THE MARKETS

CANADIAN PACIFIC'S CROP REPORT

Winnipeg, Sept. 13—The Canadian Pacific Railway company crop report for the week ending Friday, Sept. 13, says:

"In Manitoba 80 to 95 per cent. of the wheat is cut and in some portions in the south it is completed. Threshing is general in most districts in the southern part. The weather during the past week was unfavorable but as many of the wet days was followed by bright sun and wind, recovery was quick and delay and damage was not great.

"In Saskatchewan 65 to 75 per cent. of the wheat is in stook and as high as 90 per cent. in some districts on the Moose Mountain, Portal and Forward districts.

"In Southern Alberta from 85 to 90 per cent. of the wheat is cut and in the north from 35 to 50 per cent. Winter wheat cutting was completed last week. The quality of the crop is generally better than last year.

"Oats are up to the average. Barley, though late, is a good crop and flax is much better than usual. There will be very little sign of 'flax wilt' this season."

CROP NEWS

Light Rains in Saskatoon

Saskatoon, Sept. 13—Light drizzling rain falling here this morning, but harvest has progressed too far for much anxiety to be felt should there be a recurrence of the very wet weather of last week. Except for a small patch here and there wheat is all cut.

Threshing at Portage la Prairie

Portage la Prairie, Man., Sept. 13—Threshing which had been progressing rapidly since Monday last was again stopped by heavy rains which set in at midnight and still continues. Wheat is turning out high grade and yielding from 23 to 30 bushels per acre.

Rain at Regina

Regina, Sept. 13—A thunderstorm passed over Regina last night and this morning a drizzling rain set in. This will stop all work in the harvest fields but nearly all the wheat is down. Threshing was to have commenced today in this district. It will start as soon as the weather clears.

Heavy Rain at Brandon

Brandon, Sept. 13—Harvesting operations are entirely suspended for at least a few days by a heavy downpour which lasted for the past 8 or 9 hours. In many parts of the Brandon district it was intended to start threshing but today's rain will prevent this taking place for almost a week anyway. Had rain held off cutting would have been completed round here this week. As it is with so much grain in stook farmers are nervous lest weather fails which would assuredly start grain growing in stook.

Rain in North Dakota

Chicago, Sept. 13—Rain stopping threshers in North Dakota and interfering with the Canadian harvest led to an additional upturn. There were export sales here. The market closed unsettled 7-8c net higher at 91 1-4 for December.

Heavy Rains in Manitoba

Winnipeg, Sept. 13—Threshing and harvesting are at a standstill today all over Manitoba and most of Saskatchewan where rain has fallen in varying degree during the night. It has been generally fine in Alberta. Four fine days, however, have seen a tremendous amount of work accomplished in the fields. Very unusual conditons would be necessary to do much damage now on the spring wheat crop, which is turning out so high in grade.

Prospects are for frost this week end in all three prairie provinces but it can do little damage except to late flax and oats.

In the Edmonton District

Edmonton, Sept. 13.—F. T. Fisher, of the board of trade, and August Wolf, secretary of the Citizens' league, spent yesterday in and around the country about Edmonton looking over harvest conditions.

"As far as I could see," said Mr. Fisher, "and I inspected a great number of fields, the grain has not suffered a particle; it is in splnedid condition, and the crop is exceedingly heavy.

"Th eonly complaint I did hear—and I heard it repeatedly—was that the binders choked up on account of the weight of the grain.

May	94⅞	95½	95⅛	95½

Winnipeg, Sept. 13.—On the wheat market today trading was active and prices booming on the unfavorable weather here and in Russia, and heavy buying by the export trade. Features opened 5-8 to 7-8c higher, following which there was further advances on all months, closing 1-8 to 1-4c higher for October and December, and 1c up for May. Americans opened unchanged to 3-4 higher, continuing strong the entire session.

Minneapolis closed 1 1-8 to 1 3-8 higher, and Chicago 7-8 to 1 1-4 higher.

Liverpool cables were 1-2 lower at opening, and closed 1-2 to 5-8 higher.

The cash demand at Winnipeg was good for all grades, with a few offerings and export inquiry active.

Oats for both months were firmer, advancing 1-2 to 5-8, while flax bids were also 1 3-4 higher.

