HAMILTON HAPPENINGS

HAMILTON LANDS BIG INDUSTRIAL WORKS

Will Mean Increase of Population by 8000 to 10,000 Before End of Year.

HAMILTON, May 17.—(Special.)—Negotiations with the Oliver Chilled Plow Co. of South Bend, Ind., which have been pending several months, came to a successful climax last night, when the city council closed a deal by which the big concern will establish its Canadian plant in Hamilton, spending a million and a half dollars at once in the erection of buildings, with a capacity for 2000 employes. These will be rapidly increased until the payroll numbers 3500 hands. This is said to be the biggest American industrial concern ever captured by a Canadian city. It will mean an addition of from 8000 to 10,000 in the city's population before the end of the year.

The Oliver plow plant in South Bend, Ind., is the largest in the world, and has a capacity for 500,000 plows a year. It employs 4000 hands there, and at present is making extensive additions. The Canadian plant will be the largest in the British Empire. The company plans to do all its export trade from Hamilton. Welland and several other places offered the concern liberal inducements. The Olivers, however, asked for no special terms.

To Manufacture by December.

Plans have already been prepared by a firm of Pittsburg architects, and the work will be begun at once. By December the company expects to be manufacturing plows. The site contains about 90 acres of land and water. The name of the new concern will be the Oliver Chilled Plow Works of Canada, Limited.

J. D. Oliver will be president and general manager of the Canadian plant; Capt. Edward Niear, treasurer; W. A. McInerny, secretary, and R. A. Smart, general works manager.

The annual meeting of the Hamilton district of the Hamilton Conference of the Methodist Church was held in Central Church to-day. Among the memorials passed was one seeking to extend the pastorate of any minister, in a church that desires an extension, beyond the three-year limit. Another seeks to limit the membership of quarterly boards to 22. The financial reports presented showed all the churches to be in a healthy condition, the missionary and connexional funds having been accorded better support than last year. Barton-street Church, this city, shows the largest increase in membership, 164 having been added during the year, its total membership now totaling 732. Ryerson Church comes next with an increase of 172. Rev. H. G. Livingstone, pastor of the Barton-street Church, was appointed at this district representative on the stationing committee.

Set Fire to Her Clothes.

Jessie Hinchburger, a four-year-old child, while playing with matches this afternoon set fire to her clothes and she was badly burned about the arms, face and hands before the flames could be extinguished. The injured child was taken to the city hospital, where she lies in a critical condition.

Leslie Hunter, 405 North James-st., who was injured about the head by being crushed between two cranes at the steel plant to-day, is lying at the city hospital and is not expected to live.

Charles Perkins of Beamsville suffered an apoplectic fit this morning on the street and was taken to the city hospital. After being unconscious for several hours he came to and was conveyed to his home.

Walter Jaggard, who figured in a collision between two rigs on the Plains-road last week, and who was badly injured, has developed pneumonia, and his life is despaired of by the city hospital doctors.

Public Service at Windsor.

WINDSOR, Ont., May 17.—Arrangements have been made by the Windsor clergymen for the holding of a public memorial service next Friday afternoon, at the time of the royal funeral in England, at City Hall-square, if the weather permits. Otherwise it will be held in the armories. Mayor Hanna has issued a proclamation making Friday a public holiday.

Similar steps are being taken in Walkerville.

Will Only Close Two Hours.

BELLEVILLE, May 17.—The council has empowered the mayor to proclaim May 20 as a public holiday, but it is not likely that it will be generally observed. Some of the principal stores in the city say that they will only close from 11 a.m. to 1 p.m., when the memorial services will be held in the churches.

MILLION IN TEN YEARS

Predictions as to the Future Population and Composition of Montreal.

MONTREAL, May 17.—(Special.)—W. D. Lighthall, K.C., who has given a great deal of attention to municipal and political matters, read a paper this evening before the Presbyterian Union, in which he declared that in ten years time Montreal would have a million souls, and that the English language would predominate, as the ever increasing Jewish population were speaking English. He stated, however, that the Roman Catholic would be the predominating religion. He thought that Montreal would grow all over the island and possess one day five or six million souls.

WINS $10,000 BY WAITING

School Teacher Camps Twelve Days on Doorstep to Secure Land Section.

SASKATOON, Sask., May 17.—That grit and determination in a measure which few men possess are necessary to camp on the cold and uninviting doorsteps of a public building every hour for twelve days is something which no one will deny, but that is the feat accomplished by Miss Williams, a pretty young school teacher of this town. Her reward came to-day when she filed the first claim for a section of land within two and one-half miles of the town of Kindersley, which to-day is valued at $10,000.

Miss Williams, who is a teacher in the Alexandra School here, and is well-known and respected thruout the town, took up her position on the doorstep of the land office building on Thursday, May 5, and had been on the step every hour until this morning, when her plucky wait was rewarded by the filing of her claim and the hearty plaudits of her friends as she left the building.

NEW YORK COMET CRAZY SOME PEOPLE SCARED

Hotels and Theatres Preparing For a Lively Time—Negroes in Hayti Take Comet Pills.

