Huron Signal.

GODERICH, OCT. 1st, 1879.

THE CIRCULATION OF THE SIGNAL IN GODERICH AND SURROUNDING TOWNSHIPS IS LARGER THAN THAT OF ANY OTHER PAPER.

OUR POSITION.

The anxiety displayed by dealers in wheat and other cereals, as to the shortage this year in England, Europe, and other countries, is worth noticing. Even the most ultra-protectionist dealer who, when party ends were to be served, denied the influence of foreign demand on the value of grain in Canada, is now closely summing up the estimated yield in those countries. He knows, as well as he knows the difference between a cent and a dollar, that the price and *foreign* demand are closely related. An increased foreign demand means an increased price for the Canadian farmer. A less foreign demand, a less price. But we must not stop short in allowing only a negative influence to the boasted N. P., for a whirling blight has so far pervaded the land since, and in consequence of its adoption. What we predicted has come about. Although manufactures have been obliged, on account of the enhanced cost of living, to pay more for labor, thus increasing the cost of articles produced, yet this increased cost has so checked the consumption that the labor demand is much *more limited* than formerly. There can be no manner of doubt but that the prolonged wail of "nothing to do" that prevails over the length and breadth of the land, has been lengthened out by the abortive legislation ending in that miscarriage called "National Policy." This howl of despair, among the laboring classes, is increasing in intensity notwithstanding the favorable prospects for the agricultural land holders. We need only refer to the labor riots in Quebec, and elsewhere to show that the fight for bread, cheap as it is, is only commencing, and that with the shortening days of the winter season, the poor laborer and artisan will sigh for the by gone days of Mackenzies rule, and common sense legislation. Depressed as were times then—and many thought they could not be worse—we now find that there is still a lower depth.

To show that we are not misleading when we say the cost of living is enhanced, we will quote from the *Globe* of Monday. Coal increased cost 14 per cent; Sugar, increased cost 12 per cent; Canadian Woolens 10 per cent; Canada cottons, 10 per cent; Cheap blankets 20 per cent; Union shirtings 37 per cent; Ducks 18 per cent; Denims 12 per cent, and other necessary articles of ordinary consumption increased in price in the same portion. Is it to be wondered at that the revenue increases? Or is it a cause of surprise that the working man has his nose kept closer to the grindstone? No; less employment, and more to pay for what he buys is the inevitable result with a tariff arranged as is the present one.

TOWN COUNCIL.

Council met on Friday evening. Present, Mayor in the chair, and Johnston, Hutchison, Dancy, Acheson, Elliott, Seymour, Bingham, W. Mitchell, Gerdon, J. Mitchell, Nicholson, Jordan.

STREET RAILWAY.

Letter from Cameron & Co, Mr. Polley's lawyers, in regard to amendments to first proposed by-law, specifying what amendments he agreed to—some amendments he could not accept, but not naming the latter. Mr. Johnston said that as the objectionable portions were not named the council could not do anything, Mr. Polley should state what he objected to. Mr. Doyle said Mr. Johnston's views were correct. Mr. Dancy said that the alteration from 50 to 30 years, and his having to furnish material to make roadway were what he objected to.

Jordan and Hutchison moved that the matter be referred to Public Works committee and have Mr. Polley confer with them as to what he wanted.—Carried.

As to the keeping of the

PEACE,

Messrs Weller, Proudfoot and others requested the council to appoint a constable for St. Patricks ward, as the portion of the town where petitioners reside was often made hideous by uproarious noises, etc. Johnston and Bingham moved that Mr. Weller be appointed ward constable.—Carried.

Treasurer's monthly statement was read.

PRINTING.

From Rowsell and Hutchison stating that their tender for printing was about fifty per. cent less than it should have been; they having been misled by their foreman, but not asking for any extra compensation other than for 3 pages extra printing. The clerk stated that Messrs R. and H. said they were in the habit of printing voters lists, he gave them the number of names; what was claimed as extra printing was only what was customary in connection with the work.

Johnston and Dancy moved that the extra amount be paid. Mr. Hutchison said that these men had written the clerk in answer to inquiries about this work, they said they perfectly understood what was required of them, all they wanted was the number of names. For this council to pay R. and H. anything extra simply because they had made a mistake, or through ignorance of what they claimed they knew, would not be right.

Elliott and Nicholson moved in amendment, that the amount of tender only be paid.—Carried.

FINANCE.

Williams & Murray's account for $426,—Referred to Finance.

LEGAL.

Report from John Davison, Esq., stating that a clear written title to proposed market lot, lay with Mr. Polly for five sixths of it and by possession the had an equitable and legal right to the other sixth—Received and filed.

PUBLIC WORKS.

From E. Bingham, chairman, stating that the following tenders for town buildings were received, and recommending the tender of Miller & McQuarrie. The walls of building and roof to be completed this fall, the whole to be finished by 1st July, 1880. Referred to Public Works, with power to act. The tenders were: Jamieson Reid $3,658, Alf. Gale $3,495, Robt. McBrien $3,944, Geo. Graham $3,890, E. Sharman $3,721, Miller & McQuarrie $3,310, F. Smeath $3,410, C. H. Crain $4,190, J. Somers $3,617.