There were ninety cars in sight today.

NEW YORK STOCKS

New York, Sept. 13.—The only appreciable difference between today's stock market and the earlier sessions during the week lay in the greater dullness. Trading in the first three hours ran under 300,000 shares, and the total output was the smallest in over a fortnight.

The money situation was less obtrusive as a factor, fall loans touching their highest figure at 5 per cent., as against 5 1-2 per cent. yesterday and the day before. As a matter of fact, the bulk of today's loans were made under 5 per cent. There was some further calling of loans, however, a result of the week's statement of outflow estimated between $7,000,000 and $9,000,000.

There were many rumors of pending gold imports, based largely on private cables from London and the workings of foreign exchange. But so far as was ascertained dealings were still in the tentative stage. For the greater part of the day the movement of stocks was in keeping with the unusual dullness. In the last hour, however, the list moved upward to a level well above yesterday's level. Among the few features of decided strength were L. and N. and Southern railway preferred. The rise in the latter stock came shortly before the announcement that the directors had restored the dividend to the 5 per cent. rate, which prevailed for the five years preceding the panic of 1907.

Other issues that rose a point or more included Seaboard Air Line, St. Louis Southwestern, Consolidated Gas, General Electric, and some of the tobacco group.

London was a purchaser here of about 15,000 shares, chiefly steel and Amalgamated Copper. Greater firmness was reported from Paris and Berlin.

Bonds were irregular, but tending lower. Total sales, par value, $1,025,000. United States 3's and 4's advanced 1-4 per cent. on call.

Chicago Wheat

Chicago, Sept. 13.—Revival of export demand today helped to bring about a lively advance in wheat. The market closed unsettled 7-8 to 1 1-4 over last night. Latest trading left corn varying from 1-4 off to a like amount over oats with a gain of 1-4 to 1-2 to 5-8.

Wheat prices were higher at the start. The fact that foreign demand is still prevalent with power to withstand exceptionally high ocean freight rates gave a decided impetus to the prices. Bullish cables furnished the cue to the traders and nullified fears of heavy world shipments. German crop advices seemed in parcprospect of a sort to alarm shorts, and there were disturbing reports of diminishing stocks in Argentina. Rains northwest which stopped threshing added to the difficulty of the bears, and milling demand was good.

Much of the business in the wheat pit came from buyers who yesterday were urgent sellers. No attention was paid to signs of a coming increase in the United States visible supply. December fluctuated between 90 1-2 to 91 1-2, with last sales 91 1-4, an advance of 7-8c compared with 24 hours before.

Falling off in receipts, a hint that prices were not satisfactory to the farmer, had a tendency to lift oats. Upper and lower levels reached by December were 32 3-8 to 1-2 and 32 1-8 to 1-4. The close, 32 3-8, showed a gain of 1-4c.

Montreal Produce

Montreal, Sept. 13.—Butter, active, strong and higher. Sales for western month and coast this week 20 cars. Eggs active at an advance of 1c. Cheese, finest easterns 13 1-8 to 13 1-4. Butter, choicest creamery 27 1-8 to 27 3-8, seconds 26 1-4 to 26 1-2.

Eggs, selected 29 to 30, 2 stock 21 to 22.

Pork, heavy Canada short mess barrels 35 to 45, pieces 27. Canada short cut back barrels 45 to 55, pieces 27.

Chicago Cattle

Chicago, Sept. 13.—Cattle—Receipts, 2,000; market dull and weak; beeves, $5.75 to $10.80; Texas steers, $4.75 to $6.40; western steers, $5.55 to $9.30; stockers and feeders, $4.25 to $7; cows and heifers, $3 to $8; calves, $8.50 to $11.50.

Hogs—Receipts, 11,000; market active, 5c advance. Light, 8.35 to $9; mixed, $8.10 to $9; heavy, $7.90 to $8.85; rough, $7.90 to $8.15; pigs, $5.25 to $8.20; bulk sales, $8.35 to $8.85.

Sheep—Receipts, 10,000; market steady to strong; natives, $3.50 to $4.65; western, $3.60 to $4.65; yearlings, $4.70 to $5.85; lambs, native $4.85 to $7.75, western $5 to $7.75.

