SCIENCE AND PROGRESS.

Ball Bearings for Wagons—Investigation Shows That They Are Not Yet Economical.

Ball bearings are successful only when the balls themselves are of the highest quality, and the shells and axles are of the best steel, hardened and ground to the highest perfection, writes Professor Sweet in the Rural New Yorker. The limit of error in the best does not vary more than one-quarter of one-thousandth of an inch, or one-fourth the thickness of tissue paper. Such perfection is very costly, and the least dirt destroys the whole gain, for if the balls be stopped by any impediment, they are very soon ruined. Such accurate work is not likely to be properly protected or properly cared for in farm vehicles. Hence it is questionable whether the failures would not more than overbalance the advantages; besides, in the cost of drawing a load, a part is friction and a part is overcoming the ground resistance. The poorer the road the greater is the ground resistance, and this has a great bearing on the percentage of advantage; for supposing that, in the case of a trotting sulky, the friction is half the resistance and the ground resistance the other half. Now, if we reduce the friction one-half, the power required to draw the sulky would be reduced one-quarter, or 25 per cent., whereas if, in drawing a lumber wagon, the friction is ten per cent. and the ground resistance ninety per cent.—which on a farm and farm roads is about what it amounts to—then by reducing the friction one-half, we have reduced the actual power required only five per cent.

The time has not come when it will pay. It will be an infinitely better investment to use the same money to put wide tires on the wheels and cut off the forward axles so as to bring the forward wheels the width of the tires nearer together than the hind ones.

I have just been over a dirt road where one hundred tons of limestone are drawn every day, and the ruts were horrible when only common wagons were used. The road is now splendid, all owing to the use of half the number of wagons built as above described, while the ball bearings could at the best reduce the power required to draw farm wagons only from five to ten per cent. The wide tires and short axle wagons would reduce the cost of hauling on the farm roads forty to fifty per cent., and the cost of the changing to ball bearings would equal the cost of the new wheels and front or back axles.

HEAT FOR HOTEL GUESTS.

A Slot Machine to Supply Fire in Each Room.

The "penny-in-the-slot" system of gas supply is now being applied to gas stoves. A Liverpool hotel has had a penny-slot-in-the gas fire on trial in one of its bedrooms for about 12 months, and has now, we are told, decided to fit up the whole of its bedrooms in the same way, so that of the occupant of the room can have fire whenever he wishes by placing in the meter a number of pennies equal to the number of hours he wishes to have the fire burning.

TELEPHONE IN CHURCH.

You Can Sit in Your Parlor and Hear the Sermon.

Supporters of the telephone system in Birmingham can now be placed in communication with Christ Church in that city, and practically take part in the services. The telephone wires run straight into the pulpit, and the listeners at the other end of the system can hear the tolling of the bell, the prayers, the responses, the singing and the sermon. Even casual coughing among the congregation can be distinguished. There are many classes of persons on whom this new departure confers a great boon. The sick and bedridden, who have long been prevented from attending any place of worship, can now be present, if not in flesh, in the hearing.

SPRING MOTORS.

Some Inventors Claim It is the Ideal Power.

Although cable trams, steam trams and electric trams have been introduced with more or less success—generally more, as compared with horse-work—there are still inventors who appear to have an idea that spring motors will beat the others out of the field eventually. An inventor who has taken out several previous patents for motors with coiled springs, has recently patented in the United States a device to concentrate power from a number of springs, and transfer it to a power shaft, the springs being wound singly or collectively while the shaft is still or while it is in motion. Any number of springs in suitable drums may be ground around the drive shaft by the revolution of which all the springs in the group may be simultaneously wound up, and any number of grouping of drive shafts and springs may be employed, each shaft being in communication with a common power shaft. Great economy of space is said to be obtained by the improvement, and the friction is reduced to a minimum.

Business Embarrassments.

