WEDNESDAY MORNING, AUGUST 28, 1889.

A Crisis in the Sugar Trade.

It is pretty well known to the public that, both in Canada and in the United States, sugar has been selling at pretty high prices during a year or two past. A New York paper gives the following as the average wholesale quotations there, per 100 lbs., for the grade of refined called "crushed A"—1878, $8.94; 1879, $8.59; 1885, $6.06; 1886, $5.81; 1887, $5-66; 1888, $6.69. For the first half of 1889 the average is about a quarter of a cent higher than for 1888, or say $6.96.

By the Free Trade press it is charged that in both countries the refiners are getting higher profits now than they used to be getting in years past; which is true, though it is not the whole truth. For during a period of years back the price of raw sugar, in the countries of production, has been rising. Nor has this been all, for at the same time the world's whole supply of the raw material has been in the way of getting "cornered," or of passing into few hands—that is, into the hands of very wealthy men, who chose to invest their money in sugar, and to hold it.

Nor has there been anything very wonderful or unusual in all this. It is just another example of the swing of the pendulum from one extreme to the other, which we see pretty often in the prices of important staple commodities. Only yesterday, so to speak, we were hearing that cane sugar had gone down so low in price that in the West Indies and other producing regions of the globe it did not pay to raise it any more, and the opinion was freely expressed that that valuable product, the sugar cane, must soon die out and become extinct. Now prices have recovered somewhat, but who dare assure the producers of raw cane sugar that the improvement (for them) is destined to last very long?

Then we must look also at what has been going on among manufacturers, as well as among producers of the raw material. During some years back, in Canada as well as in the States, there has been a rush of men of money into the sugar refining business. More recently there has been a rush to get out of it, the rush just aforesaid being accelerated in some cases by legal process. No real business man would be at all surprised to learn that, along with the rush into the refining business of an excess of new competitors, profits had actually gone down below fair living rates, which, we believe, did actually happen, and on a pretty large scale, too, both in the Dominion and in the Great Republic.

Some years ago we were getting our "granulated," "crushed A.," and such like for actually less than it was fairly worth. Now, perhaps, we are paying a little more. Well, you may grumble a good deal at this; but what you are going to do about it does not very clearly appear. One thing we may well be convinced of—that the present is a very critical time in the sugar trade, taking the world over.

Most people who read the papers have heard of Claus Spreckels, the "sugar king," as he is called; a German or Deutscher born, we believe, but for a number of years back a citizen of the State of California. Having been across the Atlantic on business connected with some gigantic sugar schemes of his, he has just returned to New York and has been interviewed by The Herald. He is now having laid down in Philadelphia the largest sugar refining plant in the world, as he affirms it to be. The new establishment will be ready for operation in October, and he advises the public that things will begin to "hum" among the sugar men. This new refinery in Philadelphia will have a capacity of a thousand tons per day, while his California refinery is good for five hundred tons per day. Already there is a gigantic sugar trust in the States, and this concern, so Spreckels says, stands ready to buy him out, totally and for good. But the great sugar king prefers to figure as a public benefactor, rather than as the accomplice of sharks and speculators—you may believe this or not just as you like, this being a free country.

Now, if Claus Spreckels stands to his guns the big fight between him and the sugar trust will go on and sugar will be obtainable at reasonable prices. But should the two hostile powers arrange their differences somehow then a gigantic monopoly would be pretty firmly established and away up would go prices, higher than they have yet been. And this is why we look upon the present as a critical time in the sugar trade. But the rest of the story we must tell on another occasion.

The St. Louis reporter who enlisted in the United States army for the purpose of investigating the life of the common soldier tells a startling story of cruelty practised by commissioned officers, and of the general bad quality of the rations. The story furnishes an explanation of the enormous number of desertions from the army, there having been 2842 during the year ending June 30, or more than 10 per cent. of the whole number in the army.

It the Minister of Education is the man The World takes him to be, he will speedily make good use of the commissioners' recommendations re French schools, and so give his political opponents and the public generally nothing to complain of, on this score at least.

Brown-Sequard's elixir of life would be a popular question for discussion by the scientists.

Signs in New Brunswick point to a general election in that province early next year. The present parliament will expire by lapse of time during next summer, but the three vacancies in St. John, and the coming into force of the new election law in January next, will likely induce the Provincial Government to declare a dissolution. Premier Blair's chances of retaining office are pretty good.

The Welsh language is a rather difficult one to twist the tongue round, but the Queen tried it with success on the occasion of her recent tour through the principality. Her Majesty, it is related, captured the hearts of the people by memorizing and repeating, in pure Welsh, abounding in c's, l's and w's, the words for "I am very much obliged to you," and, on the presentation of her picture, the words for "It is extremely beautiful. How kind of you!"