London Money

London, Sept. 13.—Money was dearer today. Discount rates were firmer, and New York cable transfers were watched with interest owing to the fears of gold exports, but no inquiry for the metal has been traced to that quarter. The general settlement was concluded on the Stock Exchange.

One small failure was reported. The market was generally steady and speculation broadened. Peruvian shares and Metropolitan rails were features, but Kaffirs and Rubber and Marconi stocks were in good demand, and consols hardened in the afternoon. American securities opened steady. Trading was light during the forenoon, but prices advanced a fraction on light covering. The list moved irregular in the late trading, and the market closed dull.

WHAT THOUSANDS ARE DISCOVERING

Strangers arrive daily in town and they look to this paper for news and opportunity and all are saying that there's no medium to compare with

THE WANT AD. SERVICE

Toronto Stocks

Toronto, Sept. 13.—Stocks here today were quiet. Speculation continues at a standstill, owing to large part to the common talk of money stringency.

The precautions that are being taken by money lenders to avert tight money may possibly result in disappointment to many capitalists. It will not be surprising if a period of great stringency failed to come. Our banks have much greater resources at home than at any former period, while their reserves in London and New York can be drawn on to the extent of many millions. When the crops begin to move eastward, they will go pretty rapidly, and the banks will then begin to recoup themselves. Canadian banks have now so many branches in the west, and the check is so liberally used in payment, that there is really no great danger of banknote circulation becoming overdone.

The investment demand continues fairly good for choice securities, but no important advances are noted. Canadian Pacific railway was stronger at 274 bid, but no sales were made here. It was, however, fairly active and strong in New York. Packers common made a new high mark at 123. Canners preferred in better request and firmer at 102 1-2. The most active issue was Dominion iron, which sold to the extent of 325 shares at 65 1-8 to 65 1-2.

Rio was weaker at 147 5-8 for twenty-five shares, and Sao Paulo receipts offered 257 without bids. The new Brazilian stocks hold 93 to 93 1-4. Richelieus higher, selling 115 1-2 for four shares, but closing at 116 5-8 bid. Twin City steady at 108 1-2 and 108, and Winnipeg 1-2 higher at 228 1-2. Bank shares quiet and irregular. Total business was 1,474 shares, $2,500 bonds and 230 shares mining stocks.

Montreal Stocks

Montreal, Sept. 13.—Richelieu continued on its upward march in the after lunch session of the exchange.

Opening at the morning's close price of 116, it advanced rapidly to 117, but eased off a fraction to 116 7-8.

The buying demand for the stock was strong enough to keep it steady around the high level of the day, over 1,100 shares being dealt with.

There is considerable talk on the street that there is a heavy short interest in Richelieu, the existence of this dating back to Tuesday, September 3rd, when R. and O. had a bad break and a number of the traders went short on its way up to its recovery around the 114 mark.

Laurentide was firm at 208 to 1-4 above the morning's close, but there was little trading in the issue.

Dominion steel was strong on limited buying in them, selling at 65 3-8 to 1-4 above the last sale of the forenoon.

Cement preferred was fairly active, ruling strong at 93 1-4 to 94. The announcement that the provincial government had given contracts for the building of a portion of the King Edward highway of concrete was a bull argument in its favor.

C. P. R. was strong at 274 3-8, Shawinigan at 149, Detroit 73, and Tramway 126.

New York Stocks

New York, Sept. 13.—Copper quiet. Standard spot, September and October 17.25 to 17.45, November 17.25 to 17.50. Electrolytic 17 1-2 to 3-4, Lake 17 5-8 to 3-4, castings 17 1-8 to 1-4.

London copper firm, spot 78 pounds 6s. 3d., future 79 pounds 3s. 9d.

Tin quiet, spot 49.12 12 to 49.25, spot 49.05 to 49.25, October 48.90 to 49.25. London tin firm, spot 224 pounds 10s., futures 222 pounds.

Lead firm, 500 to 525. London lead 22 pounds 10s. Spelter quiet.

AN EVER-PRESENT PROBLEM OF THE MANUFACTURER

is to get in touch with better workmen, more skilled operatives. The Want Ads solve that problem.

HAVE YOU ADVERTISED?

