EAST ENDERS WIN AT LIBERAL ALLEYS

Capt. Garnet Arthurs' team of bowlers from ward 5 were too many for Capt. Frank Millson's trundlers last night in the Liberal Club series, winning two out of three games. The South London bowlers were the better the first game, and won with 37 pins to spare. The next two went to the east enders by comfortable margins. The bowling was not up to the usual standard, the players being out of practice. Capt. Arthurs did the best all-round bowling, although Beech got high score with 164.

The scores:

WARD ONE.

Beech	114	122	164	400
Leathorn	134	104	101	339
Garside	129	119	101	349
Trebilcock	153	126	121	400
Capt. Millson	117	129	128	374
Totals	647	600	615	1,862

WARD FIVE.

Simpson	124	120	130	374
Sippi	132	142	126	400
Cunningham	116	117	130	363
McHugh	113	109	134	365
Capt. Arthurs	125	160	128	413
Totals	610	648	648	1,906

Local Items

—Mrs. Russel Myers (nee Comsky) of this city, is visiting at her home in Ingersoll.

—Mr. and Mrs. W. F. McMichael, of Kalamazoo, Mich., spent Sunday with the former's parents at 370 Ontario street.

—Mr. A. B. Lee and family, of North Main street, Glencoe, have taken up their residence for the winter at 722 Colborne street, city.

—During the holidays of Dr. McCallum, Dr. Harris is acting superintendent. Dr. George Biggs of Toronto, is assisting him.

—Rev. Dr. Courtice, of Toronto, will give the fourth of his splendid series of lectures on the life of Christ at Dundas Center Church tonight.

—Professor William Saunders, of the Government Experimental Farms at Ottawa, and father of Water Commissioner Saunders, was in the city today.

—Dr. H. A. Stevenson has returned from a hunting trip in the northern woods. He reports excellent sport, bears of all kinds, with the exception of the Teddy variety, being in abundance.

—A curly cabbagehead on exhibition at the well-known grocery store of Connor Bros., corner Richmond and Oxford streets, has a remarkably "chesty" appearance, having spread itself over a diameter of something more than a foot and a half, and shows no sign of having suffered from drought or financial stringency.

Mr. Baird Accepts.

Rev. J. W. Baird, B.A., of Sarnia, has accepted the invitation of the Hyatt Avenue Methodist Church to become its pastor after July 1 next, subject to the action of the stationing committee.

Whist at Hyman Hall.

The weekly whist tournament at Hyman Hall will be held tomorrow evening. Both the compass and progressive whist games will be played. The evenings are growing in interest, and a large attendance will probably be present. Valuable prizes have been put up for competition.

May Be Insane.

Abraham Summers, a London Township farm laborer, was arrested last night by County Constable John Richardson on a charge of insanity. Summers set fire to a strawstack on the fourth concession, lot 8. He will be examined this afternoon as to his sanity.

Evangelistic Services.

The evangelistic services in the Wellington Street Methodist Church, conducted by Miss Kathleen Morton, of Toronto, are being well attended, and much interest is being manifested in them. On Sunday night there was a very large attendance. Several have professed a desire to live a new life.

Sprang Fire Alarm.

The firemen had a run at 11:30 last night to Robinson, Little & Co.'s warehouse. The firm is installing an automatic sprinkling system, with a fire alarm system attached. The work has not been completed, and last night an alarm was turned in, the cause of it not being known. One of the tanks was leaking a little, but caused practically no damage.

Rev. C. O. Johnston Coming.

It will be good news to a great many Londoners to know that Rev. C. O. Johnston, of Queen Street Methodist Church, Toronto, is to lecture at New St. James' Presbyterian Church next Monday night. His subject is, "Specimens of Humanity," and those who have heard it say that it excels his lecture on "The English, the Irish and the Scotch," which he gave last spring in New St. James', to a large and delighted audience.

Council of Women.

