CORRUPT POLITICS IN RAILROAD BUILDING OF CANADA CHARGED

Bishop Fallon Claims Best Architectural Examples Originated by Catholics.

Declaring that he did not look for the history of mankind in books, Rt. Rev. Bishop M. F. Fallon, D.D., spaking at the musical vespers held in St. Mary's Church Sunday evening, compared the architectural and artistic achievements of men in the present age with their achievements under the inspiration of mediaeval Catholicism.

The history of mankind was not written in books, he said. One read a great deal nowadays of the Irish question. He would not say on which side he stood in regard to that question, but declared it was impossible to get a history of it from printed pages. What was published today in official documents, in the public press and in current magazines, was denied tomorrow. Anybody who is wise will not go to books to read history. One must go to the achievements of men. Men build themselves into the buildings they construct. In a bank, like a Grecian temple, they express the idea, money. In an office building, like a Gothic cathedral, it is business. In a picture theatre, like a Roman palace, it is pleasure. In a residence, like a king's palace, it is selflove and vanity. Natural motives are back of these buildings, as in the building of destructtive battleships, or railroads on which public money was squandered. Political corruption had been back of the wild extravagance of Canada in building railroads during the last twenty years.

Build for Love of God.

But when they built for love of God, they built St. Peter's Palace in Rome, with a dome 400 feet high, and an auditorium in which the speaker himself had seen 65,000 people and as many more outside vainly seeking admission. From the same motive they had built Rheims Cathedral, and in England, Canterbury Cathedral, a Catholic offering to God which was afterwards taken away from the Catholics, as was also Westminster Abbey. All the worth-while architectural examples at Oxford and Cambridge had also been built in the time that England was Roman Catholic.

Nowadays people build soap factories and laundries and call them schools, or perhaps they squander public money on patent ventilators and terraza floors. No body of public men, outside of the Roman Catholic church, was economical at the present time, the bishop claimed. Other public bodies were elected from year to year, and squandered all the money they could get from the people one year and the next year all they could borrow or mortgage.

New Organ Played.

The feature of the musical program was the playing of the new Casavant pipe organ by A. J. Pepin of Detroit. In congratulating St. Marys parish upon the excellence of the new organ, Bishop Fallon observed that according to church regulations, the organ, being a dignified instrument, is the only musical instrument supposed to be permitted in Catholic churches, although he was aware that right in his own diocese this rule was not always observed.

Mr. Pepin's organ numbers included Salome's "Cantilena," Delburck's "Berceuse in A," a gavotte from Thomas' "Mignon," Capriccia in F," from Lemaigre, and Coloarts' "Marche Triomphale."

Miss Marie K. Bray of Chicago beautifully sang Verdi's "O Salutaris." Excellently rendered choral numbers by the St. Marys parish choir included two from Generali, Mozart's "Magnificat" and "Tantum Ergo."

LARGE MIDWAY AT FAIR WILL BE IN FULL SWING TODAY

Grand Stand Acts Have Arrived—Livestock Entries Doubled.

Large crowds of young and old, boys and girls, principally boys, however, gave up the idea of their usual Sunday pre-breakfast and after-dinner nap to witness the once-a-year work of unloading of live stock at the Campbell street entrance to the Western Fair grounds yesterday.

From 7 o'clock Sunday morning until the shows put in their appearance at 2:30 in the afternoon the throngs lined up on Campbell street, but when the news came that the show train was in sight arrived, the majority transferred their curiosity to Egerton street crossing of the G. T. R.

Seek Excuse To Enter.

Scores of youngsters, alone and in groups, scratched their heads and racked their brains for a reasonable excuse to offer to the "cop" on the gate which would entitle them to a free entrance to the inside "just to look around." Some of the luckier ones had lunches to carry for a dad or a big brother who was busily engaged on the construction of a refreshment booth or kewpie game, while others scrambled over each other to lead in a cow or horse to their respective stalls, and, once inside, it was an easy matter to get outside of the barns and ramble around.