A meeting of the creditors of Withrow & Hillock was held yesterday afternoon at the office of Assignee A. A. Wright of the Victoria Harbor Lumber Company. No offer having been made, it was decided to wind up the estate. The inspectors appointed to look after the interests of the creditors are Messrs. John Donogh, Robert Laidlaw and B. Jennings of the Imperial Bank.

John Dawson, general store, Gelert, has assigned to W. A. Campbell. Liabilities $4000 and assets nominally the same.

Dr. J. B. Huff, Florence, writes: "I have great pleasure in testifying to the good effects which I have experienced from the use of Northrop & Lyman's Vegetable Discovery for Dyspepsia. For several years nearly all kinds of foods fermented on my stomach, so that after eating I had very distressing sensations, but from the time I commenced the use of the Vegetable Discovery I obtained relief."

Stoves and Ranges.

Do you often go home and find dinner not ready and the good woman all out of sorts and ready to jump on the first one who says a word, and you wonder how cross she is getting, and what is the cause of it. Well, it is nothing but a bad cook stove that is causing it. And you will save money by throwing it out in the yard and getting one of those Favorite Ranges and Stoves. One dollar per week buys one at

STOCKS ARE VERY STRONG

WALL-STREET SECURITIES CLOSED AT HIGHEST PRICES.

Another Advance in Sterling Exchange—The Local Produce Markets Are Dull and Prices Heavy—Cables Firmer for Wheat, But Prices at Chicago Closed Lower—Cotton is Stronger.

Friday Evening, Oct. 5.

Canadian securities were active to-day and very firm.

Consols closed weak at 101 3-8 for money and account after a strong opening.

Another advance is reported in sterling exchange at New York, and local rates are firmer in sympathy.

The Bank of England lost a large amount of bullion this week, and the proportion of reserve to liability is now 68.10 per cent, as against 70.66 a week ago.

In London American securities were active and higher to-day. St. Paul closed at 63 5-8, Erie at 15, Reading at 9 1-2, N.Y.C. at 103 1 2 and C.P.R. at 67.

A CAR OF SALT

that will sell well is the one you want. Dealers who have tried one car of Windsor Salt order others. Suppose you try one.

TORONTO SALT WORKS,
128 ADELAIDE EAST.

Money Markets.

At Toronto call loans are quoted at 4 to 4 1-2 per cent. The rate in New York is unchanged at 1, and in London at 1-4 per cent. The Bank of England discount rate is unchanged at 2, and the open market rate 9-16 per cent.

STOCKS AND BONDS.

MUNICIPAL DEBENTURES for sale at prices to yield from 4 to 5 per cent., suitable for Trustees or for deposit with DOMINION Government Insurance Department. SCOTCH money to invest in large blocks at 5 per cent.

Tips From Wall-Street.

The market closed strong.

L. & N. earnings for fourth week of September decreased $34,000.

Canmack is said to have covered a good deal of Quincy and St. Paul.

Henry A. King & Co's special wire from Ladenburg, Thalman & Co., New York: The market presents the appearance of having a further decided buying support in various portions of the list. The bears have not been inactive, but their only impression was made in Louisville, which declined a little in the morning. Sugar was under support from the pool and was advanced and then allowed to work off a little. The proceedings in Chicago Gas were of a similar character, though the stock appears to be in receipt of assistance from its old friends in the market. The whole list met with a temporary check towards noon on the announcement that a municipal bond house of some prominence had been placed in the hands of a receiver. The people in question have, however, no connection with the speculative market and their trouble will be confined to their own circles. The market consequently disregarded this and also paid no attention to the advance in Exchange rates. The Grangers were especially strong in the last hour or so, covering and buying by the traders, giving a very bullish tone to the market. Sugar and Gas were inactive, but firm in the final transactions and the general list holds its advance though very little life was shown in the trading.

Commercial Miscellany.

Cash wheat at Chicago 51 1-4c to 51 3-8c.