The meeting of the local council of women advertised for Thursday afternoon will be partly of a social character, to welcome Mrs. Cummings, corresponding secretary of the National Council of Women, and Mrs. Brown (Faith Fenton), its press convenor, also to hear the report of Mrs. R. M. Graham, London's own delegate to the annual meeting of the national council lately held at Vancouver.

All in the Same Box.

It is not unlikely that in the near future London will have another metropolitan innovation in the shape of a quick-lunch wagon. A Greek gentleman has approached the authorities to find out how much a license for a wagon of this kind would cost. Chief Williams says he will have to treat the newcomer just the same as he does the peanut peddlers and popcorn men if he obstructs the street with his wagon.

Dr. McCallum Back.

Dr. McCallum, superintendent of the London Asylum for the Insane, returned last evening for a shooting trip, and left this afternon for Baltimore, where he will spend a week. Regarding the rumors that he would be transferred to the asylum at Penetang, Dr. McCallum would not talk. "There has been nothing done officially so far as I know, said Dr. McCallum. "I know only what I have seen in the newspapers." Further than that he declined to discuss the situation.

Breaks Her Wrist.

Last evening as Mrs. Freeland, sister of Second Assistant Chief Case of the London fire department, went to go down the front steps of her home in the East End she stumbled and fell headlong, breaking her right wrist just above the hand. Mrs. Freeland had the misfortune to have the same wrist broken several years ago. When she met with the second accident she was about to go to the drug store for medicine for her husband, who lay sick in bed. Dr. Teasdall attended the injured woman.

To Open New Citadel.

The opening of the new Salvation Army citadel will take place on Thursday night, Nov. 14, at 8 o'clock. The building is situated on the corner of Edward street and Tecumseh avenue. The street car runs right to the door. Ald. Gerry will preside, and other influential gentlemen are expected to be present and take part. The London I. Corps are uniting for the occasion, and the London I, Band will give a splendid up-to-date musical programme. All friends and sympathizers of the army are asked to join in the rally, and make the occasion a very memorable one.

MORGAN DRIVES A HARD BARGAIN

Rescues Wall Street Finances at a Huge Profit to Himself.

New York. Nov. 11.—The World says: J. Pierpont Morgan drove a hard bargain a few days ago while saving the situation in Wall street, and one which will profit him many millions to add to his already large fortune. The World takes three columns of space in which to tell the story, which in essentials is as follows:

When Cortelyou decided to come to the rescue Morgan "saw him first," and got control of most, if not all, of the Government funds. Then there came the heads of troubled banking institutions asking advances on standard stocks, among them Tennessee Coal and Iron. Morgan demanded control-stock of the T. C. and I., with its "open hearth" steel-making process, refusing to make a loan on the stock, and insisting on a sale of it to him at a low price fixed by himself. After disputing all night, and seeking other expedients in vain, the financiers gave in—and Morgan got the bargain he sought. The World's story says:

"When they were all seated The Master spoke, slowly, almost indifferently. He said in effect that he had been requested to assist two great institutions. He realized the resposibility it imposed, but as a patriot having the welfare of his beloved country (he dwelt impressively on the words) he had consented to act in order to stay the senseless feeling that had apparently seized on the people, which, if not discouraged, might work irreparable damage to the said beloved country.

"'You can have the T. C. and I,' Cactus said in a hard, metallic voice.

"'You can have it at the price you named. Send around the money in the morning before 9:30, and you can have the stock.'

"A genial smile crept into the face of The Master.

"'A very wise decision,' he said. 'The money shall be there—and before 9. You need not trouble about the details tonight. It is nearly morning, and you gentlemen need sleep. Were it not so late I would like to show you my collection of Japanese carvings. There is none like it in the world. Good-night, gentlemen.'"

CRASH IN A FOG.

