MELVERN SQUARE.

Mr. and Mrs. Starratt Dodge attended the exhibition at Bridgewater last week.

Rev. A. A. and Mrs. McCloud, Mr. and Mrs. George Phinney, Mrs. Percy Demmons autoed to Clementsport on Saturday to attend the funeral of Mr. Parker Zwicker, Mrs. Phinney's brother.

The women of the Baptist Sewing Circle were very pleasantly entertained at the home of Rev. A. A. and Mrs McCloud, Baptist parsonage, Kingston, on Thursday afternoon and evening.

Mr. and Mrs. Arthur Coleman and two children of Halifax are the guests of Mrs. Coleman's mother, Mrs. Ella Goucher.

Mrs. Samuel Hicks of Berwick, Kings Co., has been visiting her uncle Mr. Alfred Phinney, the past week..

Mr. and Mrs. Miner Sproul and son Percy, accompanied by Mr. and Mrs. George O'Neal autoed to Clarence and spent Sunday with Mr. and Mrs. Arthur Wheelock.

Mr. and Mrs. Everett Spinney, of St. John, N. B., spent a few days last week with Mr. Spinney's cousin, Miss Winnifred Jacques.

Mr. Eugene Masters, of Roxbury, Mass., was the guest of his sister, Mrs. Arthur Stronach last week.

Mr. Harry B. Baker of Boston, Mass is here with his father, Mr. Charles Baker, for a few days.

Mr. and Mrs. Ellery Baker and son Clyde, of Passaic, N. J., and Miss Muriel Estey of Newton Highlands, are spending a few days at their summer cottage here.

Mr. Forest McNeil has gone to Boston, Mass., for a months vacation.

Miss Esther Baker has gone to Normal College, Truro, for her "B" diploma. We wish her success.

Mr. Major Balcom has gone with Mr. Hartling to Florida for the winter.

Miss Lilla Gates spent a few days last week with friends in Berwick.

NORTH WILLIAMSTON.

Mrs. Bessie Mudgett left on the 20th for her home in Intervale, N. H.

Miss Carolyn G. Gray, Dean of the Faculty of Nursing Education at Western Reserve University, Cleveland, Ohio, having spent several weeks with Mr. and Mrs. Edmund Sharp, left on the 23rd for Kansas City.

Mrs. D. M. Charlton and daughter Margery, were guests of her cousin, Mrs. Walter Aldridge on the 25th.

Mr. and Mrs. Walter Aldridge left on 26th for their home in Winthrop, Mass., after spending several weeks with their parents, Mr. and Mrs. George Beals.

Mrs. Wilfred Murphy and baby of Culloden, Digby Co., is visiting her parents, Mr. and Mrs. Weston Crawford.

Miss Edna Tooker visited her friend Mrs. Roy Crandall at Nictaux on the 25th.

Mrs. C. S. Bothamley of West Paradise spent the past week with her parents, Mr. and Mrs. Edmund Sharp.

D. M. Charlton and men have finished their work on the road here. Mr. Charlton is deserving of much credit for the work which has been accomplished.

Mrs. William Shaw and sister, Mrs. William Gates and little son, spent the past week in Mill Village, Queens Co.

Mr. and Mrs. Samuel Bent have moved to their new home in Lawrencetown.

Mr. Leander Banks of Brickton has been busily engaged threshing grain here recently.

WRIGLEY'S
After every meal

A pleasant and agreeable sweet and a i-n-v-i-g-o-r-a-t benefit as well.

Good for teeth, breath and digestion.

Makes the next cigar taste better.

Mrs. Ralph Lantz, accompanied by her aunt, Mrs. White, spent over Sunday with her daughter, Mrs. Melbourne Donnelly of Port George.

Mr. and Mrs. George O'Neal were recent visitors of Mr. and Mrs. Frank Thornson of Torbrook.

DAILY STRENGTH

Nature has admirably fitted the body to fight against weakness but there is need for a daily renewal of strength, which comes easiest through nourishment.

Scott's Emulsion

is a practical aid to health and strength. If you are pale, underweight or weak, Scott's is the restorative that builds you up Nature's way—through nourishment.

Scott & Bowne, Toronto, Ont. 24-23

WEST INGLISVILLE.

The farmers are busy picking apples, the crop is not as good as last year.

Mrs Edward Whitman of Inglisville has spent three weeks with her daughter, Mrs. Elmer McGill.

Mrs. Leonard Banks and daughter Eva, spent Friday with Mrs. George Banks and mother, Mrs. Wiswall at Wilmot.

