Temperance Notes.

From the Halifax *Herald* we clip the following:

There was a large attendance at a meeting held this forenoon at one of the parliamentary committee rooms to consider the question of prohibition, and decide upon what steps would be taken this session in respect to the matter. All present were not by any means prohibitionists, or in favor of prohibition. The representatives of the Dominion Alliance in attendance were: J. J. McLaren, Q. C., Toronto; J. R. Dougall, Montreal; W. W. Buchanan, Hamilton, Ont.; F. S. Spence and J. H. Carson, Toronto. Senator Vidal occupied the chair. Besides the Dominion alliance representatives the others present were representatives of parliament.

Mr Flint, M. P., who has given notice of a prohibition resolution in the house, addressed the meeting. The principal point was to decide upon what kind of a resolution was to be introduced so as to get the real vote of the prohibitionists in the house. His own opinion was in favor of a straight resolution for prohibition, such as he had given notice of, namely: "That in the opinion of this house, the manufacture, importation and sale of intoxicating liquors in Canada, except for sacramental, scientific, manufacturing and medicinal purposes, should be prohibited by law."

Dr Mc Donald, M. P., seconded the motion. There was much to be said in favor of a plebiscite, but as he was a temperance man and in favor of prohibition, he would support and vote for Mr Flint's resolution.

J. J. McLaren spoke as an outsider. The temperance people outside the house would regret extremely if the present parliament was dissolved without having straight vote in the house on immediate prohibition.

A good deal of discussion followed, mostly as to whether Mr Flint's motion should be supported or changed to some other, preferably one in favor of a plebiscite of the people. Dr Roome eventually moved that a committee of five be appointed to draft a new resolution. Dr Roome's amendment was defeated by 21 to 18 and a motion in support of Mr Flint was carried. The meeting then adjourned.

The *National Temperance Advocate* gives no uncertain sound with reference to the Gothenburg system. Among other editorial notes in the March number we find the following:

The Gothenburg scheme or State control is not a step toward prohibition, but a long step away from it. It makes moderate drinking respectable and easy, and appeals to the cupidity of the taxpayer, who imagines his tax is lightened by the public profits from the drink. For every dollar of direct taxes taken off by the profits from the sale of the drink, it takes at least ten dollars to repair damages made by the drink itself.

***

The Norwegian scheme is a step backward. We are teaching the children in our public schools that alcohol is a poison, and this system would take the money made from the sale of alcohol to pay the salary of the teachers. It is too late in the history of the temperance reform in this country to import the corrupting and debasing schemes of the Old World.

***

We are told that the profits go to the public pocket, but where do they come from? The public profit comes out of the private pocket, and homes are devastated, women and children beggared, police and criminal expenses very largely increased, that the public may secure the blood-money which comes from the sale of drink.

***

The Ohio Liquor Law now in operation provides that no saloon shall be located within three hundred feet of a church. A saloon-keeper in Bellevue runs a very profitable business just opposite the Congregational Church, and to avoid being closed up he recently purchased the church property, paying $1,100 for it. The Congregationalists moved into another building.

***

The *Union Signal* says: The Massachusetts legislative committee on liquor law, as expected, brought in a unanimous report against the Norwegian system of regulation. Apropos of this the Boston *Transcript* pertinently says: "The system came so near to adoption last year that the people were aroused to look into it, and now that it has been looked into it does not appear to be the perfect thing it was represented to be. Merits it has, no doubts but the *underlying objection, public connection to the liquor traffic*, does not commend itself to the advocates of temperance, and naturally the liquor interest opposes it for business reasons. So between the two opposing forces, the temperance workers on one side and the liquor-sellers on the other, the Norwegian system is likely to be squeezed to death."

A MILLER'S STORY.

He Was Given Just One Month to Live.

First Attacked With Inflammatory Rheumatism, and Then Stricken With Paralysis—Hope Abandoned and He Longed for Death to Release Him From Suffering—At Last He Found a Cure and Relates His Wonderful Recovery.