One hundred and fifty thousand men out, and the strike still spreading! Such is the latest news from London. There appears to be a universal demand for an increase in wages, and almost every trade is making the most of the present opportunity to present its demands. To their credit, be it said, the strikers have so far been well behaved and law abiding.

If the scientists would only solve the Esplanade problem, clear up the Don muddle and decide which is the best material for pavements, what a grateful people we would be!

You can tell a scientist by his specs.

The small boy scents Barnum's show from afar and yearns for cents to see it. But his father may be all nonsense.

CROPS AND LIVE STOCK.

The July Bulletin From The Ontario Bureau of Industries.

The Ontario Bureau of Industries yesterday issued its statistical bulletin (No. 28) for the province. The bulletin gives the completed agricultural statistics of the areas of field crops, numbers of live stock, values of farm land, buildings, live stock and implements and average rates of wages for farm laborers and domestic servants in Ontario for 1889. The estimates of yield of crops are based on reports made on July 20, and are of value only as showing the promise of crops at that date; they are doubtless much too high. A report with revised estimates will be published early in September.

In the following table the area of fall wheat in 1889 is taken from the returns of township assessors, but all other areas for this year are computed from the percentages of last year's crop as reported by correspondents. The estimates of total yield in 1889 are also computed from the reports of correspondents, but it must be borne in mind that those reports were made on July 20. At that time all cereal crops had a promising appearance, and even the injury caused at that time by rank growth and rust was not very noticeable. Later accounts show that none of the cereals have realized the promise of July 20, the yield of hay and clover alone is likely to be undisturbed by further reports, for this crop has been unusually good owing to the frequent rains of June.

Crops.	Acres.	Bushels.	Yield per acre.
Fall wheat:			Bush.
1889	822,115	19,182,907	23.3
1888	826,937	13,830,787	16.7
Spring wheat:			
1889	398,610	7,679,642	19.3
1888	367,880	6,433,559	17.5
Barley:			
1889	875,286	26,539,517	30.3
1888	895,432	23,968,569	26.1
Oats:			
1889	1,927,115	73,663,061	38.2
1888	1,849,868	65,405,911	35.4
Rye:			
1889	90,106	1,722,556	19.1
1888	84,067	1,295,302	15.4
Peas:			
1889	709,385	15,439,133	21.8
1888	696,653	14,283,863	20.5
Hay and clover:			Tons.
1889	2,398,795	3,748,229	1.56
1888	2,322,639	3,009,017	1.33

A report to be issued early in September will give a revised estimate of cereals, based on the threshing results of this month and careful observations made at the close of the harvesting season.

The following table gives the areas of other field crops for 1889 and 1888, together with the acreage of cleared pasture land:

Crops.	1889. Acres.	1888. Acres.
Corn	187,116	182,971
Buckwheat	56,368	57,523
Field beans	21,839	22,700
Potatoes	145,811	148,815
Mangel-wurzels	21,311	21,450
Carrots	11,261	11,024
Turnips	111,103	113,138
Pasture (cleared)	2,617,761	2,535,604

The total area in crop, not including pasture land, is 7,776,133 acres in 1889, as compared with 7,616,350 in 1888, and with 7,381,566 as the yearly average of the seven years 1882-8.

The statistics of farm live stock in the following table show increases in horses, swine and poultry and decreases in cattle and sheep:

Farm Live Stock.	1889. No.	1888. No.
Horses and colts	618,798	606,218
Milch cows	779,171	781,559
All other cattle	1,112,723	1,147,079
Sheep and lambs	1,216,120	1,349,041
Swine	835,469	819,079
Poultry	6,304,298	6,164,114

The total clip of wool is estimated at 825,930 fleeces, yielding 4,588,896 pounds, or 5.56 lb. per fleece. There were 851,522 fleeces, yielding 4,691,027 pounds in 1888, being 5.51 lb. per fleece.

The table of the values of farm property shows that land has depreciated by over $3,000,000, but buildings, implements and live stock show increases which make the aggregate value at nearly $1,000,000 above the returns of last year. Following are the figures for the two years:

Farm Property.	1889.	1888.
Land	$632,322,433	$640,430,801
Buildings	126,404,237	126,203,226
Implements	51,685,706	49,754,832
Live Stock	105,731,288	102,630,225
Total Property	862,210,664	861,368,084

The rental of leased farms is placed at $1.96 per acre on the whole farm, or $2.80 per acre on the cleavage. In 1888 these respective figures were $2.07 and $2.85.

