LATH SHIPMENTS ON INCREASE

Shipments of laths from Nova Scotia and New Brunswick ports next year by schooners will, it is expected, greatly exceed 1922. There will be a heavy sawing of laths thruout the two Provinces during the Winter, on account of a heavy demand in the New York and Boston market. New York will take the greater proportion of the offerings. Building activity in the United States and contemplated activity for 1923 is given as the cause.

SUES ON 110 YEAR OLD DEBT

Great Britain is suing the United States before the Arbitration Commission provided for under the treaty of 1910, for a 110-year-old debt of $3,000,000 which it is claimed New York State owes the Cayuga Indians. Besides the $3,000,000 New York may also pay $2,400 a year forever.

In 1908 the Cayuga Indians ceded their lands to New York State. The State, in return, agreed to pay $2,400 annually to the Cayugas or their heirs in perpetuity. New York charged that at the outbreak of the war of 1812 the Cayugas joined the British and the State stopped paying the annuity and has not paid it since. But the peace treaty stipulated that Great Britain's allies sacrificed none of their rights.

It is upon this clause that the British Government rests its claim on behalf of the Cayugas, some of whose descendants are now living in Canada. Britain demands payment of arrears, with compound interest, about $3,000,000 in all, and that the payment continue to be made regularly in the future.

Henri Frangeot, Chief Legal Adviser to the French Foreign Office; Sir Charles Fitzpatrick, former Chief Justice of Canada, and Chandler P. Anderson, Counsellor of the State Department under Secretary Knox, compose the Arbitration Commission.

The number of carloads of automobiles shipped from Detroit for the first eight months of this year showed an increase of 114 per cent. over the corresponding period last year. The total over the Michigan Central was 55,046 carloads for the eight months.

QUESTIONS AND ANSWERS ON FORESTRY

Q. What were the forest fire losses in Canada this year?

A. Final statistics are not available, but the number of fires exceeded four thousand and the damage was above ten million dollars.

Q. Has radio telephony been utilized yet for forest protection?

A. Yes, in several districts and has been remarkably successful. The Air Board employed radio communication from their aeroplanes in Alberta and the system will probably be extended next season.

Q. Is the photographing of timber limits from aeroplanes yet a commercial success?

A. Yes, a company has been organized in Quebec and has completed most satisfactory aerial photographic surveys for banks and lumber and pulp companies. Accuracy has been fully attained and the speed of such surveys is obviously great.

Q. Has any valuation been put on the whole of the forest resources of Canada?

A. It depends what is meant by "valuation". What, for example, is the value of a very young forest in process of early growth? There have been rough estimates of the standing timber of the Dominion as worth upwards of two billion dollars, but the figure is largely guess work.

MORGENTHAU CONTENDS INVESTMENTS IN TURKEY ARE GOING TO BE LOST

New York.—All the money that would be invested in Turkey in the next twenty-five years was going to be lost, Henry Morgenthau, former Ambassador to Turkey, declared.

"I am amused that concessions are wanted in Turkey," he said. "It is an unsafe country to put money into. You might as well throw it in the river. All the money that is put into Turkey in the next twenty-five or thirty years is going to be lost, and we don't want an open door in Turkey."

Exports of boots and shoes from the United States during October amounted to 529,342 pairs, valued at $1,285,228, which was a great increase over October of last year.