Seattle, Wash., Nov. 12.—Forty men, women and children were injured, 26 seriously, in a street car accident yesterday when two speeding cars crashed into each other in a dense fog. Both cars were crushed. The accident was due to the attempt of the conductor and motorman of one car to steal a switch on an outbound car. The track ran over a trestle above the tide flats, and the coaches narrowly escaped toppling over into deep water. Several of the victims may die.

STEAMED 44,000 MILES.

New York, Nov. 12.—When the British steamer Earl of Douglas arrived here today she completed a circuit of the globe in which she steamed 44,000 miles, establishing a new record of 75 days for the last 15,000 miles. When the Douglas sailed from New York she went direct to Shanghai, thence to Australia, San Francisco and British Columbia. At Mosquito Harbor, B.C., she took on a load of cedar and then turned about for the long voyage around the horn.

Of all the interesting uses to which incubators have been put, that of hatching alligator eggs is probably the most striking, says Popular Mechanics. An Englishman at Hot Springs, Ark., is engaged in raising alligators for the market. The demand for the hides to use in manufacturing purposes is constantly increasing, while parks and zoos buy the live reptiles for exhibition.

Germany's labor famine has become so acute that it has been found necessary to impress peasant girls into the railway service as platelayers and repairers. A gang of them is now hard at work near Beyersdorf.

According to statement made by British lumber dealers the relatively small quantity of lumber imported from the United States to these parts is mainly due to the indifference and inattention of the American sellers.

The most frequent cause of collapse among small water tanks, says the Building News, is the corrosion of the hoops. These are flat wrought iron bands, one-eighth inch to one-quarter inch thick, which are seldom painted, so that they become subject to corrosion both from the outside and from inside. Hoops should be made without welds and thoroughly painted before and after erection.

Your Liver

Hood's Pills

Sold by all druggists. 25 cents.

MOROCCO A SEALED TREASURE BOX

Moslem Fanaticism and Ignorance Close Door to Modern Commercialism.

Tangier, Nov. 11.—The natural resources of this country of Morocco, upon which the powers of Europe are looking with eyes of greed, make it a prize well worth the winning. Perhaps it is entirely accurate to say that it is the richest field on earth left unexplored by the commercialism of modern Christendom.

Morocco really is unexplored. The foothold that foreign enterprise has secured in half a dozen places on the coast are as pin pricks on this great area of richness, estimated at 400,000 square miles.

When, as ultimately must take place, the splendid fanaticism of the semi-barbarous Moor gives way before the pressing ranks of foreign prospectors, traders, and promoters—ever on the lookout for the now rapidly decreasing virgin fields to conquer—out of the ruins of Moroccan Empire will rise the Rockefellers, Astors, Belts and Rhodeses of a future generation. It may be on the cards that these rich men of the future are not destined to be of the Anglo-Saxon race, but of whatever race they may come, the story of their rise will be the old story of "getting in on the ground floor."

Peep Into the Future.

In the light of the present situation, the wall of Moorish power may fall tomorrow, as days go in history. It may fall the day after tomorrow, next week, or next year, but whatever the date of coming dissolution, it is difficult to foresee how it can be deferred for long. It may be that lads who now are sitting at school desks in America, wearing Eton collars in England, or studying arithmetic in France, then will metamorphose into captains of industry with the northeast corner of the continent of Africa as the base of their operations.

What is there not hidden within the confines of this fair land of Morocco? Who shall say what treasures are not locked within the snowy breasts of the Atlas range—a region trodden only by a handful of explorers?

What stores of mineral wealth are lying under the surface of Morocco, even under the city of Tangier, within sight of Gibraltar, waiting to be uncovered by the spade? No one has been permitted to go farther than to obtain a mere glimpse at these secrets, and the majority of such glimpses have been obtained inadvertently. The Moors have perceived that a strong element of their safety lies in minimizing the lures that draw foreign aggression, and every half discovery has been covered up promptly by native authority and "lost."

"Lost" Quicksilver Mine.

