☞ Blanks, Handbills, and Job Printing of all kinds, executed at the Chronicle Office at lowest prices.

THE CHRONICLE.

SAINT JOHN, AUGUST 8, 1845.

Various interesting extracts from papers received by last English Mail will be found in our columns. No news of striking importance having been received from any quarter since our last publication.

BELL BUOYS.—Willmer and Smith's *European Times* suggests that the entrance to Halifax Harbor and various places of danger along the coast should be marked by Bell Buoys, as being greatly superior for safety to the old fashioned dumb ones, and enabling vessels, especially steamers, to proceed on their voyage during a fog, when the dumb buoys could neither be heard nor seen. These buoys would no doubt be of incalculable value to sailing vessels and steamers running in the Bay of Fundy, and often prevent the interminable delays to which they are subject. Our Provincial government should get information on the subject, and if these buoys are found to answer a purpose of safety in any degree, we know of no more legitimate object for which to expend a portion of the public money.

THE QUEBEC SUFFERERS.—On Sunday last collections were made in the several Churches in this city, Portland, &c., in aid of the sufferers by the Quebec Fires. In the following Churches the sums annexed were collected:—

Trinity Church,		£25	0 0
Saint John Church,		18	0 0
St. Luke's and St. Paul's Churches, Portland,		15	2 9
Saint Malachy, city,	£82 15 0	111	15 10
" Peter, Portland,	29 0 10		
" Andrew's Church,		8	0 0
" Stephen's do.		7	8 6
Methodist Chapel, Germain street,		16	11 8
" Centenary Chapel,		8	11 0
Baptist Chapel,		10	17 13
Reformed Presbyterian Church Lower Cove,		7	0 0

FATAL ACCIDENT.—Yesterday as Mr. Martin Garretty, Branch Pilot, of this port, was boarding the brig *Amelia* to anchor in the harbor, he accidentally fell overboard and was drowned. We learn that he was standing at the bows of the vessel giving directions when he fell, and it is thought in a fit, (to which he had been subject,) as ropes were thrown and every exertion made to save him, but the deceased made no effort himself, and unfortunately sunk in an untimely grave.

BURNT DISTRICT.—It is gratifying to observe that the ruins are rapidly being cleared away, and many of those who a few days since lost their property will re-build immediately. This will no doubt give a large demand for building materials, such as bricks, lime, lumber, &c., some of which have already advanced in price. Bricklayers, Carpenters, and other Mechanics, must also find employment.

His Excellency the Lieutenant Governor arrived in town on Monday last and remained until Thursday, when he left in the steamer *New Brunswick*, for Head Quarters.

His Lordship the Bishop, we learn, will hold a Confirmation in Trinity Church, in this Parish, on Monday the 18th instant: he is now on an Episcopal visit to St. Andrews, Grand Mannan, West Isles, and Campo Bello.

The Montreal Courier says that Sir George Simpson arrived at Lachine on the 23rd instant, from the interior of Hudson's Bay, and through that gentleman we are informed, that the United States citizens, who had emigrated to Oregon, were dissatisfied with the character of the country, and that, of 5000 who had arrived there from time to time up to the month of March last, 1000 had proceeded to California.

SHIP LAUNCH.—On Monday, was launched from the Building Yard of Messrs. W. & J. Lawton, Portland, a beautiful ship registering 730 tons, called the "*Prince of Wales*." She is owned by the enterprising builders, who spared no pains to render her a superior vessel, and will prove a worthy addition to the large number of first class ships of which our Port can boast.—*New Brunswicker.*

The steamer *Unicorn* arrived a day or two since from Halifax: various reports immediately got into circulation as to the object of her visit. We are authorised to state that, being no longer wanted on the route between Halifax and Quebec, she is bro't hither for sale; and that her arrival in this port is in no way whatever, connected with public or official business.

We have since heard that the *Unicorn* has been sold for £10,000 to a company of gentlemen, to run as a packet between New York and Havanna.—*New York Albion.*

H. M. S. *Apollo*, commander Radcliff, arrived here yesterday evening from Halifax, with the 46th Regiment.—*Quebec Gazette.*

A person was convicted on Saturday last, before the weekly session of the peace, on a suit of the Corporation in a penalty of 20s. and costs, for having gone into his stable with a lighted candle without a lantern, contrary to the Police Regulations.—*Ib.*

From the Boston Post, August 1.