The C. A. Wortham shows, which are under contract to open their doors on the midway for the afternoon performance today, arrived in record time from the Toronto exhibition, where they showed to capacity filled tents for practically every performance, and broke all records of any previous show there. And they promise to provide Londoners and visitors to the Fair with something well worth seeing.

Large Midway.

The midway consists of 28 shows and 8 riding devices, and comes to London recommended as an exceptionally high-class lot of shows. Yesterday the manager stated that although they are not scheduled to begin their performance until the afternoon, if the attendance of children at the exhibition in the morning is large the midway attractions will immediately open their doors.

The management of the Western Fair reports especial success in securing the services of ten clean, wholesome acts for the afternoon and evening performances in front of the grandstand, and have added several special features to this program.

The board has secured the services of Mr. Mosely, physical director of the Brantford Y. M. C. A., as manager for the grandstand performances. He will take full charge of the stage and act as general announcer for the different acts.

All Grandstand Acts Here.

All the acts for the grandstand program arrived Sunday, and the fair board intends making good the promise to give the visitors to the exhibition a full week of attractions for the first time in the history of the Western Fair, commencing today at 1:30 and concluding at the drop of the curtain on the fireworks exhibit Saturday night.

One of the special grandstand acts is known as the Dutton Society Equestrian Act, an act in which three snow-white horses, a pure white Alaskan Spitz dog, "Snow," and a comic mule, "Brisco," standing 27 inches high; James Dutton and his two sisters, the Misses Winnie and Bessie, take part. The act carries its own 9,000-candle power lighting plant, and has a world-wide reputation, having shown before the royal family in England, and just concluded a three years' run at the Hippodrome in New York City.

F. Yeates of Circleville, Ohio, reported at the fair offices yesterday afternoon, and will commence work as judge of the speed events today.

Owing to the large number of entries which arrived during the week-end, it was found necessary to erect two large tents, 30 feet by 60 feet, in order to accommodate the sheep exhibits alone. New pens had also to be erected for the swine, and all space having been taken up in the poultry department, it was necessary to house a large flock of geese in a corner of the grounds with only a three-barred fence, hastily put together to keep them in place.

Saturday Judging.

In the agricultural department, roots were judged and prizes awarded on Saturday morning. Ladies' work was also judged on Saturday by Miss E. V. Powell of the agricultural department, Toronto. Speaking to Secretary Hunt about the exhibit she expressed herself as very well pleased with the competent way in which the ladies in charge handled the display.

The reason for the horticultural building being practically empty on Monday of each exhibition week, Secretary Hunt stated, is that the judging in this department does not take place until Tuesday morning and the articles are not put on display until Monday night so that all will be fresh, thus making the work of judging much easier.

Double Livestock Entry.

The livestock entry is practically double that of last year and every other exhibit is the same. The dog show is much larger than last year and the very best breeds from all over Canada will be shown.

Nothing has been overlooked and if the Western Fair of 1921 doesn't go "over the top" it will be no fault of any of the directors.

CANADIAN PACIFIC "VANCOUVER EXPRESS"—WINNIPEG—CALGARY—VANCOUVER.

Passengers for Western Canada will find the "Vancouver Express," leaving Toronto 10:00 p.m. daily, a most convenient train, stopping at and connecting for all principal points.

Equipment consists of first-class coaches, up-to-date standard and tourist sleepers, compartment observation, dining and colonist cars.

The most beautiful in Canada is along the line of the Canadian Pacific.

For tickets, reservations and full information apply to any Canadian Pacific ticket agent, or H. J. McCallum, city passenger agent, corner Dundas and Richmond streets. zxv

THREE SMALL FIRES OCCUR ON WEEK-END

A fire causing $200 damage broke out in the Alma Block, Richmond street, Saturday night. The blaze originated when cleaning cloths in the janitor's closet took fire. A hole was burned through the floor to the joists.

The fire department extinguished a small fire at the East Garage on Saturday about midnight. The cause of the fire is unknown. The damage done did not exceed $25.

Another blaze occurred at 3 o'clock Sunday afternoon when some rubbish in the basement of R. Graham's residence, 347 Simcoe street, took fire. The fire department was called and extinguished the blaze. No damage was done.

