New York Stocks

NEW YORK, March 10.—Stocks held close to the prevailing level of the last few days thru the day's session. Altho a few issues made particularly good headway, changes in most cases were almost negligible. It was another dull day, with little news except the monthly report of U. S. Steel Corporation's unfilled tonnage. The amount of trading yesterday was the smallest of the year up to that day, but the total of sales to-day established another low record. There was again a noticeable absence of large selling orders, a condition which has been so general of late as to indicate that there is almost no pressure to liquidate.

The Canadian stocks and Mo. Pacific were the strongest in the list. C. P. R. was strong all day, rising to a new high record, altho its advance was less than those of allied stocks, Minneapolis, St. Paul & Sault Ste. Marie, Wis. Central, and Duluth, South Shore & Atlantic, all of which rose two points or more during the day. Holders of Missouri Pacific were disposed to exact better prices on account of indications that the new ownership may not have been settled definitely. Better understanding of the Mexican situation resulted in some improvement in Mexican railways.

The U. S. Steel report of unfilled orders at the end of February, amounting to 3,409,000 tons, a gain of nearly 200,000 tons, was accepted favorably as showing a continuation of the steady increase in the steel trade which has been in progress of late, altho the increase was not up to the most sanguine expectations. Traders bought Steel shares freely during the morning, expecting a more marked increase than shown, and Steel common sold off on publication of the figures. The drop in Steel arrested the slow improvement which was in progress thru the rest of the list.

PROMINENT BARONET INVESTS IN PORCUPINE

Sir Bryan Leighton of Military Renown Has Faith in the New Gold Fields.

The Hotel Mossop, that is rapidly becoming the headquarters for many prominent Porcupiners, has as its guest Major Sir Bryan Baldwin Mawddwy Leighton, who has been interested in Porcupine since last July.

Sir Bryan is the ninth to hold the baronetcy which was created in 1692. He is a justice of the peace for Shropshire, and is a major of the Westmoreland and Cumberland (late Shrops) Imperial Yeomanry. He has a brilliant war record, having joined the Americans in the Spanish-American war, and served two campaigns in South Africa; the first in 1896 and 1897, and the second in 1900-1. He is only forty-two, a noted traveler, lithe as a willow wand and every inch a gentleman.

One year ago last January some friends who had been looking over Porcupine told him in London that Porcupine was worth while investigating, so with his associates he came out in July and took up several claims in various parts of the Porcupine camp. In particular he is the owner of the Sullivan lot at the south end of Porcupine Lake, right north of the Warner claim and adjoining the McDougall vet. In fact, his claim will be about one hundred yards from the T.N.O. railway station, which will be built on the McDougall vet.

Sir Bryan has faith in the new gold country, and is proving it by prospecting and developing his properties. He himself is sailing for England at the end of the month, but is leaving his engineer in charge, and will return to Porcupine in July. He is one of the big men in London, and his opinion regarding Porcupine will carry weight.

BRADSTREET'S TRADE REVIEW.

Montreal reports to Bradstreet's say a review of wholesale trade generally seems to indicate that at the present time the volume of business moving is of average proportion in most lines of trade. In hardware, metals and kindred lines business is good. Excellent orders are coming in and the outlook for the season is most encouraging. Values are generally steady to firm. In dry goods trade is fairly active, and while orders for spring on the whole have been good, there is now displayed by storekeepers some tendency to wait later events in the more active opening up of spring business. The millinery trade has been fair and it is expected to be more active a month hence. The grocery trade is generally steady and of fair volume. Sugars are firm at the recent advance and canned goods also hold quite strong. Country trade is fair and moderately active. Collections are variously reported. From country districts it is understood they are slow. Receipts of produce are fairly large and prices hold steady.

Toronto reports say an excellent tone is noted to all lines of business there, and in most cases the volume is well up to expectations. The weather has been favorable to a continued clearing up of winter lines and some spring goods have already begun to move briskly in a retail way. Business at interior points is showing signs of opening up nicely and nothing has occurred to alter early indications of a good's season's business. Staple dry goods are moving well, and the turnover will be large. Trade in millinery has so far been good and the outlook is for a heavy season's trade. General retail trade here has been rather brisk during the past week and at provincial points there also seems to be a good business moving. Staple groceries are fairly active. Sugars and canned goods continue to hold very firm. The demand for building materials is active and hardware generally seems to be moving well. Country business is fair. Collections show little improvement.