Mr. and Mrs. John Barteaux of Nictaux, and Mr. and Mrs. Walter Baker, Meadowvale, spent Sunday with their brother, Mr. Fred Barteaux and Mrs. Gipson.

Mrs. Isaac Durling and children spent Sunday at the old home of her brother, Vernon Beals, Inglisville.

Mr. and Mrs. Wilbur Banks and family are home after a busy summer at Dalhousie.

Mr. and Mrs. Percy Cleveland and baby Glendenning of St. John, spent a week with the latter's aunt, Mrs. John McGill.

Mr. and Mrs. Ernest Gipson of Dalhousie and Mr. Zebulon Durling were recent guests of Mrs. Emma Gipson.

Mr. and Mrs. Avard Leonard were visitors at the home of Leonard Banks recently.

Mr. and Mrs. Zebulon Durling visited Mr. Oliver Delancy, Lawrencetown South.

TORBROOK.

Mrs. Arthur Jefferson has returned home after a pleasant visit with her sister and friends in N. S.

Mrs. John Barteaux is home again from Harmony.

Mr. Aubrey MacAloney is in Halifax, spending a few weeks with his parents, J. E. and Mrs. MacAloney.

Miss Reta Murray of Halifax, also visited her friend Mrs. MacAloney last week.

Mr. Mark Neily is spending a week with friends in the Springfield moose district.

Mrs. L. A. Allen and granddaughter Miss Wyona Charlton, have gone to Springfield to visit Mrs. James Conrad and other friends.

MARGARETVILLE.

Mr. A. G. Blair and Miss Lottie Landers visited this place recently.

Mrs. H. Lawrence of St. John, is spending a few days at the home of her daughter, Mrs. C. E. Balcom.

Mr. J. G. McMurtery is a guest at the home of Mr. and Mrs. Harry Goucher.

Rev. Mr. Webb of Halifax, occupied the pulpit in the Baptist Church on Sunday morning.

Mrs. Bertha Ray and Mac Ray left on Thursday for Vancouver, where they will spend the winter.

Mr. and Mrs. J. A. Balcom and Miss Georgie have been spending the week in Lawrencetown at the home of Mr. and Mrs. C. S. Balcom. One evening while there four generations were represented.

Mrs. Elizabeth Balcom and family, Mr. J. A. Balcom and family, Mr. C. E. Balcom and family, Miss Eleanor Ray, who has been visiting her mother, Mrs. F. Ray returned to the U. S. on Saturday.

Mrs. Helen Harris and Mrs. W. F. Dormie spent Thursday at the home of Mrs. J. A. Balcom.

Mrs. H. S. Carey entertained a few friends at tea on Friday evening.

Mrs. A. B. Donnan has gone to Yarmouth, where she expects to spend the winter.

Dr. Lovett was calling on his friends here one day last week.

NEW LAMP BURNS 94% AIR

Beats Electric or Gas.

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, J. M. Johnson, 246 Craig St. W., Montreal, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency and without experience or money make $250 to $500 per month. 23-13t.

Roofing Materials

Let us advice you in regard to what is best for the repair of your roof. Our experience should be of much value in enabling you to choose what is best for your particular job. After the choice is made we can interest you in our low prices by reason of our carload purchases.

We purchase in car lots and have in stock the following:—

Roll Roofing in All Plys
Plain and Rock Surfaced—3 colors.

New Brunswick and Quebec Cedar Shingles

British Columbia Red Cedar Shingles

Asphalt Slate Shingles
Red, Green and Blue Black

Asbestoslate and Galvanized Steel Shingles
And suitable nails to put on the above to your roof.

A NEW FRUIT INDUSTRY.

The Domesticated Blueberry.

(The Rural New Yorker.)

It is probable that all or most of our popular fruits were originally wild. They have been domesticated, improved and made subject to man, as the dog, the cat and the horse or cow have been. Some of them, like the Baldwin apple, were evidently superior seedlings growing at random in the woods and likely to 'blush unseen" until the end of their life unless by accident man chances to discover them and noting their excellence, take measures to improve and preserve them.

We are now witnessing the domestication of a new wild fruit—the blue berry. This fruit has ranked among the best that nature has to offer, but for years it seemed impossible to tame and domesticate it. Taken into captivity it pined away and died, as wild birds and animals often do. During past years thousands of people have dug superior blueberry bushes and planted them carefully in the rich, mellow soil of good gardens. These people reasoned that if you take a plant from some thin sour land and give it every opportunity of fertile soil, lime and manure—of course it will appreciate the change and grow larger and finer than ever. It did not work that way. The blueberry bush showed itself as truly homesick as a boy or girl taken from some sterile valley far back among the hills and lodged in a palace with all the wealth and formality of palace life. Both blueberry and boy would pine away in such uncongenial surroundings.

