HAMILTON HAPPENINGS

SAID PROPOSED SHELTER WAS NOAH'S ARK BUILDING

Hamilton Council Meeting Was Not Pink Tea Affair — Power Report Stands Over.

HAMILTON, June 12.—(Special.)—Contrary to general expectations, the Sifton report on the proposed municipal power ond lighting plant provoked no discussion at the regular meeting of the council to-night. he report was formally submitted to the council in the board of control's report, and was adopted without discussion. This leaves the board free to introduce a bylaw, to be submitted to the people, asking their authority to proceed with the installation of the plant as outlined in the Sifton report. The bylaw will be put before the council at the next regular meeting and the members of the council will then probably express their views in the matter.

Despite the absence of any verbal pyrotechnics over the power and light question to-night's meeting was not a pink tea affair exactly. The board of control's recommendation that a children's shelter be established and placed under the management of Children's Aid Society was the first subject to disturb the equinanimity of the council. The recommendation included the proposition of having the society look after juvenile delinquints, and proposed to submit a bylaw to raise whatever is required above the $1500 already provided to establish the institution. Controller Bailey contended that the society would not look after the delinquents, and moved that the clause dealing with the matter be referred back to the board of control for further consideration. He said that as a shelter was what the people had voted for, it should be established. Controller Cooper said it was proposed to establish the shelter in a house built about the time of Noah's ark, and wanted a new building. Controller Bailey's amendment was lost, the board of control's recommendation was adopted, and efforts will now be made to get the Children's Aid Society to agree to take the juvenile delinquents as wel als neglected children.

Recommendation Adopted.

Ald. Campbell objected to paying $20,000 for six houses for hospital purposes, when the assessed value was only $9800. Controller Cooper admitted that the price was a little high, but said they were needed, and that they were worth more than the assessment. The controller's recommendation for a bylaw to purchase the houses was adopted.

Miss Jeannette Lewis' offer to present the city with a full equipped children's hospital finally obtained acceptance to-night, but not without opposition.

Ald. Forth wanted to know what guarantee the city would have of the hospital being properly equipped, and said that the proposed site was better for a slaughter house than a hospital. Controller Bailey objected to more buildings on the hospital grounds, and Ald. Horning raised the same objection. Controller Gardner thought the opponents of Miss Lewis' hospital acted as if she was trying to hand the city a gold brick, and deplored the knocking. Ald. Lalonde opined that no alderman who opposed the hospital would refuse a free house, and Ald. Lovejoy thought that as Miss Lewis owned the land on which the institution is to be built, she should not be interfered with. Controller Cooper pointed out that the hospital must meet the approval of the board of governors, and the clause was adopted.

The council overruled the recent decision of the board of control to withhold sewer contracts from S. Cheseman, and referred some tenders back, with the understanding that the contractor would be given the work.

ASSEMBLY DENOUNCES MENACE OF MORMONISM

Continued From Page 1.

that the civil government is pleased to authorize marriage according to the rites and ceremonies of the various religious denominations, and to maintain the validity of the same in law.

Clash With Civil Law.

"That we deeply regret that any denomination should presume to reflect upon, to morally or materially damage any person that may be united in marriage according to the provisions of the civil law, whether with or without the sanction of any particular religious denomination.

"And because the peace and training of our Canadian life has been greatly disturbed and the civil rights of the people greatly interfered with by the publication and attempted enforcement in Canada of the Ne Temere decree by the Church of Rome, we, therefore, in the common bonds of fraternity, so long and happily secured to us in our beloved land, record our respectful protest against the enforcement of that decree in Canada, and call upon all good citizens to resist the same, and our legislatures to render it impossible by law."

WOMAN SUFFRAGE MEET

Opens in Stockholm, With a Thousand Delegates Present.

STOCKHOLM, June 12.—The sixth congress of the International Woman Suffrage Alliance was held here to-day, there being present a thousand delegates from Europe, the United States, Australia and South Africa. The address of welcome was made by Mrs. Anna Whitlock of Sweden, after which Mrs. Carrie Chapman Catt was re-elected president of the alliance. Riksdag Deputy Beckman spoke warmly in favor of the suffrage for women, and then Mrs. Catt delivered a long and eloquent address on the history of the movement. Mrs. Frederick Nathan of New York proposed the formation of an association of Swedish men to work for woman suffrage.

The congress will sit until Saturday.

TENTS COLLAPSED IN FIERCE WIND AT NIAGARA

Frequency of Rain Makes Soldiering No Pleasant Occupation—A Quiet Camp.