Winnipeg reports say there is noted a heavier movement of general merchandise than is usual at this time of the year. Retailers from outside points say winter stocks of dry goods have been well cleared up. A large number of retail milliners and general dry goods merchants were in for the millinery opening and business has been very brisk. Orders for general spring lines are also good. Travelers are booking a good volume or orders for footwear. Receipts of produce are fairly large and prices generally steady. Money is firm and in good demand. Collections are slowly improving.

Canadian Laboratories Co., Limited.

Mr. W. K. McNeil, B.A.Sc., is the manager of the above institution, and we commend the Canadian Laboratories Co., Ltd., to all who may require the services of an assayer or chemist. They are mining, metallurgical and industrial chemists, and are thoroughly experienced and accomplished in the profession. A specialty is made of expert reports upon Cobalts and Porcupine ores. Their offices are located at 24 Adelaide-street W.

London Wool Market.

LONDON, March 10.—A sale of Cape of Good Hope and Natal sheepskins was held here to-day. There were 322,118 skins offered, of which 173,518 were sold. The selection was poor, but competition was fair, and prices ranged from unchanged to ¼d dearer, except for short coarse, which were ¼d lower.

A GOOD REPORT

Chambers-Ferland Shows Balance of $162,850 to the Good.

The advance of over a point in Chambers-Ferland yesterday was due to the improved financial position as indicated in the financial report, being for the year ending Dec. 31 last.

This statement showed that the company had a balance on hand or due from smelters on that date of $162,850. The actual cash on hand was $13,385; bills and accounts receivable, $2591; ore in transit and at smelters, $7369, and ore in hand, $14,503. Added to this are the accounts payable, including royalty, $16,436.

Montreal Grain Prices.

MONTREAL, March 10.—There was a fair enquiry from foreign buyers for Manitoba spring wheat, but as bids were 1½c to 2½c per bushel out of line no sales were made. A moderate amount of business is doing in oats for local consumption at steady prices. The tone of the market for flour remains steady, but the demand is still limited.

WELLAND

THE STEEL CITY

We believe WELLAND will grow faster during the next ten years than any other Canadian city.

It doubled in population last year and should do so again this year.

We offer and recommend a few choice workingmen's lots near the factory district, at from $70 each up, which should double in value this year.

Chicago Wheat Market Firmer On Reports of Damage to Crops

Hessian Fly Reported to Be Working in Winter Wheat Country—Winnipeg Exchange Higher—Liverpool Firmer.

CHICAGO, March 10.—Fear concerning Hessian fly in parts of Illinois and Indiana sent wheat soaring to-day, Texas reports of abnormally hot weather had a like effect. In consequence the market closed strong at 1½c higher. Latest figures showed an advance, too, in every other leading staple. Corn advanced ¾c to 1⅝c, oats ⅝c to ¾c to ⅞c, and hog products 2½c to 5c to 17½c to 20c.

Good buying of wheat was in evidence all day. Shorts, who oversold on yesterday's slump, were uneasy from the start. In addition, larger professional speculators took advantage of the opportunity and followed the course of commission buying, which reached a big total. New investors directed their efforts in the main to the July delivery. As a result that month made a better relative gain than May. Little attention was paid to the fact that the Hessian fly infection had been found in only a few counties of either Indiana or Illinois. The feeling of apprehension aroused was supplemented by talk of alarming possibilities of excessive heat in Texas; besides, primary receipts and the world's supply exhibited a substantial reduction, as compared with last year, and there was only the faintest response by Liverpool of yesterday's hard smash at prices in America. From the opening this morning until the pit was cleared, the advance suffered no important stop. May ranged at from 89½c to 90⅞c, closing at 90¾c.

Corn strength was chiefly speculative. Nevertheless, cash corn advanced one cent in the sample market, eastern demand improving a little, and local elevators also taking hold. May ranged at from 48⅞c to 50c, and closed steady at 49⅞c, a rise of 1c to 1⅛c over last night.

Oats rose in sympathy with corn. Shorts covered freely. High and low limits for May were 31½c and 30⅝c to 30¾c, with the last sales ¾c to ⅞c above the figures of twenty-four hours before.

Receipts at Primary Centres.