For many years people who tried to domesticate the blueberry killed it with kindness, assuming that it would respond to garden culture like most of the lime-loving plants.

Finally the Department of Agriculture and Miss Elizabeth C. White of New Lisbon, N. J., discovered the simple secret. The blueberry is not a lime-loving plant; it does not want rich, alkaline garden soil. It knows just what it wants by touting in sour bogs or acid uplands, and knowing what it wants it will not submit to the wise theories of people who preach the title of U.S.D.—Lime, legumes and drainage for all crops. The blueberry is an acid soil plant and proud of it.

At any rate the basis for successful blueberry culture lies in adapting the soil to the plant. The ideal situation would be about what you would select as a cranberry bog. In the future great tracts of land now considered too sour and sterile for growing ordinary crops will be considered ideal for blueberries. The crop is now sure to develop as a commercial proposition. It will utilize great tracts of land well nigh worthless at present, and give the market a new and greatly improved fruit. There is also some hope that by using acid chemicals ordinary cultivated land may be fitted for the crop. It is possible that by using inoculated sulphur the soil may be made fit for this acid-loving plant. As we know, this form of sulphur is used to prevent scab on potatoes by making the soil somewhat acid, so that the scab germ will develop slowly if at all. Such chemicals as acid phosphate or aluminum may be used for the purpose. Perhaps in time we may learn how to grow good blueberries in common garden soil by using these acid chemicals.

Experiments With The Plant.

Miss White's development of this fruit shows in a most interesting way how these superior wild things may be captured and held in captivity. The blueberry does not come true from its seeds. The actual wood of the superior plant must be used as grafts or rooted cuttings if its character is to be maintained. Miss White lives in a section where great quantities of wild blueberries are picked and marketed. She knew many of these pickers personally, and observed that now and then they brought in berries of very superior size and flavor. Some of them were quite as large as gooseberries. So she offered prizes or awards to anyone who could find a bush producing berries of a certain size and lead her to it in the bogs. Each picker who cared to try it was given rings of certain size and these measured the berries that were needed. The result was that quite a number of very superior bushes were discovered. Miss White says that these pickers displayed a most remarkable instinct in locating these bushes for her. They would plunge into the woods; off the road, without any apparent landmark and go straight to the bush. These superior native bushes have been used for propagating, and we believe that much scientific work at crossing has been carried out. These plants are not mere seedlings, dug up in the woods at random, but each plant has been propagated from a cutting or grafted with wood from some known variety, so that a plantation of these blueberries is as true to name as an orchard of McIntosh or Baldwin apples would be. Aside from its value as a fruit producer, this bush is as beautiful as an ornamental shrub. Those who follow this blueberry culture are witnessing the beginning of a great new industry which will, without question, add a new domestic fruit to our list, and give value to much land now lying idle and useless.

OBITUARY.

Joseph N. North.

Middleton.—The death occurred Tuesday of last week of one of Nova Scotia's aged and highly respected citizens, Joseph N. North, after an illness of several days. The deceased, aged 88 years, had been in failing health for some time, but his end was hastened by pneumonia.

Mr. North was a son of the late Daniel North, having been born in Middleton, and living his entire life in this vicinity. He was a farmer by occupation, but later in life retired from active work. He was a Justice of the Peace for many years, and a Baptist in religion. He was predeceased last May by his wife, Ada, daughter of the late Col. Hardy Parker. He leaves one sister, Mrs. Killam, of Cornwallis. Interment took place Wednesday afternoon at 1 o'clock at Nictaux cemetery.

How to Prevent Biliousness

Doctors warn against remedies containing powerful drugs and alcohol. "The Extract of Roots, long known as Mother Seigel's Curative Syrup, has no dope or strong ingredients; it chases away indigestion, biliousness and constipation. Can be had at any drug store." Get the genuine. 3

SPRINGFIELD.

Mrs. William Morse, of Lawrencetown, spent a few days with Mrs. Gilbert Drew.

Miss Carrie Rhodes, of Lynn, Mass., has been visiting friends in this place.

Miss Effie Morrison, of Worchester Mass., is spending her vacation with her parents, Mr. and Mrs. J. E. Morrison.

Mrs. Phoebe Stoddart is visiting her son, Milford Stoddart of Harmony.

Miss Kathleen Sproule was a week-end guest of her cousin, Miss Alice Freeman.

Roger Lohnes left on Tuesday for Wolfville, where he has accepted a position.