ANNEXATION RATIFIED IN TEXAS.

We have received Galveston papers of the 12th, but they contain no news from the convention in session at Austin. In the N. O. Picayune of the 20th, however we find a letter containing the gratifying news that the convention unanimously ratified the act of annexation on the first day of its session, the 7th of July. No other result was expected here:—

"*Austin, July 7, 1845.*—The convention assembled on the morning of the 4th, and unanimously elected Gen. Rusk to preside over its deliberations. On taking the chair he made a short address, which was well delivered and suitable to the occasion. A committee of fifteen was soon after appointed, who reported by their chairman, Judge Lipscomb an ordinance assenting, on behalf of the people of Texas, to the terms of annexation proposed by the United States government. It was adopted with one dissenting voice—but five members absent. It was engrossed and signed by all the members absent.—It is not a little singular that the only dissenting voice was Richard Bache, the father is law of your secretary of the treasury and brother in law of the vice president.

After the necessary resolutions were passed for the transmission of the ordinance to the United States; a resolution was offered by Col. Love, and unanimously adopted, "That the members wear crape on their left arm for one month, as a testimony of regret for the decease of General Jackson."—Whatever difference of opinion may exist as regards his political acts elsewhere, Texas owes him a debt of gratitude. To him we are indebted for the privilege of becoming a member of the great American Union—a measure so important to us, and I hope to you. The convention then adjourned. It was a novel celebration of the Liberty Day, to surrender the independence of our nation, and by the act of the people, assent to its incorporation with another, and offer a tribute of respect to the man through whose influence the measure was consummated.

On the 5th we appointed committees on the plan adopted by the Virginia convention, to report on the various subjects submitted. It called forth some discussion which was creditable to the speakers—it was the skirmish that precedes more heavy firing.

The delegates to the convention, for intelligence, integrity and worth, would rank high in any country. There is not, perhaps, much of brilliancy, but a great deal of matter of fact sense and sound knowledge: and I predict that we shall form and send you a sound and sensible constitution, free from the worst features of ultraism.

A despatch was received from the United States in the morning, and Maj Donelson arrived on the evening of the 5th, having been detained at Washington by serious indisposition. These despatches relate to the occupation of our frontier by your troops. They are now on their march—the foot by water to Corpus Christi, on the west bank of the Nueces; the dragoons by land to San Antonio.

The story is taken that will decide Mexico in her policy. Foreign troops will soon be upon the soil she claims. Her choice must be a declaration of war, or, if she is wise, negotiation. She may acquire money by the latter—defeat and disgrace by the former. To day a resolution was passed requesting the President of the United States, in behalf of the people of Texas, to send troops forthwith to our frontier. This resolution is a sanction, on the part of the people of Texas, of the movement noted above.

Lord Aberdeen has avowed to Dr. Ashbel Smith that her Majesty's government will not interfere in the question, so he writes home.

We are entirely exposed to the attacks of Indians and Mexicans—not a soldier on guard, and but few fire arms. So callous have the people of Texas become to danger, that they scarcely ever prepare to repel attack. On my way here I met a young man, with two young girls, in a buggy, with no protection whatever from attack, almost at the very spot where young Hornsby had been killed two weeks previous by the Indians. They were in high glee, laughing and talking merrily. I could but think that an hour might consign them to death, or a worse fate!

The following appointments have been made by the President:—

Hon. Ebenezer Allen, Secretary of State.
Hon. W. B. Ochiltree, Attorney General.
Hon. J. A. Greer, Secretary of the Treasury.

The reports of the crops throughout the country are highly favorable. Galveston and the other cities and towns continue healthy, and emigrants are pressing into the country from the adjoining State of the Union.

The British brig Persian had arrived at Galveston from Vera Cruz, with despatches, to return as soon as advices could be received from the seat of government.

CHINAMEN IN BOSTON.—Among the strangers now in Boston, are three real Chinamen, good specimens of the inhabitants of the Celestial Empire. They appear in full Chinese costume, long black queue and all, and are *attaches* of the famous Chinese Museum, which is soon to be opened here, and will form an interesting part of that exhibition.