Puts on December wheat 53 3-8c; calls 54 1-8c.

Puts on May corn 50 1-2c; calls 51 1-2c.

At Toledo clover seed closed at $5.15 for November.

Cattle receipts at Chicago to-day 9000, including 1000 Texans and 4000 Westerns.

Car receipts of grain at Chicago today: Wheat 44, corn 69, oats 150. Estimated for Saturday: Wheat 73, corn 110, oats 136.

Estimated receipts of hogs at Chicago to-day 16,000, official Thursday 27,529, left over 10,000. Market slow and generally 5c lower. Heavy shippers, $4.60 to $5.60. Estimated for Saturday 10,000.

Receipts of wheat at Liverpool the past three days were 232,000 centals, including 80,000 centals of American.

Exports at New York to-day: Flour 1120 barrels and 9763 sacks, wheat 8202 bushels.

Primary receipts of wheat in the West to-day 745,000 bushels and shipments 400,000 bushels.

Schwartz, Dupee & Co., Chicago, wired Dixon: Wheat opened strong, was weak and strong by turns several times during the session, but finally closed at the bottom. Exports small, about 200,000 bushels. On the other hand, primary receipts were small. There was a little winter wheat sold to Milwaukee, 400,000 bushels. Cables up a fraction. That started prices off strong. It was altogether a matter of local speculation during the session, and when the local crowd were covered the price turned weak. This liquidation of short interest was one reason why the close was at the bottom, at about the "put" price. It takes a great deal of trade to hold prices after they are up, and there was not much trade going. There was a round lot of cash corn sold at Peoria.

Samson, Kennedy & Co.

TORONTO,

Have just completed an Extensive Purchase of

Pure All-Wool Gray Flannels

Having cleared out the Entire Stock of a Well-Known Mill at Prices Much Below the Cost of Production.

Attention is also directed to a BIG LINE OF FLANNELETTES at Prices Defying Competition.

Write for Samples.

44, 46 and 48 Scott-street, 15, 17 and 19 Colborne-street and 25 Old Change, London, Eng.

That bulled the October to a premium over May, and made the May very strong for a while, but there was a lot of corn offering to arrive, without much demand, and the seaboard market acted weak. About the only strength remaining at the close was in October, which showed a gain over last night of half a cent. December and May were back to about Thursday's last figures.

MANNING ARCADE.

Henry A. King & Co.'s special wire from Logan & Co., Chicago: Wheat opened firm; heavy local selling caused a decline, but on a report of the death of the Czar of Russia the market gained all it had lost, and advanced a good half cent. All this was lost at the close. The principal cause for the decline was the selling out of a big lot of December, bought this morning by a local operator at about 54 cents. We want to see it go up, and think it will with this big feeding demand. The question is, when?

Provisions opened steady, with some outside buying. Packers and local bear element helped the decline by pressure, which brought out some stop orders. Later on the market was favorably influenced by grain markets, and advanced easily under good buying by early sellers.

CONGER COAL CO., LTD.

"IT'S AN ILL WIND"

That blows nobody good." When other dealers reduced their price of Coal to what we were then selling at, it was our business—if we were disposed—to make still lower reductions. That's exactly what we did—and the public are the gainers.

Our Price for HARD COAL A1 Quality, is $4.75 PER TON
DELIVERED IN BAGS WITHOUT EXTRA CHARGE.

WM. McGILL & CO.

KOAL.

Our celebrated Lehigh Valley Coal has not GONE UP, but it HAS GONE OUT very fast, and if the price does not go up soon there will be none left to GO OUT. Get your share of it while it is going, as there is nothing in the market equal to it, and the miners say they won't mine any more to be sold at $5.00.

GRATEFUL—COMFORTING.
EPPS'S COCOA
BREAKFAST—SUPPER.
"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame.—Civil Service Gazette.
Made simply with boiling water or milk. Sold only in packets by grocers, labeled thus:
