"DINEEN QUALITY"

Genuine Panamas

Panama hats are remarkably distinguished in appearance, and throughout a long life retain their noticeable elegance of style. The close, firm texture and steadfast qualities resist hard usage better than any other hat fabric.

Panama hats not only wear long—they wear well.

$5.00 to $25.00.

Thousands know why Panama hats are the best for men of moderate means, with high expectations, as well as for the affluent.

Early birds get their pick.

East Toronto.

EAST TORONTO, June 5.—Henry Bregman, a converted Hebrew rabbi, and at present a student at the Bible Training School, will speak in the East Toronto Baptist Church on Sunday, June 9.

J. E. Zleman, well-known as one of the most enthusiastic baseball players and all-round sports in town, was unfortunate enough to be struck in the eye while engaged in a friendly match to-day.

Mrs. Thomas Meagher, wife of Thos. Meagher of the Bayview Hotel, is seriously ill.

The newly organized brass band held a practice to-night in the Aberdeen Rink.

The benefit concert in aid of Hector Allan, in the Y. M. C. A. to-morrow night, promises to be largely attended.

The removal of Miss May Culleton from town has rendered vacant the position of organist of St. John's R. C. Church, which has been filled by the appointment of Miss Kathleen McGuire.

The standing committees of the town council met for the transaction of routine business to-night.

C. T. Lyon is in North Bay on a business trip.

The execrable car service which the residents of ward one are getting at the present time has aroused a feeling of hostility to the company. Not alone is the service infrequent, but it is irregular. If the town council have any jurisdiction in the matter they will be called upon at their next meeting to exercise it.

"One thing we can do when their franchise expires," said a citizen tonight, "is to cut off their line thru the town, on the Kingston-road, and block the Scarboro."

Richmond Hill.

RICHMOND HILL, June 5. — The Agricultural Society will run their excursion this year to Parry Sound by the C.N.R. on June 10. The association realized $500 thru gate receipts on May 24.

As the work of improving the street running down to the C.N.R. station proceeds, the wisdom of the town in passing the bylaw appropriating a large sum of money for this purpose becomes more apparent. This thorofare will be a credit to the town.

Aurora.

AURORA, June 5.—Miss N. Thompson left yesterday for the west on an extended visit to her brether, Rev. L. Thompson.

A great deal of dissatisfaction has for a long time existed over the inefficient lighting service in some portions of the town, more especially at the corner of Wellington and Mosley-streets. This will now be remedied as Electrician Birchard is busy installing ten smaller lights and taking out the two arc lights formerly there. This will have the effect of lighting up Yonge-street for a considerable distance.

Balmy Beach.

BALMY BEACH, June 5.—The senior baseball team will hold an important meeting in the Beach Clubhouse tomorrow (Thursday) evening at 8 o'clock. All the players and anyone wishing to join are invited to attend.

Teston.

TESTON, June 5.—A very exciting game of football was played last night on Teston football grounds between the married men and single men of Teston. The result was that the benedicts scored 2 to 1. As this is the first game for the married men this season, they were not in proper shape, but managed to defeat the bachelors. The return game will be played on Monday evening, June 10, commencing at 7.15 sharp. The married men are open for challenges from all neighboring teams. A large crowd is expected at the return match on the 10th.

Wychwood.

WYCHWOOD, June 5.—Residents of the little Village of Wychwood are anxious to cast off their allegiance to York Township and cast in their lot with the city. Acting on behalf of a large number of the people living here, H. Bromley to-day made application to the board of control for the naming of a date to discuss the situation.

Mimico.

MIMICO, June 5.—The action of the Etobicoke Township in voting to expend the sum of $5000 or an amount equivalent to double that contributed by public subscription is looked upon with favor generally thruout the township. From Mimico easterly to the Humber, along the Lake Shore-road, the necessity for the improvement is most marked. Last night and to-day's strong winds caused a heavy sea, and at points where the roads run near the shore line a good deal of damage has been done.

TORONTO JUNCTION, June 5.—A deputation of the railway engineers will enter a protest at Montreal against the "pooling" system on the road, by which no crew has a regular run, but is "booked." This gives the older and experienced men no advantage over the new-comer, and to this they object.

A tent has been erected on Fairview-avenue, to serve as a hospital for a woman with the scarlet fever. Her husband is at Weston Sanitarium. There are other cases of scarlet fever on Edmund-street and Mulock-avenue.

BOY SHOOTS FRIEND.

Playing With Revolver, Robert Scott, 13 Years Old, Injures Companion.

Robert Scott, 13 years of age, 164 Fenning-street, shot his companion, Verney Mackie, 11 Dovercourt-road, in the calf of the right leg with a revolver. The lads were playing about a lane north of Argyle-street at 7.30 o'clock last night, and the shooting is thought to have been the result of an accident.

The injured boy was removed to his home, where Dr. W. C. Heggie dressed the wound. The bullet had passed clear thru the leg. The injury is not serious.

Scott was much frightened at his act, and did not return to his home. At an early hour this morning he had not been located.

PUTS BRAINS IN ENGINE TO PREVENT ACCIDENTS

Simple Device Patented in Toronto to Bring Train to Dead Stop.

"Putting brains into an engine" is a nutshell description of an invention that has been patented in Toronto for preventing either head-one or tail-end collisions on railroads.

The device is simple, and from all appearances will soon be adopted by all the railroads who understand its usefulness and value.

It consists in general of an electro-pneumatic arrangement by which the engineer's brake valve lever is pushed to the service stop position, or any position, since it is adjustable; and after being held sufficiently long in that position, to allow the brakes to be set to complete length of the train, retreats and resets itself, ready to apply the brakes at the next signal. This gives the engineer complete control of the engine after the brakes are set.

The device is positive in its action, and in the case of two approaching trains a circuit is closed, whereby the device closes the throttle automatically and brings the trains to a standstill at a distance of two blocks from one another. As nearly all railway accidents are caused by forgetfulness on the part of those in charge, or misunderstandings between signal men and engineers, the value of this device is accentuated, as the whole action is automatic and the human element has been entirely eliminated. A signal whistle is given by the device just before the brakes are applied.

As it is not expensive to instal and can be carried in the cab of the engine, occupying less than a square foot of space, the apparatus is the most practical of any contrivance of like nature that has yet been devised. The Intercolonial Railway are at present having it installed on a portion of their line, and among the tests so far it has given the highest satisfaction.