This table gives the average wages over the province for farm laborers and domestic servants for 1889 and 1888:

Farm Wages.	1889.	1888.
Laborers—		
Per year with board	$162 00	$157 00
Per year without board	221 00	231 00
Per month with board	17 20	16 90
Per month without board	26 61	26 50
Domestics—		
Per month with board	6 61	6 28

There is in these figures a very near approach to the average of the seven years 1882-8, and a small excess over the wages of 1888, except for farm laborers per year and per month without board. The increase in the wages of domestic servants shows that this class still continues in good demand on the farms.

A perfect complexion, free from pimple or blemish, is very rarely seen, because few people have perfectly pure blood. And yet, all disfiguring eruptions are easily removed by the use of Ayer's Sarsaparilla. Try it, and surprise your friends with the result.

Made Specially for Women.
Yet good for all, Carter's Iron Pills. 24

The Wheat Farmers' Good Year.
[From The Philadelphia Times.]

Various estimates have been made of the American wheat crop for the current year, the latest and most reliable of which places it at about 500,000,000 bushels, or 80,000,000 more than last year.

Under ordinary circumstances this would mean cheaper flour at home and a large surplus to carry over to next year. But the wind that blows cool to somebody has been wafting prosperity in the direction of American wheat-growers by making short wheat crops elsewhere.

The London Miller estimates this shortage as follows: Russia, 72,000,000 bushels; Hungary, 36,000,000; Roumania, 8,000,000; Germany, 8,000,000; India, 18,000,000, and South America and Australasia, 24,000,000; total, 166,000,000. The increases are: United States, 82,000,000; Canada, 8,000,000; England and France, 32,000,000; Italy, Spain, Belgium, Holland and Algeria, 32,000,000; total, 154,000,000.

The estimate, if correct, shows the world's wheat crop to be about 12,000,000 bushels less than last year, and as the reserves are lower than at that time it seems quite probable that the bulk of our surplus crop will be needed for export.

Few children can be induced to take physic without a struggle, and no wonder—most drugs are extremely nauseating. Ayer's Pills, on the contrary, being sugar-coated, are eagerly swallowed by the little ones, and are, therefore, the favorite family medicine.

Ministers, lawyers, teachers and others whose occupation gives little exercise, should use Carter's Little Liver Pills for torpid liver and biliousness. 246

Among the Societies.

The County Orange Hall is being renovated.

A new Orange lodge will be instituted in the North End in a short time.

Lenmore Court, I.O.F., had 3 initiations and 2 propositions last night. Chief Ranger Carey presided.

Mount Lebanon Lodge, I.O.G.T., had 3 initiations and 5 propositions last night. Bro. H. Tugwell presided.

The executive of the County Orange Lodge met in the County Hall on Monday. W. Bro. H. A. E. Kent, D.G.M., presided. The report of the 12th demonstration was presented by the secretary. The total receipts were about $1900. W. Bros. H. A. E. Kent, D.C.M., John McMillan, D.M. of C.T., George Downard, D.M. of W.T., Robert Kirkpatrick, D.S. of R.T., and John Vance, D.S. of W.T., are recommended to be placed on the Board of the Protestant Orphans' Home as life members.

A. D. Noyes, Newark, Michigan, writes: "I have enquired at the drug stores for Dr. Thomas' Eclectric Oil, but have failed to find it. We brought a bottle with us from Quebec, but it is nearly gone and we do not want to be without it, as my wife is troubled with a pain in the shoulder and nothing else gives relief. Can you send us some?"

Women from their sedentary habits are often subject to headache and constipation. These are quickly removed by Carter's Little Liver Pills. 246

The action of Carter's Little Liver Pills is pleasant, mild and natural. They gently stimulate the liver and regulate the bowels, but do not purge. They are sure to please. 246

TOOLE FINALLY MASTERED

THE TORONTOS SOLVE HIS DELIVERY AND FOUND OUT A VICTORY.

The Rochesters Could Not Locate Titcomb's Curves—Racing at Morris Park, Saratoga and Chicago—Trotting at St. Kitts—Other Sports.

ROCHESTER, Aug. 28.—For five innings today Toole had the Torontos at his mercy, but after that the situation of affairs was exactly reversed. In the sixth he was hit for two triples, a double and two singles, and in the seventh for a double and three singles. In the Rochester's half of this inning Toole was spiked severely by Betsit when sliding into second and forced to retire from the game. Fitzgerald took his place and was hit for three singles and a double in the two innings in which he pitched. On the other hand Titcomb was invincible and Rochester could make but six scattered hits off him. The Rochesters fielded miserably and the Torontos did but little better. McGuire's batting was the feature. Emslie fined Titcomb $10 for kicking on a decision. The score:

TORONTO.	R	H	O	A	E	ROCHESTER.	R	H	O	A	E
Burke, cf	0	1	1	0	0	Grim, cf	0	1	2	0	0
Pettit, ss	2	2	1	3	2	Knowles, 2b	0	0	1	0	0

TORONTO BEATEN AT LACROSSE.

