At Pearsall, Tex. H. L. Brooks runs a help-yourself hotel. The guests register without assistance, ordering from a blackboard the number of the room they select. When they leave they put the money to pay for their stay in an envelope and drop it in a locked box near the door. The hotel owner seldom appears, there is no cashier and servants give unobtrusive service. Mr. Brooks says that he has been cheated of only \$2 thus far.

New Brunswick Rocked by A Series of Earthquakes

Tremors Most Serious Felt in Province for Many Years.

HARTLAND HAD FIVE SHOCKS

First Shock at 10.20 on Saturday Night—Last At 3 a.m. Sunday.

Severe earth shocks—the most serious that have been experienced in many years—were felt in New Brunswick on Saturday night. While several tremors were reported to have been generally felt, no material damage appears to have been created in this province, although several fires said to be the direct result of the earthquake.

St. John Experiences.

St. John, N. B., March 1.—In St. John the very unusual phenomenon started the citizens at about 10.15, and announced its arrival in creaking and swaying houses, gyrations of furniture, rattling of crockery, waving of straws and the foliage of plants and everything that was strange and weird. No actual damage was reported from any section affected by the earthquake, but the amount of movement and disturbance in St. John was greater in those localities where there was marsh originally. The tremor lasted only about three minutes in St. John and only one shock was felt.

Buildings Rocked at Moncton.

Moncton, N. B., March 1.—Saturday night's earthquake was more severely felt in Moncton and vicinity than any quake within the memory of Moncton's oldest residents. The shock occurred at 10.20 and lasted a minute or more, rocking the larger buildings in a terrifying manner. Citizens who had retired were awakened from their sleep while in many instances people rushed terror-stricken from their homes into the streets to ascertain the cause of the disturbances.

The shock was more severely felt in some sections of the city than others, while in one or two of the central sections the tremors were not felt at all. In stores bottles rattled on the shelves and in many homes the dishes rattled and light chandeliers and pictures swayed to an alarming degree.

Five Shocks Felt.

Hartland, March 1.—Five distinct shocks were felt at Hartland. The earthquake, which affected most of North America, had its heaviest and most severe in this locality. Old residents claim this to be the worst experienced in recent years. Five distinct shocks were felt, the first at 8.20 p. m. and the last at 3.20 a. m. These figures are unofficial, but there appears to be sufficient evidence to substantiate the statement that five tremors were felt, the ones at 1.20 p. m. and 2.20 p. m. being the worst.

The 10.20 one was the most generally felt and knocked chairs over, upset bottles in stores, caused several chimney tops to fall and scared a large percentage of the populace.

The shocks through the night were not intense with the exception of the one at 3.20, which woke many people and caused quite a few dishes, which had become loosened by the earlier quakes, to fall with considerable clatter. The sensation as noted over the radio was a terrific rumbling interruption with squeals of violent static.

Woodstock Alarmed.

Woodstock, March 1.—A very distinct earthquake shock was felt here last night at 10.20. The tremor of the earth lasted longer than any previous shock experienced in many years.

It was severely felt by those occupying upstairs flats. Stores and dishes took a prominent part in the clamor that caused many people serious alarm.

Buildings Shaken at St. Stephen.

St. Stephen, March 1.—This community was visited last night by an earthquake shock. Residences and stores were shaken so that hangings fell from walls and shelves.

Bathurst Has Two Shocks.

Bathurst, March 1.—Two distinct earth tremors were felt here during the night. The first shock occurred at 10.20 and was violent enough to shake buildings. The second quake was noticeable between 3 and 4 o'clock this morning.

Felt Three Shocks at Edmundston.

Edmundston, N. B., March 1.—A very severe earth shock was felt here about 10.20 last night, lasting about three minutes. People at the shows in theatres rushed out doors. Five other shocks were felt during the night, one at about 3 o'clock, quite severe, but lasting only a minute.

Shock Very Severe at Florenceville.

Florenceville, N. B., March 1.—An earthquake shock was distinctly felt here last night at 10.23, lasting almost two minutes. A great roaring noise was the first indication, followed by a shock so severe doors blew open, keys fell from locks and dishes rattled. No property damage is reported in this vicinity.

Shock Breaks Windows at Dalhousie.

Dalhousie, March 1.—Two distinct earth shocks were felt here last night and this morning, one about 10.20 o'clock and the other early this morning. In the first tremor several panes of glass were broken.