BAILIFF'S SALE

I have seized under lien note the following goods and chattels:

One 20-foot Canada Machine Co. pony plain and countershafts; one 30-foot Napa Harper band saw, with 3-8 to 1-2 saw blade; 7-foot 5-inch 3-inch single belt, 7.22; one barrel emery and shaft with stone; 2-16 saws; one wood turning lathe complete, which I will sell on the premises, 2012 10th Avenue West, on Monday, Sept. 16th, at 10 o'clock in the forenoon.

F. X. STAHLE, Bailiff.

Nearly All of the Sales

made to those who use a machine for the first time, are made in competition with adding devices of various kinds.

Where they know the Burroughs from experience, either with it or the other devices, we get the business in 90 per cent. of cases.

We sell Burroughs Machines from $150 to $940—on little payments, too.

DUN SAYS RAIN HAS NOT AFFECTED CROPS

Big Crop is Assured and Business in All Lines is Excellent

Situation Very Encouraging in Winnipeg; Good Demand for Merchandise

New York, Sept. 13.—Dispatches to Dun's review from branch offices of R. G. Dun and company, say that while there has been too much rain in some sections, conditions have now improved, and there is a marked revival in general activity.

At Montreal there is a satisfactory distribution of staples, especially in groceries and drygoods, while leather is in good demand, and dealers in footwear report liberal sales. Hardware metals and building materials are moving freely, and manufacturers in nearly all lines are busy. Both wholesale and retail trade at Quebec are in well maintained volume and excellent demand being noted for all kinds of the fall goods. With increased assurances of large crops Toronto reports that general conditions reflect notable confidence in the future, many orders being received for merchandise for fall and winter requirements. Dry goods are being bought with increased liberality, clothing and footwear are in brisk request, and there is more than normal call for most other staple lines.

Hamilton reports that wholesale trade shows a slight improvement, and that retail sales have increased with the reports of more favorable weather. Merchants at London report a fairly well sustained demand for most kinds of staple merchandise, and regard prospects as quite encouraging.

In the far west and northwest harvesting is progressing favorably, added generally by improved weather conditions, which stimulate activity in most mercantile lines.

At Winnipeg the situation is very encouraging, and there is a good demand for all kinds of merchandise, country merchants especially stocking up freely in staple dry goods and clothing

Saskatoon reports that harvesting is retarded by heavy rains, but the outlook remains promising, and the lumber trade is the best in years.

Marked activity is noted in the shoe and leather trade at Regina, and favorable weather improves the general situation. Excellent harvesting weather in the vicinity of Edmonton stimulates confidence, and the volume of trade is reported at Calgary with prospects exceedingly satisfactory.

Vancouver reports a brisk demand for seasonable merchandise, with general expectations of large fall and winter trade

Gross earnings of all Canadian railroads reporting to date for the month of August show an increase of 16.4 per cent., as compared with the earnings of the same roads the same month a year ago.

Commercial failures in the Dominion of Canada this week number 31, as against 21 last week, and 19 the same week a year ago.

WEARING APPAREL IS NOW MADE FROM WOOD

Supposed Shimmering Silks Nothing More Than Fibre From Which Paper is Made

Science Has Reduced Pulp to Material That Wears and Washes Like Cotton

If you see a lovely lady going down the theatre aisle this winter clad in shimmering silks and dragging an opera cloak of fancy velvet behind her, you would be very much surprised, wouldn't you, if some one told you she was incased in wood or was wearing the same material as that from which paper is made?

But it's a fact!

Just as Mother Eve went to the tree for her first fall gown, her daughters may go there for their taller-made and ball dresses.

Wood-pulp fibre is the commodity employed, and this fall will see the first wide exploitation of the materials in which it has been used. The manufacturers have been experimenting with it for the last year in this country, although it has been used abroad for some time, and declare that they have at last overcome all the drawbacks to its use.

Plant in Pennsylvania.

It was only a year ago that the first extensive plant for the manufacture of the wood pulp fibre was established in Pennsylvania. The company has great faith in its ultimate success, for a large factory was put up to give work to 1,000 hands. It began operations with 100 operatives, but in the short time since it began it is now running to its full capacity, and the 4,000 pounds of yarn a week has been increased to 23,000 pounds a week.

