THE ACADIAN.

WOLFVILLE, N. S., APRIL 29, 1887

Municipal Council.

The second session of the fifth Municipal Council of the Municipality of King's County convened in the Court House at Kentville on Tuesday the 26th inst. persuant to adjournment, B. Webster, Esq., in the chair. The roll being called all the Councillors responded to their names except H. Patterson, N. J. Lyons, F. G. Curry, S. L. Fitch and Dr Fitch, all of whom came in shortly after. The minutes of the last meeting were read and approved. A number of rate-appeals had been received which were handed to the committee on assessment. The report of J. S. Woodworth on proposed new road from Berwick station, with damages amounting to $124.40, and petition against the same with some 50 signatures, were read, and after some discussion report was dismissed. William Anderson was allowed to substitute a pole fence for a wire fence on a new road, through his lands, confirmed at a previous meeting, and allowed same amount for fencing. Robert Schofill asked for extension of time to report upon a proposed new road at Black River, which was granted. A number of applications were received from parties asking to be allowed to perform their statute labor on their own private roads, most of which were granted. A large number of new appointments were made which will almost necessitate the publishing of a new list of county officers. If Councillors were a little more particular in making their appointments in the first instance the necessity of making so many changes would be very much lessened. The sum of $24 was granted in full to Wesley Baker, for fencing road through his lands, in place of $48 asked for. Chas. H. Curry was appointed Collector of County and Poor rates in Ward 9, *vice* W. K. Rathbun, resigned. The sum of $10 was voted for pound at Cambridge, and Jas. E. Dodge was appointed commissioner and pound-keeper. On petition from residents of Wolfville, the Wolfville school section was set off as a police district and the sum of $600 authorized to be assessed and collected from off the ratepayers in said section for the purpose of paying a policeman and providing a lock-up; J. W. Caldwell, G. V. Rand, and J. W. Hamilton were appointed a committee to carry the same into effect. Bad rates were struck off in Ward 14, William Lee collector, amounting to $13.69. Ordered that Robert Reid be struck out of the list of constables in Ward 3. Report of committee on roads from the North River road to the Ward road in Ward 6 was confirmed; no damages. Bad rates were struck off in Ward 7,—including Rebecca Farrell's rate, $3.71—$22.62, E. A. Davison, Collector; in Ward 12, J. S. Marshall collector, $49.46; in Ward 6, Harry Coldwell collector, $39.34. E. A. Davison was appointed to prepare statute labor returns in Ward 7, *vice* D. W. Benjamin, resigned. Report on survey of Canaan road to Conquerall road, allowing $50 damage to Austin Gates, was confirmed.

Permission having been granted to receive delegations from the different temperance organizations, a number of gentlemen, and ladies representing the W. C. T. U., were admitted, and the question of appointing an Inspector under the provision of sec. 123 of the Licence Act was opened by Councillor F. G. Curry, when an animated discussion ensued, the Rev. Messrs Heart, McFall, and Mosher, and Councillors Baker, Curry, Illsley, S. L. Fitch, Dr Fitch, Dr Bars, and T. G. Mack taking part. The motion being put to appoint an Inspector, the vote resulted as follows:

For	Against
Steele	Chase
Illsley	Dr Fitch
J. P. Lyons	The Warden
A. T. Baker	H. Patterson
Dr Bars	Jehiel Davidson
F. G. Curry	S. L. Fitch
N. J. Lyons	T. G. Mack
Jas. Northup 8	Henry Baker 8

According to the rule of the Council in cases of a tie, the motion was declared lost. A committee of the Town Council of Kentville who had been waiting an audience with the Municipal Council to adjust the proportion of the Provincial road money to be appropriated to town, was introduced, and after some discussion it was deemed advisable to appoint a committee from the Municipal Council to confer with the town committee and report next day. The following were appointed the committee: Councillors N. J. Lyons, S. L. Fitch, Chase, Warden, and Clerk. Meeting adjourned.

WEDNESDAY.

The minutes of previous meeting were read and approved. On motion it was resolved that the Collector of County and Poor rates for Ward 8 should have his commission raised to 3½ per cent. The sum of $250 was

[Concluded on third page.]

Our Ottawa Letter.

No. II.

OTTAWA, April 22.—How the time slips away!—the first week of the session past and the work of another week well under way. My first letter was dated on Friday last and treated of the speech from the throne and gave a brief sketch of the new Speakers of the Commons and Senate. On Sunday I took a walk out to Janeville, near here, to look upon the devastation the ice and its accompanied freshet caused. The bridge (St Patrick's) over the Rideau appeared to be the best place, and the one where most of the sightseers were to be found to view the damage done by the last ice shove. Up to Thursday last it was thought that the bridge could not possibly stand the pressure, but on that night things looked more favorable, the water then was seen to recede very fast and the ice-jams began to move away slowly. The bridge was saved but was left in a most dilapidated condition. Some of the more venturesome ones walked across my friend who accompanied me among the number, but when he asked your correspondent to also take a trip across he respectfully declined—knowing that the many readers of the ACADIAN would think him more foolhardy than wise to do so. It must have been a picturesque sight in the little village of Janesville (a suberb of Ottawa) when the mighty torrent of the Rideau came pouring down through her streets. In some instances the water reached the first floor of the dwellings and reminded me of the scenes of my youth when I was up the river St. John, N. B., visiting, and saw the freshets of that river when the ice began to break up and make a shove. The freshet on the Rideau was this year the highest known for many years and the damage done must be immense.

But, Messrs Editors, I am digressing, and I must return to the House of Commons and inform you of what is taking place and how the business of the House is progressing. So far everything has been most pleasant, not much wrangling between the members of the Government and the big or little guns of the Opposition.

One of the very first questions brought up before the House was in regard to the Queens (N. B.) representation. Mr Baird, who got 61 votes less than his opponent, Mr King, but was returned as elected, through a technicality, by the returning officer, Mr Dunn, has been sworn in as a member. Mr Weldon (St. John) moved for all papers, correspondence and returns for the election. This motion having been agreed to by Sir John A., who remarked that the matter was one of the greatest importance and should be dealt with in a judicial spirit and that he had not the least objection to the motion, consequently it passed without a division of the House. Mr Pope, the clerk of the crown in chancery, was then called upon to produce all correspondence, etc. in the matter, which he did. Mr Dunn will also be called upon to transmit at once to the clerk of the crown in chancery all poll-books, ballots and other documents appertaining to the election; and thus the matter rests and until the request is complied with, Mr Baird will continue to sit for Queens. He (Baird), to say the least, has been placed in an unenviable position; but with a strong Opposition against him and a Government who will do what is right in the matter, no doubt in the end this question will be settled so that the one who is best entitled to the seat will occupy it. The New Franchise Act from present appearances will be brought up at an early stage of the session and its merits and demerits will be rigorously discussed, as the act in question is not one that the Opposition take kindly to by any means. Both Mr Lanerkin and Mr Innis, the former representing South Gray and the latter South Wellington, both Ontario constituencies, put identical notices on the paper of motions of accounts of all expenditures in carrying out of the Franchise Act. This, of course, is preliminary to an attack on the act. Whether this means an amendment, or repeal of the act, time alone will tell. Of course all new acts must have their defects, and this act is doubtless no exception to the general rule. The debate on this subject will be looked forward to with great interest in every constituency in the Dominion. The following committee was elected to strike standing committees: Sir John A Macdonald, Sir Hector Langevin, Sir Richard Cartwright, Hon. Messrs McLelan, Bowell, Blake, and Laurier. A committee composed of Messrs Blake, Berchard, Charlton, Colby, Davin, Desjardins, Ellis, Innis, McIntyre, Royal, Taylor, Tupper of Pictou, and Weldon of Albert, was appointed to supervise the official reports of the debates of the house with power to report from time to time. Hon. Mr Blake found fault with this committee, and by his suggestion Mr Scriver was substituted for Mr McIntyre and Mr Somerville's name added.

The newspapers irrespective of politics speak in high praise of Prof. Weldon, the seconder on the reply to the address. They all join in saying that he will be a useful man in the house and one calculated to become a shining light as his parliamentary experience increases. Maritime Provinces boys are bound to come to the fore anyway.

At a caucus of the French members who seceded from the Government on the Riel question, fifteen members were present, but as their proceedings were strictly private, the results of their deliberations have not as yet become public. It is rumored that great unanimity prevailed, and that it was generally agreed that by common action and working harmoniously together they could make themselves a power in the House, and if they could not control, they could practically influence to a great extent the legislation of the country. But time will tell. Those who have the *ear* of the government say that its majority on a party division in a full House will be forty—an excellent working majority.

The members of the Press Gallery are in high feather this session and they have reason to be proud, for with them is a charming young lady correspondent, Miss Brodlique, a niece of Hon. David Mills, who represents the London *Advertiser*. The members of the Press Gallery will have to look sharp now, and always be on their best behavior.

It is rumored that the Opposition intend to move an amendment to the address on the subject of Home Rule which is contained in Mr Curran's resolutions on this subject, and which will be taken up by the House and discussed at an early day. The Government will not accept a vote upon this question as a test of the strength of the House, as the move did not eminate from the Government but from a private member.

The proposed new regulations in connection with the admission of travellers' baggage from the United States to Canada is not very kindly received by railway men, and a deputation representing the principal roads over which the bulk of the summer tourists travel, has been here and had an interview with the Minister of Customs. They say if it is carried out it will seriously impede, if not altogether stop, tourist travel to Canada. The Government with its usual promptness, and looking at it in the right light that tourist travel should be encouraged, have agreed to rescind the regulations, so far as they referred to railways, and steamships on the rivers and lakes and bays of Canada. If the bays include our beautiful, but rough and foggy, Bay of Fundy, all right; but if not, it reminds me of what I once heard Jack Ritchie, the popular baggage-master with Joe Edwards, the popular conductor of the Lightning Express and Tourist Delight line say. Jack said, when he saw a bicycle being shoved into his car, "I can stand all kinds of baggage coming in, but when I see one of those things,"—pointing to the bicycle,—"it completely *breaks me up*;" and so, if he and the popular Joe were compelled to examine the tourists' baggage and report upon them, it would be a complete breaking up all around, sure enough.

Prof. Macoun, "Old Hickory," of Fruit Growers' Association fame, of your province, who is on the Geological Survey Staff of the Government, intends to start in a few days for Vancouver Island, and will make a botanical examination of the interior of the Island. Prof. Fletcher, who will also be remembered by many of the readers of the ACADIAN, with Prof. Fauhault and Robert, will this season continue the work of mapping the Nova Scotia gold fields.

Mr Jones, member for Halifax, in the House on Tuesday last, moved for correspondence between the Department of Railways and Halifax Chamber of Commerce respecting running powers of the Windsor & Annapolis railway over the Intercolonial.

On Wednesday the first real war of words of this session took place. Mr Mills, Opposition, made a violent attack on the action of the returning officers at the last election. Both Mr Jones and Mr Kenny of Halifax also spoke on this question, of course the one going for the Government and the returning officers, and the other upholding the Government and their appointees. The only other member from Nova Scotia who spoke on the question was Tupper of Pictou. A motion made for returns and correspondence with regard to election matters, passed. It appears that in this matter the Opposition claim that Government members of the House were gazetted just as soon as possible after the election, and that on the other hand the Liberals were not gazetted so soon. The Opposition claim that in thus doing it gave the Government a better chance in regard to protests than otherwise would be the case, but seemly the Government are in excellent good humor, and give the Opposition anything they ask for.

NOTES.

No holters were present at the Liberal caucus.

The Deputy Speakership and the Leadership of the Senate are still unnamed.

It is reported, on good authority, that it is the intention to give to the Northwest Territories two Senators.

Some amendments will be made to the Chinese Restriction Act during this session. With other amendments to the Act, it is proposed to abolish the certificates now granted to Chinamen arriving in the country on payment of the $50 tax. It has been discovered that these certificates are used for illegitimate purposes. You know that "for ways that are dark," etc., the Chinese are peculiar.

The Manitoba members believe that the disallowance question will have to be finally settled by referring the whole matter to the Imperial Government.

A bill will be shortly introduced to appoint a Court of Claims in place of the existing Dominion Board of Arbitrators.

The return of Dr Montague, the Conservative member for Haldimand, is contested, and Mr Hudspeth has been re-elected in South Victoria. In the first election he was disqualified under the act of holding govnt appointment.

The gross debt on the 21st of March was $270,340,000, and the net debt, $225,805,000. It will cost upwards of $550,000 to complete public works now under construction throughout the Dominion.