From the window of the hotel room in which these lines are penned may be seen the English Church of Tangier—a picturesque Spanish structure covered with a roof of glazed green tiles. Beside this church only a short time ago some Moors were digging a well, the spot having been exorcised of djinns, of course. The diggers found that they had dug a well into which flowed quicksilver instead of water. They reported the find to the basha, who at once ordered the well filled up and "lost."

The incident serves as an index to the sentiment of all Morocco. The mineral resources of the country are untouched. Because of superstition the Moor thinks he is fortunate to be able to pick up simple droppings from the horn of plenty. The Moors know that the wealth exists, however.

A few clandestine prospecting expeditions made by foreigners have led to confirmation of native reports of vast mineral deposits of various sorts in the interior of the country.

It is known that there are rich iron deposits not many days distant southeast of Tangier. To go out looking for them now is quite a sufficient guarantee of getting one's throat cut.

Mineral in the Hills.

Travelers who have penetrated to the Atlas mountains almost invariably have returned to civilization not only with interesting stories of mineral deposits of exceeding richness, but with samples of rich ore in proof of the truth of their stories. It is known positively that tin, lead, zinc, copper, silver, antimony, and iron are to be found in the Atlas. As for gold, certainly it is to be found there as well. Certain explorers have succeeded in finding gold mines which at some early date had been operated, but which subsequently were closed. The presence of large quantities of raw gold ornaments in the interior is further evidence if any more is needed.

Undoubtedly jewels exist in the interior and even along the coast. Stones of the less highly-prized kinds, such as topazes, amethysts, and sapphires have been picked up frequently. During the present week a foreign newspaper correspondent pried a sapphire worth about $7 out of the mountain road about two miles out of Tangier.

It is small wonder that Morocco incites dreams of Moroccan Cripple Creeks, Cobalts, or Kimberleys. But what adds luster to the undeveloped country is on top of the ground even more than in the bowels of the earth. Morocco has been fitted by nature to be the commissariat of Europe. The population of Morocco—estimated at from 5,000,000 to 12,000,000—does not employ a tenth part of the resources of the country.

It is said that bees must take the nectar from 62,000 clover blossoms to make one pound of honey. This means that they must make 1,750,000 trips from the hive to the flowers. And when the price of honey is taken into consideration it will readily be seen that the price of bee labor is too cheap

"The best pickpockets," said the detective, "are the Hindoos. You have to call them light-toed as well as light-fingered, for they can lift a watch or purse as easily with their feet as with their hands."

Six to eight minutely speckled flesh-colored eggs suffice to keep the nervous wren in her home.

KING ALFONSO TIED TO APRON STRINGS

Queen Ena Makes Her Spouse Obey Her, Although Giving Him Much Liberty.

London, Nov. 11.—King Alfonso is still his young wife's devoted slave. She leads him where she will by a silken thread which, however, sometimes becomes visible to her royal relatives.

He obeys orders as a good husband should. So, being certain of him, his spouse, with a self-confidence which most royal wives lack, insists that he shall not be tied to her apron strings, but shall go where he pleases with his intimates and enjoy his sports.

Yet Queen Victoria knows how to assert herself and how to restrain her husband's boyish impulsiveness. A proof of this vastly amused King Edward at Sandringham on Thursday.

The Spanish King is a fine sporting shot, but the Prince of Wales, the second best shot in England, was bringing down more birds than Alfonso was, never missing one. Alfonso decided that his shooting coat hampered his aim and, throwing off the coat, flung it from him. Then, while King Edward laughingly spurred the rivalry, King Alfonso shot so fast and accurately that soon he had as many birds as the Prince of Wales.

Made King Put on Coat.

Alfonso was as happy as a boy with a new gun. But unfortunately for him, his wife, with Queen Alexandra and Queen Maud of Norway, was in a motor car watching the battle from a little distance. Seeing her husband without a coat Queen Victoria sent a peremptory message by one of her suite, bidding him to put on his coat, lest he catch cold. The courtier put the order into many polite words and delivered it most hesitatingly, but the king paid no attention to it. He went on shooting, bringing down birds with unerring aim.