Receipts of wheat in car lots at primary points, with comparisons, were as follows:

	To-day.	Week ago.	Year ago.
Chicago	19	15	6
Minneapolis	160	108	300
Duluth	8	19	73
Winnipeg	259	183	129

European Grain Exchanges.

The Liverpool market closed to-day ½d lower than yesterday on wheat, and unchanged on corn. Antwerp wheat closed ⅝c lower than yesterday, Berlin ⅝c lower, Buda Pest 1⅝c lower, and Paris ¼c to ½c lower.

Winnipeg Inspection.

Winnipeg receipts of wheat to-day graded as follows: No. 1 northern, 23 cars; No. 2 northern, 78; No. 3 northern, 80; No. 4 northern, 32; No. 5 northern, 19; No. 6 northern, 8; rejected, 11; winter wheat, 2.

Argentine Cable.

Weekly Argentine shipments: Wheat, 3,592,000 bushels; last week, 2,536,000; last year, 4,464,000. Corn, 68,000 bushels; last week, 8,000 bushels; last year, 41,000 bushels.

Visible wheat, now 4,344,000 bushels, against 3,680,000 bushels a week ago, and 3,680,000 year ago, and 4,480,000 two years ago. Corn, 312,000 bushels last week; 315,000, last year and 306,000, two years 187,000 bushels.

The wheat market is quiet with a declining tendency and the demand inactive. Corn is weak with sellers numerous and demand limited.

Argentine—Receipts from interior are on a more liberal scale and stocks are increasing and sales are being made at a concession.

Australian Shipments.

Australian wheat shipments this week 2,480,000 bushels, against 1,160,000 last week and 1,608,000 bushels last year.

World's Estimates.

Broomhall estimates wheat and flour for the week at 10,800,000 bushels, inclusive of North America, 9,144,000 bushels actual last week. Of this total Europe will take about 10,000,000 bushels.

The total shipments last week 12,352,000 bushels, and 11,405,000 bushels last year.

Arrivals of breadstuffs into the United Kingdom will aggregate about 4,800,000 bushels. He predicts there will be a fair increase on passage to the United Kingdom.

Liverpool Cable.

LIVERPOOL, March 10.—Wheat—Market at the opening was influenced by weakness in America yesterday. Australian and Argentine shipments were larger than expected and estimates for world's shipments this week other than America, are 1,000,000 bushels over last year. Argentine weather and crop news continue favorable and reports from Russia are bearish regarding crop outlook and prospective early shipments. During the morning there was some covering by shorts and prices advanced ¼d for both May and July, while March was unchanged. Support was due to an improved demand from the continent for cargoes and a fair spot trade.

Crop Situation.

Modern Miller says: Favorable weather in most of the winter wheat belt maintains crop prospects above the average for this season of the year. Advices from the late drought stricken sections of the southwest state that plentiful moisture greatly improved crop conditions. In Oklahoma where the wheat was supposed to be dead, 50 per cent. of a yield is expected. Hessian fly is still reported in some parts of Illinois and Indiana, but there is no material damage.

Chicago Gossip.

J. P. Bickell & Co. say at the close:

Wheat—Higher. Firm cables and damage reports from scattered sections of winter wheat belt created buying on all dips, session closing with values 1¼c to 1¾c higher. Receipts are small and available supplies are decreasing and period of crop scares is at hand. Continue to advise purchases on all declines.

Erickson Perkins & Co. had the following at the close:

Wheat—The market opened steady to a shade firmer and ruled strong and higher thruout the session, the basis of the strength being various reports from the winter wheat country of damage by Hessian fly. The market, being a short one, easily responded to any bullish news of this character. To-day's action was simply illustrative of the fact that we are at a period of the year when a nervous market is in order. The fact that prices are so much below those of a year ago, and the high point of this present crop, is constantly in the mind of traders and induces buying of any kind of news which is of a bullish character. We think the advance of to-day all that the market is entitled to, at the moment, judged from a standpoint of the news and the technical speculative position.

Corn—The market ruled very firm throughout the entire session, general speculative sentiment continuing friendly to the long side. The market seems to be working towards a higher level, but we advise caution about buying on sudden advances.

Oats—Prices were firm all day, with heavy covering by local shorts. There was some improvement in the demand and the cash market was ¼c to ½c higher. We are inclined to think the advance about enough for the time being.