The Athletics of St. Kitts Easily Defeat the Queen City Team.

ST. CATHARINES, Aug. 28.—A lacrosse match was played here this afternoon between the Torontos and the Athletics of this city, which resulted in favor of the home team by 6 goals to 1. There was a large attendance, and barring a little dispute in the third game in which one man on each side was ruled off everything passed off pleasantly. The teams were as follows:

Toronto.		*Athletics.*
T Carmichael	Goal	Riddell
Martin	Point	Morton
McConaghy	Cover Point	F Williams
Gordon	Defence	R Williams
Carr		Fairfield
Gale		Lobb
Green	Centre	Dowler
J Garvin	Home	Yielding
Johnston		Fralick
Longley		Notman
Schofield	Outside Home	Peterson
Woodland	Inside Home	Doyle

Referee—Charles A. McKay of Woodstock. Umpires—Thompson and Hara.

First game—The Torontos secured the ball at the start, but it was quickly taken by the Athletics. Toronto captured it again and threw it on the home flags but it went wide, Riddell securing it and making a good throw to centre, where it was caught by Downey, who passed it to Yielding, who put it through the Toronto goal. Time 12 min.

Second game—After the face off, Downey secured the ball but lost it to a Toronto man, who threw on the flags, but it was stopped and rolled behind the flags, where some skirmishing took place. The home got the ball and threw down to centre, where some good combination play took place for about a minute, after which three shots were made in quick succession by the Athletics on the Toronto goal, the third one going through. Time 3½ minutes.

Third game—After two minutes' play a little dispute occurred between one of the Torontos and one of the Athletics, which ended in both being ruled off, after which good lacrosse was played for about eight minutes, the Athletics showing splendid team work, and the game was won by them. Time 13 minutes.

Fourth game—This game was featureless, with the exception of a long run down the field by Downey, who made a shot on the Toronto goal, and after a little skirmishing in front of the goal the ball was put through by the home team. Time, 2 minutes.

The fifth and sixth games were taken by the Athletics in one minute and three-quarters of a minute respectively, without any features.

Seventh game—This was the longest and best played game of the match. Toronto seemed to brace up and get in their old form again. Close play prevailed all through, the combination playing being among the best seen here this season. The game was won by Toronto. Time, 17 minutes.

The eighth game was started and after seven minutes' play was called on time limit.

Wheelmen at St. Catharines.

ST. CATHARINES, Aug. 28.—The Owl Bicycle Club had a series of races on the Driving Park here to-day. The results follow: One mile—Chas. Walker 1, Ed. Everett 2, Will. Whitten 3. Time 3.50.

Safety class—½ mile. R. Fletcher 1, J. P. Corbin 2, W. Whitten 3. Time 2.03.

A Great Bicycling Event.

The proprietors of the World's Bicycle and Racing Association through their Honorary Secretary-Treasurer, Mr. F. W. Coulson, have deposited with The Empire Printing and Publishing Company the sum of $950 to be given in prizes at the great 72 hour bicycle race, to be held in the Mutual-street rink, Toronto, beginning Oct. 21, 1889. First prize, $500; 2nd., $300; 3rd., $150, in cash. For full particulars address F. W. Coulson, Hon. Secretary-Treasurer, Box 266, Toronto, Canada.

SMALL FIELDS AT SARATOGA.

The Favorites Beaten and the Talent Hit Hard.

SARATOGA, Aug. 28.—Small fields and the downfall of the favorites were the features of to-day's races. Two races were ducts and another had but four starters. Leo H was considered a sure thing for the first but could not finish better than third, Lady Pulsifer making a runaway race from the start. In the next those who had backed Leo H. played Vermont at 3 to 5, but Vermont was "never in it." Lavinia Belle easily defeated Wary in the Morrisey Stakes, proving herself excellent at long distances. The next race had but two starters and there was very little interest in it. Maid of Orleans scored her third winning within a week in the last race and was bid up $250 by Lowell who secured her for $1650. When the Maid of Orleans arrived here about 10 days ago her owners had to borrow money to pay the freight bill, but she has won considerable money in the past week.

First race—Purse $400, for 3-year-olds and upwards; 2 mile.

W Lovell's ch f Lady Pulsifer, 3, by King Ban—Penelope, 107 1
