Cheese Market.

LONDON, Oct 28—Twenty factories offered 11,440 boxes of cheese. Sales were made of 7168 boxes August at 10c to 10½c, Sept 11¼c to 12c, Oct 11 3-16c to 11¾, Sept and Oct 11½ to 11¾. Cable 9 shillings.

A Swell.

Hello, Jack, you are quite a swell, where did you get that new suit? I got it at Petley's, all the boys go there now. They have the nobbiest lot of suitings this season I have ever seen, and they fit to perfection. tf

MOTHERS! MOTHERS! MOTHERS

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so go and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere. 25 cents a bottle.

REST AND COMFORT TO THE SUFFERING

"Brown's Household Panacea," has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago, and any kind of a pain or ache. "It will most surely quicken the Blood and Heal, as its action is wonderful." "Brown's Household Panacea," being acknowledged as the great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, should be in every family handy for use when wanted, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle.

REMARKABLE PARAGRAPHS.

—Impaired vigor of mind and body, in both male or female, old or young, cured by the timely use of Dr. E. C. West's Nerve and Brain Treatment.

Nothing better ever made than those Jersey suits for the boys—last longer, look better and half the price of the old-fashioned suits of tweed. All sizes at White's, 65 King st. west.

Pleasant to the Taste.

Children and persons with weak constitutions have always found great difficulty in taking Cod Liver Oil, and from this fact it has not been universally used, but with Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda, this prejudice is removed. It is so thoroughly disguised that you cannot detect the Cod Liver Oil. One physician writes us that it is used almost as a beverage in his family; another person informs us that he had to hide the bottle from his children. For Coughs and Colds, broken down constitutions, and all Lung Diseases, it has no equal.

A Los Angelos, California, dame is the mother of 32 children.

An æsthetic Marlboro hen lays eggs with miniature pictures of a sunflower on the shell. Where's Oscar?

Mr. G. W. Maculiy, Pavilion Mountain, B.C., writes: "Dr. Thomas' Electric Oil is the best medicine I ever used for rheumatism. Nearly every winter I am laid up with rheumatism, and have tried nearly every kind of medicine without getting any benefit, until I used Dr. Thomas' Electric Oil. It has worked wonders for me, and I want another supply for my friends, &c."

A fashion writer says that short ladies should wear long skirts of small figures but costly fabrics. That may be, but ladies whose husbands are "short" shouldn't.

Pride of family is a good thing, provided the representative of noble ancestors proves worthy of them. The thoroughbred horse is valued not because he is thoroughbred but because he wins the race.

Mr. John Magwood, Victoria road, writes: "Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure is a splendid medicine. My customers say they never used anything so effectual. Good results immediately follow its use. I know its value from personal experience, having been troubled for nine or ten years with Dyspepsia, and since using it digestion goes on without that depressed feeling so well known to dyspeptics. I have no hesitation in recommending it in any case of Indigestion, Constipation, Heartburn, or troubles arising from a disordered stomach."

There is no good reason why prohibition may not be a success in a climate like that of Minnesota, but in this part of the country experience has proved that prohibition and an Atlantic coast east wind don't mix very well.

A tug-boat captain has been arrested and fined for "outrageous whistling." We do not know much about the case, but the fact that he lived to be arrested and fined proves that he did not do his whistling in any newspaper office.

Mr. G. H. Williams, Toronto, writes: "I have thoroughly tested Dr. J. D. Kellogg's Asthma Remedy, and take much pleasure in recommending it to asthmatics. Last winter I had the Asthma so bad that I frequently had to sit up in a chair all night. I tried different Asthma medicines but without deriving any benefit from them; at least I got a package of Dr. Kellogg's and commenced its use, and I was almost immediately relieved." Northrop & Lyman, Toronto, proprietors.

A scientist says that a powerful current of electricity could be made a terribly destructive engine of war and would be an absolutely safe coast defense. There is hope for our navy yet. The ships might be anchored off the coast and used to string the wires on.

Miss Pardee of Pennsylvania received among numerous other gifts a clock for $60,000 on her wedding day. Her father is one of these poor, overburdened coal operators who have to stop their mines about three days a week to keep from starving on the low price of coal.

No time like the present for seeking medicinal aid when what are foolishly called "minor ailments" manifest themselves. There are no "minor" ailments. Every symptom is the herald of a disease, every lapse from a state of health should be remedied at once, or disastrous consequences are likely to follow. Incipient dyspepsia, slight costiveness, a tendency to biliousness, should be promptly counteracted with Northrop & Lyman's Vegetable Discovery and great Blood Purifier, and the system thus shielded from worse consequences.

When a man's piano gets so bad that he can't stand it in his own house, he gives it to an asylum, and then then thinks he has done a deed of charity.

A "dainty dish to set before the king" is an oyster-crab salad, made of the tiny crabs found inclosed in oyster shells. The crabs should be slightly boiled before they are immersed in dressing.

