AT THE EXHIBITION.

10,527 were in Attendance on Friday.

What the Judges of Grain, Field Roots, and Garden Produce Say.

Messrs. W. M. Blair and Walter Simpson, who judged the grain, field roots, and garden produce reported officially to the Exhibition Association, that with a few exceptions they found the exhibits satisfactorily arranged. In cereals they found the exhibits of a very high class, some of the samples of wheat and oats could hardly be excelled at any show on the continent. Potatoes were of a uniform excellent quality. Many of the samples, considering the lateness of the season, were surprisingly large. The field roots were a strong class considering the early date at which they were gathered. There was a small entry of corn but some samples were well matured. Garden produce was of an excellent quality and there is a large exhibit. They also acknowledge the receipt of every courtesy from the officials in charge, especially mentioning valuable assistance rendered by their assistants, Mr. F. A. Pickett, who performed his work in a most satisfactory manner.

C. Flood & Sons.

The exhibit at the fair which is attracting most attention is that of Messrs. C. Flood & Sons. Their exhibit is not only attractive to the eye, but the playing of Mr. John Francis Gilder, the distinguished pianist and composer, is attracting those who enjoy good music. Messrs. Flood & Sons are showing an exquisite Ronisch Parlor Grand in Circassian walnut and beautifully inlaid, also two uprights of the same manufacture, one a large upright in same scale as the grand. Also a beautiful Hallet & Davis Parlor Grand in mahogany, which is a magnificent piano and one of the choicest instruments that has ever come to St. John. In addition to the above pianos they are showing three Nordheimers, which are claimed to be the Steinway of Canada. They are certainly most delightful instruments, and have many admirers in St. John among the music loving people. The Evans Bros. and R. S. Williams pianos also come in for a fair share of attention. These pianos have been sold in the city and province for a great number of years, and while they do not cost as much as some of the others, still they always find friends wherever they are sold. Visitors to the fair should not miss visiting C. Flood & Sons' exhibit. It is certainly the most attractive spot in the whole exhibition. Not only will you see some choice pianos displayed with artistic taste, but you will also hear one of America's greatest pianists and composers. There are daily recitals, afternoon and evening, by this eminent pianist, and a half hour can be very delightfully spent at C. Flood & Sons' exhibit, west end of gallery.

Nothing More Comfortable.

Rubber tires to our carriages will soon be a thing of only ordinary notice, it has been found they add so much to the comfort of a drive. The Dunlop Tire Company of Toronto, who have an exhibit in the fair have made their name famous by their pneumatic tires for bicycles, carriages and automobiles and now make the solid rubber tire for carriages. They add greatly to the life of the vehicle.

Peerless Hand Laundry.

In the gallery of the main building, Bolton & Laskey of the Peerless Hand Laundry have a tastefulylly arranged booth where they are demonstrating the claims of hand work in this particular line. The advantages of hand work are no doubt very great, for the saving in wear is an important item, to say nothing of the far greater satisfaction which the proprietors claim to give. Expensive garments that are likely to be destroyed by ordinary processes are insured against any neglect when handled by the Peerless Hand Laundry.

In the booth at the exhibition workmen are employed in doing up linen on a small scale and in fact conducting it upon the principle of a well equipped laundry though on a much smaller scale. They turn out some very creditable work and have a lot of interested spectators always hovering round. They are furnishing a little souvenir of the exhibition in the form of a neat little pocket fire alarm telegraph printed on green paper. Messrs. Bolton & Laskey have been but a short time in business but their business is rapidly increasing, and their facilities for pleasing their patrons are being constantly improved and added to. Their headquarters are on Germain street and the proprietors promise the very closest attention to any work coming their way and hope by fair and honorable dealing with their patrons to make the Peerless Hand Laundry one of the best institutions in this line in the city. If you have not already visited their booth a pleasure is in store for you when you next go to the show.