His wife alighted from the motor and approached her disobedient spouse, who, intent on the birds, did not see her. But King Edward did and, although laughing heartily, called to Alfonso:

"You had best be careful; your wife is coming."

Alfonso glanced around, saw the queen approaching him, thrust his gun into a bearer's hands, took his coat from another and, while the whole party, men and women, shrieked with laughter, hastily put on his coat.

In a word, however gentle the queen's control over him, it could not be more complete if she were ten years Alfonso's senior.

Alfonso Is Never Punctual.

But she has not yet eradicated his Spanish habit of procrastinating, of saying "manana," nor his Spanish indifference to keeping an engagement punctually. The whole royal party again left London for Sandringham today; King Alfonso was twenty minutes late for the special train. His wife was furious, for punctuality is almost a religion with the English royal family. In all probability Alfonso would have been even later for the train had he not expected that the guns would start at Sandringham three hours earlier than they did. But it is entirely likely that his queen will break Alfonso of his dilatoriness.

An English friend asked her the other day if she and her husband were not exposed to great danger from anarchists in Spain. "Ena" laughed as she said:

"We run far greater danger of breaking our necks while making up time, in a motor, on an engagement for which we are late, than from anything the anarchists can do to us."

Everyone here is raving about the beauty of Queen "Ena," as she is still called affectionately, and she aroused equal admiration in Paris. Her blonde complexion is unsurpassable in its perfection of pink and white; her blue gray eyes with their dark lashes are wonderfully attractive.

The queen dresses with tasteful magnificence. When her mother, Princess Henry of Battenberg, entertained King Edward at Kensington Palace the other night, the Spanish Queen, wearing a beautiful white gown, a superb diamond crown and diamond and ruby ornaments, looked lovely, dazzling. She has acquired the "queenly manner," and indeed can hold her own in any assemblage of Englishwomen, even of the most beautiful.

TREASON IN FRENCH NAVY

Important Secrets Apparently Sold to the German Government.

Paris. Nov. 12.—A special dispatch from Wilhelmshaven, Prussia, announcing a report that Rear Admiral Siegel, the German naval attache here, has been recalled, is printed here as an item of sensational news, presumably in connection with a recent discovery of treasen in the French navy, and espionage on the part of agents of a foreign power.

Ensign Charles B. Ullmo, of the French navy, was arrested at Toulon Oct. 25, on the charge of being a spy. An examination of his effects showed him to have been in possession of many valuable documents, and he afterwards confessed to having abstracted a secret signal book and the naval cipher. An army reserve officer named Burton was afterwards arrested at Vendome on similar charges.

At Toulon Nov. 10 five ringleaders of what would appear to be a most important association of international spies, which apparently have been carrying on an extensive traffic in military and naval secrets, were arrested and it was understood warrants had been issued for the apprehension of fifteen more suspects. The authorities of Toulon yesterday searched the local postoffice, and among the things that were found was a telegram sent by Ullmo to a German agent offering to sell information concerning the defenses of France.

Analysis of Strong's BAKING POWDER

by the analytical chemist of the Dominion of Canada:

"Strong's Baking Powder is found to have very high aerating power. It is a cream of tartar powder, containing no alum or phosphate, and it is not adulterated."

Alum baking powders are sold to consumers at from 10c, 15c to 20c a pound. So detrimental to health are alum baking powders considered that in many countries their sale is prohibited.

Strong's Baking Powder, 25c per lb.

CZAR WILL NOT OPEN PARLIAMENT

Third Attempt at Representative Government Will Start With Simple Ceremonies.

