## YORK COUNTY AND SUBURBS

### Junction Public School Board is Seeking a Site for a New School.

### MR. BROOM'S UNIQUE POSITION.

**In Connection With Premises of Farmers' Loan Co.—North Toronto School Board.**

Toronto Junction, March 7.—A special meeting of the Public Schol Board was held in the Town Hall to-night to consider the purchase of a site for the new school in Ward 3. A block betwep Western and Ontario-avenues was thought to be the most suitable, but a committee, consisting of Trustees Joy, Gilbert and Rice, will report on other lots before a purchase is made.

On Sunday Mr. Yellowlees, Association secretary of the Provincial S.S. Union, will speak on "Ship Signals" in the Baptist Church.

A horse and dray will be required to cart the Town Clerk's books to Osgoode Hall tomorrow. The suit in question is Prittle v. the town.

Mr. S. J. Chubb will introduce the proportional representation system at the regular meeting of the Liberal Club on Saturday evening. Ballot papers are being prepared with a view to carrying on a mock election.

The National Lacrosse Club has reorganized with: President, Dr. Perfect; Secretary, W. Carter; Treasurer, Mr. Grennians; Field Captain, Percy Wright; Team Committee, Messrs. Grennians, Gilbert, Sibley, Savage and Irwin.

Four attempts have been made during the present week to effect an entrance into the premises adjoining those occupied by Mr. Broom on Dundas-street, the right and title to which has for several months given rise to much litigation between the liquidators of the Farmers' Loan Co. and Mr. Broom. The first attempt was made on Monday, when a gentleman in a brown coat began to pry up some boards. He was ordered off and later Mr. Wills, an agent of the company, with the other man, improvised a battering ram and made another attempt. To-day an inspector of the company came out and was refused admittance, and a little fuss ensued, which caused several exaggerated reports to be spread around town, one report even alleging that an ax was used to drive the inspector off. Mr. Broom denies this report, and intends to guard the premises against all comers. A curious feature of the dispute is that Mr. Broom, it is said, has no claim upon the premises adjoining those he occupies, and yet is able to keep out the accredited representatives of the owners. This, however, is no more strange than the alleged fact that he has lived in the adjoining premises, also owned by the Farmers' Loan Co., for many months, without paying any rent, and in all the legal entanglements with the company has come out the victor.

**North Toronto.**

The question of diverting a portion of the Forest Hill road will be taken up at a special meeting of York Township Council on April 12 next.

A Metropolitan car collided with a wagon driven by James Farley of Bathurst-street, at the corner of St. Clair-avenue yesterday morning, and, as a result, Miss Frances Wightman of Deer Park is under Dr. Foster's care. Miss Wightman was at the crossing when the collision occurred, and was struck to the ground by the wagon, which overturned on top of her. With the exception of an injury to the nose, it is not thought that her accident is otherwise serious. Eye-witnesses of the accident exonerate the motorman from any blame in the matter.

Messrs. Bert Petrie and Arthur Britton, two old North Toronto boys, are among the volunteers for Baden-Powell's South African Police.

The regular meeting of the town School Board was held last night at the Town Hall, Chairman Douglas presiding. The secretary presented a statement showing insurance of $16,600 carried on the school building. The chairman discovered that the sheds were not covered by the policies, and he suggested that they be at once included.

The purchase of three dozen single desks was left in the hands of the Management Committee.

The application of Rev. T. W. Powell to give religious instruction in the Eglinton school was considered. The Educational Act was looked up, and it was found that the board had no recourse but to grant the request. The chairman thought it was liable to open up the question of denominational teaching, and feared applications for similar privileges from the other town preachers.

The board set apart half an hour on Friday afternoons after the regular school hours.

The principal of the Eglinton School drew the attention of the board to children attending who were not in the school section, and the Town Clerk will be asked to confirm the facts before any action is taken.

The principal of the Davisville School asked the board to purchase books for indigent children, and the matter was referred to a committee.

Miss Balfour tendered her resignation as teacher at the Eglinton School, owing to ill-health, and the board will advertise to replace her services.

**Mr. Costigan Madigan.**

From The Catholic Standard.

Costigan: Don't say you ain't done nothin'.

Madigan: And why not?

Costigan: Because that isn't good English.

Madigan: Faith, I'm glad to hear it, for, by the powers, naither am I.

**DINEENS'**

## Parisian Always.

You are good Britishers in aims and thoughts, but when it comes to fashion you bow to France—to Paris. This is essentially so in regard to fur garments. Paris sets the style always—it influences the whole world, and we have looked directly to that city for our ideas, though we have purchased the skins from the hunter and made them into garments on our premises. These goods we are advertising are the latest and best, and our reason for selling at such prices is because we have made rather heavy purchases and wish to turn them into cash.

| | |
|---|---|
| New lot Grey Lamb Gauntlets, were $3.00 and $4.00, for | 2.75 |
| Persian Lamb Jackets, fashionable short length, 22 inches, plain or trimmed with mink, chinchilla or other furs, were $125, for | 75.00 |
| Grey Lamb Jackets, best fur, were $50 and $60, for | 35.00 |
| Alaska Sable and Persian Lamb Caperines, were $35, for | 25.00 |
| Moire Astrachan Jackets, pointed fox, sable trimmings, high-class brocaded satin lining, were $110, for | 80.00 |
| Moire Astrachan Jackets, Alaska sable and mink trimmings, were $100, for | 75.00 |
| Alaska Sable Ruffs, reduced in price, commencing at | 5.00 |
| Electric Seal Jackets, best fur, were $50, for | 35.00 |
| A few Alaska Seal Jackets, fashionable length of 21 and 22 inches, with double-breasted reefer fronts, splendid bargain, were $175, for | 125.00 |

Our stock of Royal Ermine Caperines, Muffs and Caperines of different fur combinations is high-class in every particular.