T. H. Estabrooks'

exhibit of Red Rose tea still continues to be a very attractive spot for visitors who never seem to tire watching the packing process. Red Rose tea is making rapid strides into public favor because of its superiority to most other grades and blends.

Mr. Frank L. Cooper,

of Fredericton, has a magnificent exhibition of carriages, sleighs, etc., in agricultural hall. In fact a better display has never been made at previous exhibitions. There are twenty-seven carriages shown by him and a more handsome or better finished collection it would be hard to find anywhere.

Among the more noticeable features of the exhibit are a wagonette which carries 12 persons comfortably, finished in natural wood, a number of natural wood road wagons in different styles, also Bangors, one of the latter with light trimmings and rubber tires being especially handsome. A laundry wagon is much admired and its gay decorations make a bright piece of coloring amidst the more sober hued carriages. A very comfortable looking, and easy going beach wagon is upholstered in black and a Lexington finished in blue has many admirers. A Gladstone sleigh in natural wood is upholstered in grey corduroy and presents a nice appearance, while near it stands a rival for universal attention in a handsome sleigh with a rich shade of brown upholstering. A piano box top buggy with rubber tires and a whole host of other comfortable riding and driving carriages are shown.

Each carriage has a 1,000 mile axle, and nearly all have rubber tires. One feature of the vehicles is their thoroughly finished appearance and the evidences of superior workmanship which all display. Mr. Cooper has in the years he has been engaged in the manufacture of carriages, won for himself a reputation that is certainly to be envied not only for his reliability in work, but in his business methods of dealing with patrons.

He has made a special effort to have his St. John exhibit surpass that of previous years and his work has not been without the best results. Mr. Cooper occupies a large space in the front of agricultural hall and his exhibit attracts all who admire good workmanship.

It has not only attracted, but examination of the carriages has had a practical result in the sale of a number of the manufactures exhibited. It is Mr. Cooper's desire to take back to Fredericton none of those which he has brought to the St. John fair, so he has put a very reasonable price on all and persons thinking of purchasing would do well to call at his exhibit and learn the figures. These in connection with the quality of the vehicles go a long way in convincing one that in buying there is surety of every satisfaction for a reasonable expenditure.

Draught Competition.

Yesterday the draught team test was made. There were entered the teams of W. W. Black, Amherst; S. Creighton, Silver Falls, and Thos. Moriarty, Silver Falls. Mr. Black's team got first prize and Mr. Creighton's second. Mr. S. L. Peters was judge. The test for oxen will be made this morning.

Save Money and Add Comfort.

The Dunlop Tire Company of Toronto, are exhibiting their rubber tires for carriages. The name of Dunlop is famous in connection with tires and the excellence which made their pneumatic tires standards, is to be found in their solid rubber carriage tires. They make a carriage drive a luxury and add years to the life of a vehicle by counteracting the jolting and vibration of parts.

The Eclipse Acetyline Gas Co. of Montreal.

A handsome exhibit at the exhibition this year is that of the People's Gas Supply Depot of the Maritime Provinces which has its head office at Fredericton. Mr. H. H. Pitts, manager for the department, has charge of the exhibit, which consists of a number of gas machines in practical operation, models and bicycle lamps. The gas machine which lights the exhibit, as well as the New Brunswick Tourist parlors, is manufactured by the Eclipse Acetyline Gas Company of Montreal and the beautiful clear white light is an attraction which draws many people to that part of the main building. Acetyline gas has now become an established home convenience, as well as being extensively used in the lighting of stores, factories and churches. The claims of the manufacturers of the Eclipse machine are that for economy, cleanliness and general utility the machine surpasses anything in the market. A few years will see this light as common in small towns, villages and for isolated lighting generally as other modern inventions, such as the bicycle and mowing machines. This beautiful light costs less than paraffine oil, is far superior in brilliancy than either electric light or coal gas, and is sure to win its way in public favor. Letters addressed to the People's Gas Supply Depot, Fredericton, for information regarding prices of machine, expense of running, or cost of piping residences, will be promptly answered.