St. Petersburg, Nov. 11.—The preparations have been completed for the opening of the third Russian Parliament Nov. 14, which will occur, like the second parliament, in the Tauride Palace and with little ceremony. The current reports that Emperor Nicholas would come to St. Petersburg and receive the delegates personally at the winter palace, as on the convocation of the first parliament, are devoid of foundation.

They were based on the supposition that the Emperor wished to signalize the conservative nature of the last body, but the steps has been regarded as objectionable. Premier Stolypin and the cabinet ministers will be presented. After a religious service, M. Golubeff, vice-president of the council of the empire, will read the imperial ukase convoking parliament, and a brief greeting from the Emperor, it is anticipated, will be couched in a warmer tone than his address to the radical second parliament. M. Golubeff will then invite the members to proceed to the election of a president of the house, who it is expected will be either Nekolala Khomiskoff, Octoberist, of Smolensk, or M. Rodnizo, also an Octoberist, of Ekaterinoslav.

The prospects of the co-operation of the Octoberists and Constitutional Democrats on a moderate liberal programme are steadily improving. Both parties, however, rejected the idea of fusion. At the Constitutional Democratic congress at Helsingfors, which was dominated by the Moderates, it was decided to shelve all demands for extreme reforms which would produce a break between the parties.

The Moderates will support the measures proposed by the Octoberists or the ministry having the same general tendency as their programme.

The Octoberists leaders, M. Plevoko, of Moscow, and Alexander J. Guchoff, also of Moscow, at a recent Octoberist conference sounded the keynote of moderate constitutionalism. M. Guchkoff threw down the gauntlet to the reactionists in a toast to the Smperor, who has broken with the dark past.

HERCULANEUM TO BE BROUGHT FORTH

Treasures Buried With Historic Ruins Are to Be Rescued.

Rome, Nov. 11. — The proposal to continue the work of excavation at Herculaneum has become so popular as a result of the efforts made by Charles Waldstein, professor of fine arts in King's College, Cambridge, England, that the Italian Government is about to take the matter actively in hand.

Signor Rava, the minister of public instruction, upon whom the work actually depends, has prepared a bill to be presented to parliament, which provides for one appropriation of $100,000 for the purpose of removing the houses forming the modern town of Resina, which is located over Herculaneum, and one appropriation of $3,000 a year for the actual excavation work. This latter sum does not include the salaries of officials, In the meanwhile a special commission under the presidency of Prof. Depetra, of the University of Naples, has undertaken preliminary studies for the commencement of the work.

Prof. Waldstein, contrary to the views held by the members of the present Italian cabinet, is in favor of international co-operation to do the work of Herculaneum. He is about to bring out a large volume showing what has been done up to the present time and setting forth what he considers necessary to insure the completion of the work.

He will maintain that if carried out according to modern methods the excavation of Herculaneum will call for an expenditure of $200,000 a year. A contrary opinion is held by a majority of the Italian archaeologists, headed by Prof. Giacomoboni, the well-known director of the excavations at the Roman forum, who declares that it will be impossible to spend more than $3,000 a year if the work is done cleverly and without injury to the buried treasures.

The twine trust may find a rival in the Malva Castella, a new Philippine fiber plant.

On the Tombigbee River, Alabama, is enough limestone to supply a cement plant for 100 years.

$6.50

ENCLOSED in a handsome velvet lined case this brooch sells for $6.50.

THE pearls are all selected and of the best quality.

THE mounting is of heavy 14k. gold and very substantially made.

THIS artistic design is entirely exclusive, being one of the newest and prettiest brooches that our factory has yet produced.

Our Catalogue is yours for the asking.

ROLLMAN MEAT and FOOD CHOPPER....

It Opens, Easy to Clean

The unique construction of the Rollman Chopper will appeal to you. It is made so that by raising a simple clamp the machine opens "like a book," and all the interior is laid bare. Now it is easy to clean, and you can see that it is clean. Capacity 1 to 3 pounds a minute. A child can operate it.

Price, $1.50
