Wills All to Fight Graft.

Wills All to Fight Graft.

Port Huron, Mich., March 7.—
Archimeds Galbraith, an aged hermit, who was carried from his hut a few miles from here a week ago because he was no longer able to care for himself, died in the county poor house yesterday.

He left a will in which he directs that his body be sold to any medical college for dissection, and that the proceeds, together with his \$12,000 estate, be placed in the hands of a prominent lawyer, and an editor, who are to "fight and expose the corrupt court and lawyers of this county."

Czar "Satisfied."

St. Petersburg, March 7.—Parliament did not meet yesterday, pending the reception of M. Golovin, president of the Lower House, by Emperor Nicholas, which took place yesterday. His majesty declared himself "thoroughly satisfied with the first session of the House, and assured the president that he and the Ministers were inspired by the best feelings toward Parliament, and hoped that its work, with the assistance of the legislative projects which the Ministers had prepared, would be beneficial to the country.

Head Found In City Hall.

Head Found In City Hall.

Kingston, March 7.—Laborers working on the dome of the city building found a tin pail containing the perfectly preserved head of a middle aged man.

An inquiry was made and it was discovered that a medical student at one time had used the tower as a laboratory and on being graduated, left the head, which probably has been in the tower ten years.

of Light. Here is a story as told by a gentle-man who spends the greater portion of his time studying the habits of birds: A humming bird with an angry dash expressed its disapproval of the pres-ence of a big bumblebee in the same tree. The usually pugnacious bee incontinently fied, but he did not leave the tree. He darted back and forth among the branches and white blosthe humming bird in close pur-Where will you find another pair that could dodge and dart equal to these? They are like flashes of light, yet the pursuer followed the track of the pursued, turning when the bee turned.

In short, the bird and the bee controlled the movements of their bodies more quickly and more accurately than he could control the movements of his eyes. The chase was all over in half the time that it takes to tell it, but the excitement of a pack of hounds after a for was no greater. The bee escaped, the bird giving up the chase and alighting on a twig. It couldn't have been chasing the bee for food, and there is no possible explenation of its attack except that it wanted all the

The Queer Little Ermine The ermine is a queer animal. It is one thing in winter and another thing in summer. In winter its fur is as white as snow, and it is called the ermine. In summer it turns a reddish brown on the upper part of the body and a light yellow on the lower part, and it is then called the stoat. This change is familiar to naturalists, but not to ordinary people, and the ermine and the stoat are therefore generally regarded as distinct animals. The fur of the ermine is much valued. At one time it was a mark of royalty, and the state robes of judges and magistrates were lined with it as an emblem of purity. The ermine is so cunning in its ways that it is almost as difficult to catch it as it is to "catch a weasel asleep." In fact, about the only way to capture it is to mark its course from its home and then strew mud in its pathway. When the dainty, fastidious little animal reaches the point where the mud is strewn it will lie down and subject itself to risk of capture rather than smirch one of its snow white hairs.

DR. WOOD'S NORWAY PINE SYRUP

Always Stops the Cough

It combines the potent healing virtues of the pine tree with other absorbent, expec-torant and soothing medicines of recognized worth, is absolutely harmless, prompt and safe.

A cough is caused by the presence of phlegm in the throst and lungs, and continued coughing is liable to distend the bronchial tubes, congest the lungs and preduce inflammation or hemmorhage.

A neglected cough can have but one result. It leaves either the throat or lungs, or both, affected.

A single does of

Syrup

will stop the cough, soothe the threat and heal the lungs.

Read what Miss Nettie A. Seeley, Ashland, N.B., says: "I take much pleasure in recommending Dr. Wood's Norway Pine Syrup, for I have found it a very valuable remedy for coughs. My mother has used it in our family for a long time and whenever any of them get a cough, mother will says: "I will have to get some Dr. Wood's Norway Pine Syrup for I know it is good, and always stops the Cough when nothing else will."

Insist on getting Dr. Wood's as it is the genuine, put up in yellow wrapper. Price 25 cents at all dealers. 3 pine trees the trade mark,

A FAMOUS GAMESTER.

Amazing Skill of Captain John Scott at Whist.

HIS RAPID ROAD TO WEALTH.

The Winnings of the "Gentleman Gambler" at White's, In London, In the Eighteenth Century Exceeded \$5,000,-000-Fox's Reckless Play.