We have already stated that one of these Chinemen was a professor of music. His name is *Lelooking*. He is about 25 years of age, and has much more the appearance of a philosopher than a musician. He has a very sedate and imperturbable look; and we understand he his never, since leaving China, manifested any symptoms of excitement, except when he first got into cars upon the railroad, on his way from New York to Boston. He is, in fact, an inveterate Chinese; and seems determined not to become a "barbarian" if he can help it. Mr. Weed, supercargo, and Capt. Killam of the ship Bazaar, in which the Museum of the Chinese gentlemen were brought out, too considerable pains to instruct Lelooking in some of the facts of European science; but vain. He obstinately persists in his oriental notion of the perfection of the human race; has no idea of the march of mind and all that sort of thing; and in spite of the testimony of his own eyes, still doggedly maintains that the world is not round, but as flat as a pancake, and as long as from China to New York.

Tsew-Chaoong is much more tractable; and takes great delight in the developments of the new world. He is charmed with this country, and he says he means, after he has fulfilled his three years' engagement with the proprietors of the Museum, to go to China and see his father and mother, and then come backhere and live. He is about 25 years old, speaks Canton-English pretty intelligibly, and writes a fair English hand. We have before us a specimen of Tsew-Chaoong's chirography, which shows that he has already made considerable proficiency in his European education.

The other one appears to be of humbler rank, and to have fewer Chinese peculiarities. He comes, we believe in the capacity of a servant, and as a matter of convenience has assumed the European dress. They all visited Mr. Simpson's factory at Saxonville a day or two since, and were marvelously affected by the operations of Yankee labour-saving machinery.—*Boston Travellor.*

GOOD ADVICE.—There are certain persons whom it is unnecessary to mention, who will not find it a difficult matter to appropriate to themselves the following seasonable advice:—

Calculatetobelawnkyhighifiwonfingerthetypesins printingofficeortouchanything indeditor'ssanctum.

Experiment with the Great Britain.—This lovely thing monster of the deep was placed for a few trifling repairs in one of the dry docks connected with this harbour, on the 5th instant; as there was but a foot spring tide, on that day, a very short draught of water was necessary to get her in with safety; but after every effort, by trimming coals, cables, anchors, &c., it was found that she was drawing at seven o'clock on the morning of the day alluded to, 14 feet 8 inches aft, and 12 feet 6 inches forward. Captain Hoskins on seeing this gave directions to draw a bolt out of the bow, and allow the first compartment to fill with water. This brought the vessel in a short time to 14 feet aft, and 13 feet one inch forward, the position required, and satisfactory demonstrated the utility and efficiency of the water tight bulk heads. No water made its way to the adjoining apartments although 50 tons at least entered the bow of the vessel.—*English paper.*

German Reformed Catholic Church.—The church of the German Reformed Catholics opened at Frankfort in June last, and though only calculated to contain *two thousand* persons, *six thousand* applied for tickets of admission.

The Junior Colonel of Europe.—The Emperor Nicholas has appointed his grandson Alexander Alexandrowich, an infant three months old, chief of one of the battalions of Finlanders belonging to the Imperial Guard.

THE TEMPERATURE for the months of July, for this and two preceding years at St. John, as indicated by observing a Farenheit's thermometer three times each day, at the hours of 7 a.m. and 1 & 9 p.m. the average gave the units as under; while a "thermometer attached" to a barometer of Taglia bue's best make, enclosed under a glass frame, frequently gave 2 degrees of higher temperature.

July 1843 gave	1810 units;	average	58.40
1844 "	1710 "	"	55.14
1845 "	1793½ "	"	57.86

During July, 1843, the lowest temperature observed in the shade was 50d on the 4th; the highest in the sun's rays, at 10 a.m. 12th, 104, and in ten minutes after, fell to 98:—the highest at any other time during the month, in the sun's rays, was 90 on the 25th, but the month afforded a high average notwithstanding.