MARKET.

From F. W. Johnston, chairman, that a by-law be introduced closing up present market grounds, and for establishing market on lot 118 and adjacent streets, also for fixing fees for produce brought to market.—Several amendments were made to market by-law. The market clerk shall not buy anything on market other than for his own personal use; he shall not rent any part of market building for storage purposes only. Market fees on wood to be 5 cents, for double waggon with produce 10 cents, single waggon 5 cents, horses exposed for sale 25 cents per head, cattle 10 cents, sheep 5 cents for first and 1 cent for each additional one. No forestalling nor selling produce outside of market until after 12 o'clock a. m.

Huron West Riding, Show.

Last week we gave a brief description of the inside department, from a cursory examination. The outside exhibit was held on the second day. It was all that could be desired. The weather, though threatening otherwise, was very fine. In

AGRICULTURAL IMPLEMENTS.

The Goderich (Humber) Manufacturing Co. had fair samples in land rollers, ploughs, etc., and took three first prizes. L. Elliott, as usual, got first prize for harrows. The Oliver chilled plow as made by Seegmiller & Co., was not exhibited owing to the absence of one and the sickness of another, of the parties interested. Many outside manufacturers, also, exhibited in this line, and altogether there was a good collection. In

CATTLE.

Mr. H. Snell and Registrar Dickson showed portions of their magnificent herds and took many prizes. In grade cattle, sheep and pigs, creditable samples were on view. The programme in

HORSES

was of unusual merit, and the animals fairly well (though we have seen better here) upheld the character of the county for excellence in this important branch of agricultural economy.

POULTRY.

The variety of breeds and excellence of samples shown in this line, were far ahead of any other exhibit here, and an expert in this department informs us that he did not see, at any of the provincial shows, fowls equal to those shown in Goderich.

MANUFACTURES.

Besides those mentioned last week, there was a variety of specimens of artificial stone, made by the Messrs Thomson of this town, which were noticeable. Straight, and curved and moulded blocks for architectural purposes, also garden vases of this material, were here. This stone has been used for outside ornamental work for years, and seems to harden with exposure and the lapse of time. The sand obtainable here being superior to that found elsewhere.

CARRIAGES.

One may hazard the assertion, that in no branch of industrial art has competition at riding or county shows developed a more healthy tone, or resulted in greater good to all concerned, than in the carriage making line. The exhibit in this class was exceptionally good and was the centre of much attraction. Expert outsiders remarking that in no city in the Province, if in the Dominion, could carriages and buggies be found which, for gracefulness and utility of design, excellence of workmanship and beauty of finish, would excel those exhibited this year at Goderich.

MR. JOHN KNOX

exhibited largely. His side bar road waggon is a model of compactness and strength, weighs only 180 lbs, and is commendable for the manner in which the rear and forward parts of the gearing are coupled. A solid piece of iron from the reach grasping the head block in such a way that strength and extra steadiness of the parts, and neatness are secured at the same time. The one shown was sold to Mr. J. Gentles of Kincardine. The next of Mr. Knox's which we noticed was a family phaeton (covered, single or double) with three springs, side lamps, extra silver plating and in every way a desirable article. This was sold to Mr. Joseph Goldthorpe, Colborne. Then there was a double carriage which Mr. Knox has sold to Thos. McKee of Goderich township, this was a gem in its particular class, as also were the "Dexter King" the "Piano Box" and "Coal Box" buggies. Mr. Knox has also a beautiful market waggon in his show room which he did not exhibit here, but which took first prize and diploma at Dungannon.

MORTON AND CRESSMAN

had, as usual, a fine display of their carriages. Their double "Cut under Carriage" is something entirely new. The whole contour of the body is rounded off in such a way that the absence of the usual angularities strikes one at once as being a very pleasing feature in the design. A minute inspection of the ironwork will at once detect the extreme care and finish which Mr. Cressman invariably takes with and imparts to the work turned out by his firm. The morocco leather trimming, the painting and wood work, also, show extra care and finish, and the vehicle, if not flash, displays a neatness and durability such as may be desired by a well-to-do-farmer. The rear seat is moveable and the whole seating is roomy, and access thereto less obstructed than by any vehicle we have seen. This firm also exhibited a very fine pony phaeton which looked well and presented the usual durable appearance of the work of the firm. Messrs. Morton & Cressman had a special prize awarded them for the wood-work of a cutter,—This job was evidently got up by no prentice hand. There was no paint, putty or other obscurations about it; just as it came from the hand of the wood-worker, without an imperfection. The joints of the seats and other parts not a all distinguishable, except by the different colors of the wood. In passing, we would say that our town carriage manufacturers turn out desirable work at such very reasonable rates that our county friends will consult their own convenience and interest by continuing and increasing their orders from the above reliable firms.

Mr. Lewis Elliott showed a serviceable farm waggon. Messrs. Cantelon Bros., Clinton, also showed a very fair waggon, and an excellent top buggy of really good workmanship. For prizes see list.