Of all the gentlemen gamblers at the close of the eighteenth century in England a single one is noted for the immensity and the regularity of his winnings. This was John Scott, who, beginning as a penniless captain, wound up his career as a millionaire general. On the subject of the campaigns he conducted history is silent, but con-temporary London was full of talk of his marvelous luck with dice and cards, and the marital misfortunes of his later life gave more material for the gossips.
Writing to Richard Bentley from Arlington street on Feb. 25, 1755, Horace Walpole says:

"The great event is the catastrophe of Sir John Bland, who has flirted away his whole fortune at hazard. He tother night lost in reckless play an immense sum to a Captain Scott, who at present has nothing but a few debts

Sir John Bland, to conclude here the history of that luckless dicer, shot himself dead, after losing the last of his fortune, in Kippax park.

Captain John Scott was of that branch of the numerous Scott family of which Sir Walter was a member, and his ancestor in the thirteenth century was that famous chemist, Michael Scott, who won the name of wizard. A later Scott distinguished himself in the time of Charles II. by marrying, when time of Charles 11. by marrying, when he was himself only fourteen years old, a lady who was three years his junior. The bride was Mary, countess of Buccleuch, in her own right the richest helress in Scotland. The marriage was a secret one, and none of the friends and few of her family were in-formed of it until the day after. The youthful bridegroom did not profit greatly by this match, for his bride died at thirteen. Her sister Anne, who succeeded to her titles and estates, made a marriage with the pet son of Charles II., Monmouth, and had a numerous family. It was sixty years later, or about 1750,

that young Scott, son of the laird of Scott's Tarvet, entered King George's army. Two years later he was in London and in the midst of the most reckless set of spendthrifts, rakes and gamesters that English society has ever known. Sir John Bland was only one thousand rich young English who threw away fortunes over the gaming table at White's. The one his-toric loser of that era was Charles Junies Fox, Pitt's rival. Fox gambled away, all told, no less than \$5,000,000. Scott was the very antipodes of Fox. When he died, at a ripe old age, he left a fortune as great as that with which Fox had begun, and every penny of it had been won at the gaming table. Fox was a ripe scholar. Scott was almost illiterate. Fox said that losing was the next greatest pleasure to winning. Scott never lost or so rarely that it did not affect the serenity of his ca-reer as a winner. Fox would go home in the morning after a night in which he had gambled away £10,000 or £20,000 and immediately lose himself in a study of Sophocles or Æschylus, Scott, like the sensible fellow he was, would button his coat over the portemonnaie in which he carried away winnings of an equal or even greater amount and

immediately go to bed so as to be fresh for play in the rening. When Scott found himself in London and amid the wild young men of his era, he determined that gaming was his only chance of getting money. When he engaged himself to throw a series of mains with Sir John Bland. he had, as Horace Walpole puts it, nothing "but a few debts and his com-mission." His shrewdness taught him that there was nothing in dicing, at which a stupid man has as good a chance as a bright one, and so he speedily gave up hazard and applied himself to whist, at which game fortune fights on the side of the skillful player. Never in the history of play did men gamble for such high stakes as Scott and his victims did at White's between 1753 and 1780. Scott's system was an exceedingly simple one. He was nothing in dicing, at was an exceedingly simple one. He gave himself the best of it in every possible way. He never went to the possible way. He never went to the gaming table unless his head and his stomach were in the very best order. He never lost his composure or his good nature for an instant. He played A neglected cough can have but one result. It leaves either the throat or lungs, or both, affected.

A single dose of

Dr. Wood's Norway Pine

Syrup

A neglected cough can have but one result. It leaves either the thin stant. He played a perfectly fair and honorable game, and at first he made it a rule never to play for more than a fixed sum, which he could afford to lose. He won so steadily that it wasn't long before he was prepared to risk any sum which even the wealthiest or the most reck-less of his adversaries would venture

to propose.

A story which illustrates capitally Scott's patience in the face of hard luck has been preserved. One night while he was at the card table news was brought to him that his wife, the first Mrs. Scott, had given birth to a

"Ah," he said, "I shall have to double my-stakes to make a fortune for this young lady."
But in a few hours he was £8,000 to

the bad. Retaining his invariable se-renity, he said he was sure of his luck returning, and at 7 a. m. he went home Subscribe for The Planet—and Do the Winner of £15,000. That's the sort of play that went on at White's night after night during the years that John Scott was winning the largest fortune ever accumulated by a gentleman game Bowell Is Lone Survivor.