Carrol Lohnes returned to Ashburnham on Saturday, after spending the past two months at his home.

Miss Christine Swallow, of Falkland Ridge, was a week-end guest of her friend, Miss Marjorie McNayr.

The Misses Jean and Verna Morrison of Lawrencetown, are visiting friends here.

Mrs. S. P. Grimm and two children, of Halifax, are guests at Mrs. Mary Grimm's.

Mrs. L. Stoddart, of Lawrencetown, has been visiting friends here.

Mr. Gilbert Drew returned Thursday, after spending the past three weeks in Truro.

J. G. Murray, agent C. N. R., is away on his vacation. He is being relieved by Mr. J. W. Houliham, of Windsor Junction.

URGES LIGHTNING RODS.

Federal Weather Bureau Issues Figures Regarding Fire Liability.

For more than thirty years the Weather Bureau of the United States Department of Agriculture has been an earnest advocate of the protection of buildings and other property against lightning by suitable rodding. The bureau is frequently called upon to advise enquirers concerning the proper methods and materials to be employed. Occasionally plans are drawn up in detail for the protection of Government structures. In 1910, the White House was rodded after plans and specifications prepared by Professor Marvin.

To determine the relative liability of farm buildings to fire damage by lightning, a study of lightning fire losses was made recently by the Weather Bureau. The average annual loss for the whole United States is a little over $12,000,000, which is probably a conservative figure. Illinois has the unenviable first place, with an average annual loss of more than a million dollars, part of which may be attributed to industrial sections. Texas is next in order because of its large area and the presence of highly inflammable oil storage tanks. New York is third, for reasons similar to those affecting Illinois.

In the highly developed agricultural States of the North, heavy losses are suffered, especially through destructive cyclonic thunderstorms. If the index number showing relative liability of farm buildings to damage is small in one State when compared with another having equally destructive and frequent thunderstorms it is quite possible that protection against lightning is more general in the former State. Michigan, Wisconsin, Minnesota and Iowa are States where it is estimated that somewhat more than half of the farm buildings are protected by rodding.

142,018 BARRELS OF APPLES SHIPPED.

Total to Date Shows Increase of 69,188 Barrels Over Last Year.

Figures furnished Wednesday by Furness, Withy and Company, gives the total shipments to date of apples from the Annapolis Valley through the port of Halifax to United Kingdom and Continental ports, that is of this season's crop. With the exception of one shipment made on August 27th, the figures represent what went forward during the month of September and total 142,018 barrels. This represents all steamship lines and includes the last ship out for the month ending Wednesday, which was the Leyland liner Daviaian for Liverpool and Manchester, sailing Wednesday afternoon, and taking 10,566 barrels. While the first shipment last year left on September 7th, this season's was sent the latter part of August or ten days earlier.

The first steamers to depart from Halifax with October shipments will be the Atlantic Transport liners Menominee and the Manchester Brigade, both of which sailed for England.

The Furness liner Comino, Captain Nuttall, arrived Thursday night from Montreal to complete loading with apples for London.

Furness, Withy and Company announce that the oil burning steamer Korean Prince will be here about the middle of the month from New York to load apples for London, taking the place of the Northwestern Miller, which was expected to make a sailing from here about October 15th. The Korean Prince is a modern freighter and one of the Prince Line fleet.

The Furness liner London Mariner arrived at London Thursday from Halifax, according to cable advices received here. She has a shipment of 20,341 barrels of apples which was the largest sent from here by one steamer so far this season.—Herald.

AMERICAN TOURISTS SPENT LARGE SUMS IN CANADA.

Commissioner of Highways Gives Some Figures.

"American automobile tourists spend $118,000,000 a year in Canada, and at the various ports of entry along the Canadian border there were registered during 1923 for a period of from one to six months, 1,965 motor vehicles; for a period of from two to thirty days 272,444 motor vehicles, and for a period of twenty-four hours, 1,662,200 motor vehicles. Assuming that each vehicle so registered at the different border ports carried four passengers each, who spent $5.00 per day during their sojourn in Canada, and that for the shorter period all remained the full time of their permits and for the longer periods of one-half of the time the amount of money expended by American tourists in the different provinces of Canada last year would amount to nearly $118,200,000. These figures were furnished by A. W. Campbell, Chief Commissioner of Highways of Canada and are based of actual registration figures at sixty-six ports of entry along the Canadian border, from the Atlantic to the Pacific."

It is anticipated that about twice as many tourists as entered New Brunswick at St. Stephen in 1923 will have passed the Customs officers at the end of the 1924 season.

It is hope which maintains most of mankind.
