. German, of Welland, though running as a Liberal, has announced that he is against reciprocity.

SUMMARY OF WORLD'S GRAIN CROP THIS YEAR

Immense Yield in Western Canada—Harvesting Conducted Under Generally Favorable Conditions.

Washington, Sept. 15—Conditions of the important foreign crops as reported to the United States department of agriculture bureau of statistics, were announced as follows:—

In Western Canada, the greatest portion of 9,500,000 acres of wheat had been cut by early September. Harvesting operations have been conducted under generally favorable conditions. Commercial estimates range between 150,000,000 and 185,000 bushels.

Western and northern central Europe suffered from an almost unprecedented lack of moisture. Upon winter cereals the effects were almost everywhere beneficial, quantitatively, the aggregate wheat yield of the western and north central European countries, omitting Russia, is known largely to exceed that of the preceding year.

Rye shows some shortage in volume. Oats are heavily deficient and only a very moderate yield of corn is expected.

In south central Europe, the small cereals, although not so abundant as last year, have given better than average quantities. The corn crop promises well.

In Russia the yield in both wheat and rye probably will be much smaller than in either of the past two years. No trustworthy estimate of the exact extent of the deficiency, however, can be had until the publication of the official figures. The wheat shortage is attributed chiefly to a disastrous crop failure in southeastern Russia and western Siberia. Confirmation of the calamity is said in a report that the Russian government has bought large quantities of rye and wheat for the relief of the unfortunate districts. Barley promises a good crop and of corn a bountiful yield is assured.

In the southern hemisphere the growing crops are entering upon the first month of transequatorial spring. In Argentina recent general rains throughout the grain belt have strengthened confidence of the outcome of the future harvest. The areas under wheat, flaxseed and oats are four per cent., two per cent. and twelve per cent., respectively, larger than last year, making a record season.

Given favorable conditions, a good wheat crop in Chili seems assured.

Australian wheat acreage is said to show a slight increase with prospects for a favorable crop.

In British India conditions have improved, but rain is still lacking in some districts. An official report upon the acreage planted in cotton in 1911-12 in districts which usually have 75 per cent. of the total, estimates the area at 11,560,000 acres, against 12,215,000 acres in the same territory last year.

CHINESE TROOPS WILL NOT JOIN EITHER SIDE

Chung King, Sept. 15—A number of American families from Klating and elsewhere have arrived here safely. Two thousand modern troops outside Cheng Tu have not yet joined the beseigers, but have moved from their barracks, which are outside the walls, into a camp five miles distant. They refuse to obey the viceroy or to participate in the siege. It is reported that the students of the military college have joined these non-combatants. The authorities outside fear to attempt the relief of Cheng Tu, lest the neutral soldiers join the rebels. The beseigers are armed only with antique weapons. They demand the release of the ring-leaders of the Railway League as a condition of which they will relieve the seige of the capital. The rebellious agitation was begun by the league in protest to the government's programme of building the Hankow Sze Chuan railroad extensions with the aid of foreign capital.

Ordered to Sze Chuen.

Peking, Sept. 15.—An Imperial edict, issued today, admits that the situation in the province of Sze Chuen is very dangerous and orders Tsen Chuen Suan to proceed thither immediately. Tsen Chuen Suan formerly was viceroy of Sze Chuen and Wang Tung, and has the reputation of being a ruthless suppressor of rebellions. According to Chinese reports, two thousand troops who are outside Cheng Tu refuse to join either side.

Danger of Famine in Philippines.

Manila, Sept. 21.—The danger of a famine in the Philippines on account of the failure of the rice crop has become so threatening that Governor General Forbes today decided to order the purchase by the government of a ship load of cereal in Rangon. The cargo will be sold to the people at cost.