During July 1844, the lowest temperature observed in the shade was on the 24 and 6th, 48 deg. at noon and evening; the highest in the shade was at 1 p.m. on the 4th and 17th, 70, and on the 24th at the same hour 72:—the highest in the sun's rays, either before or after noon, were on the 8th, 100—15th, 102—17th, 100—25th, 102. Up to the 23d July, 1844, more thunder and lightning had occurred in that month than for two or three previous years:—the 29th was a cold day with fog and rain; at 9 p.m. the thermometer marked only 58, which was the highest warmth of that day.

During July 1845, there were 19 days more or less foggy; either dense, driving, or diaphanous, and 19 days on which rain fell, either in very copious or growing showers of longer or shorter duration:—the lowest temperature in the shade was on the 2d at 7 a.m. 47; the highest on the 11th, 82, and on five other days the thermometer ranged from 70 to 79 in the shade:—the highest in the sun's rays was on the 11th at 11 a.m. 110; at 2 p.m. 121, and at 5 p.m. 110:—the temperature of the month has been tolerably high, notwithstanding the unusual quantity of rain that fell, and the prevalence of dense fogs. On three days, the 24, 5th, and 23d, there occurred squalls or storms of thunder and lightning. R.

Passengers in the Barque "*Cosmore*," 25 days from Glasgow, Dr. James Coxetter, and James Malcolm, Esq., of this city.

Married.

In the Parish Church of Shediac, on the 22d ult., by the Rev. Dr. Jarvis, Mr. Thomas Good, of Westgonche, to Miss Jane Lawe of Dundas, in the County of Kent.

In the Parish of Sussex, on the 20th ult. by the Rev. H. N. Arnold, Mr. Cornelius Snider, to Frances D. eldest daughter of Mr. James Hoyt, of that Parish.

At the residence of John Earle, Esq., Grand Lake, on the 23th ult., by the Rev. A. Wood, Rector of Waterborough, Mr. David Hanselpecker, to Mary, Amelia, eldest daughter of John Earle, Esq., M.P.P. of Queen's County.

On 25th ult. at Fredericton, by the Rev. Ingham Sandiliff Wesleyan Minister, Mr. Robert Winter, to Miss Eliza Ann Creighton. And on Monday by the same, Mr. Wm. Smith, to Miss Mary Lynch.

At Nashwaak, on the 5th inst., by the Rev. W. Beals, Mr. Allen McDonald, to Miss Jane Sutherland, both of St. Mary's.

Died.

On Wednesday last, Mr. John Richardson, in the 51st year of his age; a native of Halifax, N. S., much and deservedly esteemed in all the relations of life, by those who had the pleasure of his acquaintance; leaving a wife and daughter to mourn the irreparable loss of a kind husband and an affectionate Father. He bore his sickness with Christian fortitude to the Divine Will, with the full assurance of a blessed immortality beyond the grave.—Funeral to-morrow (Saturday) at 4 o'clock, from his late residence in Portland, when friends and acquaintances are respectfully invited to attend.

At Fredericton, on Monday morning last, William eldest son of Mr. Joseph Sutherland, aged eight years and six months.

At Sheffield, on the 25th ult., Rebecca Ann, wife of Mr. Alfred Day, of that place, aged 18 years.

At Pounds Bay, Westmoreland, on the 25th ult., in the 40th year of his age, caused by a fall from his horse, Mr. J. Thompson, Trowmen, much and deservedly esteemed, by all who knew him.

"Etna," and "Protection" Insurance Companies.

ALEXANDER BALLOCH, the Agent in this City, has received Circulars, from which the following is taken:

From the "Etna" Company, 22d July, 1845:—"You may be solicitous to know how we are affected by the fire in New York, on the morning of Saturday the 19th instant.

"We have a list of all our Insurances in the Burnt District—and we have the pleasure of stating, that the amount is such that we can meet every claim as soon as presented. If our Customers should feel interested to inquire, you now have the ability to answer."

From the "Protection" Company, 21st July, 1845: "Before this reaches you, intelligence doubtless will have been received of the late most disastrous conflagration in the city of New York, and its effects will probably be entirely to absorb the Capital of some Offices, and to create inquiries as to all in this section of the country, it is deemed proper to send this Circular to our Agents to let them know that our loss by the fire is moderate—nothing more than we can readily meet, and will not interfere with the regular course of our business, nor affect the security of those who insure with us."

August 1.