## CROW'S NEST COAL FOR U.S.

### Access to American Markets Favored by Board of Trade Transportation Committee.

### CHARTER SHOULD BE GRANTED

**For a Railway Running South From the Coal Fields to International Boundary.**

The Transportation Committee of the Toronto Board of Trade met yesterday afternoon and passed a resolution to the effect that the Dominion Parliament should grant an application for a charter for a railroad to run from the Crow's Nest Coal fields to the boundary of the United States.

Chairman J. F. Ellis and Messrs. Edward Gurney, J. D. Allan, H. N. Baird, C. W. Band, J. W. Wood, Peleg Howland, W. E. H. Massey and W. Ince, Jr., were present.

**The Resolution.**

The resolution, which was referred to this committee by the Council of the Board of Trade for consideration, was as follows:

The original resolution before the committee was that referred to it for its consideration by the council of the board, and which reads as follows:

"Whereas, an application is now pending before the Dominion Parliament for a railway charter running south from the Crow's Nest coal fields to the international boundary, with a view of obtaining railway communication between the Crow's Nest coal fields and the American railway systems.

"And, whereas, it appears from the report of the Geological Survey of Canada that there is an exhaustless supply of coal in the Crow's Nest district.

"And, whereas, coal and coke are both finished products, and labor being expended on them in the country, and every dollar that comes into the country in return for coal or coke exported makes the country just that much richer, and the farmer, the rancher, the miller, the merchant and the manufacturer all profit thereby.

"And whereas the Crow's Nest Coal Company, as appears by the statement of the president of the said company, is prepared, provided the said railway charter is granted, to greatly extend its operations in the said district, and to proceed with the development of the coal areas of the said district, involving an immense additional capital expenditure of over $800,000, and in the near future an annual wage bill of between two and three millions of dollars.

"And whereas such development will mean the establishment of new towns and the building up of large and important business enterprises in British Columbia, which will be greatly to the advantage of the people of Canada.

"And whereas the merchants, manufacturers and other dealers in supplies in Toronto, in common with those of other eastern cities, have greatly benefited by the present development in the Crow's Nest district, and would derive still larger benefits from an increased development in the future;

"And whereas we believe that the construction of the said railway would promote the development of our country, improve its material prosperity, increase the comfort and convenience of its citizens, and directly besnefit the merchants, manufacturers and dealers of Toronto, as well as other cities in Ontario;

"Be it therefore resolved, that we most respectfully and strongly urge upon the Parliament of Canada that the application for the said charter be granted, and that a copy of this resolution be forwarded to the Minister of Railways."

**Amendment Voted Down.**

Mr. C. W. Band introduced the following amendment, which was voted down:

"A resolution having been referred to this committee dealing with the application for a charter for a railway in the interests of the Crow's Nest Coal Company;

"And whereas the said application appears to be in the interests of one corporation;

"And whereas there is apparently a conflict of opinion about the advisability of opening up at this early date, and before there is given adequate time and opportunity for the development of industries in Canada, the section of country referred to by railway communication to United States territory;

"And whereas it appears that Canada possesses an inexhaustible supply of coal, suitable for coking purposes, absolutely necessary for smelting, and not found in any other place adjacent to the mining district in the west;

"And whereas it appears that the development of the coal mines and coking has not more than kept pace with the development of mining and smelting in British Columbia;

"And whereas there is every evidence to warrant the opinion that mining and smelting interests will increase rapidly in British Columbia, and, therefore, it is questionable policy to open up communication with a foreign country, where these interests are well established and competitive with our own, as it would tend to prevent rapid development in our own country;

"And whereas it has been charged that American interests have secured a direct controlling interest in the property of the Crow's Nest Coal Company, and that the balance of available lands in British Columbia are held out of the market under an agreement with the said company:

"And whereas more complete and full information will be forthcoming when the said application for charter will be brought before the Railway Committee.

"Resolved, that this committee refer the resolution back to the council, giving as their opinion that the present is not an opportune time to come to a decided conclusion in the matter until more fully informed as to the full effect which such legislation would have on the development of mining and smelting interests in our own country is better understood."

**Supported the Resolution.**

The committee was addressed by Mr. Elias Rogers, who by the aid of a map showed the committee where the road would be constructed.

Mr. G. M. Hyams, a gentleman who has large smelting interests in Montreal, and who, it is said, purposes the erection of a smelter in British Columbia, strongly urged that the railway be constructed.