Bowell is Lone Survives.

Kingston will very heartily enter state the suggested celebration of the jubilee of the Canadian Press Association in 1908, the organization having started there in September, 1859. The City Council will likely invite the association. It is felt that the most desirable time would be in the summer, when pleasant trips and other enjoyments could be had. The regular meeting of the association could be held in Toronto in February, and the annual outing and celebration could occur in August or September. The Kingston newspapermen will do all in their powers to make the event memorable. It is suggested that the association rear a tablet in the City Hall to commemorate the occasion. In looking over the list, it would seem that Sir Mackensie Bowell of The Belleville Intelligencer is the only living person who was at the organization of the exercise. the only living person who was at the organisation of the association.

A Square Deal A Square Deal

Is assured you when you buy Dr. Pierce's family medicines—for all the ingredients entering into them are printed on the bottle-wrappers and their formulas are attested under oath as being complete and correct. You know just what you are paying for and that the ingredients are gathered from Nature's laboratory, being selected from the most valuable native medicinal roots found growing in our American forests and while potent to cure are perfectly harmless even to the most delicate women as children. Not a drop of alcohol enters into their composition. A much better agent is used both or extracting and preserving the medicinal principles used in them. Viz.—pure triple-refined giveerine. This ageat possesses intrinsic medicinal properties of its own, being a most valuable antiseptic and antiferment, nutritive and soothing demul-

cent.

Glycerine plays an important part in Dr. Pierce's Golden Medical Discovery in the cure of indigestion, dyspepsia and Glycerine plays an important part in Dr. Pierce's Golden Medical Discovery in the cure of Indigestion, dyspepsia and weak stomach, attended by sour risings, heart-burn, foul breath, coated tongue, poor appetite, gnawing feeling in stomach, billousness and kindred derangements of the stomach, liver and bowels. Besides curing all the above distressing ailments, the "Golden Medical Discovery" is a specific for all diseases of the mucous membranes, as catarth, whether of the nasal passages or of the stomach, bowels or pelvic organs. Even in its ulcerative stages it will yield to this sovereign remedy if its use be persevered in. In Chronic Catarrh of the Nasal passages, it is well, while taking the "Golden Medical Discovery" for the necessary constitutional treatment, to cleanse the passages freely two or three times a day with Dr. Sage's Catarrh Remedy. This thorough course of treatment generally cures the worst cases.

the bronchial mucous membranes. The "Dis" covery "is not so good for acute coughs arising from sudden colds, nor must it be expected to cure consumption in its advanced stages—no medicine will do that—but for all the obstinate, chronic coughs, which, if neglected, or badly treated, lead up to consumption, it is the best medicine that can be take.

Grace By Weights.

Grace By Weights.

It has been suggested, I see, that it would make for the greater dignity and grace of future generations of English women if from an early age female children were made to constantly carry weights on their heads, as they do in the east. There is nothing, so to say, to keep our women properly balanced. They hop, wriggle, shuffle, mismanage their arms and hips, poke forward their heads and generally walk as if they were either deformed or dropping to pieces.—London World.

Woman Dead at Ninety-Nine.
Kingston, March 5.—Mrs. Lappin, one of the oldest residents of Garden Island, died Sunday. She was 99 years

BIG CANADA.

Sad News Will Take Six Months to Get to Trading Post.

Hundreds of miles from Winnipeg, in lonely northern trading posts of the Hudson Bay Company, the two sons and daughter of ex-Chief Factor Camsell are living, ignorant of the death of their father, which took place in January in Winnipeg. Not until next July will the sad news reach them. W. E. Camsell, the oldest son, has followed in his father's footsteps, and is an accountant in the Company's service at Moose Factory. Fred Camsell is in charge of the post at Fort Simpson, and Mrs. Harding lives with her hsuband at Fort Resolution.