NIAGARA-ON-THE-LAKE, June 12.—(Special.)—To the soldiers encamped here, it appears that a mistake was made in placing it on the map. It belongs somewhere down in the tropics, where it is reasonable to expect a rainstorm every day between the hours of 11 and 1. Almost daily since camp started, the mid-day meal has been eaten to the accompaniment of the sharp staccato of the rain drops on the tightly-drawn canvas of the mess tent.

To-day, as the mess call sounded, the sky blackened with all the intensity of a tropic sky in a typhoon, and as the men rushed from their lines to the mess tent a solid sheet of rain descended upon them. A great gust of wind came, and the men's mess tent of the 20th Halton Rifles shook. Then with a mighty heave the pegs pulled loose and the great sheet of canvas bellied up and fell on the ground, burying the tables in an envelope of canvas and broken poles. Hardly had the 20th tent given way when a roar was heard alongside, and the 34th tent lay spread on the ground. The men had quite a time with the mid-day meal, most of them getting a bit from the kitchen and rushing back thru the pelting rain to their tents to eat.

"No wonder the farmers here grow good fruit," declared one old soldier who had striven with a dry soil and the balky elements in an Ontario County farming community. "Jupiter Pluvius seems to have marked this part of the country for his own."

With all the wet weather, however, and the tropical heat when it is not raining, there is very little grumbling except from the professional grouchers. The men have lost the awkwardness they brought to camp, and with the steadiness acquired they have also discovered a new ability to "grin and bear it," and it takes a whole lot of it in a military camp.

Y. M. C. A. Work Appreciated.

The work of the Y.M.C.A. in the camp is meeting with widespread approval. Thru forty camps the boys have provided games and amusements, and have done everything possible to keep the men in camp, and now on their fortieth anniversary the camp has taken to the Y.M.C.A. as never before. Every evening from 400 to 700 soldiers congregate about the "Y" tent to watch the ball games and athletic events, and a large proportion of them go into the after meeting. Viewing this in the light of a camp without a canteen, the full extent of the work can be realized.

"In all my many years of service," stated Brigadier - General Cotton, speaking to one of the Y.M.C.A. officials, "this is the quietest camp I have known. It is mostly due to the Y.M.C.A. work, the athletics and games keeping the men from going downtown, and most of those who stay either go to the after meeting or to bed. It has accomplished great results this year."

Tactical and strategical work is occupying the most of the time this week.

Nos. 7 F. A. and 15 F. A. of the A.M.C. were to march towards St. Catharines to work out a tactical scheme, but owing to the wet weather and the condition of the roads the march was called off.

Varied Daily Grind.

The cavalry brigade, consisting of the 24th Grey's Horse and 25th Brant Dragoons, left early this morning in the direction of Virgil. The heavy thunderstorm interfered greatly with their manoeuvres. Col. Lessard rode out with the cavalry to inspect the brigade. The 12th York Rangers paraded early this morning and marched to the new butts, where the right half shot for their efficiency pay. The left half, under command of Major Nicholls, deployed in skirmishing order, and practised various tactical schemes. In the afternoon the right half returned to camp and the left half shot.

The 20th and 34th Regiments engaged in company drill and skirmishing until the rain interrupted the manoeuvres.

General Cotton is working out a scheme of attack, and proposes to hold a "tactical day," probably on Wednesday. The general purport of the plans has not yet been made public.

Grass is Luxuriant.

The camp is not without its humorous incidents. The long grass on the parade grounds and in the tents sometimes causes a little discomfort. Many of the officers and men have made remarks about it, but one best probably comes from Major Muir of the 25th Brant Dragoons. The grass in the major's ante-room is very long; in fact, in some places it looks like a hay field. One day he called his orderly to him.

"Yes, sir," and the orderly's hand went up in salute.

"Bring up my horse, orderly, and turn him into the ante-room to crop the grass," and he acknowledged the orderly's salute and went into his tent.

CONGREGATIONAL UNION.

KINGSTON, June 12.—(Special.)—The Congregational Union closed its sessions to-night. An invitation received from Zion Church, Montreal, for the next meeting place, was accepted.

Rev. H. I. Horsey of Ottawa, who spoke on the ministry and social and moral reform, expressed great regret that parliament had re-sanctioned professional gambling on racetracks, and that the law did not prohibit the sending and reporting of racing information.

Received No Offer.