Quake Shook Earth From St. Lawrence to Mississippi

New York, March 1.—Old Mather Earth shook herself just a trifle last night, sending a vigorous little earthquake peil meil throughout the north-eastern part of the United States and Canada.

The tremors were noticeable for about two minutes at 9.23 o'clock and they shook territories from northeastern New England to the Mississippi and from Ontario as far south as Wheeling, W. Va., Richmond and Louisville.

In the great centres of population—New York, Chicago, Montreal, Toronto, Philadelphia, Washington, Pittsburg, Cleveland, Boston, Detroit and others—the quake was severe enough to alarm millions of people.

Look for Origin.

New York, March 1.—Scientists in many cities and in several lands tonight were endeavoring to find the point of origin of the earthquake.

Seismic experts in the area affected found their data rather difficult to interpret, but their preliminary observations tended to indicate that the disturbance centred in the region of the Great Lakes, perhaps near the mouth of the Saguenay River, in Quebec.

Fatality at Three Rivers.

Three Rivers, Que., March 1.—The earthquake which shook the country around here Saturday night caused one fatality, the victim being Mrs. Eugene Bureau, of Ste. Anne De Laprade, about 25 miles from here.

In Nova Scotia.

Halifax, March 1.—The severest earthquake ever recorded on the seismograph at Dalhousie University occurred last night, according to Professor H. L. Bronson, who had charge of the observatory at the time. The first tremor was noticed at 10.20 and reached its maximum two minutes later, indicating Dr. Bronson said, that the centre of disturbance was about 1,300 miles away. In addition to being the most severe in the history of the observatory, it was the closest to Nova Scotia that had ever been recorded by the instruments.

No damage has been reported from any part of the province but the tremor was noticed throughout Nova Scotia by the rattling of dishes, trembling of houses, and the disturbance of the ground. The shock lasted 25 minutes and its course was marked on the seismograph by Dr. Bronson, who happened to be in the observatory at the time.

Upsets Furniture and Dishes.

Toronto, March 1.—Very pronounced earth tremors were felt in Toronto last night about 9.22. The quake appears to have been general over the north-eastern portion of the continent and as far as the officials of the meteorological department are concerned, the centre of the disturbance was in southern Pennsylvania.

The tremors knocked over furniture and dishes.

Most Severe Ever.

Ottawa, March 1.—Four times more severe than any previously recorded here, was the official report of the earthquake from the Dominion Observatory. At 9.21 p. m. the preliminary tremors arrived, said the official report, and the vibration continued to be recorded until midnight, although in the houses and public places it was felt for only a few minutes.

The earth variations were one-quarter of an inch. The distance from the epicentre was 540 kilometres or 335 miles, and the origin was placed somewhere at the mouth of the Saguenay River.

Train Robbers Rob Passengers

Line Them Up and Strip Them of Their Cash and Jewels.

Gary, Ind., Feb. 28.—Through the underworld denizens of the bad lands that connect Gary with Chicago, and Indiana with Illinois, the authorities today searched for two train bandits who last evening held up a Chicago-bound New York Central train and escaped with cash and jewelry valued at \$13,000.

The bandits, according to railroad officials, boarded the train at Toledo, Ohio.

Just as the train was leaving Chester, Ind., 14 miles from Gary, they opened a satchel, drew out a revolver and a sawed-off shotgun and began their operations.

A University of Toronto debating team will for the first time cross the border to engage in an international contest when Varsity debates with Pittsburg University in Pittsburg on Saturday, February 22th.

The team will be (from the top): P. J. Martin, of St. Michael's College; Cyril Phillip, of Victoria College; and Morley Callaghan, of St. Michael's College.

Just as the train was leaving Chester, Ind., 14 miles from Gary, they opened a satchel, drew out a revolver and a sawed-off shotgun and began their operations.

Succeeds Trotsky

MICHAEL VASILIEVITCH FRUNZE, Who has succeeded Trotsky as the head of the Russian red-armies.

GRAND FALLS HOUSE DESTROYED BY FIRE

Beautiful Home of J. L. White, ex-M. L. A., Burned Following Quake.

Grand Falls, N. B., March 1.—Grand Falls was visited last evening and early this morning by a succession of earthquake shocks. The first and most severe occurred at a few minutes after 10 o'clock. The shock was by all odds the heaviest ever felt in this locality.