EXTRA TRAIN SERVICE VIA CANADIAN PACIFIC RAILWAY SEPTEMBER 14TH, ACCOUNT WESTERN FAIR—LONDON.

For the accommodation of passengers attending the Western Fair at London the Canadian Pacific Railway will have extra train service in and out of London Wednesday, September 14, as follows:

Special train to leave Chatham 8:00 a.m., arriving London, Richmond street, 9:55 a.m., Quebec street, 10:05 a.m., September 14, making all local stops, and returning Special to leave Quebec street 10:20 p.m., Richmond street, 10:30 p.m., running through to Chatham, making all local stops.

For further information apply Canadian Pacific Ticket Agents, or H. J. McCallum, City Passenger Agent, London. Sept.14

CHRISTIAN SCIENCE AIMS TO RESTORE ART OF HEALING

Lecturer From Mother Church Addresses Large Audience Here.

William D. Kilpatrick, C.S.B., a member of the board of lectureship of the Mother Church, First Church of Christ, Scientist, Boston, Mass., delivered a lecture on Christian Science to a large audience in the Allen Theatre yesterday afternoon. In part he said:

Christian Science has come to humanity to restore to it the lost art of healing which the great Master-Christian, Jesus the Christ, declared should ebemplify the understanding of those truths of existence which he gave to the world some twenty centuries ago. One can hardly read the New Testament without a firm conviction that much of the vitality given it by the life and works of Jesus taught that it was his understanding of God and God's government of His universe which enabled him to do the works of healing and regeneration he so freely accomplished throughout His brief ministry and of which He said in no unmistakable terms: "He that believeth on me, the works that I do shall he do also."

Demonstrable Fact.

If you will carefully follow the life of Jesus as given in the New Testament and consider His works in connection with what He taught you will discover that what He did was merely to establish as a demonstrable fact what He taught, and that what He taught and did were said and done in accord with, and in explanation of, some immutable ever-present, universal law. You will see, in other words, that His words and works were looking to the establishment with men of a divine, omnipotent, spiritual law which will eventually rule al. mankind to the complete extinction of any so-called opposed law and its effects.

Not God's Laws.

And this Law of God—this Law, the knowledge and application of which Jesus said should make us free—is what Christian Science has come to re-establish with men. Those wonderful works of Jesus prove conclusively that laws of matter are not God's Laws and that God's Laws are not only superior, but are actually laws of annihilation to so-called material laws and thereby prove that material laws are the product of a mortal misconception of what constitutes true law.

We find, with reassurance, that this Law of God is a law of Life—not of death; a law of health—not of sickness; a law of abundance—not of lack and limitation; a law of harmony—not of discord; a law of peace—not of strife; a law of love—not of hate.

How to Apply It.

And now the question of how to bring into action this ever-present Law of God, how to apply it to our present needs, how to heal the sick, comfort the sorrowing and save the sinner, as Jesus did, naturally presents itself. This, my friends, is accomplished in Christian Science solely through the prayer of understanding. Christian Scientists have learned that whatever is to be achieved in the way of healing and saving must be done through such prayer, and that this prayer must be without ceasing. Our every thought, inclination and deed must be the outcome of a constant mental attitude of prayer if we would follow the Master in the way of His appointing.

Mary Baker Eddy, the discover and founder of Christian Science, has incorporated the fundamental teachings of Christian Science in her book, "Science and Health with Key to the Scriptures." This is the textbood of the Christian Sience denomination. Through its study the secrets and obscurities of Holy Writ have been made plain and instead of a book of mystery the Bible has come to be the chart of life to thousands upon thousands to whom it has heretofore been closed.

Coal Deadlock!
Buyer vs. Dealer
Situation Is Serious

Coal dealers do not own, nor can they afford to own, enough motor trucks or horse-drawn vehicles to be able to deliver a sufficient amount of coal to keep everyone warm during the coming winter, if the delivery of coal is deferred until cold weather sets in.

It is very improbable that we will have another mild winter.