KINGSTON, June 12.—(Special.)—An article in The Ottawa Free Press states that a Mr. Simpson had offered to purchase the interest of Hon. William Harty in the Chats Falls. Mr. Harty stated to-day this was news to him; that if offer was ever made it never reached him.

An Absolute Remedy for Corns

Is Putnam's Painless Corn Extractor; safe, sure, always painless. A hundred substitutes prove the supremacy of Putnam's Painless Corn Extractor. The name tells its story. It is painless, it extracts corns, and it does it quickly. Sold by druggists, price 25c.

York County and Suburbs

COUNCIL AND SCHOOL BOARD HAVE LONG TALK

Looks as Tho All Would Be Well in North Toronto Yet—What of the Deer Park Switch?

NORTH TORONTO, June 12.—(Special.)—What looked at first like a stormy session of the town council and the high school board, but which later turned out to be only a round-table conference, anent high school matters, was held here to-night. Mayor Brown presided, and every member of the council was present, as well as the school board. The whole question of a continuation school and the methods which have hitherto been adopted to finance the institution came in for a certain amount of criticism, but no very definite decision was arrived at.

Failure on the part of those charged with the duty of collecting the county and government grant last year is largely responsible for the present trouble. Finally, Principal George H. Reid agreed to pay to the town the sum of $453 received from fees, and will himself take chances of securing the belated grants. A committee composed of Mayor Brown and Councillor Muston and the solicitor, together with Messrs. Brownlow and Barton, will see Deputy-Minister of Education Colquhoun in the near future, and see what can be done. There was some talk about the inspector's suggestion to acquire four acres for a school site when provision is only made for one acre.

The fact that the Deer Park switch is not included in the application of the Metropolitan Railway for an extension is looked upon as most significant by those directly in touch with the complicated and complex problem soon to come before the board. Why was not the Deer Park switch named as a part of the scheme? If any division of the road is likely to be congested, it is surely that part most adjacent to the terminal, and that the Yonge-street crossing of the C.P.R. The impression is general that the Metropolitan Railway do not wish to come in direct conflict with the city, and prefer to deal with the minor municipality in the hope that the suggested changes will slip thru without exciting any very great opposition. The public meeting of Saturday night is a fair indication of the temper which animates the citizens of North Toronto, and the railway company may find here just as effective and able opposition as with the larger municipality to the south. Whether the city will be represented even in a general way before the board at the approaching argument seems to be hard to find out.

WEST TORONTO.

WEST TORONTO, June 12.—(Special.)—Victoria Presbyterian Church held a large congregational social in the basement of the church to-night, the occasion being the commencement of a six-day campaign to raise $40,000 for a new church building. A committee composed of a hundred enthusiastic church workers were appointed and started to work to-night. The new building is to be used for a Sunday school chiefly, but will also contain rooms for all the organizations in connection with the church, including a fully equipped gymnasium with swimming baths, etc., and clubrooms for both men and women. The campaign was launched by two strong sermons preached at yesterday's services by the pastor, Rev. Dr. McKerfell.

The Orange lodges of West York will celebrate the Twelfth of July this year at Markham. A special train will leave the G.T.R. station at Weston early on the morning of the 12th, proceeding to Markham via the Union Station.

Courts Toronto Junction, Stevenson and Lakeview of the Independent Order of Foresters will hold their annual church parade, headed by the band of the British Welcome League, to Victoria Presbyterian Church next Sunday afternoon. Court Toronto Junction, No. 166, of the Canadian Order of Foresters, will hold their parade to the high Park-avenue Methodist Church in the morning. They will be headed by the Salvation Army Band, and will be accompanied by the officers and visitors from the High Court.

H. Marchmont of Osler-avenue is suffering from a severe shock received Saturday evening while working at Long Branch for the Interurban Electric Light Company.

MIMICO.

MIMICO, June 12.—H. McGee was elected president of the Mimico Lawn Bowling Club at the annual meeting of the organization. The other officers elected are: Vice-president, R. H. Skelton; secretary, William Black; treasurer, Dr. T. N. McGill; skips, Messrs. H. McGee, R. H. Skelton, W. J. Bowman, T. N. McGill, W. Inglis and W. Black; reception and entertainment committee, the president, secretary and Mr. H. Shepherd.

The opening games will be rolled on the green at Gilcooley Cottage (residence of H. McGee) on Wednesday evening of this week.

DOVERCOURT.

