Manng ing Director. - Enzunssa Panne Mr. Panen P. Sandenou.

holders then decided upon the proceeding, as the best to be salopted under all the circu-stances.

Int.—To meet the h-avy losses of the Bank, by a reduction of the Capital, 25 per cent, making each Share of Stock \$75 instead of \$100.

2nd.—To reduce the number of Directors to fise instead a sleen, as previously, and to increase the que liteation of each Director to 40 Shares of Stock instead of 20 Shares, the then existing qualification.

3rd.—To apply to the Legislature then in session, for permission to alter the Charter of the Bank in conformity with these changes.

There recommendations were accordingly carried out, and the necessary ametion of the Legislature obtained to an amended Charter embracing them, and under this Charter, so amended, the present Board of Five Directors came into office at the annual meeting in June last.

The former Caphier, Mr. Castle, having in the meantisme resigned his post, the first attention of the new Board was directed to the filling up of that impurtant vacancy, and in this duty the Board are happy to report, they have been eminently successful in the appointment of the present Cashier, Mr. Macculled, who has since filled the office with university accurate and much ability, under most adverse and trying circumstances.

Before proceeding further, it will be proper here

Macculson.

In waveried zeal and much ability, und.r most unwerried zeal and much ability, und.r most adverse and trying circumstances.

Before proceeding further, it will be proper here to mention, that when the reduction of 25 per cent, upon the Capital Stock was decided upon at the gen ral meeting in March, 1849, it was then understood and believed that the reduction of the Capital, covered all previous losses sustained by the Bank, and that the remaining 75 per cent. of the Stock would be unencumbered with any further drawbacks from these suiting losses, but in this n perplexing disappointment was experienced by the subsequent discovery of a discrepancy of \$2.9,000 in the account of "Notes Discounted."

A fresh apparent loss was thus to be contended against, and accounted fre, in the discovery of unraveiling of which the Board have ever since, becaused; it is duty which is still in progress has in earch; this duty which is still in progress has

against, and accounter it. In the providing of which the Board have ever since been in search; this duty which is still in progress has involved a most featible and invited examination of the Books of the Bank for the last 13 years; and from the mass of papers and agares to go through, and the extremis difficulty in tracing items, from the absence of proper references, and from part of the Books having been accidentally burned, it has been found very trying and laborious; but the results already obtained, go to shew its great importance and the necessity of an continuance.

During the early part of the aummer the respective Agencies at Quebes, at their brooks and at Stanfield were visited by the President, and such changes, precautions and reforms recommended in their management as appeared safe and necessary. The visit to the Sherbrooke Agency entailed.

The visit to the shearest own the contused and very onsafe condition of its affairs. The whole department underwent a thorough examination and revision; security was obtained wherever necessary and practicable, and such other safe and precautionary ressures adopted, as the circumplements were

conservation; security was obtained wherever mecceany and practicable, and such other and and precautionary of essures adoptes, as the circumpataneous of the case suggested. All discounts were at once suspended, and every executed five contract of contracting chains there due; the extent of these children, and the state of the country makes, this children, and the state of the country makes, this duty quost, difficult and onerous, but in its performance, as indeed in the discharge of early of the branch of his latty, the present agent, his. Rit. this, has swinced much read and annihity, and have b mastite the thanks of this receiting. The location of the state of the contracting up to the Latte of the late St. theology, the latt of the late St. theology, the latt of the late St. theology, the present implantible to say have as the ultimate results of lowes at this Agency may differ above or below the estimate management; but in watching the progress of the character of a save discounted at a very regular and ante condition, and as any capital, thus employed could be better applied here, the Stant considered it their that to direct the square, Mr. Judi, to rise capital here, where it can be employed to tester at the present, with a view of transferring the capital here, where it can be employed to tester at the property of the Stant condition, and as any capital, thus employed could be better applied here, the Stant considered it their that to direct and accounted to a very a small sum; and thould it appear, that the condition is the capital here, where it can be employed to tester at a save discounted to a very analytic and; and the contracting the source of the character of a care discounted to a very analytic and; and the contracting the stant that the capital contracting the stant that the stant capital contracting the stant that the stant capital contracting the stant that the stant capital contracting the stant contract

has been their armest study since they came into office, to improve the condition of the Bank, by every possible means in their power, and thus to promote the interests of the Stockholders.

