We sing the praises of the little store—that one at the head of the market, 'Twill be time enough to talk about the prestige of the large store when our own covers a block—for the present our eye is single to the advantages of the small store.

And it has its advantages.

Do you want a dress? And before you buy do you wish to see what is in the market? Don't go to the small store but to the large; the latter can show you ten pieces to the latter's one. To be sure you may be asked to pay a little more for the goods because you have been shown such a variety and because the firm must make up for the loss of goods that will never be paid for.

But some people don't mind paying for other people's parcels, and some people don't consider it an advantage to get a pattern free. Do you?

Athletic.

CHAMPION JEWETT.

Harry M. Jewett of Notre Dame University of Indiana, now holds the record for the running hop, step and jump, with a distance covered of 44ft. 8½in. This record excels by 3½ inches the one made by John H. Clausen of the Boston Athletic Association. Jewett is 20 years of age, 6 feet 1 inch tall, weighs 170 pounds, and his natural chest measure is 39½ inches. He has cleared 5ft. 10in. for the running high jump and 21ft. 4½ in. in the running broad jump. He can put a 16-pound shot 35ft. 8½in. and run 100 yards in 10 1-5s. Last May he joined the Detroit Athletic Club, and in June, he won the western championship 100-yards run, defeating John Owen, the champion of America, and he also won the running broad jump. On Aug 21, at Syracuse, he won the 100 yard run in 10 1-5s on a muddy track. He also won the running broad jump and putting the 16-pound shot. When he broke the record for the running hop, step and jump, the ground was so hard that it gave him a stone bruise on the foot he hops on. His hop in the record breaking was 17 feet. He says he is sure that he can make a record better than his present one on good grounds. He intends to take part in the 100 and 220 yards runs at the American champion. ship games at Washington, on Saturday Oct. 11.

Notes.

The St. John's annual games were postponed today on account of the unfavorable weather. They will probably be held tomorrow.

Frank White leaves this evening for Montreal where he will take part in the club sports of the Montreal association next Saturday, and in the Canadian championships on the succeeding Saturday.

Re-Building From the Ashes.

Another visit was this morning paid by the Press reporter to the scene of the late disastrous fire at A. Robb & Sons' foundry. Considerable headway has been made in the work of clearing away the debris and a strong force of men are still employed on that work. Our attention was attracted by the new building which we find to be about boarded in and the roof nearly covered. The firm has not even awaited the completion of the building, but has already a cupola in position and is about ready to put in the moulding sand for the moulders' floors, and we find that all the preparations are being made to commence casting in the new building next week. The I. C. R. auxiliary cars with its gang of men are also on hand clearing away the remains of the burnt cars, so that when the new machine tools which have been ordered by the firm arrive, they can be run right to the new building and put into position without difficulty. The pattern makers are also busy in the meantime getting out new patterns and repairing those partially destroyed, so that along with the stoves that were saved the firm will be enabled to meet all orders promptly. We notice they are shipping a number of their celebrated steel furnaces and as there will be no delay in their shipment we hope to learn that the already satisfactory trade in these will be even increased upon. A flat car was sent out of the yard yesterday with a boiler loaded on it for St. John, N. B., and the firm have a number of orders for boilers, upon which the men are working very busily. The firm have on hand several contracts for plumbing jobs, such as fitting up bath rooms, etc., etc., and we bespeak for them a larger business in the future, in this line, even than that which they have had in the past, as also their trade in beltings, packings, saws, steam fittings, and other supplies, a large stock of which they carry.