Joseph Rosen, Percy, writes: "I was induced to try Dr. Thomas' Electric Oil for a lameness which troubled me for three or four years, and I found it the best article I ever used. It has been a great blessing to me."

President Arthur's Presentiment.

N. Y. Cor. Philadelphia Record.

A gentleman who is on intimate terms of personal friendship with President Arthur, who was the bosom friend of his law partner, the late Benjamin K. Phelps, was speaking of the accident to the United States steamer Despatch, a few days since, when she ran upon the docks of Newport harbor, and says that he was terribly distressed over it, trifling as it was. "As for the president," he remarked "I do not wonder over the telegram which says that he was very much depressed by the casualty. He has not had a really happy day since he was inaugurated president. I do not think him any more superstitious than the average of men, but I know that he is harrassed by a presentiment that he will not live out his term. He has no fear of assassination, but his nervous imagination (for it is nothing but imagination) leads towards death by sickness or accident, and this makes his life a very sad one." Probably the thousands of men who envy President Arthur his wonderful good luck, and thinks that he must necessarily be the happiest man in the United States, will be surprised to learn that the president carries his own load of sorrow and finds that the highest office is not without its thorns. It was this that made him weary of the ceaseless round of gaiety at Newport, and led him to turn his back upon the smiles of shoddy at a time when the aristocracy of fashion's city by the sea thought their flattering attention had raised him to the pinacle of a self-satisfaction.

The Stranger in London.

That the great city will ere long be hardly recognizable by its former denizens, all the world has heard. The visitor passing up the Thames now finds his eye gratified by the many handsome edifices recently erected. As he reaches the famous Victoria Embankment, there rises over him on the right hand the new Times office, and on the left hand the new tower-crowned works of Messrs. James Epps & Co., both phases of Italian architecture. It may be said that these two buildings are types of the far-reaching business energy of the nineteenth century, for it has resulted from such means that these two establishments have brought themselves to the fore, and that the annual issue of each has come to be estimated by millions. During the last year the number of copies of the Times issued is estimated at 16,276,000, while the number of packets of Epps' Cocoa sent off in the same period is computed at 14,749,695. The latter is a large total, when it is borne in mind that in 1830 the consumpsion of cocoa throughout the whole kingdom was but 420,382 lbs., there then existing no preparation of it such as this, which by the simple addition of boiling water would yield a palatable drink. Truly time may be said to work many changes. tf

Corner Lots in Montreal.

From the Shareholder.

Corner lots in Toronto, Chicago and other great western cities are built upon and made useful. In Montreal they are an abomination. It is true that the civic ordinances insist upon their being fenced in, but that is not much, for the fences are at once seized upon by bill-stickers, who cover them with obnoxious placards, where a flaring announcement of a minstrel show or circus, and a warning to the unconverted in all stages of dilapidation, offend the eye of visitors and citizens alike. Just look at the lots on St. Catherine street, and the vacant lot opposite our palatial Windsor. Not quite vacant however, for there is a strange abomination there in the shape of a crystal palace, the said crytal being composed of a mound of carpenter work covered with strips of felt and a coating of pitch. Not so much as a skylight is visible to break the gloom from the outside. Doubtless the crystal is all inside; but outside it has no form or comeliness, or glass, let alone crystal. Seriously speaking, do the owners of these lots pay any taxes? A corner lot is valuable in proportion to the capital expended on the lots in the neighborhood. This should be taken into account in the assessments, and the owners of vacant lots made to pay, not only in strict proportion to the rest of the rate-payers, but a good round sum in addition to commensate for positive injury inflicted on the city by their usually disreputable condition and hindrance to progress.

A Perfect Fit.

Why, Mrs. B——, how beautifully your dress fits you; where did you get it? I got it at Petley's, of course, all the ladies go there now; they have a new head dressmaker and she fits beautifully. I was never so well pleased before. tf

MEETINGS TO BE HELD.

THE TORONTO

Mining & Exploring Co.

A general meeting of the shareholders in this company will be held at Room No. 9, 30 Adelaide street East, Toronto, on

Wednesday, the 8th day of November next,

WHAT

LIFE INSURANCE IS AND DOES.

"A French writer has remarked that the two principles—association and insurance—are the levers which are able to move the world; and, in a sense by no means lacking its serious phase, life insurance may be defined to be an indispensable element of earthly happiness. There is no condition of life which it cannot ameliorate; no danger whose consequences it cannot lessen; no sentiment of affection which it cannot strengthen. If, of all contingencies, death is the most terrible and the most inevitable, the wise man should always find room in his mind for the thought that death may, by a sudden stroke, surprise him amid his most cherished projects, and snatch him, perhaps without a moment for farewells, from his family and friends. Now, life insurance will not hinder any one from dying; but it has proved itself abundantly able to diminish the sad consequences of that inevitable event called death. There are times when no one can count upon a permanent possession of anything. Life is full of vicissitudes, whereby the wealthiest men are, as in a moment, brought face to face with poverty and ruin. Your own thoughtlessness or extravagance; the betrayal by others of your confidence; swift-coming and unheralded monetary revulsions; social or national calamities; the thousand and one accidents and happenings which go to make up the vast variety of human existence and experience—all these or any of them may, within the period of the next few years, cast the dark shadow of disaster upon you, and compel you to grope your way toward the pauper's grave. This has been the hapless fate of thousands who have thus been forced from envied heights to take the plunge into misery's depths. Why should you be, more than they, exempt? An anticlote to the possibility of such a sad experience is supplied by life insurance, which, in one of its many forms, offers to guarantee the payment to yourself, ten, twenty, thirty years hence, of a fixed sum, which shall relieve your latter days from all fear of poverty, or, in case of your death in the interval, the same sum will reach whomsoever you may designate.