With the exception of Mr. Band, the committee voted in favor of the resolution calling for the construction of the railway, and when the Council meets next Monday Mr. Band's amendment can be brought up.

## FOURTEEN FEET FOR THE CANALS.

Continued From Page 1.

which would give a good idea of the transportation. In January, 1898, the Toronto freight of the Grand Trunk was 103,754 tons and Montreal 58,091. In September, 1897, Toronto freight was 105,000 and Montreal 96,000 tons. He did not quote these figures to discourage Montreal, but to show the importance of equipping the harbor of Toronto.

Mr. Kemp also referred to the Conners scheme for Port Colborne and Mntreal. That scheme now having collapsed, he reminded the Government to rise equal to the occasion. In this connection, he impressed upon the House the necessity of building a Canadian marine in the Upper Lakes. Trade on the lakes is now carried on American bottoms, and the Government should propound some policy whereby a Canadian inland marine would be encouraged. Mr. Kemp assured the Government that the remarks which he had made were in no way suggested by party feeling. His only view was the prosperity of the country. [Applause.]

**Reply of Mr. Blair.**

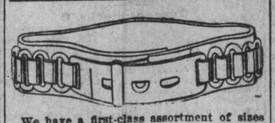
Hon. Mr. Blair, in reply, charged Mr. Kemp with the sin of partisan attack. He declared that the Government would have been laughed at in connection with the Drummond County deal if it had suggested a clause in the agreement with regard to the terminus. He replied at great length to what had been said by Mr. Kemp about the St. Lawrence waterway. He said steamers of 15½ feet draught had gone thru without encountering any difficulty, and read a large number of reports from the officers of his department. Much might be done to straighten and widen the channel, but he contended that there was 14 feet of water in it all the way. The Americans looked upon the St. Lawrence as a serious rival to their transportation routes. With the improvements in contemplation at Port Colborne properly carried out, and the port of Montreal and the river below looked after, the advantages of the St. Lawrence canals would be asserted. [Hear, hear.] The policy of the Government is, and has been, to stand by the St. Lawrence route. The railway proposals referred to by the mover of the resolution (Mr. Bennett) could not fill up the canals or tear down the locks. The Government would not hurt the canals if it took up 12 different railway schemes. The Government would go ahead with all despatch to finish the works at Port Colborne.

The Speaker left the chair at 6 o'clock.

**Armed Guard at Crossing.**

Ottawa, March 7.—Ten policemen, armed with revolvers and instructed to prevent any person from attempting to lay a level crossing over Wellington-street, have been placed on guard by the Mayor. The city has been fighting the attempt of the Canadian Pacific Railway to get permission to lay the crossing. To-day the Railway Committee of the Privy Council approved of the company's plan for the proposed crossing, and the company announces that the crossing will be laid as soon as gates are obtained to protect people from danger from the trains. The Mayor says he is prepared to swear in every citizen as a special constable to prevent the crossing from being laid. The company will go to the courts.

# Extra Values For Saturday's Selling.



We have a first-class assortment of sizes and patterns for your selection at right prices.

50 only Heavy Leather Dog Collars, tan color, brass mounted, 19 inches long by 1¼ inches wide, bought to sell for 35c. Saturday they go at 19c each.

### RUSSIA'S TROUBLES.

**Mohammedan Revolt Threatened in Siberian Steppes.**

London, March 8.—The Mohammedans in Mongolia are trying to foment an insurrection among the Mahommedans of the Siberian Steppes, says the Odessa correspondent of The Daily Express, "and the Russian Government has ordered at least two soldiers billeted in every family thruout Eastern Siberia, who shall act as menials and be ready to assemble at any moment to suppress a rising."

**Southwark Gets Loose.**

New York, March 7.—At 7.50 o'clock this evening the steamer Southwark, which ran aground yesterday, got clear and is moving slowly out.

**Had Said It.**

Erect, defiant, with flaming eyes, the proud young beauty stood at bay.

"I am of age," she said, "and capable of choosing my own associates!"

"But, Eunice," urged her mother, "have your father and I no rights? Are we not entitled to say who shall and who shall not come to our house on the familiar footing of a welcome guest?"

"You know, mamma," rejoined the girl, "your only objection to Cyrus Winterbottom is that he is poor!"

"That is only one of a hundred. He spends too much time at the club——"

"How can he, when he's here six evenings in the week?"

"He devotes too much time to golf, he never goes to church——"

"Neither do I."

"Because you have to take Sunday to rest. He spends $50 a year on his neckties——"

"That shows his good judgment."

"He smokes a great deal."

"If I can stand that you ought not to object."

"He is full of the small talk of society, he is too effeminate, he's altogether too sporty, he——"

"That's eight. Have I got to listen to the other 92 objections before luncheon?"

"Eunice," pleaded her mother, "you know you are only amusing yourself with him. Let him go. Tell him good-by!"

"Mamma, I have told him good-by."

"When—how, child?"

"A hundred times," said Eunice, faintly, "Over the telephone!"

And they continued to glare at each other.