In the Senate the reply to the address was moved by MacCullam and seconded in French by Cagrain.

About four hundred guests attended the Conversazione of the Geological Survey Staff previous to their departure for their respected fields of labor.

The Government are quite prompt this session in placing the blue-books in the hands of the members. In my next letter I shall endeavor to give some information, contained in them, interesting to your readers, and in the meantime I shall bring this letter to a close.

C. S. C.

Newspapers in 1887.

Geo. P. Rowell & Co., of New York, will issue on Monday, May 2d, the Nineteenth Annual edition of their standard publication, the "American Newspaper Directory." The new volume contains an exhaustive list of all Class Publications so admirably arranged that any of the three thousand papers represented there can be readily referred to and all important facts concerning it, together with its circulation rating, easily obtained. The Newspaper Directory will be used principally by Publishers, Advertisers and Advertising Agents, but the vast fund of information it contains makes it valuable to persons of almost every trade and profession. As a Gazetteer alone it is well worth the price charged, $5.00, for it fully describes every town in which a newspaper is issued, and few people care to know about any place where one is not. The numbers of papers published in the United States, Territories (including Alaska) and Canada is put at 15,420; an increase of 581 in one year. The growth of newspapers in some of the Western States would be a matter of wonder, if it were not that this year is no exception to the rule. In Kansas the increase is 80 and in Nebraska 64; while the Keystone State shows a smaller advance of 35 and the Buckeye State of 30. Pennsylvania exhibits the largest increase in dailies, 17; Kansas in weeklies, 81, and New York in monthlies, 42. Seven states show a decrease; the most prominent instances being New Hamshire and Virginia, six each. The whole volume shows that great care has been taken to sustain its reputation as the most comprehensive work of the kind yet published, and to insure accuracy in every detail. Anything less than a complete compendium of American newspapers and periodicals would surprise those who are familiar with the former efforts of this firm, who are so well known as the oldest, largest and best known of all the American Advertising Agencies.

Jersey Cows the Best for Butter.

Jersey cows are the best for butter-making. There are good butter cows among the Shorthorns, Ayrshires, Holsteins, Devons and other breeds. But there is no other breed in which so large proportion of the cows are good for butter-making as the Jerseys. The best of the Jersey cows excel the best cows of any other breed in the quantity and quality of butter made. The grade Jerseys in this respect are scarcely inferior to the full bloods, and can be purchased at as low prices as cows of other breeds, thus bringing them within the reach of all. By the use of a thoroughbred bull out of a good strain of butter Jerseys, grade Jerseys can be obtained which will be likely to prove valuable butter-makers. Where cheese-making is more important than butter making some other cow, such as the Ayrshire, perhaps, would claim the preference; but where butter-making is the principal object, the Jerseys are unsurpassed.

The Jerseys have substantial grounds for their preeminence. They produce the largest quantity, the best quality, the highest-priced butter, and at as low a cost of production and as any other breed. They have, indeed, a brilliant record for quantity of butter produced. The largest yields per day, per week, per month, and per year on record have been made by Jerseys. There are reliable records of nearly three and a half pounds of butter a day; 21, 22, 23, 24 and 25 pounds per week; 183 pounds in sixty-one days; and 600, 700, 705 and 778 pounds a year have been produced by Jersey cows, and no other cows have recorded these highest figures. There are more Jersey cows which have produced fourteen pounds and upwards of butter per week than of any other breed.

MARKET REPORT.

White Bronze!

Has been awarded the Highest Prizes and Gold Medals over all Monumental Competitors. Is achieving great popularity and destined to be

The Monument of the Future!

"The only imperishable material for monumental work is White Bronze, it is artistic, elegant, and inexpensive.—*N. Y. Herald.*

"Metal possesses many advantages over stone for monumental purposes aside from its greater durability; the positive assurance of the raised lettering or inscriptions remaining legible for ages is itself worthy of appreciation, as the value of any monument lies in its ability to legibly retain its record. The monuments are made with removable tablets, for the purpose of adding inscriptions in the future. White bronze is also free from the discoloring influences of trees or growths of moss or mildew, and is not effected in the least by the elements of the atmosphere, so destructive to stone.—*Scientific American, vol. 53, page 304.*