The annual popular excursion of Davenport-road Church takes place next Saturday, June 17, to Rosebank, River Rouge, 20 miles down the lake. A G. T. R. special will leave Davenport Station at 9 a.m., and a great crowd is expected. The Toronto Swimming Club will give an exhibition of aquatic sports during the afternoon. Tickets may be secured at the station.

YORK COUNTY COUNCIL.

The members of the York County Council met and adjourned yesterday, the majority of them going over to the Baseball game at the island. To-day they accompany Warden Bull on the time-honored trip to Niagara Falls, and Monday they are supposed to get down to business. One afternoon will be devoted to the annual jaunt up to the Industrial Home at Newmarket. No big questions are likely to come up for discussion, unless it is in connection with the good roads system, and this is pretty well all settled.

IT DELAYED TRAFFIC.

Belated reports of the severe electrical and rain storm, which swept over North York on Saturday and Sunday continue to arrive, and while they do not add very materially to the sum total of the damage they indicate the widespread nature of it. All day Monday the Metropolitan was seriously inconvenienced by the damage to the wires, and in some cases trees were blown across the lines, greatly delaying operations. The first thru car from Lake Simcoe only got to the city at 10.30 in the forenoon. A good deal of inconvenience was occasioned to local travelers on the line last night, the 6.30 car failing to make connections at all. A number of the county council came in during the forenoon from the outside points.

Time for Biscuit and Berries

When your think of strawberries or other fresh fruit think of

SHREDDED WHEAT BISCUIT

the cleanest, purest, most nutritious of all the cereal foods—combines most naturally with all kinds of acid fruits—better than the soggy white flour dough of ordinary short-cake and more easily digested. A Summer delight and a stomach joy for those who like good things to eat and who have to cut out heavy winter foods.

Heat a Shredded Wheat Biscuit in the oven to restore its crispness; then cover with strawberries, raspberries, or other berries and serve with milk or cream, adding sugar to suit the taste. A dish of Shredded Wheat with berries and cream is the bright spot in a dull day. It will keep the stomach sweet and clean and the bowels healthy and active. An ideal Summer food, ready-cooked, ready-to-serve. Your grocer sells it.

Two Shredded Wheat Biscuits with milk or cream and a little fresh fruit will supply all the energy needed for a half day's work or play.

STIRRING UP INTEREST IN CANADA'S HISTORY

Prizes for Essays One Method—Dominion Organization in Process of Making.

So important is the work being done by the Ontario Historical Society that prizes valued at $100, $60 and $40 are to be offered for the teachers of public, separate and high schools who contribute the most valuable essays and documents for preservation by the Historical Society of this province. Steps are also being taken to offer a fellowship in the Royal Society for the most original and interesting contribution to the provincial historical records.

The money prizes will be competed for only by teachers this year, but arrangements will be made whereby outsiders can be eligible in future. The annual meeting of the society, held at Brantford a few days ago, shows how it has been progressing, and President Williams is doing energetic work.

Progress towards the formation of a Dominion Historical Society, with added and more extensive fields for historical research has progressed so far that an incorporated body of people interested in this work have obtained a provincial charter and are working co-operatively but independently of the Provincial Historical Societies. The members of this independent society are from nearly every province of the Dominion, hence their efforts are bound to bring about important results. Whether an actual and fully recognized Dominion Society will grow out of this time alone will tell. At present, however, the Royal Society of Canada, which is supported by the government, is the organization, par excellence, in the collection of valuable historical records. Each provincial society is affiliated with the Royal Society, the latter being as it were the parent body, drawing a lot of its strength from the provincial societies of Ontario, Quebec, Nova Scotia, Manitoba and practically all the provinces.

More Attention to History.

Alexander Fraser, provincial archivist, thinks the Royal Society should in future devote more attention to history. "The wonderful growth of Canada in minerals, natural resources, etc., within the past ten years has naturally given these lines of research the precedent, but historical research should not be overlooked in future," he said.

"The Historical Manuscripts Commission of England has somewhat of a duplicate here in the committee on public documents, which, as a standing committee, is always in touch with the Dominion archivist as to what historical contributions should be published."

Mr. Fraser stated to The World yesterday afternoon that plans were under way to enlarge the sphere of activity of the Ontario Society in every possible manner. "The amount of valuable records we have already accumulated and are receiving every year is totally unknown, to the general public," said Mr. Fraser, "but there are lots of material in every locality if we only had the men to get it. What is done now has been done by men overburdened with the work on hand, consequently they have had no time to publish the facts and so the public don't know much about the work the society is doing."