The late Captain Julien Camsell was born 68 years ago in Ceylon, where his parents were then living, his father being an officer of the British ordnance. After being educated in England, he joined the army in 1853, being anxious to see service in the Crimean war. But his regiment did not go after all, being later sent to Canada and stationed at St. Johns, Quebec. In 1857 a portion of the Royal Canadian Riflee, a Colonial regiment, was despatched to Red River by way of Hudson Bay, and with it, as an ensign, marched young Camsell. The expedition left Montreal by sailing ship on the 20th of June, 1857, and arrived at Fort Garry on the 15th of October in the same year. The force was sent to Red River by the British Gövernment in anticipation of trouble with the United States over the Oregon boundary, and also at the solicitation of the Hudson Bay Company, who feared that the natives were contemplating mischief. The soldiers remained at Fort Garry two years, when the regiment was disbanded, most of the men returning home. Capt. Camsell became infatuated with the adventurous life of buffalo hunting on the plains, and in 1860 joined the service of the H. B. Co., and was sent to the Mackenzie River district in the Far North. Major Seaton is said to be the last surviving member of the expedition of 1857, which numbered 116 men and 16 women.

Capt. Camsell was an able and efficient officer, and rose steadily in rank in the Company's service. Appointed chief trader in 1872, he was given charge

A Wondrous Fish Story.

A Wendreus Fish Story.

Not many persons have the luck of a fisherman on the Arrow Lakes, British Columbia, last summer. At the same time he captured a 200-pound deer and a ten-pound trout.

The fisherman was trolling for trout, when several deer swam past his boat. The man managed to catch hold of an eld buck as he was going by, and, having no gun, attempted to kill the animal with a clasp knite.

Struggling violently, the deer got away, and as it swam off it carried the fisherman's line upon its horns.

Picking up his oars, the man started in pursuit, but was unable to bring the deer to bay and kill it until after

about two hours of pursuit and fight-Most amazing, however, was the fact that then developed. The fishline was still fastened about the deer's horns, and hanging on the hook was a fine ten-pound trout, that had seized the bait as the deer dragged it through the water. The fisherman bore home in triumph both fish and animal.

Only One Each.

By the tresty of 1817, Great Britain and the United States bound themselves not to keep more than one war vessel apiece upon Lake Ontario.

FIGHTING THE STORM.

The few straggling ducks that tempt the strenuous Canadian climate had a distressing time in the storm that swept the lake on a recent Sunday morning, writes S. T. Woods in The Globe. The great, white-crested waves chased and crowded one another down the lake, rearing up in angry impatience, struggling forward in the crush, or turning to dash against the rising barriers of white ice that protect the shore with their endless line of distorted peaks and fantastic embrasures. They struggled against the cross currents to attack the eastern lighthouse, and build up the great, irregular masses of ice formed by the breaking spray. The searching gale from the west caught and ruffled up every open space in the disturbed ice of the bay, and even in the gap the contrary waves rocked the disturbed ice of the bay, and even in the gap the contrary waves rocked the broken and grinding blocks of loose ice, moving them here and there in uncertain formations. There was no rest on the deep water, and every straggler seeking shelter in the bay was driven off in distress by the insatiable wind. A bluebill moving against the wind along the ice barriers of the shore with outstretched neck and swift, quivering wings rose with inherited caution to avoid the

suspicious mechanism of the foghorn and storm signal appliances. Rising against the full and sudden rush of the gale, there came a balancing of strength against strength, and for a moment it seemed as if he would not be able to make headway. A bird see proverbielly swift, now close and barely moving against the grey sky, gave the angry storm a momentary suggestion of strangeness, which passed as quickly as the almost basfied duck when he turned and shot by with the wind. The storm lent special interest to his course as he inspected one open space after another, turning away from the angry and forbidding water. After a long, circular detour, outlined sometimes against the irregular colors of the city's waterfront, he returned and dropped excitedly into the open water of the gap.

There is no expression of row sidered wonder and alarm like that of a wild duck at close range, and that the open water of the timbers, was a picture of perpetual surprise. The undulating waves from opposite directions moved their lines of ice as if to hedge him in. The alarm of his expression was real, for he rose, against the wind and turned out over the chasing waves in the open lake. As he moved steadily along, dwindling to a black speck against the uncertain horizon, the great, surging masses crushed and crowded past, forcing each other aside in their eagerness to be first. But the tossing waves and savage, searching wind were forgotten in watching the course of the moving atom of life seeking refuge from the pursuing storm. We turn from the grandeur and sublimity of nature's inanimate struggle te the little efforts toward which we feel a human sympathy. human sympathy.