The company has already made plans to expend a million dollars for new factory buildings, new machinery, and 300 dwellings for operatives on the factory site. Yet the output of this plant is only a small part of the artificial fibre consumed by the manufacturers of the different commodities in which it is used. No other infant industry in the United States has had such remarkable and as rapid growth. There are now a half dozen firms manufacturing it.

You see, it all comes from the fact that everybody wants to wear silk. The day was when a woman got a black silk dress and wore it for years, and only people of means possessed this one silk dress. But go down to Coney or the Broadwalk at Atlantic City any Sunday afternoon and almost every other woman who comes along is wearing a silk dress of some sort—foulard, taffeta, silk striped muslin, charmeuse, crepe de chine or mull.

In Reach of All.

The girl whose pay envelope holds $5 or $10 a week wears silk stockings. They are pseudo-silk, at any rate—cotton soles, then silk as far up as modesty requires, and thence cotton again. You see silk shirtwaists in the windows at $1.50 and knitted silk ties for men at 25 cents.

Never has there been such a demand for silk and never has it been so cheap. That is apparently the truth. You can go to the cheaper stores and buy "Silks" on "bargain days" for as low as 39 cents a yard. The goods look like silk, but, as everybody guesses, there's not a great deal of silk in it.

With this enormous demand for silk the silkworms have not hustled a bit in turning out their supply of silk, no matter if the owners sit up all night watching the mulberry trees and trying to tempt them with scientific feeding. So, with all the girls crying, "Give us cheap silk for our dresses and waists," and the women insisting upon "silk linings throughout," and the young men demanding silk shirts, and the prosperous, tired business man wanting it for his underwear, the manufacturers have had to do some scheming. It must be admitted they have seemed to have achieved the impossible.

No Absolutely Pure Silk.

Of course, the solution was adulteration. Here they have performed wonders. One dealer says: "There is no such thing as absolutely pure silk, and every manufacturer knows it is a physical impossibility to dye black silks without adding some weight to the fabric." Another declares: "It is impossible to detect the real quality of silk in a garment, the only way to acquire this knowledge being to submit it to a chemical analysis, and this of course is impracticable. Women buy from style and color without a knowledge of the quality. I can place two pieces of silk on the counter, one at $1.50 a yard and the other at $1, and they cannot tell the difference in qualities."

So then the manufacturers turned out some substitute for silk—something that would look like silk, glisten like silk, feel like silk, and yet not be silk at all. The trouble with the wood pulp fibre was that when it was wet it turned back to a pulp and parted readily under tension. So a lot of experimenting was done, and this difficulty was overcome, so that now the artificial silk is introduced into wash cottons as silk stripes or figures, and washes very well.

IMPERIAL BANK OF CANADA

Capital Paid up $6,460,000.00
Reserve Fund $6,460,000.00
Head Office—TORONTO.

REPORT OF COAL EXAMINER IS UNFAVORABLE

The city of Calgary is not apt to launch into the coal mining business in the near future at least, if it acts on a report submitted by Mining Engineer Coulthard, now in the hands of the industries committee of the city council.

With reference to available unfiled on coal areas, Mr. Coulthard says:

"It has been shown that the locations from which the seams can be attacked advantageously are held by other parties, and, if any such remain apart from those areas visited, they must be in remote parts where the coal will remain untouched for many years."

Nine properties were visited by Mr. Coulthard, most of which were undesirable lignite, some bituminous and a few semi-anthracite. Of the latter, Mr. Coulthard recommends the Canmore and Kanaskis areas. Of the Canmore field, he says:

"The strata in the Canmore field has, when exposed by mines, been found to be considerably folded and faulty."

He recommends the study of "surface conditions" on this field, placing the cost of such study at from $1,500 to $1,800. While the Kanaskis field was found good, he estimated that the cost of a railway to get it out would be from $25,000 to $30,000 a mile.

New Instruction for Queen's

Kingston, Ont., Sept. 13.—Queen's Theological College board of management last evening appointed Rev. Wm. Morgan, D.D., Tarbolton, Scotland, to the chair of systematic theology and apologetics. He is one of the ablest of the younger Scottish theologians.