NEW YORK, May 17.—Unusual preparations are being made to celebrate "Comet Night," as to-morrow evening already has come to be known, and if the fiery tail of the astral visitor brings a cataclysm it is bound t obe preceded by much joy.

The large hotels and restaurants in New York are making preparations for the accommodation of numerous patrons, and the theatres schedule special cocmet programs. The manager of one east side theatre aiming to reassure his patrons against the deadly oxygen gas from the comet's tail, announced to-day that he will "blow an atmosphere of pure oxygen" into his auditorium on Wednesday evening, and will have medical advisers present. The effect of an atmosphere of pure oxygen would probably be such as to require the presence of medical advisers.

Fortune in Charms.

There is little apprehension of danger in New York, but in some foreign colonies of the city the approach of Wednesday's crisis is being awaited with feelings of superstition. Fortune tellers are doing a rushing business, and the police found one clairvoyant who was getting rich at a rapid rate thru the sale of charms and powders for the purpose of warding off all cometary ills.

Prof. A. S. Mitchell of Columbia University, will leave to-day for the Yerkes Observatory on Lake Geneva, Wisconsin, where he will observe the visitor as soon as its post-sunset appearances begin.

The weight of Halley's Comet, according to Prof. Mitchell, is less than one hundredth thousandth part of the earth. Altho the volume of the tail is enormous if it could be compressed it could be put in a lady's handbag. The head of the comet, according to Prof. Mitchell's theory, consists of meteorites, and the tail of gases, in which hydro-carbons predominate.

Whatever the comet may do or whatever it may not do to this long-suffering old earth of ours, the negroes of Port au Prince, Hayti, are safe, because they know they are well portected with comet pills.

Comet Pills.

Comet pills are new to the pharmacopaeia. Word of their appearance arrived by the liner Allegheny, in from Port au Prince. Her officers said that all the negroes there, rich men, poor men, beggars and thieves, are running pell mell to the hut of a shrewd old hoodoo doctor just outside the city, who is selling comet pills faster than he can make them. The prescription is one pill for every hour up to the time the comet begins to recede from the earth, but many patients make doubly sure by taking one pill every half hour.

The comet doctor guards his formula closely, and he is growing rich faster than Colonel Mulberry Sellers in his wildest dreams.

Instructions to Wireless Stations.

DETROIT, Mich., May 17.—The U. S. hydrographic office has cautioned wireless telegraph operators and vessel masters along the lakes that wireless instruments and compasses may be affected by atmospheric conditions caused by Halley's comet.

Both operators and captains are expected to take careful logs between the 18th and 20th, recording static effects and magnetic variations. The sighting of meteorites, it is said, should be promptly reported in detail.

Cameras Busy.

CHICAGO, May 17.—Sixteen cameras will be turned on Halley's comet from now on at Yerkes Observatory, William's Bay, Wis., where the largest telescope in the world is located.

"We certainly will bring our whole broadside to bear," said Prof. E. B. Frost. "Every instrument in the observatory will be at work in charge of an expert. The entire photometric laboratory has been set up outdoors on the esplanade of the observatory.

"We have been conservative in our predictions so far. I don't mind saying tho that I will not be surprised at anything that happens Wednesday night.

"It is impossible to predict what phenomena will result. There is a possibility that a meteoric display will be visible, but I should hesitate to call this a probability, and then there may be electrical disturbances in the atmosphere, such as auroral displays, but the heavens will be very light on Wednesday, owing to the presence of a good sized moon, and it is very doubtful whether in such unfavorable conditions much may be learned."

"A BREACH OF FAITH"

Saskatchewan Grain Growers Say Meagre Aid to H. B. Railway.

MOOSE JAW, Sask., May 17.—At a meeting of the executive of the Saskatchewan Grain Growers' Association to-day the Hudson Bay Railway question was discussed and the following resolution passed:

"That, while in the face of the assurances of Hon. G. P. Graham, minister of railways, given on the floor of parliament some short time ago, we, at our last meeting, felt it our duty to express our confidence in the declarations of the federal government as to the speedy construction of the H.B.R. R., later developments, in the form of a totally inadequate appropriation for the carrying on of the work, make it necessary for us, on behalf of many thousand members of our association, to protest most vigorously against such a breach of faith in a matter so vitally affecting the welfare of the whole populace of western Canada."

A copy of this resolution will be forwarded to the Dominion authorities.

That the game will be a hummer is a certainty. The Tecumsehs are confident of winning on the strength of their showing at Montreal, while the Torontos cannot see anything but a victory in sight. Both teams are going along well in practice and will be fit and ready when the battle call sounds.

Another Tie at Berlin.

BERLIN, May 17.—In the football game, played in the pouring rain, Galt and Rangers played a tie to-night, each tallying once, but it was almost a defeat for Berlin, the tieing goal coming with only two minutes to play. Galt's score was put thru by Sinclair, and was an easy-looking one after a lone rush from centre field. Charlie Gillespie of Berlin officiated as referee. This is Berlin's third straight tie game, having neither won nor lost a contest this season.