There will ever be romance connected with the birth and growth of a nation and Canada should be specially favored in this regard with her interesting history and wonderful development.

The Provincial Historical Societies of the Dominion have done wonders in the past, and the provincial governments have provided liberal grants to encourage research in all branches and phases of the nation's growth. Valuable aid has also been rendered by such energetic local societies as the Canadian Institute, York Pioneers, U. E. Loyalists and the Women's Historical Society, all of which are working in co-operation with the Provincial Society. In the matter of valuable research work it is not inopportune to mention the Champlain Society, which under the presidency of Sir Edmund Walker is doing remarkable work. The membership of this society includes university men thruout the country and archivists from every province in Canada.

The Air is Germ-Laden

In the Springtime—Disease is Ready to Make You a Victim When the Blood is Thin.

Rich, Red Blood is the Greatest of Germicides—You Can Get the Blood Right by Using

Dr. Chase's Nerve Food

When the blood is rich and red, when it is largely composed of red corpuscles, there is little chance for disease germs. They cannot thrive in the system which is filled with good blood.

But in the spring the blood is generally thin, weak and watery. It lacks the vitalizing red corpuscles and you become an easy prey to the germs of disease which seem to lurk everywhere at this time of year.

You can fortify yourself against the germs of disease by using Dr. Chase's Nerve Food. This great restorative treatment forms new, red corpuscles in the blood, makes the blood rich, red and healthy.

Weakness, tired feelings, stomach derangements and disorders of the nervous system soon disappear when Dr. Chase's Nerve Food is used.

The medicine cures by the building up process, and for this reason its benefits are lasting. Nearly everybody needs something in the spring to enrich the blood and tone up the system, and it would be impossible to get a more satisfactory spring tonic than Dr. Chase's Nerve Food. 50c a box, 6 for $2.50, at all dealers, or Edmanson, Bates & Co., Limited, Toronto.

Electrical Workers Out.

Following out the orders of the International Brotherhood of Electrical Workers, 150 men of that body went out on strike promptly at 10 o'clock yesterday morning. Eighteen firms were interested in the talk of a strike which began some time ago, and 9 of them agreed to the raise of 40 cents an hour, asked for by the men. The remaining 9 refused to continue work at the old rate of 35 cents, and are prepared for a long sta yout. If necessary, those who were granted the increase will help those who are out.

Pipe Manufacturer Here.

L. Chapins Comoy, who is staying at the King Edward Hotel, is the president of H. Comoy & Co., the largest manufacturers of briar pipes in England, all of which are London made. It is Mr. Comoy's first visit to Toronto, and he thinks it is the most beautiful city he has visited.

C. O. F. Convention Opens.

The annual convention of the Canadian Order of Foresters meets this morning at the new Forester's building on College-street.

The proceedings will be somewhat of a private nature, commencing with the opening of the high court, the presentation of high court officers to the board and receiving of deputations.

YOUNG GIRL TOOK POISON

Sixteen Year Old Flossie Whitmore Was Disappointed in Love.

KINGSTON, June 12.—(Special.)—Disappointed in love, Miss Flossie Whitmore, aged 16, took a dose of bichloride of mercury and died in the General Hospital. On the evening of June 1 she was out walking with her sweetheart, and on arriving home told her sister that she was going to take poison. Her sister thought she was joking and paid no attention to her. The next morning she was terribly sick and then admitted what she had done. She was rushed to the hospital and lived until this morning.

A WOMAN'S BACK.

Not One Woman In Twenty Has a Stong Back.

The kidneys are to blame nine times out of ten.

Mrs. A. H. Hutton, Jr., McCreary, Man., writes:—"Two years ago last spring I had a very severe pain in the small of my back. When I would rise it seemed as if my back would break. My kidneys were very badly out of order, and I would have to get up three or four times during the night. I took one box of Doan's Kidney Pills and they effected a cure."

Doan's Kidney Pills are 50 cents per box or 3 for $1.25, at all dealers or mailed direct on receipt of price by the T. Milburn Co., Limited, Toronto, Ont.

If ordering direct specify "Doan's."

When the blood isn't properly filtered the poisons that ought to be carried off by the kidneys are sent back through the system, and it's hardly to be wondered that backaches and lame backs come to make life miserable.

Doan's Kidney Pills are a specific for all kidney troubles. They begin by expelling all the poisonous matter from the kidneys, and then heal the delicate membranes and make their action regular and natural.