Sherbrooke Gazette.

The benefits arising from the use of Dr Williams' Pink Pills are well known to the Gazette. It is a frequent occurrence that people come into this office and state that they have been restored to health by their use. It occasionally happens that extraordinery instances of their curative powers comes to our notice and one of these was related to us recently, so astonishing in its nature that we felt the closest investigation was required in order to thoroughly test the accuracy of the statements made to us. We devoted the necessary time for that purpose and can vouch for the reliability of the following facts, wonderfully passing belief as they may appear:

There are few men more widely known in this section than Mr A. T. Hopkins, of Johnville, Que. Previous to his removal to Johnville, Mr Hopkins resided at Windsor Mills and was for three years a member of the municipal council of that place. When a young man Mr Hopkins was noted for his strength and his activity as a wrestler. His strength stands him in good stead for he works hard at his business, carrying heavy sacks of flour in his mill for many hours during the day and frequently far into the night. Active as he is, and strong as he is, there was a time not long distant when he was as helpless as an infant and suffered intolerable agony. About three years ago, while residing at Windsor Mills, he was attacked by inflammatory rheumatism. It grew worse and worse until, in spite of medical advice and prescriptions, after a year's illness he had a stroke of paralysis. His right arm and leg became quite useless. Sores broke out on both legs. He suffered excruciating agony, and had rest neither day nor night. He sought the best medical advice that could be obtained, but no hopes were held out to him by the physicians. "He will certainly die within a month," one well known practitioner told his friends. "He will be a cripple for life," said two other doctors. It is no wonder that, as he says, life became a burden to him and he longed for death to relieve him from his sufferings. This was in August, 1892. About October of that year he heard of Dr Williams' Pink Pills and as a forlorn hope determined to try them. He did so, and before long was able to take outdoor exercise. He persevered with the treatment, closely following the directions, and is to-day nearly as strong as when a young man, and is able to follow successfully and without difficulty the laborious calling by which he gets a living.

Such was the wonderful story told the Gazette by Mr Hopkins, who attributes his recovery solely to the use of Dr Williams' Pink Pills, and he is willing to satisfy any person who may call on him as to their wonderful effects.

A depraved condition of the blood or a shattered nervous system is the secret of most ills that afflict mankind, and by restoring the blood and rebuilding the nerves, Dr Williams' Pink Pills strike at the root of the disease, driving it from the system and restoring the patient to health and strength. In cases of paralysis, spinal troubles, locomotor ataxia, sciatica, rheumatism, erysipelas, scrofulous troubles, etc., these pills are superior to all other treatment. They are also a specific for the troubles which make the lives of so many women a burden, and speedily restore the rich glow of health to pale and sallow cheeks. Men broken down by overwork, worry or excesses, will find in Pink Pills a certain cure. Sold by all dealers or sent by mail, postpaid, at 50 cents a box, or six boxes for $2.50, by addressing the Dr Williams' Medicine Company, Brockville, Ont., or Schenectady, N. Y. Beware of imitations and substitutes alleged to be "just as good."

A Marked Increase in the Sale of the new Specific Remedy.

Detroit, Mich., May 20—City druggists here report a great number of enquiries with regard to the specific remedy for Bright's disease, diabetes, and all forms of kidney complaint, known as Dodd's Kidney Pills. A partial investigation has shown that in every case the reply of the druggists to the questions of their customers have been highly laudatory of the remedy and that they have been able to cite many cases from their own personal knowledge where the most signal benefits have been derived from its use. The result has been a very marked increase in the number of sales made and several unusually large orders have been given.

Kind gentleman—"That boy just hit you, didn't he?"
Small boy—"Yes, he did."
Kind gentleman—"Well, now, why don't you heap coals of fire on his head, like a good boy?"
Small boy—"Do good boys do that?"
Kind gentleman—"Yes, indeed, all good boys do."
Small boy—"Well, I guess I must be dead wicked then, 'cause I don't want to burn the chump to death, I just want to punch his head.