"By means of life insurance, daughters may be dowered; sons established in business; widows continued in comfort and assured the social respect which competency commands; debts may be provided for during life and paid at death. Insurance renders all this easy and offers it at a cheap rate. It never exacts but one condition, and that not from all. This condition is a disposition toward economy. Economy is the beginning of all wisdom, of all morality; just as its opposite hastens the *finale* of all these. The exercising of but a little economy, the discontinuing of useless habits, the lopping off of some foolish luxury, would suffice to place you securely under the protection of insurance and redeem from the possible enslavements of poverty, the family whose future inspires you with your chief anxieties.

BETTER THAN GOVERNMENT BONDS.

The ÆTNA LIFE offers superior advantages for the investment of funds. Its Endowments give a much larger rate of interest than Government securities will produce.

ÆTNA Endowments run ten, fifteen, twenty or more years, and are paid for in one, ten, fifteen or more annual payments. They are secured by the Ætna Life's assets of over twenty-seven millions. In event of the death of the purchaser, further payments are not required, and the Endowment becomes IMMEDIATELY DUE. Payments can be discontinued without loss, after two years.

At present prices of Government securities, one thousand dollars will purchase a United States bond, payable in twenty years, for $925.92. The same amount will purchase an Ætna Endowment, payable in twenty years (and at death, if it occurs before), for $1,806.04. The holder of the Endowment will be entitled to annual cash dividends during the twenty years. Should death come at the end of the first year, the Ætna Endowment would bring $830 more than the money invested in the United States bond.

ABRIDGED PROSPECTUS.

This Company is to be organized for the purpose of acquiring, working and increasing the business of the Dominion Bolt Company.

For the establishment of a rolling mill and furnaces for the manufacture of iron from scrap and iron ore.

For the purpose of acquiring land for such purposes and for the employees of such a business and to sell to, aid or guarantee such employees as may acquire and build on the lands of said Company.

The Dominion Bolt Company is now a well established paying business. Its growth has been continuous from its inception in the fall of 1879 until the present time. Its machinery is of the most modern kind, giving the largest output of work and of a quality that now commands approval from the entire trade of the Dominion. The demands for its products have been so steady and continuous that new machinery has been constantly added until their present premises have become crowded and they are compelled to move to larger premises to meet the pressing wants of the trade.

The Dominion Bolt Company now manufacture every kind of Bolts, Nuts and Spikes, and produce an aggregate of about thirty tons of their products per day.

This large consumption of Iron by the Dominion Bolt Company is sufficient to keep a good sized Rolling mill at work. The Bolt Works and the Rolling Mill each in themselves are good paying ventures, contributing by the scrap and requirements of the one to the success of the other.

The Dominion Bolt Company has now over 250 employees. The Rolling Mill would about double that number.

For such Works and for homes for the employees a most advantageous site has been chosen on the lake shore east of the Humber River and extending north to Bloor street, comprising in all with the water lots 200 acres—equal to about 3000 Building Lots—bought on sufficiently favorable terms to be an assuredly good speculation, independent of the projected Works, and with the Works there established, the land put into the Company at cost and divided into building lots, sold or leased, investors are assured of large returns.

The Great Western Railway—Grand Trunk Railway—also passes through the front of the property, which is near to the tracks of the Northern Railway, Credit Valley Railway, Toronto, Grey & Bruce Railway, and to the proposed Ontario & Quebec Railway and Loop Line Railway. A switch is at present being laid into the grounds from the Great Western Railway, and arrangements are also being made with the Credit Valley and Ontario & Quebec Railways for similar accommodation. Besides these advantages it is advantageously situated for constructing wharf accommodation into the lake or along the Humber River, by which it is bounded, and in which sufficient depth of water exists for lake vessels with coal, iron, or other supplies to or from such a business.

The capital of the proposed Company is fixed at $500,000 in 5,000 shares $100 each, to be called up in instalments as required after the organization of the Company and the appointment of the Directors. Of this amount already nearly 3,000 shares have been applied for.

It is proposed to pay dividends half yearly, at the rate of 8 per cent. per annum—the excess of profits after paying such dividends to be paid to the shareholders by way of bonus, or otherwise applied as the Directors may determine.

Prospectuses and forms of application may be had at the office of A. J. Close & Co., the Company's Brokers, by whom subscriptions for stock will be received.