With these feelings it gave shem great pleasure to be enabled to declare a dividend of 2 per cent for the half year ending Lat December last; and to day, as you are aware another, dividend of 2) per cent is payable for the half year ending Lat Incomber last; and the paying these two dividends amounting together to the sum of £9,800 14a 4d; a balance of surplus profits in aili left, towards forming a reserve fund of £7,456 7a 15th.

It is proper, however, to state that, in the management of the Bank, difficulties of so ordinary character have been encountered; a large portion of the reduced Capital is still locked up in Herbour Debertures at 5 per cent, interest, in Protected Notes, Bonds and Obl. gations and in Real Estate, which for the present yie d very little return. These difficulties, however, und r good management, it is hoped, will gradually disappear, and in the mean time in order to alleviate them to some extent, and to augment the working capital of the Back, the Directors sought an opportunity of disposing of a portion of the 5 per cent. Habour Debentures, and succeeded last September in a flecting a sale of £10,000 at 85 per cent.

Of the £19,000 discrepancy in the account of Notes Discounted over £8,000 have been discoved, and the balance yet to be accounted for, will most likely be found to proceed from similar discounted over £8,000 have been discoved and the parties with whom they occurred.

In the process of these researches various errors in favour of the Bank, have turned up, after remaining uniteen for a long period, they consist chiefly of ordination in entries, wrong credits, double payments, or double credits. The following are the particular of them, avoiding for obvious reasons, the minute of the parties with whom they occurred.

The President then read to the incetting the statement of errors refe

noncrably settled, and the remainder consideration or on suit.

And here it is only right to state, in justice to he Stockholders and the present Board, that a system has been introduced, suder the management of the present a thier, which it is believed all prevent the recurrence of such mistakes in future.

when the present of such mistakes in future.

The duty of the Directors being of a legislative character, it is impossible for any Board to prevent errors in the executive department of the Bank if vigilance is wanting in the Casher or Officers immediately under him; but in the efficiency and constant watchfutuess of the present Ca hier, and his infiring application to his out; e. the Stockholders have a guarantee that their interests will not again be endangered in his way. It is gratifying to the Board to be embled to report an entire freedom from losses of bad dubts during the past year, with the exception of £17 6. 6d., most dishonorably obtained by a party drawing at sight on Quebec without any au-hority. This amount may yet be recovered, but in the meantime it is charged to Profit and Loss.

The Board have also pleasure in reporting a gradual increase of business at the Bahk, as improvement in deposit accounts, and an increase in our circulation here. This increase, however,

our circulation here. This increase, however, has been assertly counterbalanced by a decrease a Quebec for the time.

The wear and tear of our Bills having rendered the issue of new Bills necessary, the Board decided upon drawing in the old circulation and replacing it with a different plate previously in passession of the Banks, and the previously in passession of the Banks, and the previously in passessions.

We have the sum of £77061 to 31, which forms a source fund against losses or deductions which it may be found necessary to write of an the farther examination of the £11001 Sungence account or the juture sales of our Con

resent at the meeting. A year ago, when some adopted the loss to the Stockholders would have been great.—From the Statements exhibited today, it was quite evident their prospects were fast orightening, but they must not forget to what they wed this beneficial change—it was to the superior management of those at the he d of the lustitation, and it was the duty of the Stockholders to shew their appreciation of this improvement. With these sentiments he therefore felt great pleature in proposing the following Resolution: Proposed by the Hon ROBT. JONES, and seconds by SAMULL ALCORN:

by SAMULL ALCORN:

That the sum of Five Hundred pounds be paid to the President, William Workman, for his exertions in promoting the interests of the Storkholders during the past year. Carried unanimously. WILLIAM MURRAY introduced the fourth res ion by remarking, that at the period referred to by the Hon. R. Jones he was one of the Stockholders who advocated the policy of winding up the Bank, because he was afraid matters would not improve, but now that a marked change had been brought about under superior management, he was glad that the institution had not been wound up, and was quite willing to join heartily in any mark of approbation towards any officer at the head of the Executive department. Past experiince had shown how important it was to have efscient men there. He considered the present

Cashier. Mr. Maccullich, an able and efficiel officer, and it therefore afforded him pleasure to offer to the meeting the following resolution:

Proposed by WM. MURRAY, and seconded by SAMUEL GERRARD:

That the thanks and approval of the S'eckholders be conveyed to the Cashier, Mr. Macculloch, for his zeal and ability in the discharge of his duties, as also to the officers of the Bank and of the Branchs and Agencies for the faithful and diligent manner in which they have discharged their respective duties.

The President here stated to the meeting that he would be hanny to afford any information in his
